East German T-V referred to the rampage as a- quote- ''great danger'' to the country's young democracy.

Today's activity overshadowed an announcement that former communist leader Erich Honecker will be investigated for high treason and actions hostile to the constitution.

Italian police in Bologna say bandits used an explosive charge to blow a hole in the internal wall of a post office and steal several hundred thousand dollars today.

Authorities say 44 people were injured in the blast.

The Bologna police chief says three bandits rushed into the post office this morning and fired two pistol shots into the ceiling. They ordered 18 employees and about 70 customers to lie on the floor while they blew a hole in a wall to the cashier's office.

The bank was filled with elderly pensioners collecting their monthly checks.

Police say the robbers escaped with several money bags in two stolen cars which were later found abandoned. One bank cashier said- ''The scene that met my eyes after the explosion was devastating.''

Hospital officials say most of the injuries are minor, but one man did have his foot amputated. Doctors say another man is in serious condition with a large wooden splinter in his leg.

#90015u2774 01/15/1990 ~United Press International
(JAN. 15) UPI - Americans nationwide are marking Martin Luther King Day

by remembering the slain civil rights leader's dream for racial harmony with parades, tributes, and the tolling of church bells.

Schools, banks, and government offices are closed for the nation's newest holiday, declared in 1986. And for the first time, the holiday falls on King's actual birthday. He would have been 61 years old today.

Civil rights leaders honored King at a religious service in Atlanta. They gathered in Ebenezer Baptist Church, where King once preached with his father.

The Reverend Joseph Lowery... president of the Southern Christian Leadership Conference... used the service to urge President Bush to push for education, housing and jobs for poor and working class Americans. Lowery was awarded this year's Martin Luther King Junior Peace Award.

King's widow, Coretta Scott King, said- ''The events of last year have clearly shown now is the time to organize a global NON-violent movement.'' She apparently was referring to recent violence directed at civil rights groups.

She called on nations and people to join together, despite their differences, in a ''commonwealth of caring and concern.''

After nearly one year in hiding because of Moslem threats, British author Salman Rushdie gave his first interview today.

In a telephone conversation from a secret location, Rushdie told a London newspaper he wishes those trying to kill him would read the book they regard as blasphemous.

The 42-year-old author of ''The Satanic Verses'' referred to the last 11 months he has spent in hiding and said he hopes it will come to an end. Rushdie said if those who protest the book so vehemently would read it- in his words- ''They would see it is NOT UNsympathetic to them.''

Moslem fundamentalists object to the novel's suggestion that the Koran was written by the prophet Mohammed, and is NOT God's word.

Last Valentine's Day, the late Iranian spiritual leader Ayatollah Khomeini sentenced Rushdie to death over the book.

#90015u2952 01/15/1990 ~United Press International

(JAN. 15) UPI - The reform process sweeping through Eastern Europe has hit a snag in East Germany. Thousands of demonstrators- fed up with how long it's taking to disband the secret police- took matters in their own

hands today and stormedheadquarters of the once feared Stasi. State-run television said the action threatened stability.

Amnesty International says more than 56-thousand Vietnamese boat people crammed into detention camps in Hong Kong are NOT properly protected from assault and injury at the hands of authorities. The London-based human rights group says most asylum seekers do NOT know their legal rights.

Military chiefs from 35 countries on both sides of the Iron Curtain have gathered in Vienna for unorthodox talks aimed at resolving military problems between the East and West. The informal talks, billed as a seminar on ''confidence and security-building measures'' in Europe,'' begin tomorrow.

President Bush has declared Florida a major disaster area following a severe winter freeze that began December 23rd. The announcement clears the way for federal aid to farm communities that suffered losses from the cold snap.

In El Salvador, the doctor of former Salvadoran President Jose Napoleon Duarte says Duarte is in very ''critical condition'' with broncho-pneumonia. The former president suffers from terminal cancer.

Authorities in Costa Rica say a plane carrying 22 people on a domestic flight crashed in a mountainous region this morning, 20 miles southeast of San Jose. The fate of those on board is NOT yet known.

The British government is defending the shooting deaths of three UNarmed robbers by security forces in Northern Ireland Saturday. A British official says the soldiers believed they were in danger.

Angola denies that one of its jetfighters bombed northern Namibia during operations against U-S-backed guerrillas. The Namibian government is protesting yesterday's incident, calling it a ''serious violation'' of its airspace.

-30- 2177

#90015u3431 01/15/1990 ~United Press International

(JAN. 15) UPI - Today brought more triumph and turmoil to Eastern Europe. Moscow declared a state of emergency in the Azerbaijan republic where ethnic strife has left more than 30 dead. In Bulgaria, the Communist Party's right to dominate the government was abolished. And in East Germany, thousands of protesters stormed the headquarters of the secret police.

West German Foreign Minister Genscher says he'll urge the European Community to provide Romania with emergency aid. Genscher says he and his

French counterpart, Roland Dumas, will press for a strong commitment of support from the E-C at a special meeting of foreign ministers in Dublin Saturday. Genscher and Dumas visited Bucharest last week.

In Phoenix, thousands of demonstrators gathered at Wesley Bolin Plaza today to sing and cheer in honor of the late Martin Luther King Junior, even though the state holiday was canceled. Today would have been Arizona'a first official paid holiday in memory of the slain civil rights leader. Last fall's legislation creating the holiday was put on hold by a referendum petition drive that will force the issue to be put to a public vote next November.

A Bush administration official confirms that National Security Adviser Brent Scowcroft is pushing for a mutual U-S-Soviet ban on mobile land-based missiles carrying multiple warheads. Scowcroft wants the proposal on the table when Secretary of State Baker and Soviet Foreign Minister Shevardnadze meet in Moscow early next month. But officials say Defense Secretary Cheney has ''a difference of opinion'' with Scowcroft... and President Bush reportedly is leaning in Cheney's direction.

-30- 1823

#90015u3469 01/15/1990 ~United Press International

(JAN. 15) UPI - The liberal Economic Policy Institute refutes claims by the Bush administration that the American educational system is well funded. The E-P-I study says the United States spends a smaller percentage of its national wealth on educating students in pre-school through 12th grade than Japan, West Germany and many other industrial countries. Administration officials say the report's statistical methods are flawed.

Pro-life advocates in Pennsylvania say the state's new abortion law will have little impact when it goes into effect tomorrow because of a tempory injunction against its key provisions. A federal judge last week put a hold on requirements that women notify their spouses before obtaining an abortion... and wait 24 hours before undergoing the procedure. The judge also blocked provisions in the nation's toughest abortion law requiring clinics to follow certain informed consent procedures.

Researchers conducting a new study of males ages 15 to 34 found high cholesterol levels were linked to an early sign of atherosclerosis ... or lesions in blood vessel walls. The preliminary results provide new evidence supporting low-fat diets for children as a way to prevent heart disease and heart attacks later in life. The new findings were presented at a heart association meeting San Antonio, Texas.

A nationwide survey released in New York today says the art of being caring and considerate is held in higher esteem than simply having a pretty face. The survey of one-thousand adults finds 78 percent of those

polled prefer a caring person while 11 percent say an attractive face turns them on. Four percent of those surveyed say power and influence is at the top of their list.

-30- 1891

#90015u3665 01/15/1990 ~United Press International

(JAN. 15) UPI - A-T-and-T officials say computer experts are working to fix a nationwide computer software problem that's snarling the company's long-distance service. The problem was first noticed when callers began receiving recorded messages, saying the country's largest network was overloaded. A company spokesman says the scope of the problem is unclear... explaining he was NOT able to call out of New York City to other A-T-and-T offices around the nation.

Portions of the Soviet Azerbaijan republic are under a state of emergency following three days of ethnic violence between Christian Armenians and Moslem Azerbaijanis that has left more than 30 people dead. The official Tass news agency reports Moscow has given regional authorities permission to set up check points, confiscate all weapons, ban rallies and enforce tighter control of the mass media.

Thousands of East Germans displayed their contempt for the dreaded secret police today by storming the organization's East Berlin headquarters. East German television says the protesters ignored appeals to refrain from violence and hurled furniture through windows. East Germany's prime minister fueled the outburst by announcing last week he was forming a new secret police... a plan he has since dropped.

A SkyWest Airlines turboprop with 16 people aboard crashed in northeastern Nevada today. Authorities say 14 people were injured, but none seriously. The plane... en route from Salt Lake City to Reno... was attempting to land in Elko during a moderate snowstorm when it went down on a mountain ridge. The passengers and crew were plucked from the crash site by helicopter.

-30- 1816

#90015u3676 01/15/1990 ~United Press International

(JAN. 15) UPI - The Red Cross and aviation officials in Costa Rica say a plane carrying 22 people crashed in a rugged mountain area today. Rescue teams headed to the crash site, but the fate of the crew and passengers was NOT immediately known. The plane belonged to a subsidiary of Costa Rican Airlines and disappeared from radar in a mountain range dividing the country's central area from the south.

Three former Colombian presidents launched a plan today to end the campaign of violence employed by the drug cartels. The Roman Catholic

Church and the country's major leftist political group are joining the former leaders in asking the powerful cocaine cartels to free kidnapping victims and to stop sending drugs abroad. The peace initiative has NOT been officially endorsed but is expected to wield considerable political weight.

In Boston, minority activists used today's Martin Luther King Junior holiday to highlight a growing racial dispute about the wrongful implication of a black man in the death of a pregnant white woman. The Boston Boycott Committee is urging a seven-day boycott of the city's two major newspapers to protest the media's handling of the slaying of Carol Stuart.

Althea Wetherbee competed in yesterday's Houston Marathon and ran the 26-mile, 385-yard course in four hours, 59 minutes and seven seconds. Her son covered the same distance in about five-point-four seconds. Hold onto your sneakers, folks. Her son is James Wetherbee, co-pilot of shuttle Columbia, who shot over the course with his space ship tooling along at 17-thousand miles an hour. Despite the astronaut's advantage, marathon officials today awarded him an honorary completion certificate.

-30- 1876

#90015u3789 01/15/1990 ~United Press International

(JAN. 15) UPI - The nation remember's Martin Luther King Junior on his birthday... that story and other top news from around the world and across the nation, from the wires of United Press International.

Martin Luther King's birthday was remembered across the nation today with parades, tributes and church services paying homage to a man who worked for peace and racial harmony. The nation's newest holiday, established in 1986, saw schools, banks, and government offices closed.

This year, for the first time, the holiday falls on King's actual birthday. He would have been 61 today.

In Atlanta, civil rights leaders gathered for a special service in the Ebenezer Baptist Church where King preached with his father. King's widow, Coretta Scott King, said the time had come for political and religious groups to put aside their differences and unite in a ''commonwealth of caring and concern.'' 400-thousand people lined Peachtree Street for a nationally televised parade following the service.

Democratic National Chairman Ron Brown, the first black to lead a national political party, commented- ''The birthday of Martin Luther King is a day for all Americans to pause and remember one who gave his life for the American ideal.''

But the holiday remains controversial. More than 15-thousand people rallied in Phoenix to protest the lack of a state holiday in King's honor. The issue will be put before the voters in a referendum next November. The day also is NOT recognized by Montana, Idaho, and New Hampshire.

-30- 1696

#90015u3805 01/15/1990 ~United Press International

(JAN. 15) UPI - More jolting headlines streamed across Eastern Europe today.

From Moscow, a state of emergency was declared for parts of the southern republic of Azerbaijan. The Soviet parliament took action following after a three-day, anti-Armenian rampage in the capital left more than 30 people dead.

In Lithuania, Communist Party leader Algirdas Brazauskas was selected president of the Baltic republic after declaring his party independent of Moscow. He replaces the Soviet-backed Vytautas Astrauskas, who abruptly resigned.

In Bulgaria, the National Assembly approved constitutional changes abolishing ed the Communist Party's 43-year-old monopoly on power.. a move that opened the road to free elections.

In East Berlin, an estimated 10-thousand demonstrators stormed the East Berlin headquarters of the hated secret police. The protresters hurled furniture from the windows and hung a skeleton outside the building with a slogan defying a revival of secret police.

In Prague, the Soviet Union and Czechoslovakia began talks on the proposed withdrawal of 80-thousand Red Army troops deployed in the country since the 1968 Warsaw Pact invasion. The Czechs want the troops out by the end of the year.

-30- 1386

#90015u3824 01/15/1990 ~United Press International

(JAN. 15) UPI - The Roman Catholic Church and the major leftist political coalition today joined three former presidents of Colombia in launching a peace initiative.

The proposal is designed to end Colombia's war with the powerful cocaine cartels.

A gang known as the ''The Extraditables'' has been at war with the nation since August and is responsible for a spate of recent kidnappings and a string of assassinations. The kidnapping victims include the son of a

powerful member of the administration of President Barco .

''The Extraditables'' were formed after the government began extraditing suspected cocaine traffickers to the United States.

The initiative was NOT officially sanctioned by the Barco government, but it's expected to carry political weight because it was endorsed by the church and former presidents, including two from the ruling Liberal Party.

The peace overture comes as the governments of Colombia, Peru and Bolivia prepare for an anti-drug summit with President Bush February 15th in Colombia.

An administration official says national security adviser Brent Scowcroft is in favor of a bilateral U-S Soviet ban on mobile land-based missiles carrying multiple warheads. But, the official says Scowcroft is encountering opposition from Defense Secretary Cheney.

The source adds that Scowcroft wants the United States to present the weapons reduction proposal to the Soviets when Secretary of State Baker and Foreign Minister Shevardnadze meet in Moscow early next month.

Cheney reportedly has what's termed a ''difference of opinion'' with Scowcroft, and there are some indications that President Bush is leaning toward Cheney. But the source says NO decision has been made yet.

A Washington newspaper reports Scowcroft's proposal ''has attracted support from key congressional leaders.''

-30- 2015

#90015u3879 01/15/1990 ~United Press International

(JAN. 15) UPI - A study released in Washington today says the United States spends less of its national wealth educating students from pre-school through the 12th grade than Japan, West Germany and many other industrial countries.

The liberal Economic Policy Institute compared the percentage of the total value of goods and services... the G-N-P... spent on education in 16 countries.

The institute used U-N and Education Department statistics and found its results contradict Bush administration claims that the American educational system is well-funded.

The study says the United States comes in second when comparing public and private spending on all levels of education. But, when spending on pre-school through 12th grade was analyzed, the United States tied for

12th.

Sweden emerged first, followed by Austria and Switzerland.

Administration officials say the study is flawed. Charles Kolb, undersecretary of education, says the report is ''irrelevant'' because it uses the G-N-P. Kolb says the United States spends more per student than any other nation except Switzerland.

The author of the best-selling 1969 book ''The Peter Principle'' is dead at age 70.

The wife of Laurence Peter was quoted as saying her husband died in his sleep in Los Angeles Friday. He suffered a stroke two years ago.

Peter's runaway best-seller theorized- quoting here- ''In a hierarchy, individuals tend to rise to their level of incompetence.''

According to the author, if you do your job satisfactorily, you will be promoted until you reach a job you cannot do and you will remain there ''bungling the job and eroding the competence of society.''

The satirical work by Peter, a psychologist and professor of education, sold more than eight-Million copies.

Peter wrote ''The Peter Principle'' with free-lance writer Raymond Hull. But 13 publishers rejected the manuscript several years before it hit the market... which, in effect, supports book's central point.

But the Peter Principle did NOT apply to the author. The book earned Peter enough to retire in 1970 to devote all of his time to exploring ways to improve teaching.

#90015u3934 01/15/1990 ~United Press International

(JAN. 15) UPI - Americans marked the 61st anniversary of Martin Luther King Junior's birthday with parades, rallies and tolling bells. In Atlanta... the native city of the slain civil rights leader... 400-thousand people lined Peachtree Street for a nationally broadcast parade in his honor.

A-T-and-T officials now say about half of all long-distance calls are going through... following a computer problem that disrupted service nationwide, beginning this afternoon. Computer specialists are working to fix the software problem, but officials say it's unclear when full service will be restored.

Parts of the Soviet republics of Azerbaijan and Armenia are under a state of emergency. Today's action by the Soviet parliament follows three days of ethnic violence that has left more than 30 people dead. More troops have been sent to the area.

Several thousand East Germans stormed the East Berlin headquarters of the secret police today in an hour-long rampage. Outside, 100-thousand other protesters called for a quicker dismantling of the state security police.

Searchers on foot and in trucks continue to comb a mountainous area near San Jose, Costa Rica, where wreckage from a missing twin-engine plane has been sighted. Officials say they don't know if any of the 22 people aboard survived the crash.

Federal aviation inspectors have been sent to the scene of today's crash of a SkyWest Airlines turboprop near Elko, Nevada. 14 of the 16 people aboard the plane were injured when it crashed while trying to land during a snowstorm.

-30- 1721

#90015u3952 01/15/1990 ~United Press International

(JAN. 15) UPI - NASA says it'll let the shuttle Columbia astronauts sleep an extra 30 minutes tonight, in recognition of the hard work they put in to finish today's chores. The crew was awakened ahead of schedule early today by a false alarm from a navigational aid.

Nicaraguan President Ortega says there's evidence the U-S-backed opposition, known as UNO, will withdraw from next month's elections to cast doubt on the proceedings. But an UNO spokesman says that is- quote- ''just more of Ortega's nonsense.''

Authorities in Bologna, Italy, say 44 people were injured today when bandits blasted a hole in a post office wall and stole several hundred-thousand dollars. Police think one bandit may've been injured in the blast.

Five people were injured and about 100 more evacuated from their homes in Michigan City, Indiana, today after railroad workers discovered a fire in a boxcar carrying a powdery chemical. The evacuees were allowed to return home late this afternoon.

Officials at the Springfield, Missouri, Municipal Zoo say eight animals worth an estimated 10-thousand dollars were found dead this morning after dogs broke into the zoo during the night. Three more animals are in serious condition.

A Pennsylvania veterinarian is in fair condition at a Pittsburgh hospital

after being attacked early today by a crazed 200-pound chimpanzee. The animal bit off the vet's left ear and part of his hand before being shot to death by his owner and police.

#90015u4084 01/15/1990 ~United Press International

(JAN. 15) UPI - In Savannah, Georgia, today, N-double-A-C-P executive director Benjamin Hooks said Martin Luther King Junior was- in his words- ''a gifted prophet.'' Hooks says King's followers must NOT be swayed in their fight for racial justice by- quote- ''wild, demented and stupid people.'' Hooks addressed about 15-hundred people at the Martin Luther King Junior Arena.

Try to make a long-distance phone call tonight and you may hear- ''All circuits are busy now. Please try later.'' Problems with a nationwide computer software system have disrupted A-T-and-T's long-distance service. An A-T-and-T spokeswoman says service was interrupted early this afternoon... but by early evening, officials said half the calls were going through.

Soviet television says at least 34 people have died in the republics of Armenia and Azerbaijan following three days of ethnic fighting. The Soviet parliament imposed a state of emergency today and ordered more troops to the area. The decision comes hours after Soviet Prime Minister Ryzhkov warned military force would be used to prevent civil war between Christian Armenians and Moslem Azerbaijanis.

Costa Rican officials say rugged, heavily forested terrain is hampering efforts to reach the wreckage of a plane that crashed this morning with 23 people aboard, 20 miles southwest of San Jose. Officials don't know if anyone survived the impact. They say those aboard included a two-year-old girl and passengers from the United States, Canada, Panama and Sweden.

-30- 1686

#90015u4090 01/15/1990 ~United Press International

(JAN. 15) UPI - El Salvador's President Alfredo Cristiani was scheduled to discuss the U-N's role in peace talks between the Salvadoran government and leftist rebels. But he postponed his visit to U-N headquarters today... amid speculation that he feared a military coup. Sources close to Cristiani say he only delayed the visit because U-N Secretary General Perez de Cuellar is in Moscow.

Much of the Midwest is enjoying a record mid-winter thaw as parts of California dig out from a weekend storm that dumped five inches of snow on the western state. The snowstorm is moving inland to the mountains of Arizona and Colorado. Showers continue to drench the Pacific Northwest and

part of California, with the northern wine country getting nearly two inches of rain.

A nine-year-old boy watched in horror today as his father shot his mother to death outside a Christian school in San Francisco. Police say after the intitial burst of gunfire, Joseph Charan dragged his wife across the school lawn and shot her again before killing himself. Charan faced wife beating charges and had been ordered by a judge to stay away from his wife.

#90016b0003 01/16/1990 ~Business Wire

LAKEWOOD, CO (JAN. 16) BUSINESS WIRE - Capital Associates Inc. (NASDAQ:CAII), a major leasing, financial service and asset management company, Tuesday reported that for the second quarter ending Nov. 30, 1989, it had increased its revenue and earnings from the immediate prior quarter.

The company's earnings per share for the second quarter of fiscal 1990 of 4 cents represents an increase from the 2 cents of earning per share reported for the first quarter of fiscal 1990.

Revenue for the second quarter increased to $44.4 million, up 34 percent from the same period a year ago. Net income declined to $0.4 million compared to $1.8 million for the second quarter of fiscal 1989.

Revenue for the six month period ended Nov. 30, 1989 increased to $81 million, up 33 percent from the same period a year ago. Net income for the six month period declined to $0.5 million compared to $2.6 million in fiscal 1989.

Jack Durliat, president and chief operating officer, stated: ''Increased competition in our markets, the cost to consolidate several of our operations into Colorado, accounting changes required under FASB TB 88-1 that spread income over extended periods for certain equipment sales to investors, reduced revenue from equipment remarketing, and higher than acceptable general and administrative costs have each contributed to the disappointing results.

''The company has recently implemented measures that will increase its yield on leases, lower its general and administrative cost, increased remarketing activities, and reduce the volume of equipment sales that defer income under FASB TB 88-1. The 1990 second quarter results show improvements from the first quarter of 1990 through reduced expense growth and new leases having higher average implicit lease rates.''

Capital Associates Inc. is the second largest independent computer leasing company in the United States. The company, which has arranged more than $1.7 billion of asset financing for its Fortune 1000-stature customers,

currently employs over 235 people throughout its 20 offices and subsidiaries nationwide.

#90016b0005 01/16/1990 ~Business Wire

COLUMBUS, OH (JAN. 16) BUSINESS WIRE - Acting at the request of both the LTV Steel Co. and the United Steelworkers of America, Attorney General Anthony J. Celebrezze Jr. Tuesday filed a "friend of the court" brief with the United States Supreme Court, seeking to protect the operation of the company's pension plans for thousands of LTV retirees.

The action came as a result of two lower court decisions against a move by the federal Pension Benefit Guaranty Corp. (PBGC), which tried to override the negotiated pension agreement between LTV Steel and the United Steelworkers of America.

Despite losing its case twice, the PBGC continues to argue that the pension plans which existed prior to LTV's bankruptcy filing in July, 1986 be "restored," a move which potentially could threaten the recovery of LTV Steel and the financial future for its employees and retirees.

"That possibility can't be allowed to happen," Attorney General Celebrezze said. "Too much effort has been made by too many people to put LTV Steel back on firm ground while providing fair and equitable pensions for loyal retirees. By defending this negotiated agreement in the courts, we will protect that progress."

After LTV Steel declared bankruptcy, the company and the union entered into collective bargaining negotiations to discuss the company's pension plan obligations. Six months of difficult negotiations resulted in an agreement - limited to the duration of the company's reorganization under Chapter 11 bankruptcy terms - which saved the company an estimated $50 million per year.

For its part, the company agreed to several new programs designed to replace some of the retiree and employee benefits which had been lost due to the earlier termination of LTV Steel's pension plans.

Almost immediately, the PBGC sought to stop this good faith agreement between the company and its employees, arguing that the original pension plans should be "restored." However, the two lower federal courts both

agreed that the PBGC failed to follow the law requiring it to "accurately determine whether a business can in fact bear the cost of a restored plan."

In its brief, Ohio argues that this analysis also is imperative to protect "the legitimate interest of the states within whose border the companies, the employees, retirees, and creditors reside."

Attorney General Celebrezze explained, "This agency didn't take into account fundamental federal bankruptcy and labor law policies when it tried to halt this agreement. That is particularly disturbing in this case as the company and its employees are fighting to stay competitive in a very tough and demanding business.

#90016b0010 01/16/1990 ~Business Wire

EVERETT, WA (JAN. 16) BUSINESS WIRE - John Fluke Mfg. Co. Inc. (ASE:FKM) Tuesday reported growth in earnings per share of 26 percent on essentially unchanged sales and net income for its first quarter of fiscal 1990, ended Dec. 29, 1989.

Net income of $3.5 million was equal to 49 cents per share on approximately 7.1 million shares and share equivalents outstanding. This compares with the same level of net income which equaled 39 cents per share on approximately 8.9 million shares and share equivalents outstanding for the same quarter of last year.

Revenues for the quarter totaled $57.9 million vs. $58.6 million a year ago.

Orders during the period totaled $53.3 million, up some 5 percent from last year's first quarter orders of $50.9 million. Orders from U.S. customers, at $32 million, were essentially flat with the prior year. European orders increased 7 percent from $9.7 million in last year's first quarter to $10.3 million this year. Orders from other international customers continued their healthy growth, climbing 18 percent from $9.3 million last year to $10.9 million in this year's first quarter.

Although Fluke's Asian business opportunities look strong in coming quarters, and modest growth in Europe is likely, defense spending retrenchment and sluggish commercial buying in the United States creates uncertainty about overall sales growth this fiscal year. In light of this uncertainty, the company will continue to manage its expenses conservatively and point its product development and marketing programs toward prime opportunities. With this discipline, the company sees

positive prospects for earnings per share growth through the year.

John Fluke Mfg. Co. Inc. is a leading supplier of electronic instrumentation and services that improve the productivity of technical users engaged in research, service, design, manufacturing and calibration. Fluke focuses on customers who are manufacturers and users of electronic and electrical equipment in defense and aerospace, government agencies, computers and peripherals, electronic instrumentation, communications, utilities, automotive, and consumer electronics.

Founded in 1948 and headquartered in Everett, Fluke employs more than 2,300 people and had sales of $247.7 million in its most recent fiscal year, ended Sept. 29, 1989.

#90016b0016 01/16/1990 ~Business Wire
KANSAS CITY, MO (JAN. 16) BUSINESS WIRE - BHA Group Inc. (NASDAQ:BHAG) Tuesday announced unaudited operating results for the three months ended Dec. 31, 1989.

Net earnings for the first quarter increased 13 percent to $860,000, or 13 cents per share, compared to $763,000, or 15 cents per share, for the same period in 1988.

Net sales for the three months ended Dec. 31, 1989, increased 17 percent to $14,933,000 from $12,718,000 for the first quarter of 1989.

Commenting on the results, Michael T. Zak, president and chief executive officer, said: ''The first quarter reflected the impact of consolidating the operations of the three acquisitions that were made by our PrecipTech subsidiary during the last 12 months, including Midwest Power Corp. which occurred in October.

BHA Group Inc. manufactures and supplies replacement parts and accessories and provides installation and other services for air pollution control equipment worldwide.

#90016b0020 01/16/1990 ~Business Wire
CAMARILLO, Calif.(JAN. 16) BUSINESS WIRE - Vitesse Semiconductor Corp. on

Tuesday announced that John C. (''Jack'') Lewis has joined the board of directors of the company.

Lewis is chairman and chief executive officer of Amdahl Corp., Sunnyvale. ''I'm very happy to serve on the Vitesse board and be part of an organization that is made up of very talented and motivated people,'' said Lewis. ''Vitesse is creating an exciting new market in high-performance VLSI circuitry through innovative gallium arsenide technology.''

Lewis joined Amdahl as its president in 1977. He became chief executive officer in 1983 and was appointed chairman of the board in 1987.

He came to Amdahl from Xerox Corp., which had recruited him in 1970 to assist with its marketing efforts. He was appointed vice president of marketing for Xerox Data Systems in 1973, became president of that organization in 1974 and was named president of Xerox Business Systems in 1976.

He began his corporate career as a salesman for IBM's Service Bureau Corp. (SBC) in 1960, following a three-year tour of duty as an officer in the U.S. Navy. He quickly became SBC's top salesman and was promoted to sales manager for the Los Angeles area and then to branch manager of the Southern California area. When he left IBM in 1970, he was responsible for SBC product planning.

''We are very pleased to add someone of Jack Lewis' reputation and experience to the Vitesse board,'' said Lou Tomasetta, president and chief executive officer of Vitesse. ''Mr. Lewis brings to Vitesse a wealth of knowledge of the high-performance computer business.''

Lewis holds a bachelor's degree in accounting from California State University at Fresno.

In addition to being chairman of Amdahl's board of directors, he is on the advisory board at Santa Clara University's graduate school of business, and serves on the board of directors of the American Electronics Association, the California Chamber of Commerce and the Santa Clara County Manufacturers Association.

He is a member of the American Business Conference and the U.S. National Committee for Pacific Economic Cooperation. Lewis has also served as general campaign director and chairman of the board of trustees of the United Way of Santa Clara County.

With annual sales in excess of $2 billion, Amdahl is a major supplier of powerful mainframe computers, data storage subsystems and data communications products. Amdahl also develops systems software and provides educational and consulting services.

Vitesse Semiconductor Corp. was founded in 1984 to develop, manufacture and market cost-effective digital gallium arsenide circuits for the high-performance electronics marketplace. The company has focused its efforts to date on the development of high-performance GaAs ICs incorporating proven silicon manufacturing techniques in the process.

Its product family of GaAs ICs available to commercial and military customers includes gate arrays, RAMs and logic products. Vitesse is now the leading supplier of digital VLSI GaAs integrated circuits. The company has headquarters in Camarillo, 40 miles north of Los Angeles. -0-

#90016b0023 01/16/1990 ~Business Wire

DENVER (JAN. 16) BUSINESS WIRE - U.S. Gold Corp. (NASDAQ:USGL) Tuesday announced record gold production for 1989 of 32,870 ounces compared to 20,008 ounces in 1988.

''We are pleased with our 64 percent increase in gold production and are anticipating our sixth straight year of profitability,'' said William W. Reid, president of U.S. Gold Corp.

The conventional oxide portion of U.S. Gold's new mill at Tonkin Springs has been undergoing start-up over the past two months. While several problems typical of new mill start-up have been encountered they have been substantially corrected and the oxide portion of the plant has demonstrated its ability to achieve the 1,500 ton per day design rate.

During this period the mill produced approximately 1,800 ounces of gold from limited oxide ore.

''The bio-oxidation pre-treatment step of the new mill is now undergoing its start-up. We expect the commissioning of this portion of the mill to take between two and three months and consequently do not expect significant gold production during this period,'' said William Reid. ''However, the oxide heap leach operation at Tonkin Springs will continue limited gold production.''

Reid said the company's borrowings and short term obligations have significantly increased due to the higher than anticipated construction costs and slow start-up at Tonkin Springs.

The previously announced sale of the company's 29.3 percent interest in the Dee mine closed on Dec. 29, 1989, effective Oct. 31, 1989. ''Proceeds of $4.07 million were substantially used to repay bank borrowings,'' Reid said. The company is continuing to evaluate its various options of reducing debt including possible joint venture or sale of additional assets.

U.S. Gold Corp. is a Denver-based gold mining company with producing mines in Nevada and gold properties in other western states. The company is listed on the NASDAQ National Market.

LOS ANGELES (JAN. 16) BUSINESS WIRE - Magnetek Inc. (NYSE:MAG), a leading manufacturer of electrical equipment, Tuesday announced the results of the company's fiscal 1990 second quarter and first half, which ended Dec. 31, 1989.

Revenues for the quarter were $250,021,000, compared with $229,586,000 in the second quarter of fiscal 1989. Net income was $5,925,000, or 25 cents per share, up from $2,396,000, or 9 cents per share, in the comparable period in 1989.

Revenues for the first half of fiscal 1990 totaled $487,661,000 against $456,798,000 last year. Net income for the six months amounted to $11,186,000, or 46 cents per share, up 84 percent from $6,021,000, or 25 cents per share, in 1989.

Commenting on the results, MagneTek President Frank Perna Jr. cited improvements in sales, profits, profit margins and new order bookings. ''As anticipated, we are experiencing our highest rate of growth in engineered products and utility services,'' Perna noted.

''We believe that the nation's utilities and the physical infrastructure in general are entering a prolonged period of modernization, and we are participating in that process,'' Perna said. MagneTek is currently awaiting Justice Department approval of its acquisition of ABB Electric, Waukesha, Wis., the leading U.S. builder of medium power transformers for the electric power industry.

''Overall, we are looking forward to our fifth consecutive year of record sales and profits,'' Perna concluded.

Founded in 1984, MagneTek manufactures lighting ballasts, transformers,

motors, generators, drives and controls, and provides electrical equipment repair and rebuilding services to utilities and industrial customers.

The company operates 50 manufacturing and service facilities throughout North America and overseas, and employs some 14,000 associates. Listed on the New York Stock Exchange (symbol:MAG), MagneTek recorded sales of $962 million for its fiscal year ended June 30, 1989.

#90016b0031 01/16/1990 ~Business Wire

DENVER (JAN. 16) BUSINESS WIRE - Communications World International Inc. (NASDAQ:CWIIA) Tuesday announced results for its first quarter ended Oct. 31, 1989.

The company reported increased net income of $55,660, or less than one cent per share, on revenue of $634,126 for the quarter compared to net income of $45,925, or less than one cent per share, on revenue of $1,000,641 for the comparable quarter a year ago. Systemwide sales, which are total product and service sales by all 61 Communications World outlets nationwide, were $3.3 million for the quarter.

The increased profitability occurred despite the expected decrease in revenue resulting from the temporary inavailability of product from one of the company's major suppliers, Toshiba America Information Systems (TAIS).

This unavailability is linked to a U.S. Commerce Department imposition of tariffs on the imports of certain foreign manufacturers. TAIS has responded with a decision to manufacture products in the United States and management believes product availability will increase in the near future.

''In anticipation of decreased revenue during this period, we instituted strict cost control measures that enabled the company to remain profitable '' said H. David Hunt, chairman of the board of Communications World.

''We believe the effect of the TAIS situation will be a pent-up demand among our customers resulting in significant revenue increases once product shipments resume.''

Communications World outlets market state-of-the-art telephone systems and other communications products to small and medium size businesses and provide their customers with ongoing service and support. The company is the largest publicly held franchisor of interconnect companies in the United States with 61 locations serving more than 20,000 customers in 26 cities across the country.

#90016b0037 01/16/1990 ~Business Wire

SAN FRANCISCO (JAN. 16) BUSINESS WIRE - Wells Fargo (NYSE: WFC) Tuesday reported that fourth quarter 1989 earnings per share were $2.95, an increase of 20 percent from $2.45 per share in the fourth quarter of 1988.

Earnings per share were $11.02 for the year 1989, compared with $9.20 a year earlier.

Net income in the fourth quarter of 1989 totaled $158.5 million, an increase of 17 percent from $136.0 million in the fourth quarter of 1988. Net income was $601.1 million for the year 1989, compared with $512.5 million a year earlier.

Return on average assets (ROA) was 1.29 percent and return on average common equity (ROE) was 24.77 percent in the fourth quarter of 1989, compared with 1.19 percent and 23.97 percent, respectively, a year ago. ROA was 1.26 percent and ROE was 24.49 percent in 1989, up from 1.14 percent and 23.99 percent, respectively, in 1988.

Earnings in the fourth quarter and for the year 1989 benefited from increased net interest income, which primarily resulted from an increase in domestic loans. The company's net interest margin was 5.20 percent in the fourth quarter of 1989, compared with 5.29 percent a year ago. For 1989, the company's net interest margin was 5.11 percent, compared with 4.96 percent in 1988.

Net interest income on a taxable-equivalent basis was $568.8 million in the fourth quarter of 1989, compared with $538.1 million a year ago. It was $2.2 billion in 1989, compared with $2.0 billion in 1988.

Noninterest income in the fourth quarter of 1989 was $189.8 million, compared with $163.7 million in the fourth quarter of 1988. It was $778.7 million in 1989, up from $682.2 million in 1988.

Noninterest expense was $409.6 million in the fourth quarter of 1989, compared with $381.8 million a year ago. Noninterest expense totaled $1.6 billion in 1989, compared with $1.5 billion in 1988.

The provision for loan losses in the fourth quarter of 1989 was $80 million compared with $75 million in the fourth quarter of 1988. The full year 1989 provision was $362 million, compared with $300 million in 1988. Domestic net charge-offs were $42.3 million, or .41 percent of average

domestic loans, for the fourth quarter of 1989 and $175.9 million, or .45 percent of average domestic loans, for the full year 1989. At Dec. 31, 1989, the allowance for loan losses equaled 1.77 percent of total loans.

At Dec. 31, 1989, the company had no medium- and long-term cross-border outstandings to developing countries, as the remaining outstandings of $245 million were eliminated in the first quarter of 1989 through loan sales and charge-offs.

At Dec. 31, 1989, total nonaccrual and restructured loans and other real estate (ORE) amounted to $1.154 billion, or 2.7 percent of total loans and ORE. The entire amount was attributable to the domestic portfolio. At Dec. 31, 1988 total nonaccrual and restructured loans and ORE amounted to $1.028 billion, or 2.7 percent of total loans and ORE, of which $924.4 million was attributable to the domestic portfolio.

At Dec. 31, 1989, common equity to total assets was 5.04 percent, compared with 4.66 percent at Dec. 31, 1988; primary capital was 8.19 percent, compared with 8.05 percent; and total capital was 11.81 percent, compared with 12.09 percent.

#90016b0041 01/16/1990 ~Business Wire

REDWOOD CITY, CA (JAN. 16) BUSINESS WIRE - Network Equipment Technologies Inc. Tuesday announced that the IDNX/10 Integrated Access Multiplexer has met compatibility standards for use with AT&T's T1 and fractional T1 services.

The IDNX/10 has complied with interface specifications in Technical Publications 62411, 54016 and 54019B, and is therefore compatible with ACCUNET T1.5 Service, Extended Superframe Format (ESF), and ACCUNET Spectrum of Digital Services -- Intermediate Bit Rates (ASDS-IBR), commonly referred to as fractional T1 (FT1). Tests were conducted at the AT&T test facility in Holmdale, N.J.

The DSO-channelized network interface on the IDNX/10 makes it fully compliant with digital cross-connect systems and carrier-based services, such as AT&T Megacom/800 and SDN, MCI Prism, and US Sprint VPN and Ultra WATS.

The IDNX/10 is an integrated-access multiplexer that can access services provided by both the public network and a private IDNX network. It supports direct analog voice interfaces, digital PBX interfaces, a variety of high-speed and low-speed data interfaces, and complete system

redundancy. The IDNX/10 comes with an integral modem and integral CSU that supports D3/D4 or ESF framing.

''Our N.E.T. clients find that the IDNX/10 is ideal for supporting analog voice and sub-rate data multiplexing applications at remote, low-density access sites, such as branch banks or retail outlets,'' said Mark Elderkin IDNX/10 product manager.

''The IDNX/10 architecture also offers flexible migration to support emerging high-speed data applications and direct digital PBX connectivity without having to swap out or add new equipment -- capabilities not found in intelligent channel banks.''

The IDNX/10 is completely integrated into the IDNX network management system and can be controlled from any IDNX node in the network.

N.E.T. develops, manufactures, markets and supports advanced communications products and services that enable large, information-intensive organizations to build and manage wide-area networks. These networks interconnect computer and communications devices among geographically dispersed locations, enabling organizations to utilize their information systems to competitive and economic advantage.

#90016b0042 01/16/1990 ~Business Wire

LOS ANGELES (JAN. 16) BUSINESS WIRE - Security Pacific Corporation (NYSE: SPC) today reported record earnings for 1989 of $740.6 million, up 16 percent from the $638.9 million earned in 1988. Earnings per common share were $6.26, up 12 percent from the $5.59 per common share reported in the prior year.

For the fourth quarter, the Corporation reported net income of $191.7 million, up 13 percent from the $169.5 million earned in the fourth quarter of 1988. On a per common share basis, earnings were $1.59, an increase of 9 percent from the $1.46 reported for the same period last year.

For the fourth quarter, fully taxable equivalent net interest income was $816.6 million, up $69.7 million, or 9 percent from the year-ago quarter which included $58 million of Brazilian interest payments. Excluding the Brazilian interest from the year-ago quarter, net interest income in the current quarter was 19 percent higher. This adjusted increase reflected both a 10 percent growth in earning assets and an improved net interest

margin. The current quarter net interest margin of 4.33 percent was above both the year-ago fourth quarter margin of 4.15 percent and the 1989 third quarter margin of 3.91 percent.

The 1989 fourth quarter margin benefited by approximately 10 basis points from a one-time reduction in the negative impact from non-performing credits. In addition, relative to the third quarter, the fourth quarter margin benefited from a higher proportion of funding from lower cost core deposits, and a reduction in lower rate other earning assets. Domestic loans increased 17 percent between fourth quarters. Permanent real estate loans increased 31 percent, primarily in the 1-4 family residential category, while consumer loans increased 18 percent.

Domestic business loans increased 11 percent, while lease financing was 9 percent higher. There was a slight increase in international loans, though non-trade related developing country loans continued to decrease. Lower rate other earning assets declined 19 percent, primarily in the federal funds sold and due from banks-interest bearing categories. For the year, net interest income was up 11 percent primarily due to higher earning asset levels from a year ago.

#90016b0044 01/16/1990 ~Business Wire

INDIANAPOLIS (JAN. 16) BUSINESS WIRE - INB Financial Corp. (NASDAQ:INBF) Tuesday reported record net income of $59,109,000 for 1989, an increase of 5.9 percent over the 1988 figure of $55,826,000. Earnings per share, fully diluted, increased to $3.36 from $3.19 per share for 1988.

As a result of the record 1989 earnings, the board of directors declared a one-time extra dividend of 25 cents per share payable Feb. 16, 1990, to shareholders of record Feb. 2, 1990. The board of directors also declared a regular quarterly cash dividend of 30 cents per share payable March 23, 1990, to shareholders of record March 2, 1990.

Thomas M. Miller, chairman of INB Financial Corp., said, ''The extra dividend recognizes the record earnings of 1989 and the corporation's strong capital position.'' Miller attributed the excellent performance to growth in net interest income and non-interest income. Miller also noted that return on average assets was 1.05 percent for 1989.

Record fourth quarter net income totaled $15,587,000, or 89 cents per share, fully diluted, compared to $15,147,000, or 87 cents per share, fully diluted, for the same period in 1988.

In 1989 net interest income on a fully taxable equivalent basis totaled $218.0 million for 1989, an increase of 6.1 percent or $12.5 million over the prior year.

Net interest margin was 4.33 percent for 1989 vs. 4.43 percent for 1988. Both net interest income and net interest margin were reduced by the securitization of $75 million of credit card loans in November 1988 and an additional $75 million in July 1989; however, non-interest income increased due to the continued servicing of these accounts. Excluding the impact of the credit card securitizations, net interest margin would have been 4.45 percent for 1989.

Non-interest income increased 16.9 percent, or $14.1 million, and totaled $97.7 million for 1989. Credit card fees increased $6.6 million, primarily due to the securitizations, while trust fees and commissions increased 10.0 percent or $2.0 million. Investment securities gains were $1.4 million in 1989 vs. gains totaling $273,000 in 1988.

Non-interest expense for 1989 totaled $184.9 million compared to $172.6 million for 1988, an increase of $12.3 million or 7.1 percent. This increase was due in part to additional banking centers in expanded market areas and the purchase of insurance agencies in 1988.

Non-performing assets decreased to $52.8 million on Dec. 31, 1989, compared to $55.3 million on both Sept. 30, 1989, and year-end 1988. Non-performing assets as a percent of loans and other real estate owned were 1.35 percent on Dec. 31, 1989, vs. 1.44 percent on both Sept. 30, 1989, and Dec. 31, 1988.

Reserves as a percent of non-performing loans were 116.6 percent at year-end 1989, 105.1 percent on Sept. 30, 1989, and 104.4 percent one year ago. Accruing loans past due 90 days or more totaled $14.3 million on Dec. 31, 1989, $12.9 million on Sept. 30, 1989, and $9.4 million at year-end 1988.

The allowance for credit losses totaled $58.6 million or 1.50 percent of loans on Dec. 31, 1989, compared to $55.1 million or 1.44 percent of loans on Sept. 30, 1989, and $54.0 million, or 1.41 percent of loans on Dec. 31, 1988.

Net charge-offs totaled $5.7 million for the 1989 fourth quarter vs. $8.1 million for the like period last year.

Total assets exceeded $6 billion and totaled $6.01 billion on Dec. 31, 1989, compared to $5.93 billion on the same date in 1988.

Loans totaled $3.90 billion on Dec. 31, 1989, compared to $3.84 billion a year ago.

Deposits increased to $4.57 billion on Dec. 31, 1989, compared to $4.30 billion on the same date in 1988.

Shareholders' equity totaled $434.6 million on Dec. 31, 1989, up $41.5 million from the Dec. 31, 1988, total of $393.1 million.

#90016b0047 01/16/1990 ~Business Wire

SUNNYVALE, CA (JAN. 16) BUSINESS WIRE - Sales in Advanced Micro Devices' fourth quarter increased by 15 percent over the same period a year ago, as the company reported revenues of $285,255,000 and net income of $11,822,000.

After the preferred stock dividend, quarterly income amounted to $0.11 per share. Due to a calendar anomaly, the fourth quarter of 1989 was a 14-week quarter.

Sales in the fourth quarter of 1988 were $248,055,000 with a net loss of $34,104,000, or $0.46 per share after the preferred dividend. Last year's fourth-quarter results included an unusual charge of $17,260,000 associated with a workforce reduction, closure of a manufacturing facility and other restructuring actions.

For the fiscal year, which ended December 31, 1989, the company reported sales of $1,104,606,000, down slightly from the previous year, and net income of $46,052,000. Net income amounted to $0.44 per share after preferred stock dividends. For the prior year, AMD reported sales of $1,125,855,000 and net income of $19,316,000, or $0.11 per share after preferred stock dividends.

Sales increased by just under 4 percent from the immediate- prior quarter during which the company reported revenues of $274,847,000 and net income of $12,086,000 before the preferred stock dividend, which resulted in earnings of $0.12 per common share after the dividend.

Our progress in CMOS continues as we more than doubled CMOS revenues year-to-year in the final quarter of 1989. Fourth- quarter CMOS revenues reached a record 26 percent of total sales,'' Sanders continued.

#90016b0069 01/16/1990 ~Business Wire

FULLERTON, CA (JAN. 16) BUSINESS WIRE - Ropak Corp. (NASDAQ:ROPK) Tuesday increased its interest in Ropak Laboratories, formerly known as National Testing Corp., to one-third of that company's outstanding stock from the 20 percent interest it has held since February 1989.

Ropak paid $500,000 in cash for the approximately 13 percent interest acquired Tuesday.

The closely held Ropak Laboratories, with headquarters in Irvine, produces patented test kits to measure the irritancy potential to human eyes and skin of certain pharmaceuticals, cosmetics and household chemicals. Tests using this methodology offer an alternative to the use of live rabbits in the assessment of product safety.

The EYTEX (TM) and SKINTEX (TM) kits provide more accurate, consistent and reproducible results, and can be performed in a fraction of the time required for animal testing.

The company's products and testing services are used by numerous large consumer-products companies and are being exclusively marketed internationally by Ropak Corp. Market potential, in kit form, for these two products is judged as exceeding $500 million annually.

Ropak Laboratories' use of proceeds is directed at gearing up for the greater demand for its products and services.

Ropak Corp. is a leading multinational maker of plastic packaging and handling products for foods, coatings and a variety of agricultural and industrial materials. The company has 10 plants in the United States,

Canada and Japan.

#90016b0075 01/16/1990 ~Business Wire

EL SEGUNDO, CA (JAN. 16) BUSINESS WIRE - Rockwell International Corp. (NYSE:ROK) Tuesday reported net income for its first fiscal 1990 quarter, ended Dec. 31, 1989, of $145.8 million, or 59 cents per share, compared to last year's first quarter net income of $160 million, or 62 cents per share.

Sales and operating earnings from the company's ongoing businesses in the fiscal 1990 first quarter of $2.9 billion and $289.1 million, respectively were about the same as last year's first quarter.

Donald R. Beall, chairman and chief executive officer, said: ''Our first quarter earnings benefited from the improved performance of our Electronics businesses which had a 27 percent earnings improvement over last year's first quarter. In addition, our stock repurchase program, which is an important part of our strategy to enhance stockholder values, increased the quarter's earnings per share.''

Beall added, ''Based on our current assessment of the economy, our outlook for fiscal 1990 is for earnings per share to be about the same as 1989 before the 40 cents per share gain from the sale of a business.''

In this year's first quarter, the substantial Electronics earnings increase primarily resulted from improved volume and profitability in each of the commercial Electronics businesses -- Avionics, Allen-Bradley Industrial Automation and Telecommunications.

Aerospace first-quarter earnings were about the same as the prior-year quarter reflecting continued strong contributions by the company's Space Systems units.

Automotive's fiscal 1990 first-quarter earnings were down substantially, as expected, principally due to reduced truck volumes, competitive pricing pressures and continuing new product development and start-up costs.

A gain on the sale of property in the first quarter a year ago caused earnings of the company's Graphics business to be lower in this year's first quarter.

The current year's quarter was also adversely affected by lower interest income and higher interest expense, which together reduced earnings by

five cents per share as compared to the first quarter of last year. Significantly lower cash balances related to a substantial December 1988 income tax payment primarily affected interest income and expense.

The company's backlog was $15.6 billion on Dec. 31, 1989, an increase of 24 percent from the fiscal year-end backlog of $12.6 billion. The increase is primarily the result of additional awards on space programs. The backlog includes $3.7 billion of commercial orders, $5.6 billion of funded government orders and $6.3 billion of unfunded government orders.

Rockwell International is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses.

SCOTTSDALE, AZ (JAN. 16) BUSINESS WIRE - DataMag Inc. (NASDAQ:DMAG), a manufacturer of quarter-inch data cartridges and other magnetic media storage products, announced that the Farm Bureau Insurance Co. of West Des Moines, Iowa, has advanced $1 million to DataMag in consideration of a 12 percent convertible debenture.

The debt, as well as $850,000 in convertible debt placed earlier, is secured by the common stock in DataMag's quarter-inch cartridge subsidiary DataMag of Michigan Inc. The term of the debt is two years. The Farm Bureau has the option to convert the debt into DataMag common stock at 75 cents per share during the term of the note.

The company also announced the results of operations for the year ended Sept. 30, 1989, and for the last quarter. Sales for the year were $2,495,738 compared to $1,795,439 in the prior year. The net loss for 1989 was $3,825,890 (85 cents per share) compared with a loss of $1,784,280 (47 cents per share) for the year ended Sept. 30, 1988.

Quarter results were sales of $613,477 for the current quarter compared to $390,788 for the fourth quarter of the prior year. The company posted a net loss of $1,708,827 (28 cents per shaer) for the current quarter compared to a loss of $461,609 (12 cents per share) in the prior year.

#90016b0077 01/16/1990 ~Business Wire

CHICAGO (JAN. 16) BUSINESS WIRE - Ameritech Tuesday announced it will begin a series of tests to determine the most efficient and cost-effective means for bringing the benefits of fiber optic technology to residential customers.

Testing will begin this spring when Ameritech Services will team with Ohio Bell to install optical fiber cable to serve a new housing development near Columbus, Ohio.

''Our objective in conducting trials with various suppliers is to develop a system that is cost-effective for existing telephone services and can be upgraded to accommodate advanced voice, data and video communications services,'' said Joel Engel, assistant vice president of Science and Technology, Ameritech Services. Ameritech Services is the planning company for the five Ameritech Bell companies.

Optical fiber has long been recognized as a superior transmission medium because of its reliability and low maintenance costs. Ameritech currently has more than 226,000 miles of fiber optic cable installed in high-traffic routes such as the connections between the company's switching centers.

However, the cost of using fiber optics in the local loop -- the portion of the telephone network that connects Ameritech Bell company switching centers to customers' homes and offices -- has been too high to justify widespread installation.

The Columbus trial will test a fiber optic distribution system manufactured by Raynet, a subsidiary of Raychem Corp., Menlo Park, Calif. Trials of different technologies provided by other manufacturers will be announced in selected locations in the Ameritech region throughout 1990.

''The testing of this new fiber optic technology is part of Ameritech's ongoing effort to find ways to bring the benefits of fiber optics closer to the customer at costs that are competitive with traditional copper wire-based technology,'' said William J. Schlageter, vice president of Network Services at Ohio Bell.

''This also will allow us to continue to provide basic telephone service at affordable prices, while we explore future opportunities involving advanced communications services,'' he said.

The trial of Raynet's system will be unique in that Ohio Bell will install fiber to the curbside terminal, known as the ''pedestal,'' where copper telephone cables will be dispersed to individual customers. The Raynet system in the Ameritech trial is expected to reduce costs because it shares electronics and uses less fiber cable than other proposed systems.

Ameritech is the Chicago-based parent of Bell companies serving Illinois, Indiana, Michigan, Ohio and Wisconsin, and of several other information industry companies providing cellular communications, voice messaging, directories, audiotex services and lease financing. Its 1988 revenues were $9.9 billion.

SANTA MONICA, CA (JAN. 16) BUSINESS WIRE - Replica Inc. (OTC), a biomedical company, announced it has completed the acquisition of all the rights to a drugs-of-abuse diagnostic test product line.

The test kits are used to screen human urine for levels indicating abuse of specific drugs. Presently, four test kits are being produced and marketed. They are for cocaine and metabolites (including ''crack''), cannabinoids (marijuana), benzodiazepines (Valium- and Librium-type drugs) and barbiturates. These unique test kits all have FDA clearance and allow for inexpensive testing with immediate results and high accuracy.

These (immunoassay) kits utilize proprietary technology in a non-radioactive 96 microtiter plate format. This technology allows for safe and cost-effective testing without investing in major capital laboratory equipment. Primary users of these kits are hospitals, and commercial and forensic laboratories that need to determine if drugs have been abused.

In recent years, testing for abuse of drugs has expanded to include testing of government employees, prisoners and parolees, pre-employment screening and life insurance applicants. The U.S. military is the largest single user of drug abuse tests.

Replica purchased all worldwide rights to this product line from G.D. Marketing Corp. and Genetic Diagnostics Corp. for an undisclosed amount of cash, stock and future royalty payments.

Replica, a publicly traded company, specializes in developing reagents, vaccines and diagnostic kits. The company has headquarters in Santa Monica, with laboratories in Tustin and Vista.

#90016b0085 01/16/1990 ~Business Wire

DENVER (JAN. 16) BUSINESS WIRE - First Bank System Inc. Tuesday announced the election of David A. Baumgarten as president of the Central Banks of Colorado and chief executive officer of Central Bank Denver N.A.

Baumgarten succeeds Robert A. Krane who resigned in December.

In other board action, Thomas C. Stokes was elected executive vice president of Central Banks of Colorado and president of Central Bank Denver reporting to Baumgarten.

In addition, he will be responsible for the Metro Denver Central Banks. In this position, Stokes will be responsible for retail and trust businesses in the entire metropolitan Denver market.

Baumgarten will continue to direct the management of Corporate Banking. Baumgarten continues as a member of the Central Banks board and Stokes has been elected to the board.

Baumgarten has most recently served as executive vice president and head of Corporate Banking for Central Bank Denver, a position he has held since October 1988. He joined FBS in 1979 and has held a number of positions within the corporate lending area. Prior to joining Central Bank, he served as senior vice president and head of Specialized Industries for First Bank Minneapolis.

Stokes has 33 years of banking experience in the Colorado area and has most recently served as senior vice president of Central Bank's trust division. Prior to that time he served as president of the Belcaro Bank in Denver. He previously served as senior executive vice president of the United Bank of Denver.

Baumgarten is a graduate of the University of Wisconsin and holds bachelor's and master's degrees in finance. He currently serves on the board of the Denver Metro Convention and Visitors Bureau and as a member of the Colorado Concern committee.

Baumgarten also participated on the task force for the 1989 Denver Chamber of Commerce Membership Drive.

Stokes holds a bachelor of science degree in business and finance from the University of Colorado. His outside activities include serving as a board member of the Metropolitan YMCA, the Performing Arts Center Foundation, and the Public Education Coalition.

#90016b0090 01/16/1990 ~Business Wire

INDIANAPOLIS (JAN. 16) BUSINESS WIRE - Merchants National Corp. (NASDAQ: MCHN) Tuesday announced annual and fourth quarter earnings for the period ended Dec. 31, 1989.

Net income for the year was $41.4 million, or $2.82 per share, compared to $44.1 million, or $3.05 per share in 1988. Net income for the fourth quarter of 1989 was $3.4 million, or 23 cents per share, vs. $11.2 million or 77 cents per share, earned in the fourth quarter of 1988.

The results for 1989 reflect an additional $15 million provision for credit losses taken in the fourth quarter, stemming from the disposal of the corporation's remaining LDC (Lesser Developed Country) loan portfolio. With the exception of Mexico, which was written down to market value, all remaining LDC loans have been charged off or will be sold.

Total assets at Dec. 31, 1989, were $5.6 billion compared to $5.3 billion at the like time last year, an increase of six percent. Net loans at Dec. 31 were $3.5 billion, up 18 percent from $2.9 billion a year ago. Deposits at year end were $4.1 billion, up ten percent from $3.8 billion at the like date last year.

Merchants National Corp., an Indiana multibank holding company headquartered in Indianapolis, is the second largest publicly held bank holding company in the state. A network of 17 subsidiary banks with 139 banking locations serves the banking and financial needs of customers in Indiana and contiguous states.

The corporation, through its subsidiaries, offers a broad range of commercial, retail, and mortgage banking services as well as trust and investment services.

Additionally, under a contract with the U.S. Department of Defense, the corporation's lead bank, Merchants National Bank & Trust Co. of Indianapolis, provides retail banking services to military servicemen through 156 military banking facilities in West Germany, Netherlands,

Greece, United Kingdom, and Iceland.

In the first quarter of 1990, Merchants will assume the operation of an additional 25 military banking facilities in the Phillipines, Diego Garcia, and Republic of Korea.

#90016b0104 01/16/1990 ~Business Wire

BEVERLY HILLS, CA (JAN. 16) BUSINESS WIRE - Hilton Hotels Corp. was awarded $7.5 million by a Maryland jury, which found that a hotel owner had breached a 20-year management contract with Hilton.

The jury decision, entered in the United States District Court for the

District of Maryland, validated Hilton's contention that its 20-year contract for the management of the Greenbelt hotel was fully binding on the hotel's owners. The award represents Hilton's fees for the balance of the contract term.

Representing the first occassion on which Hilton has ever withdrawn from a management contract without a mutually acceptable termination, the company ceased management of the hotel in late June 1988 after threats by the owners to terminate the agreement. Hilton then filed its complaint with the District Court on July 6, 1988. The judgement order was entered by the court on Dec. 29, 1989.

''This is the first lawsuit of its kind filed by Hilton against a hotel owner,'' said Carl T. Mottek, president of Hilton Hotels Division. ''We have demonstrated that we expect others -- not just Hilton -- to live up to agreements.''

The management agreement was signed in January 1984 by Hilton and both Lerner Enterprises and Albert H. Small -- the general partners of Springhill Lake Hotel Limited Partnership -- to manage a hotel in Greenbelt, Md. Under the terms of the agreement, Springhill was obligated to pay Hilton a management fee for 20 years.

The Greenbelt Hilton opened to the public in the fall of 1985. In September 1987, Springhill sent Hilton a letter in which it purported to notify Hilton that the management agreement had been breached and indicated that the letter was to serve as notice of default under the agreement. In June 1988, Springhill informed Hilton that it would soon proceed with new management of the hotel, demanding that Hilton cease operation of the property as of June 30.

Hilton Hotels Corp. is a publicly owned international lodging company with 265 properties in the United States. In all, more than 94,000 rooms in 220 U.S. cities are operated under the Hilton name. The company's growing overseas subsidiary, Conrad Hotels, operates properties in Queensland, Australia; St. Martin in the Caribbean; Dublin, London and Monte Carlo. Additional Conrad hotels will open in Hong Kong and Cancun by the end of 1990.

LOS ANGELES (JAN. 16) BUSINESS WIRE - Richard J. Flamson III, chairman of the board and chief executive officer of Security Pacific Corp., (NYSE: SPC) announced that Robert H. Smith, formerly president and chief executive

officer of Security Pacific Bank, will succeed him as chief executive officer of the parent Security Pacific Corp. effective Tuesday, Jan. 16.

Flamson, who is 60, said he would continue to serve as chairman of the board, with Smith, who is 54, becoming president and chief executive officer of Security Pacific Corp. and chairman of the board of Security Pacific National Bank.

Three other officers were also promoted to new positions Tuesday: Jerry A. Grundhofer, who was elected a director of both SPC and SPNB, will succeed Smith as president and chief executive officer of Security Pacific Bank; Vice Chairman John P. Singleton assumes the role of chief operating officer of SPC from George F. Moody, who has been president and chief operating officer of SPC and who will remain chairman of the Executive Committee; and Nicholas B. Binkley, who was promoted to president and chief operating officer of Security Pacific Financial Services System Inc.

Messrs. Grundhofer, Singleton, Binkley, and Vice Chairman David R. Lovejoy, head of the Security Pacific Merchant Bank, will join Messrs. Smith and William F. Ford, chairman and chief executive officer of the Financial Services System, as members of the Office of the Chief Executive, the senior policy and planning group for Security Pacific Corp. and its subsidiaries.

Messrs. Flamson and Moody will serve as ex-officio members of the Office, along with other key officers.

Commenting on his decision to step down as chief executive before reaching the company's retirement age of 65, Flamson said: "The Board, George Moody and I have been planning this transfer of management responsibility for some time. We all believe that Bob Smith and his team are well-equipped to provide the leadership needed for Security Pacific as we move into a new decade, which will, in our opinion, be a decade of remarkable change for financial institutions."

Flamson, who joined Security Pacific in 1955, was elected president and chief executive officer in October 1978, and chairman and chief executive officer in January 1981.

During his 11-year tenure as chief executive officer of SPC, the corporation has grown more than four-fold from its 1978 position as the 11th largest bank holding company in the United States with assets of $21.6 billion and stockholders' equity of $920 million to its current ranking as the 4th largest U.S. bank holding company with assets of $84 billion and stockholders' equity of $4.6 billion.

COSTA MESA, CA (JAN. 16) BUSINESS WIRE - Douglas W. Taylor has been named senior vice president and head of Bank of America's South Orange County Regional Commercial Banking Office, it was announced by Michael E. Rossi, executive vice president and statewide head of the Commercial Banking Division.

Taylor, who brings 21 years of banking expertise to his new Orange County post, will be responsible for a commercial banking office which serves Orange County's upper middle market business customers whose annual sales are up to $250 million a year.

Prior to this appointment, Taylor was senior vice president and head of the Los Angeles Corporate Office in the North America Division where he managed the bank's lending activities in the entertainment, media, health services, manufacturing-consumer products, and the airlines and aerospace industries.

"Doug's extensive credit bankground with many of the Fortune 1000 firms will be of great benefit to our upper middle market commercial clients throughout Orange County," Rossi noted. Taylor succeeds Wally Nielsen who was assigned to a newly formed commercial banking office in San Diego.

Taylor joined BofA's comprehensive management development program in 1968 and was named vice president and senior account officer in the San Francisco Corporate Office four years later.

In 1974, he was promoted to section manager in the New York Corporate Office and in 1978 was named country manager of the bank's activities in Taiwan and manager of the Taipei branch.

In 1982, Taylor was appointed group vice president and head of the Los Angeles Corporate Office. He was promoted to senior vice president in 1984.

ONTARIO, CA (JAN. 16) BUSINESS WIRE - Bank of America's board of directors has named Steve Silvestri a senior vice president. The announcement was made by Michael Rossi, executive vice president and head of the California Commercial Banking Division.

Silvestri continues as head of the bank's Inland Empire Regional Commercial Banking Office, a position he has held since August of 1987.

The Inland Empire Commercial Office serves business customers with annual sales of $2 million to $250 million in Riverside and San Bernardino counties, as well as the Imperial Valley.

A 14-year BofA veteran banker, Silvestri joined the bank's Palo Alto branch in 1975 and served three years in various operations positions in the Northern California branch system. In 1978 he assumed his first general lending position and the following year was assigned to the Corporate Banking Group at the Sunnyvale Branch. He was promoted to manager of that group in 1983.

In 1986, Silvestri moved to Orange County where he headed regional corporate banking activities. He later became the regional credit administrator for the Orange County-San Diego region and held that position until his appointment as head of the Inland Empire Regional Commercial Banking Office.

#90016b0126 01/16/1990 ~Business Wire

SAN FRANCISCO (JAN. 16) BUSINESS WIRE - The Hotel Mark Twain and the Regis Hotel are both offering special rates aimed at making romantic San Francisco even more accommodating.

The Hotel Mark Twain is offering a no-frills Valentine special for the month of February with standard rooms priced at just $59. In order to receive the low rate, guests must ask for the Valentine's special.

"We're not offering hearts or flowers, chocolates or champagne," said Director of Sales Susan Edwards. "But we are giving guests a great low rate that saves them enough money so they can enjoy themselves in a very romantic city."

In a city where room rates are even steeper than cable car routes, the Mark Twain's special makes for an affordable getaway, Edwards said. "Stay with us and you'll have money left over for a bay cruise, Sunday brunch, Irish coffees at the Buena Vista Cafe and a cable car ride," Edwards said.

Each of the 117 rooms at the Mark Twain offers a direct-dial telephone, coffee maker, refrigerator and color TV. The hotel features a restaurant and lounge, conference room, concierge and dry cleaning service, and a travel desk. Valet parking is also available.

The hotel is conveniently located near such San Francisco attractions as the cable cars, Union Square, Chinatown and the Theatre District. For reservations, see your travel agent or call the hotel at 1-800-28-TWAIN.

From now through March 31, the Regis Hotel is turning San Francisco visits into memorable affairs with a specially priced package of pampering and premiums.

The 86-room hotel's special includes a deluxe room, a Regis shopping bag and bottle of Regis wine upon arrival. In addition, guests will receive a certificate from the new Nordstrom store in the nearby San Francisco Centre for a mini-facial from Spa Nordstrom, color makeover from Visage Beaute and a fragrance gift from Annick Goutal.

The special costs just $92 for the first night, with additional nights priced at $80. Suites are available from $130 and fireplace rooms start at $150.

All rooms are elegantly furnished with antique English and French armoires canopied or draped beds, black Italian marble baths, and feature honor bars.

BELLEVUE, WA (JAN. 16) BUSINESS WIRE - First Medical Devices Corp. (NASDAQ:FMDC) Tuesday announced that it has received a merger agreement proposal from SpaceLabs Inc. of Redmond, Wash., offering to purchase the remaining outstanding shares of First Medic common stock at a price of approximately $.72 per share, in cash, pursuant to a tender offer, subject to a number of conditions.

SpaceLabs, a wholly owned subsidiary of Westmark International of Seattle (NASDAQ:WMRK), presently owns approximately 19 percent of First Medic's 3.9 million outstanding shares of common stock.

''The board of directors is reviewing SpaceLab's proposal with its financial advisors to determine promptly the potential benefits for our shareholders,'' said James F. Pfau, president and chief executive officer.

''We also are engaged in preliminary discussions with several other companies who have indicated an interest in exploring a merger or business combination with First Medic. While there can be no assurance that an acquisition by any party will occur, the company does intend to pursue discussions with SpaceLabs and others concerning a potential transaction '' Pfau stated.

First Medic is a leading manufacturer of ''smart'', microprocessor-based, semi-automatic heart defibrillators designed for use by emergency medical technicians (EMT's) and First Responders, such as police and firefighters.
  The company has developed, designed and manufactured more than 2,000 semi-automatic defibrillators during the past three years which have been sold under its own and other brand names.

     #90016b0139 01/16/1990 ~Business Wire
SAN JOSE, CA (JAN. 16) BUSINESS WIRE - Wyse Technology and Hunter Systems have announced an OEM agreement under which Wyse will bundle a Hunter Systems XDOS Transformer with every Wyse Series 5000i and Series 9000i Unix-based supermicrocomputer.

In addition, Hunter Systems Tuesday joined a select group by announcing it has become a member of the Wyse Unity Software Program.

The XDOS Transformer permits Series 5000i and 9000i users to install a full suite of XDOS applications, which are Unix ports of popular DOS applications. XDOS applications have identical user interfaces and compatible data formats to the DOS applications.

Sha noted that early adoption of a new technology is usually encumbered by the need to develop new distribution channels and the reluctance of most users to abandon existing applications when moving to a new system. ''Wyse has overcome these barriers by selecting Hunter Systems' XDOS. XDOS allows our customers to retain their existing applications and data files,'' he said.

The XDOS Transformer is a conversion program that allows users to install as many XDOS applications packages as desired. XDOS applications are Unix versions of the original DOS programs, and indentical in feature and function to the original DOS programs. Existing DOS data files are completely compatible with the Unix version. XDOS applications run at speeds comparable to source ports.

Each Series 5000i and Series 9000i will include an XDOS Transformer with a single-user token. A token is a ''floating license'' that allows any user on the system to run an XDOS application.

Once this token is checked out, other users must wait until the token becomes available. Additional tokens may be purchased to accommodate the desired number of concurrent XDOS application users.

Each system will include demonstration versions of the DataEase database management system from DataEase International and the Sprint word processor and QUATTRO spreadsheet from Borland.

These applications are available for users to test the multi-user, multitasking capabilities of these XDOS-converted programs with their own data files.

#90016b0166 01/16/1990 ~Business Wire

SALT LAKE CITY (JAN. 16) BUSINESS WIRE - First Security Corp. (NASDAQ:FSCO) Tuesday reported net income was up 30.7 percent over the fourth quarter a year ago and up 30.6 percent over the full year 1988.

Net income, which has increased for five consecutive quarters, totaled $11.56 million in the fourth quarter compared with $8.85 million earned in the like 1988 period. On a fully-diluted basis, net income earned per common share was 87 cents vs. 69 cents in 1988's fourth quarter.

Net income for 1989 was $43.14 million, the second highest in the history of First Security and an increase of $10.10 million from 1988's $33.04 million. Net income on a fully-diluted basis was $3.28 per common share in 1989 and $2.58 in 1988.

Net interest income on a fully taxable-equivalent basis was $57.32 million for the fourth quarter of 1989 and $226.56 million for the year, up 5.4 percent from $54.36 million in the 1988 quarter and up 7.9 percent from $209.90 million in 1988. The gains reflect substantial increases in earning assets.

The net interest margin improved to 4.71 percent in 1989, up from 4.68 percent in 1988.

Non-interest income for the fourth quarter of 1989 increased 15.9 percent over the 1988 quarter to $18.27 million, and for the year rose 16.6

percent over 1988 to $68.78 million.

Productivity in 1989 was up 14.7 percent over 1988. Each dollar spent on non-interest expenses in 1989 generated $3.12 in revenue compared with $2.72 in 1988.

Earning assets averaged $5.09 billion in the fourth quarter, up 9 percent over the year-ago quarter, and $4.81 billion for the year, up 7.2 percent over 1988 outstandings. Eccles said earning asset growth was paced by strong gains in commercial, financial and agricultural loans, real estate mortgages and consumer loans.

The improved quality of First Security's assets is reflected by the continued steady reduction of non-performing assets, which have declined for 13 consecutive quarters. At year-end 1989, non-performing assets had dropped to $80.87 million from $94.72 million at Dec. 31, 1988, a decline of $13.85 million or 14.6 percent.

Moreover, the corporation reduced accounts past due 90 days or more 36.7 percent to $10.65 million at Dec. 31, 1989 from $16.82 million on the like date last year.

Profitability is up substantially over 1988, with the return on average assets (ROA) increasing to 0.81 percent in the 1989 fourth quarter from 0.68 percent in the like quarter last year and rising to 0.80 percent for the full year from 0.66 percent in 1988. Over the same time span, the return on average stockholders' equity (ROE) climbed to 11.13 percent in the fourth quarter from 9.17 percent, and for the year rose to 10.72 percent from 8.73 percent. ''Our goals,'' Eccles said, ''are to achieve a minimum of 1.00 percent ROA and a 15 percent ROE.''

Non-interest expenses of $48.04 million for the fourth quarter were down $1.80 million or 3.6 percent from the like 1988 quarter, while non-interest expenses of $194.51 million for the year were only 1.6 percent ahead of 1988.

#90016b0169 01/16/1990 ~Business Wire

EMERYVILLE, CA (JAN. 16) BUSINESS WIRE - Cetus Corp. (NASDAQ:CTUS) said that the U.S. Patent and Trademark Office (PTO) issued seven patents to the company Tuesday.

The patents relate to several of Cetus' therapeutic products, including PROLEUKIN interleukin-2, TENECRIN tumor necrosis factor and certain immunotoxins, and processes for producing and using them.

The issuance of these seven patents brings to 122 the number of issued U.S. patents held by Cetus. In 1989, the PTO issued 28 patents to Cetus.

Patent 4,894,227 claims compositions of interleukin-2 and immunotoxins which augment anti-tumor activity when used for prophylactic or therapeutic treatment of ovarian, breast and certain other cancers. Paul Stevens, Lou Houston, Kirston Koths, Brian Issell and Robert Zimmerman were listed as inventors on the patent.

Patent 4,894,225 covers combination therapy using immunotoxins with tumor necrosis factor administered simultaneously or in tandem. The patent describes the synergistic anti-tumor effect obtainable through combination use and discloses methods and protocols of administration. Robert Zimmerman was the inventor.

Patent 4,894,226 covers solubilization of proteins for pharmaceutical compositions using polyproline conjugation. Inventors Louis Aldwin and Danute Nitecki covalently joined a biologically active protein to polyproline using a flexible spacer arm and dissolved it in an aqueous carrier medium in the absence of a solubilizing agent. Polyproline is a peptide made up of one common, very soluble amino acid.

Patent 4,894,330 protects improved methods for purifying recombinant interferon beta utilizing reverse-phase high performance liquid chromatography and also claims the resulting product. Susan Hershenson and Ze'ev Shaked were responsible for this invention. High performance liquid chromatography is a high resolution means of separating and identifying components in a mixture based on differences in the ability of proteins to bond and release from hydrophobic materials packed within a column.

Patent 4,894,334 covers a method for improving the yield of heterologous proteins produced by recombinant bacteria, such as the genetically engineered ricin A toxin protein used in Cetus' immunotoxin products.

Patent 4,894,439 covers the selective separation of recombinantly produced proteins using microporous PTFE (teflon) membranes to create highly purified biologically active products. The process involves passing a solution containing the protein through a continuous porous hydrophobic membrane and recovering the enriched fraction containing the protein, and is particularly useful for producing hydrophilic proteins such as tumor necrosis factor.

Patent 4,894,441 claims various immunotoxin conjugates invented by Lawrence Greenfield, Donald Kaplan and Danute Nitecki. It describes the linking of antibodies to peptide toxin/spacer composites prepared by recombinant techniques using a novel class of polypeptides.

Cetus Corp. is a leading biotechnology company engaged in the development, manufacturing and marketing of pharmaceutical products to treat cancers and serious infectious diseases.

TORONTO (JAN. 16) BUSINESS WIRE - Central Crude Ltd. (TSE, VSE:CLC) reports that two drills are currently drilling the company's Moss Lake project located some 70 miles west of Thunder Bay, Ontario and which claims were optioned from Tandem Resources Ltd. and Storimin Exploration Ltd.

The current drill program is designed to follow up recent drill holes completed by Tandem and Storimin along strike on the main zone which returned the following assays: 1.60 oz Au/ton across 13.0 feet, 0.20 oz Au/ton across 14.5 feet in the eastern most drill of the main ore zone and 0.08 oz Au/ton across 100 feet including 0.32 oz Au/ton across 11.0 feet to the west of the main mineralized zone. A value of .33 oz Au/ton over 20 feet including 1.57 oz Au/ton across 2.5 feet was intersected 900 feet below the main ore zone and is also the target of the current diamond drilling.

The company further reports that it has an agreement in principal with Noranda Exploration Co. Ltd. covering a project known as the ''Pawnee'' which is located in the Kirkland Lake area, northern Ontario. Central Crude has agreed to take over Noranda's interest in a recent option agreement entered into between Noranda and Queenston Mining Inc., of Toronto covering Noranda's right to earn a 51 percent interest in Queenston's 42 claim Pawnee property which straddles the Larder Break in Label Township. The agreement calls for cash expenditures of $100,000 and $1 million exploration expenditures over a four year period.

Significant results obtained by previous diamond drilling returned 0.11 oz Au/ton across 98.2 feet and 0.24 oz Au/ton across 14.8 feet. A diamond drill program to commence immediately is designed to further evaluate these significant diamond drill holes as well as step out drilling to further evaluate the strike extent of the mineralized zone.

The company is further pleased to report that an agreement has been reached with Noranda Exploration Co. Ltd. wherein Noranda has agreed to act as the operator of both of the aforesaid projects.

The company further reports that it has commenced a diamond drill program

to follow up encouraging results obtained during last years exploration program on the company's Blue Quartz property optioned from Joutel Resources Ltd. and located near Matheson, Ontario. The Blue Quartz property hosts the former Blue Quartz Mine which is said to host reserves of 128,000 tons grading 0.86 oz Au/ton.

HOUSTON (JAN. 16) BUSINESS WIRE - Kelley Oil & Gas Partners Ltd. (AMEX:KLY) announced that its registration statement for an exchange offer to investors in Kelley Partners 1987 development drilling program (the ''program'') was declared effective Tuesday by the Securities and Exchange Commission.

Investors and the general partners in the program will receive a total of 472,170 depositary units in Kelley Partners in exchange for their interests in the program, reflecting the average market price of the units immediately preceding the effective date of the offering and the exchange value of the program as determined by Kelley Oil Corp., managing general partner of both Kelley Partners and the program.

Lovett Underwood Neuhaus & Webb Inc. will act as dealer manager for the exchange offer.

Kelley Partners is engaged in the management and development of oil and natural gas properties, located primarily in Louisiana, and the acquisition of additional producing properities in or near Kelley Partners' established production areas. The average reserve life of its proved reserves is 11.5 years, and 96 percent of its proved reserves are natural gas.

The program was organized in August 1987 to engage in development drilling activities on properties owned by Kelley Partners. The program has interests in a total of 31 gross (7.44 net) productive oil and gas wells.

#90016b0213 01/16/1990 ~Business Wire

PHOENIX (JAN. 16) BUSINESS WIRE - The Pinnacle West Capital Corp. board of directors Tuesday announced the appointment of Richard Snell as chairman, president and chief executive officer of Pinnacle West and

chairman of Arizona Public Service Co.

Snell, a Phoenix native and longtime attorney with the law firm of Snell and Wilmer, is chairman and chief executive officer of Aztar, the firm formed to own and operate the gaming business of Ramada Inc., after the 1989 restructuring of Ramada. Snell was chairman, president and chief executive officer of Ramada for eight years.

Snell will replace Keith Turley, who has held the top position for Pinnacle West since the holding company was formed in April 1985. Turley was previously in the same position with Pinnacle West's predecessor company, AZP Group Inc., and prior to that was head of Pinnacle West's anchor subsidiary, APS. His service spans 40 years.

Turley, who had announced last May 17 that he would step down within a year, will retire. He will continue his association with Pinnacle West and APS as an outside director.

The Pinnacle West board, in a prepared statement approved during a special meeting this morning, said:

''The present economic climate and a different set of challenges before our company and its subsidiaries suggest a different leadership, one with a different combination of experience, capabilities and specific areas of expertise.

''We have determined that Richard Snell offers qualifications that are uniquely suited to the present and future needs of Pinnacle West and its important subsidiaries.''

The board cited as Snell's qualifications for the job his background as a corporate finance attorney, his experience in working with state and federal regulatory agencies, his longtime association with APS and later Pinnacle West and his management leadership of Ramada Inc., coming at a time when Ramada's financial situation was volatile.

Snell's involvement with APS and subsequently Pinnacle West has given him a ''thorough grounding in broad issues related to our public utility as well as our umbrella corporation,'' the statement said.

The board statement noted that Snell, a director, was ''not afraid to differ with management and other members of the board on significant decisions.'' Despite that, the board said, he has ''actively and aggressively worked within the board to resolve difficulties faced by the company.''

Snell, who will relinquish his management position at Aztar, said he will assume his new responsibilities on Feb. 5. Snell said he will continue as

chairman of the board of Aztar, but will have no role in day-to-day management, freeing him to give full attention to his new responsibilities at Pinnacle West.

The announcement was made at a press conference at the downtown Phoenix University Club following board meetings at Pinnacle West and APS.

In addition to APS, Pinnacle West is the holding company for MeraBank, A Federal Savings Bank; SunCor Development Co., a real estate development firm; Malapai Resources Co., a uranium mining company; and El Dorado Investment Co., a venture capital firm.

PHOENIX (JAN. 16) BUSINESS WIRE - Aztar Corp. (NASDAQ:AZTR) Tuesday announced that its board of directors had approved the request of its chairman, Richard Snell, to be allowed to relinquish the position of chief executive officer.

The board appointed Paul E. Rubeli chief executive officer; Rubeli will continue as Aztar president and chief operating officer. Snell will remain chairman of the board.

The company said Snell had asked to be relieved of his management responsibilities because he had agreed to accept the position of chairman and chief executive officer of Pinnacle West Capital Corp. (NYSE:PNW).

In a prepared statement, Snell said: ''The completion of the restructuring of Ramada Inc. and the steps we have taken to strengthen Aztar make this an opportune time for this management transition at Aztar. The board and I have complete confidence in the abilities of the Aztar executive team.

''My day-to-day role in Aztar will be diminished. But I plan to be involved in Aztar and I remain committed to Aztar's success,'' Snell said.

Aztar is the company formed to own and operate the former gaming business of Ramada Inc. in the restructuring of Ramada completed in December 1989. The company operates casino hotel properties in Atlantic City, N.J., and Las Vegas and Laughlin, Nev.

When Aztar came into being, Snell assumed the role of chairman and chief executive officer that he had held in Ramada. Rubeli, who had been executive vice president of the Ramada Gaming Group, became president and chief operating officer of Aztar.

Snell became chairman and chief executive officer of Ramada in 1981.

MIDLAND, TX (JAN. 16) BUSINESS WIRE - Tipperary Corp. Tuesday announced the consummation of an exchange of a significant portion of its debt for equity.

Double-Double Partners II, the company's 47 percent shareholder, and Texland Oil Inc., a related party, exchanged in total approximately $9.3 million of long-term debt for common stock in the company. The net increase in stockholders' equity resulting from the exchange will be approximately $9 million. As a result of the exchange, Double-Double Partners II and Texland Oil Inc. in combination hold approximately 68 percent of the company's common shares.

This exchange, which creates positive stockholders' equity in excess of $3 million is a significant step in Tipperary's previously reported plans to be relisted on the NASDAQ System and to refinance its bank debt. The company's board of directors has proposed a ''1 to 20'' reverse stock split, which is subject to shareholder approval at the annual meeting on Jan. 23, 1990.

Upon completion of the above steps, Tipperary's management intends to begin actively pursuing growth opportunities.

SAN JOSE, CA (JAN. 16) BUSINESS WIRE - Plaza Commerce Bancorp, (NASDAQ:PLZA) holding company for Plaza Bank of Commerce, announced net income of $2.4 million for the fourth quarter ended Dec. 31, 1989, compared with $2,148,000 for the fourth quarter of 1988, an increase of $252,000, or 12 percent.

Earnings per share were 35 cents in the fourth quarter, compared with 32 cents for the like period in 1988. Total outstanding shares at Dec. 31, 1989 were 6,638,489.

Net income was $8,660,000 for the year ended Dec. 31, 1989, compared with $6,010,000 for the like period of 1988, an increase of $2,650,000, or 44 percent. Earnings per share increased to $1.24 for the year ended in 1989 compared with 89 cents for the like period in 1988, a 39 percent increase.

Total assets reached $486 million at Dec. 31, 1989, compared with $451 million at Dec. 31, 1988, an 8 percent increase. Net loans were $338 million on Dec. 31, 1989, compared with $284 million on Dec. 31, 1988, a 19 percent increase. Total deposits were $441 million at Dec. 31, 1989, compared with $416 million at Dec. 31, 1988, a 6 percent increase.

Plaza Commerce Bancorp's main subsidiary, Plaza Bank of Commerce, founded in 1979, and a member of the Federal Deposit Insurance Corp., is headquartered in downtown San Jose with regional offices in Sunnyvale and Fremont.

Plaza Commerce Bancorp recently received shareholder approval on the proposed acquisition by Comerica Inc., Detroit. Comerica Inc., an $11.5

billion multi-bank holding company headquartered in Michigan, provides banking and trust services to corporate customers and individuals through 11 affiliate banks. It is anticipated that the acquisition, subject to regulatory approval, will be consummated in the first quarter of 1991.

TULSA, OK (JAN. 17) BUSINESS WIRE - Geodyne Resources Inc. (NASDAQ:GEOD) Tuesday reported revenues for the nine months ended Nov. 30 of $19,748,153 as compared with $13,921,549 for the like period last year, a 42 percent increase.

Net income before taxes for the first three quarters of fiscal 1990 increased 25 percent to $7,414,047, up from $5,947,685 for the first three quarters of fiscal 1989. Net income for the nine months ended Nov. 30, 1989, was $4,844,047, or 27 cents per common share, compared with net income for the like period last year of $5,802,685, or 34 cents per common share.

Net income for the nine months was lower primarily as a result of the increased provision for income taxes. Contributing to the company's improved revenues were the record sales of its Energy Income Program interests of $115 million during calendar year 1989 and 18.6 percent increase over 1988.

Revenues for the third quarter of fiscal 1990 increased 62 percent to $7,169,091 from $4,426,525 reported for the like period last year. Net income before tax for the current quarter increased 59 percent as compared with the third quarter of fiscal 1989.

Net income for the third quarter of fiscal 1990 increased 5.6 percent to $1,764,420, or 10 cents per share, from $1,671,071, or 10 cents per share, for the similar period of fiscal 1989.

The provision for income taxes for the nine-month period ended Nov. 30, 1989, increased to $2,570,000 as compared with $145,000 for the like period last year and for the three-month period increased to $928,000, as compared with $20,000 for the like three-month period last year.

The increase in the provision for income taxes resulted from the use of net loss carryforwards in the prior year, which are no longer available.

Revenues from management fees during the first nine months of fiscal 1990 were $10.4 million resulting from the acquisition of approximately $88.8

million in producing oil and gas properties on behalf of the company's partnerships. Revenues from management fees in the year-earlier period were $7.9 million from the acquisition of $70.8 million in producing properties.

With headquarters in Tulsa, Geodyne Resources Inc. manages the PaineWebber/Geodyne Energy Income Programs I, II and III and PaineWebber/Geodyne Institutional/Pension Energy Income Partners. The company evaluates, acquires, manages and develops oil and gas reserves for its limited partnerships. The company also has offices in Houston and San Antonio.

WALTHAM, MA (JAN. 16) BUSINESS WIRE - IPL Systems Inc. Tuesday announced that Fred Wirth, its present director of international sales, has been named vice president and managing director of international sales.

In his new role, Wirth will develop product sales worldwide with an emphasis on Middle East, Asian and South American countries. He will also continue to expand European sales.

Wirth was promoted to director of international sales in 1989 and was responsible for expanding IPL Systems' sales efforts abroad and solidifying relationships with distributors throughout Western Europe, Scandinavia and Japan.

He originally joined IPL Systems in 1987 as director of North American sales. While in this position, he was instrumental in developing distributor channels for the company's peripheral products throughout the United States and Canada.

Prior to joining IPL, Wirth was branch manager for four years with Wang Laboratories in Colorado.

His past experience includes sales management positions in various high technology companies such as Sperry Computer Corp. and Decision Data. Wirth was also data processing manager for CTB/McGraw Hill.

Wirth holds bachelor's and master's degrees in business administration from the University of Phoenix.

IPL Systems Inc. designs, manufactures and markets IBM-compatible tape drive subsystems and memory products for IBM Systems/3X, 43XX, 9370, S/370 30XX, and AS/400 computers. The company was founded in 1973 and its headquarters are located at 360 Second Ave., Waltham, Mass., 02154, 617/890-6620.

IPL Systems Inc. stock is quoted on the NASDAQ national market system and traded in the OTC market under the symbol IPLSA.

#90016b0612 01/16/1990 ~Business Wire
SARASOTA, FL (JAN. 16) BUSINESS WIRE - OMNI Films International Inc. (NASDAQ:OFII) announced Tuesday that it has entered into an agreement with a Japanese group for installation of a Motion Master Theater at a Japanese tourist attraction at Lake Biwako, Japan.

This is the third Motion Master system to be sold in Japan.

The sales backlog of $4.1 million, achieved in the first 120 days of the current fiscal year represents approximately 129 percent increase over the total amount of contract sales for the prior fiscal year which ended Sept. 30, 1989.

Fred Hollingsworth III, president, stated, ''This latest contract not only brings our contract sales to new record levels, but also brings total sales to record levels. We are very pleased that our sales backlog has already exceeded annual sales in ever previous fiscal year and that the strong worldwide interest in our systems is continuing to build.''

Under terms of the $1 million agreement, OMNI will supply a complete Motion Master theater package, including theater design, hydraulically actuated motion seats, synchronization and show controls, projection screen, 70mm projector, six channel surround sound, installation guidance and training of operating and maintanence staff. The agreement also includes the leasing of adventure films produced by OMNI. Shipment of the Motion Master theater is scheduled for March 1990.

OMNI's 1990 fiscal year began on Oct. 1, 1989 and runs through Sept. 30, 1990.

OMNI Films International specializes in the design, sale and installation of five separate and distinct 70mm wide screen cinema systems, and produces, distributes, and licenses 70mm films for these systems. Since inception OMNI has delivered approximately 200 of its cinema systems to locations in 53 countries, including every continent except Antarctica. OMNI is traded on the NASDAQ system under the symbol OFII.

SAN FRANCISCO (JAN. 16) BUSINESS WIRE - California Energy Company Inc. (AMEX/PSE:CE) Tuesday announced it has entered into negotiations with

Chevron Resources Company regarding the sale of certain of Chevron's geothermal operations and properties located in Nevada and Utah to California Energy for an undisclosed cash amount.

''The operations and geothermal properties included in the proposed transaction fit neatly into our corporate strategy and will significantly contribute to the growth of California Energy Company,'' said Charles T. Condy, chairman and chief executive officer.

California Energy Company Inc. is a leading independent producer of electric power and developer of geothermal resources. The company is an owner and the operator of the 240 megawatt Coso Geothermal Project, located in Inyo County, California.

The company also controls nine geothermal prospects covering nearly 340,000 acres in Northern California, Oregon and Washington.

NEW YORK (JAN. 16) BUSINESS WIRE - Nazem and Co. Tuesday announced completion of the acquisition of Tegal, a Petaluma, Calif.-based manufacturer of plasma etching systems for the semiconductor equipment industry, from Motorola Inc.

Terms of the transaction were not disclosed.

''We are buying Tegal as the first step in building a major American-based semiconductor equipment company,'' said Emile Geisenheimer, general partner of Nazem. ''Tegal's strong distribution, service support and customer base in the U.S., Far East and Europe make it ideally suited for a global economy.

Nazem and Co.'s approach is to look for opportunities in markets where they anticipate substantial customer growth and for investments with the potential to become major players in a global economy.

Unlike conventional leveraged buyout firms, Nazem and Co. does not burden its companies with excessive debt; rather, it provides equity capital.

They help a company identify and capitalize on its strengths and provide,

in addition to money, new technologies as well as financial, marketing and big-business operating know-how.

Nazem and Co., based in New York and founded in 1976, is one of the oldest most successful venture capital firms in the industry, with broad experience nurturing companies from seed financing to public offerings. Its investments include Cirrus Logic, Apollo Computer, Xyvision, and CAE Systems.

Tegal is a leading supplier of advanced process equipment systems for the semiconductor industry. Until its acquisition, the company operated as a Motorola New Enterprise company.

Tegal will continue to operate as a supplier of front end capital equipment systems to Motorola. Founded in 1972, Tegal has the largest installed semiconductor equipment base in the world, with 3,000 etchers in use worldwide.

It achieved sales in excess of $50 million in 1989, almost 10 percent of the worldwide market, and has established strong international presence and a wholly owned subsidiary in Japan.

Tegal employs 200 people in its Petaluma headquarters and another 150 sales and service personnel around the world.

LANDOVER, MD (JAN. 16) BUSINESS WIRE - Falcon Microsystems Inc. Tuesday announced it has signed a three-year exclusive contract with Apple Computer Inc., of Cupertino, Calif., to continue as exclusive holder of Apple's GSA Schedule C, the official purchasing catalog for personal computing products.

The deal is estimated to be worth in excess of $100 million to Apple in its first year and could deliver a total value of $.5 billion by its expiration date of March 31, 1993.

Under terms of the agreement, Falcon, Apple's fifth largest reseller, will represent all Apple products on Schedule C. Falcon also will continue to represent Apple products on a non-exclusive basis in competitive bidding for large government contracts.

BOSTON (JAN. 16) BUSINESS WIRE - Sybase Inc., headquartered in Emeryville, Calif., and SQL Solutions Inc. of Burlington, Mass., Tuesday announced a merger in which SQL Solutions became a wholly owned subsidiary of Sybase.

Sybase is the first vendor to offer an open relational database management system (RDBMS) specifically designed for on-line applications. SQL Solutions, formerly known as D&N Systems, is a professional services and tools company specializing in building RDBMS-based applications.

Under the terms of the merger, SQL Solutions will operate as an independent company. Bob Davoli, president of SQL Solutions, will be an officer of Sybase Inc. and will report directly to Mark Hoffman, Sybase president and chief executive officer.

SQL Solutions will provide consulting services and tools to Sybase and other RDBMS vendors' customers.

SQL Solutions focuses exclusively on providing relational database services and tools. The company has expertise with all major SQL-based RDBMSs, including SYBASE, ORACLE, Ingres, Informix, Rdb and DB2.

SQL Solutions will operate as an independent company. The company will provide its services to Sybase customers in three ways. First, SQL Solutions will offer consulting services to Sybase customers through Sybase's Technology Integration Services, which include consulting, training and phone support.

Second, SQL Solutions consultants will work with Sybase sales representatives to market complete solutions that meet customer needs.

Third, SQL Solutions will continue to independently market its tools directly to Sybase customers.

SQR is an SQL-based, procedural fourth generation language and report writer. In addition, the company distributes Deft, from Canadian-based DEFT Inc., a computer-aided software engineering (CASE) tool that is tightly integrated with major relational databases.

Sybase Inc. develops and markets SYBASE, the leading RDBMS for on-line applications. It is the first RDBMS vendor to offer an open architecture, based on its SYBASE Open Client and SYBASE Open Server interfaces, specifically designed for on-line applications.

GREENWICH, CT (JAN. 16) BUSINESS WIRE - Frederick A. Moran, president, Moran & Associates Inc., announced Tuesday that the company has signed a memorandum of mutual understanding with the government of Czechoslovakia and the Ministry of Transport, Posts and Telecommunications.

The agreement calls for a joint venture partnership to be formed of which Moran & Associates will own a 49 percent interest and an exclusive cellular franchise license for the country of Czechoslovakia over the next 25 years with an additional 25-year option.

It is among the first of any cellular communications agreements reached within the Eastern Bloc and the first such agreement between a telecommunications interest and the newly formed Czechoslovakian government.

Moran will provide the technology, engineering, operations and finance through a consortium of North American cellular groups. Feasibility studies are expected to be started in mid-February with some test cellular operations expected to commence before year-end 1990.

Moran commented: ''We welcome the opportunity to work hand in hand with the telecommunications ministry to bring a state-of-the-art technology to the people of Czechoslovakia. We recognize the enormous responsibility of trust bestowed upon us to enhance the economic success of Czechoslovakia by providing an effective, economical and justifiable telecommunications system for the entire population.''

Moran & Associates Inc. is an investment banking and securities brokerage firm located in Greenwich.

#90016b0620 01/16/1990 ~Business Wire

SANTA CLARA, CA (JAN. 16) BUSINESS WIRE - Osiris Technology, an Australian systems manufacturer is using National Semiconductor's 32CG16 and 32GX32 imaging processors in a new line of powerful graphics terminals.

Osiris is established in the area of UNIX interfaces on multiple-host systems and is now diversifying into providing graphical user interfaces on multiple-host systems in line with trends in user expectations of all computer systems.

The terminals are designed to connect a large number of users with advanced graphics capabilities to a centralized computing resource. The 32CG16 is used in a monochrome version, while the 32GX32 is used in an 8-plane color terminal system.

''National's cost effective solutions and consistent architecture across the imaging system processor family allow Osiris to quickly produce an advanced product in a new computing area,'' said Eric Mills, CEO of Osiris.

The unique GraphicServer terminal consists of four basic components: the processing unit, a keyboard, a mouse and a monochrome or color monitor. The system unit has an Ethernet connection, two serial ports, a parallel printer port and an SCSI port.

The GraphicServer operates as an intelligent terminal, not a workstation and does not require a complex resident operating system such as UNIX. The reduction in intelligent nodes and therefore in system administration is significant in large networks. The intelligent terminal is connected to a central computing system through TCP/IP Ethernet, TCP RS232 SLIP, Proprietary RS232 or simple RS232.

The software resident in the GraphicServer is OpenScript, which controls all operations in the terminal. OpenScript, developed by Osiris, provides an Adobe PostScript and SUN NeWS compatible environment to users.

A 3-D window manager modeled on the OpenLook specification is included within the GraphicServer and is immediately available as a front end to all applications. Both hardware platforms can also be programmed as an X-window terminal if required.

National's 32CG16, introduced in 1988, was the first processor optimized

for page printer, facsimile, terminal, scanner and other imaging peripheral applications. The 32CG16 is a fully programmable 32-bit microprocessor featuring 18 unique graphic instructions, an on-chip oscillator, dedicated circuitry for DMA support and on-chip Bit Block Transfer (Bit/BLT).

MIAMI (JAN. 16) BUSINESS WIRE - The Keith Group of Companies Inc. (NASDAQ: HKME) based in Miami posted a profit for the first quarter (11/30/89) based on $2.04 million in revenues.

Profit for the quarter was $126,548 or five cents per share of common stock.

First-quarter home sales were $1.23 million, an increase of nine percent over the like period in 1988--the result of both a refined and enhanced sales and marketing program at the Victoria Estates and Bear Creek Manufactured Home Communities. The quarterly sales were the second highest since the company's inception in 1986.

The Keith Group, with executive offices in Miami, is a leading developer, owner and operator of manufactured home communities throughout Florida.

BELMONT, CA (JAN. 16) BUSINESS WIRE - Oracle Corporation and Pyramid Technology Corporation Tuesday announced that they have joined together to integrate Release 4.0 of AT&T's TUXEDO Transaction Processing System with the ORACLE relational database management system (RDBMS) on the Pyramid MIServer line of high-performance multiprocessor RISC systems. TUXEDO Release 4.0 was announced by AT&T today.

The combination of AT&T's industry-standard transaction processing monitor technology with the ORACLE client/server architecture provides a state-of-the-art foundation for building on-line transaction processing (OLTP) applications. TUXEDO plays a central role in OLTP environments by managing the communication between client processes and available servers. This transaction management facility allows for sustained performance levels in computing environments with very large numbers of users. In

addition, TUXEDO Release 4.0 provides transaction prioritization and centralized administration services over distributed heterogeneous networks using the X/Open XA Distributed Transaction Processing Standard.

This joint technology agreement continues Oracle's and Pyramid's engineering partnership in the area of transaction processing monitor technology. Oracle and Pyramid have developed a multi-stated version of ORACLE that is integrated with an enhanced version of AT&T's TUXEDO Release 3.0.

Product Availability

Oracle Corporation (NASDAQ:ORCL), headquartered in Belmont, Calif., is the largest supplier of DBMS software for the UNIX marketplace, as well as for the entire computer industry, and is the third largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as families of financial, manufacturing and government applications packages.

Based in Mountain View, Calif., Pyramid Technology Corporation provides the industry's broadest line of high-performance, high-availability RISC-based servers for the open, commercial computing marketplace. Pyramid MIServer multi-processing computers offer from 14 to 140 MIPS which can effectively support up to 1,000 users simultaneously.

MOUNTAIN VIEW, CA (JAN. 16) BUSINESS WIRE - Momenta, a recently established company addressing the need for easy-to-use portable computing announced Tuesday that John Rizzo has joined the company as vice president of marketing.

In his new position, Rizzo will concentrate on product definition, marketing channel strategy, long-range business strategy and corporate communications.

''We predict that personal computing will take on a whole new character in the 1990s and we're building Momenta to help define the next generation of computers,'' said Kamran Elahian, president and chief executive officer. ''To succeed, we must be bold enough to envision the future and seasoned enough to deliver it.

''John Rizzo, by virtue of his background in both the semiconductor and personal computer industries, will be invaluable to our efforts.''

Rizzo, age 32, comes to Momenta from Weitek Corp., a company considered one of the most successful semiconductor startups in Silicon Valley.

After joining Weitek in 1985, Rizzo built the marketing department and helped to redefine the corporate product, marketing and sales strategies.

His achievements supported a fourfold increase in sales, to an estimated $50 million in 1989, and helped to pave the way for an initial public offering in 1988.

As marketing vice president at Weitek, Rizzo was responsible for contributing to Weitek's strategic business plan and its marketing implementation.

Prior to Weitek, Rizzo was with Apple Computer. As an early member of the Macintosh marketing team, he helped launch the company's most successful product to date. He also held positions as Macintosh product marketing manager, hardware product manager, and peripherals product manager during his tenure at Apple.

Before joining Apple, Rizzo was with Intel, where he held a variety of technical, strategic, tactical and product marketing and management positions in markets ranging from E-PROM and other non-volatile memory components.

#90016b0628 01/16/1990 ~Business Wire

SANTA CLARA, CA (JAN. 16) BUSINESS WIRE - Revenue for 1989 was a record, while net income declined from last year's level, Intel Corp. said Tuesday.

Fourth-quarter revenue also set a new record.

Revenue was $3.1 billion, compared with $2.9 billion for 1988, an increase of 9 percent. Net income was $391 million, or $2.07 per share, compared

with $453 million, or $2.51 per share a year earlier.

Fourth-quarter results were strong as revenue reached $895 million, up 23 percent from $727 million for the similar 1988 period and surpassing Q3'88 Intel's previous record quarter. Net income increased to $123 million, or 64 cents per share from $86 million, or 46 cents per share for the fourth quarter of 1988.

Fourth-quarter revenue increased 16 percent from $771 million in the immediately preceding quarter; earnings per share increased 68 percent from 38 cents per share in this year's third quarter.

Intel's revenue per employee climbed to $147,000, a new record. Intel's international business was strong with 43 percent of revenue coming from sales outside North America. The rapidly growing Asia-Pacific region was especially strong.

For the second year in a row, Intel employees earned approximately two weeks of extra pay from Intel's Employee Cash Bonus Program, a total 1989 payout of approximately $27 million.

Intel undertook several programs in 1989 to maintain its competitiveness by shifting resources to areas with the potential for higher profitability.

-- Intel began operations in D2, its sub-micron process development facility in Santa Clara, Calif., focusing on the non-volatile memory and embedded controller marketplaces.

-- Intel also announced plans to close two of its oldest chip fabrication plants; Fab 3 in Livermore, Calif., and Fab 1 in Santa Clara.

-- Intel announced its first European manufacturing site, located in Ireland. Construction has begun on a systems manufacturing plant. A semiconductor wafer fabrication plant and a chip assembly/test center are planned for the site at a later date.

Intel manufactures microcomputer components, modules and systems.

GOLETA, CA (JAN. 16) BUSINESS WIRE - Applied Magnetics Corp. (NYSE:APM), the leading independent manufacturer of disk and tape heads for the computer industry, announced first-quarter operating results.

Ben J. Newitt, vice chairman and chief executive officer, stated that sales for the first quarter were $79,555,000, a decrease of $3,739,000, or 4 percent, from the first quarter last year.

Net income of $454,000, or 3 cents per share, compared with last year's quarterly high of 30 cents per share.

Backlog of open orders at Dec. 31, 1989, totalled $118.4 million, a new all-time high and compares with $108,622,000, at Dec. 31, 1988, and $108.45 million at Sept. 30, 1989.

#90016b0638 01/16/1990 ~Business Wire

IRVINE, CA (JAN. 16) BUSINESS WIRE - Diceon Electronics Inc. (NASDAQ/NMS:DICN) Tuesday reported financial results for the first quarter ended Dec. 30.

Net sales decreased to $26,768,000 compared with $30,667,000 last year. Diceon recorded a net loss in the quarter of $1,198,000, a loss of 21 cents per share, as compared with a profit of $237,000, or 8 cents per share, last year. Financial results for the first quarter continue to be very poor.

The company's order rate continues to be below the level of business required to be profitable. The main reason for its low rate of orders is the continuing slowdown of business in the computer industry at all levels from PCs and micros to mainframes as buyers tighten their belts and try to digest the computer power they have purchased in recent years.

To offset these conditions and dynamics, the company has developed several programs to broaden the Diceon customer base. The company is also developing a stronger marketing program to support the field sales efforts. These programs will not guarantee immediate correction to the current slowdown in business, but will position Diceon well for the future.

Diceon Electronics Inc. is one of the country's leading manufacturers of both complex and high-technology multilayer circuit boards and backpanels. Customers include original equipment manufacturers of computer, telecommunication and instrumentation systems.

#90016b0641 01/16/1990 ~Business Wire

BELMONT, CA (JAN. 15) BUSINESS WIRE - Oracle Corporation and Sequent Computer Systems Inc. Tuesday announced that they have joined together to integrate Release 4.0 of AT&T's TUXEDO Transaction Processing System with the ORACLE relational database management system (RDBMS) on the Sequent Symmetry line of high-performance systems. TUXEDO Release 4.0 was announced by AT&T today.

The integration of AT&T's industry standard transaction processing monitor technology with the ORACLE client/server architecture on scalable high-performance Symmetry processors provides a state-of-the-art platform on which to build on-line transaction processing (OLTP) applications. This allows for increased transaction throughput in OLTP environments.

The agreement calls for a cooperative engineering partnership between the two companies. In particular, Sequent will work with Oracle on the incorporation of the X/Open XA interface between TUXEDO Release 4.0 and ORACLE. Sequent has already ported TUXEDO Release 4.0 and is currently tuning and enhancing it for the Sequent Symmetry parallel architecture.

Oracle Corporation (NASDAQ:ORCL), headquartered in Belmont, Calif., is the largest supplier of DBMS software for the UNIX marketplace, as well as for the entire computer industry, and is the third largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as families of financial, manufacturing and government applications packages.

All Oracle product are available on PCs, minicomputers and mainframes, and ORACLE is the first and only database to run on supercomputers.

For further information about Oracle, call Oracle corporate headquarters at 800-345-DBMS (345-3267), or write to Oracle at 20 Davis Drive, Belmont, CA 94002. About Sequent

Sequent Computer Systems Inc. is a leading supplier of UNIX-based, parallel computers for both commercial and technical database applications. The company, which employs more than 1,000 people, reported third quarter 1989 revenues of $40.4 million. Since the launch of its parallel processor family in 1984, Sequent has installed more than 2,000 systems worldwide.

SAN MATEO, CA (JAN. 16) BUSINESS WIRE - Viewpoint Systems, a pioneer in software for designing customized graphical user interfaces to mainframe applications, Tuesday announced an agreement with Information Science Inc. (InSci), of Montvale, NJ.

Viewpoint will provide its I/F Builder and I/F Manager graphical user interface development product for InSci's mainframe Human Resource Management Software (HRMS) offerings targeted at Fortune-class companies. The agreement is valued at $3 million during the next three years.

Viewpoint's I/F Builder and I/F Manager will be utilized with all of InSci's mainframe applications: SAA, Classic and Database. Shipped with the products will be a set of Windows-based panels that have been converted from InSci's mainframe-based 3270 visual screen displays. In the future, InSci will provide clients with enhancements that include both advanced and customized views of multiple 3270 screens.

InSci is the human resource industry's first full-service systems integrator. The company offers a variety of HRMS software and now has the largest installed base of all IIRMS companies supporting large-scale IBM environments. InSci markets its products and services directly to IBM's 2,000 largest mainframe customers.

With headquarters in San Mateo, Calif., Viewpoint Systems Inc. provides graphical user interface design tools that dramatically reduce the time and cost requirements for creating IBM SAA-compliant interfaces.

Viewpoint I/F Builder and I/F Manager are targeted at Fortune-class corporations in a wide range of industries including banking and finance, healthcare, aerospace, manufacturing and utilities.

RESEARCH TRIANGLE PARK, NC (JAN. 16) BUSINESS WIRE - CompuChem Corp. (NASDAQ:CCEM) Tuesday announced that it has consummated the acquisition of Lifedata Medical Services, Inc. for $6 million in cash.

John Napiecek, Lifedata's President, will continue to hold this position at the new CompuChem division which will remain at its present headquarters in Overland Park, Kansas.

As announced on November 17, 1989 when CompuChem signed the letter of intent, Lifedata generated approximately $11 million of revenues for the twelve months ended December 31, 1989 primarily through its nationwide life insurance examination business. Lifedata contracts with 3,000 medical examiners who perform physical examinations on life insurance applicants in 10,000 cities and recently entered into the urine collection business for the drug testing market.

Kees Verkerk, President and CEO stated, ''CompuChem now is the sole Forensic Drug Testing Laboratory that has a paramedical network. We have enhanced our competitive position and leadership in the drug testing marketplace. This strategic alliance will enable CompuChem to manage corporate drug testing programs from start to finish under forensic quality procedures. Also, Lifedata's life insurance examination unit is expected to continue its growth due to the increasing volume of physical examinations and diagnostic tests required by life insurers.''

Verkerk also stated that he expects that with CompuChem's leadership and financial resources, Lifedata will expand its geographic coverage and market penetration in major metropolitan areas.

CompuChem Corp., through its two subsidiaries, CompuChem Laboratories, Inc. and ChemWest Analytical Laboratories, Inc., provides specialized analytical testing services for the accurate measurement of toxic chemicals and hazardous wastes in the environment, and urinalysis testing services for the detection of drugs of abuse.

The company also provides on-line data management systems for use by customers in managing their environmental and drug testing data bases. The company's environmental testing services are provided to major industrial companies, waste management companies, and consulting engineering firms, as well as the Environmental Protection Agency. The company's forensic drug testing services are provided to the military, other government agencies and major industrial firms.

#90016b0654 01/16/1990 ~Business Wire

NORTH MIAMI BEACH, FL (JAN. 16) BUSINESS WIRE - Home Intensive Care, Inc. (NASDAQ/NMS:KDNY (common stock) and KDNYW (warrants)) Tuesday announced results for the fiscal year ended September 30, 1989.

Revenues for fiscal 1989 rose to $57,438,000 from $27,712,000 in fiscal 1988. For the fiscal year ended September 30, 1989, the Company had a net loss of $2,606,000 or $.29 per share, compared to net income of $2,482,000 or $.26 per share in fiscal 1988. The loss in fiscal 1989 is the result of a pre-tax charge of $8,827,000 for closing costs and the write-down of assets of a portion of the Company's home dialysis business.

On November 21, 1989, the United States Congress passed the Budget Reconciliation Act of 1989. This Act contains a provision that reduces the Company's present reimbursement rate for home dialysis by approximately 50 percent effective February 1, 1990. As of December 1, 1989, approximately 90 percent of the Company's home dialysis patients were covered by Medicare, and accordingly, the Company will no longer be able to provide home dialysis to a majority of its Medicare patients after January 31, 1990.

The Company's two dialysis clinics will not be affected by the Act and the Company plans to expand these operations and is considering opening additional clinics in various locations.

James P. Cefaratti, President of Home Intensive Care commented, ''We are well ahead of schedule in implementing our strategic plan to penetrate the home infusion therapy marketplace. Home infusion therapy, which enables high-tech health care products and services, such as intravenous antibiotic therapy, nutrition and chemotherapy, to be administered at home is now approximately a $950 million marketplace and continues to grow. Thus far, we have established nine regional home infusion therapy offices, 26 satellite offices and numerous other points of service where we administer home infusion therapy.

''Home Intensive Care remains in a strong financial position with over $10 million in cash and cash equivalents at December 31, 1989. I believe that with the outstanding management team we have assembled, together with the highly-skilled trained medical staff we employ throughout the country we are well-positioned to become a driving force in providing high-quality infusion therapy products and services, concluded Mr. Cefaratti.''

Home Intensive Care, Inc. provides high-tech home health care including supervised chronic home hemodialysis services and home infusion therapy. The Company also operates two kidney dialysis centers and 24-hour acute kidney dialysis services in many metropolitan areas.

Insurance	46,027	27,092	157,223	78,966
Total net revenues . . .	308,764	275,381	$1,138,327	$963,254
Income before income taxes	34,345	29,723	127,253	118,511
Income taxes	14,116	12,309	52,301	48,769
Net income	$ 20,229	$ 17,414	$ 74,952	$ 69,742
Earnings per common share	$.55	$.47	$2.02	$1.86

Daniel A. Hillenbrand, chairman of the board, stated that on a comparable fourth quarter basis, which included one extra week in 1988, both Industrial and Insurance groups contributed to 1989's 12.1 percent increase in total revenues to $308.8 million and 15.5 percent rise in operating profit to $37.8 million. Net income of $20.2 million and earnings per share of $.55 jumped 16.2 percent and 17.0 percent, respectively, primarily due to strong performances in all segments except Caskets. Decreased casket unit volume was driven by weak sales on a lower death rate.

For the year, Hillenbrand Industries consolidated revenues exceeded a significant milestone climbing to $1.1 billion, an 18.2 percent increase over 1988's previous record year which contained one extra week. Earnings per share of $2.02 on net income of $75.0 million also set new levels of

achievement, rising 8.6 percent and 7.5 percent, respectively.

Operating profit lagged revenue growth due primarily to the performance of the Casket segment. The Casket segment's marginal revenue gain of 2.3 percent to $350.2 million and disappointing operating profit of $57.0 million, a 13.3 percent decrease, suffered from higher fixed costs associated with increased capacity, material cost inflation and lower market demand. The Health Care segment, consisting of Hill-Rom and SSI, had an outstanding year due to strong product demand at both companies. Revenues were up 15.8 percent to $469.4 million with a corresponding operating profit increase of 15.8 percent to $81.1 million in our largest segment. Durables revenues grew 18.3 percent to $161.5 million on solid increases at both Medeco and American Tourister. Despite higher materials costs in these businesses, operating profit of $14.6 million rose 18.4 percent for the year. Forethought, on a revenue increase of 99.1 percent to $157.2 million, achieved it's first full year of profitability, ahead of expectations.

WAYLAND, MA (JAN. 16) BUSINESS WIRE - Candela Laser Corp. announced Tuesday that it has received U.S. Patent Number 4887600 covering the use of pulsed lasers to break down objects within the body.

The company stated that this significant patent covers multiple medical procedures, including treatment of kidney stones, gallstones, angioplasty and other calcified material in the body. This patent is the result of collaborative work with Massachusetts General Hospital, which is the co-owner of the patent.

MGH has provided Candela an exclusive license to commercialize the various medical applications for this patent. Dr. Horace W. Furumoto, chairman of the board of Candela and Dr. Graham Watson, formerly a Research Fellow in the Wellman Laboratory of Photomedicine at MGH are co-inventors. Dr. Furumoto stated, ''We are extremely pleased to obtain this patent which covers Candela's medical laser systems in the areas of urology, gastroenterology and angioplasty. This patent will help establish Candela as a dominant force in these major markets.''

NORTH PALM BEACH, FL (JAN. 16) BUSINESS WIRE - FPL Group Inc. (NYSE:FPL) Tuesday confirmed reports that it was reevaluating its alternatives with respect to its major non-utility subsidiary, Colonial Penn Group Inc.

Colonial Penn is a premier direct response provider of personal lines insurance primarily to the age 50-and-over market, based in Philadelphia.

''We have been carefully reviewing all of FPL Group's operations throughout 1989 in terms of developing our long-term strategy,'' James L. Broadhead, president and chief executive officer, said.

''In large part, these deliberations have been driven by the large capital requirements we anticipate will be needed to meet the increased customer demand in our core business and principal subsidiary, Florida Power & Light Co.

''With respect to Colonial Penn, we have retained Goldman, Sachs & Co. to assist us in evaluating all available options, including a possible joint venture with another company, a spin-off of the unit to FPL Group shareholders, sale of the company, or continuing our current ownership,'' Broadhead said.

FPL Group is a diversified holding company whose operations include one of the nation's largest electric utilities, non-utility energy projects, agriculture, real estate, technical services and cable television, in addition to Colonial Penn.

FPL Group's shares are traded on the New York, Tokyo and London stock exchanges.

RIVIERA BEACH, FL (JAN. 15) BUSINESS WIRE - Tele-Optics Inc. (NASDAQ: TOPTU) Tuesday announced that it had been advised by Harold P. Koenig, James E. Davis, and H. Bradley Ganther, the company's senior executive officers and principal stockholders that they have executed agreements with Corvus Corp. granting Corvus options to purchase all of their shares of Tele-Optics common stock.

The options, which expire March 31 cover an aggregate 723,650 shares, representing approximately 44 percent of the total outstanding shares and provide for payment for the shares over an approximately three year period.

If the options are exercised, a change in control of Tele-Optics would result. In order to provide continuity of management, Davis and Ganther have agreed to enter into new employment agreements with Tele-Optics and Koenig has agreed to be employed by Corvus in connection with the continued development and growth of the business, if the Corvus purchase is completed.

Corvus Corp., headquartered in Vienna, Va., is a privately held firm specializing in high technology products and systems for the communication and intelligence markets worldwide. Corvus is presently comparable in size to Tele-Optics in terms of sales and net worth.

TELE-OPTICS INC. is engaged in the development, manufacture and marketing of optical, electronic, and electro-optical products and systems for use in the medical and defense industries.

HADDONFIELD, N.J. (JAN. 16) BUSINESS WIRE - United Medical Corp. (ASE:UM) announced Tuesday that the definitive purchase agreement has been executed in connection with the previously announced proposed acquisition by United Medical's division, Cardio Data Systems, of Clinical Data Inc.'s clinical Holter monitoring division.

The purchase price is $4.5 million payable in cash at closing. The closing of the acquisition will occur immediately upon shareholder approval of the transaction by Clincal Data's shareholders, which is expected to occur during the first week of February.

Cardio Data Systems is the nation's leading provider of Holter monitoring services, which is the analysis of 24 hour electrocardiograms. Cardio Data Systems provides such services to hospitals, physicians and other health care providers in connection with the diagnosis or treatment of cardiac patients and also provides Holter monitoring analysis to approximately 40 major pharmaceutical companies in connection with new drug applications.

While Clinical Data is divesting its clinical Holter monitoring business, it will continue to provide Holter monitoring analysis in the new drug research area.

United Medical's stock is traded on the American Stock Exchange under the symbol UM.

LOS ANGELES (JAN. 16) BUSINESS WIRE - L.A. Gear Inc. (NYSE:LA), a leading designer and marketer of high-quality fashionable performance footwear, related apparel products and accessories, Tuesday announced the signing of a letter of intent with the Asics Corp. to market and distribute L.A. Gear products in Japan.

''Our fashionable line of shoes, apparel and accessories combined with Asics' distribution will give us a strong presence in Japan immediately,'' said Robert Greenberg, chairman of L.A. Gear. ''With worldwide sales of almost $1 billion last year, Asics is one of the largest athletic companies in the world and is, in our opinion, the premier sporting goods company in Japan.

''Our new Michael Jackson line of shoes should be particularly popular given Michael's mega-star status in Japan.''

Killick Datta, L.A. Gear vice president of international operations, said Japanese sales this year should account for about 10 percent of the total international revenues: ''The Japanese people have a fascination for Los Angeles and all that it stands for.

''With this agreement, L.A. Gear will be able to use Asics' resources and selling experience, coupled with our own dynamic marketing and creative products. All of this will help L.A. Gear become a major force in the Japanese market.''

The agreement applies only to Japanese sales. Asics and L.A. Gear will otherwise maintain separate operations worldwide, including the United States.

L.A. Gear started its international department in 1987. Since then it has expanded to include sales of L.A. Gear products in more than 100 countries, including the Pacific Rim, Australia, Europe, South and Central America, Africa and the Middle East.

Based in Los Angeles, L.A. Gear markets and designs performance fashion footwear, apparel and accessories. Sales for 1989 topped the $600 million mark, making L.A. Gear the third-largest athletic footwear company in the United States.

FARMINGTON, CT (JAN. 16) BUSINESS WIRE - Otis Elevator Co. and the New Tokyo International Airport Authority (TIAA) Tuesday announced the signing of a contract in excess of US$15 million for the installation of the first airport people mover system in Japan.

Construction is scheduled to begin later this year and is expected to take about two years to complete.

The system, known as the Otis Shuttle, incorporates elevator technology into a horizontal transit system. The Otis Shuttle uses a standard gearless traction elevator machine to drive passenger cars, which hover above a concrete guideway on a cushion of air.

The Otis HOVAIR air-film suspension system lifts each shuttle car approximately one-half inch off the ground, providing a smooth ride in any weather. System control is completely automatic.

The Otis Shuttle is part of a two-building expansion to the existing airport complex, located in Narita, approximately 60 miles from Tokyo. The expansion will consist of a main building where departing passengers will purchase tickets, check baggage and clear security, and arriving passengers will claim baggage and secure ground transportation. A satellite building will house airline gates. The Otis Shuttle will connect the two buildings.

The contract calls for two parallel single-lane elevated guideways, each with a dual lane bypass in the middle, allowing cars traveling in opposite directions to pass each other. Two 150-passenger vehicles will operate on each guideway at a speed of 13 miles per hour (6 meters per second).

Otis has installed similar shuttle systems in Tampa, Fla., and Serfaus, Austria.

Otis Elevator Co. is a wholly owned subsidiary of United Technologies Corp. United Technologies provides a broad range of high-technology products and support services to the aerospace, building systems and automotive industries.

The Hartford, Conn., based corporation's best-known products include Pratt & Whitney aircraft enqines, Carrier heating and air conditioning systems, Otis elevators and escalators, Sikorsky helicopters, Hamilton Standard aerospace systems, Norden defense systems, and UT Automotive components and systems. Several UTC units supply equipment and services for the U.S. space program.

DAYTON, OH (JAN. 16) BUSINESS WIRE - BLOC Development Corp. (NASDAQ:BDEV) and The Reynolds and Reynolds Co. (NYSE:REY) Tuesday announced they had entered into definitive corporate license and reseller agreements relating to BLOC's F3 Forms Automation System.

As part of the corporate license, Reynolds will use BLOC's F3 Forms Automation software in its production and key sales offices.

In a related 4-year agreement, Reynolds will become a value-added reseller to market and license the F3 System to its customer base. The F3 Forms Automation System, presently under development, is a professional, high-end software product for complete forms processing for which Reynolds has been a beta site.

''We are very pleased with this important alliance,'' said Frank Millman, BLOC's chairman and CEO. Reynolds is a key player in business forms manufacturing and is well-equipped to position our F3 Forms Automation System in that industry,'' Millman continued.

Reynolds, the fourth largest business forms manufacturer in North America, has worked with BLOC since last July to adapt the technology to meet the business needs of its customers. ''BLOC's F3 Forms Automation System improves the efficiency of the form order-obtainment process by reducing the time it takes to create customer proofs,'' said Dan Dittman, senior vice president, Reynolds' Business Forms Division.

BLOC's F3 Forms Automation System is comprised of three modules - F3 Pro Designer, F3 Design by Data and F3 Fill. F3 Pro Designer is a package designed for advanced business forms composition for the pre-printed forms industry and for corporate forms management. F3 design by Data is designed to help manage information flow by composing both paper and electronic forms at the same design session.

F3 Fill is the system module which automates form filling and which also allows a form to be printed or networked.

Based in Coral Gables, Fla., BLOC develops, publishes and markets business and personal productivity software for the IBM PC, PS/2 and compatible market.

Reynolds and Reynolds, headquartered in Dayton, is a major supplier of information processing systems, including business forms and computer systems to automotive, professional, medical and general business markets.

SOUTH PLAINFIELD, NJ (JAN. 16) BUSINESS WIRE - CREATIVE LEARNING PRODUCTS, INC. (NASDAQ Symbols:CLPI, CLPIU, CLPIW) Tuesday announced that the Company entered into a letter of intent to form a joint venture with TPC Communications, Inc. of Sewickley, Pennsylvania.

CREATIVE LEARNING PRODUCTS and TPC Communications intend to produce a series of children's television program pilots, that will be offered in syndication to television stations and cable systems nationwide.

The programs will be based on existing Creative Learning Product's videos; ''Let's Sing and Dance'' and the ''Mommy I Can Learn Myself'' series. The ''Fun Way To Learn'' motto and existing products will also be incorporated into the programming.

The companies also plan to develop a Creative Learning Products merchandising program utilizing interactive video information centers. This program is planned to debut at the Back to School trade show and the International Toy Fair in January and February of 1990.

Under the letter of intent, initial research and development costs for these projects will be assumed by TPC Communications, although the details of the profit sharing arrangement, as well as other essential terms, have not been finalized. The letter of intent is a preliminary, non-binding expression of intent by the parties.

Peter Jegou, Chief Executive Office of CREATIVE LEARNING commented; ''Although the essential terms of the arrangement must be negotiated and reduced to a definitive agreement, we are all excited at the prospect of creating quality educational television programming for Saturday mornings that will incorporate the use of our philosophies and products. We anticipate that the interactive video merchandising program, with the technical support of TPC, will assist retailers and benefit our Company by increasing sales and profits.''

NEW YORK (JAN. 16) BUSINESS WIRE - Airship International Ltd. (NASDAQ:BLMP) and Airship Industries Ltd. (''AIRSY'') announced Tuesday that they have signed a letter of intent pursuant to which Airship International Ltd., ''BLMP,'' will acquire assets and operations of the North American commercial operating subsidiary of Airship Industries Ltd. ''AIRSY.''

The subsidiary, (AI USA) presently assembles and operates airships for the parent company while maintaining an airship support and hanger facility in North Carolina. Included in the acquisition will be all North American commercial clientele of Airship Industries Ltd. (USA) ''AIRSY'', all related spare parts and equipment maintained in North America, as well as two (2) additional airships of the type presently operated by Airship International Ltd. ''BLMP.''

The completion of the acquisition is subject to the negotiation of final terms, the securing of financing and the execution of a definitive agreement.

Airship International Ltd. currently owns and operates a state-of-the-art 194 foot Airship Industries Skyship 600 on behalf of the Metropolitan Life Insurance Co. The company's Skyship 600, which is fully Federal Aviation Administration Certified, is presently on a cross country promotional tour appearing as an eye-in-the-sky television network camera platform for major sporting events and special events.

The Skyship is equipped with the world's largest full color NightSign depicting logos, messages and animated graphics that can be seen from over a mile away. The Skyship is leased to Met Life for a term of 36 months with a potential value to the company of over $10.8 million dollars.

SYRACUSE, NY (JAN. 16) BUSINESS WIRE - Diagnostic Medical Instruments Inc. reported revenues of $1,225,000 in the first quarter ended Dec. 31, 1989 compared to $1,780,000 for the comparable quarter a year ago.

The company recorded a net loss of $29,000, or 1 cent per share, for the first quarter compared to a net loss of $16,000, or less than 1 cent per

share, recorded in the first quarter of fiscal year 1989.

Increasing sales of the new Altair PC system have not yet offset the decline in sales of older models. Despite lower total sales, the company recorded only a modest loss due to cost cutting measures taken during the past year.

Diagnostic Medical Instruments Inc. designs, manufactures and markets ambulatory ECG systems used in the diagnosis of cardiovascular problems.

NASHVILLE, TN (JAN. 16) BUSINESS WIRE - Northern Telecom (NYSE: NT) Tuesday announced major enhancements to its cellular mobile telephone network systems to improve system performance, increase the number of cells supported and enhance the handoff process.

"In 1991 the introduction of digital cellular radio subsystems will begin a process whereby cellular networks can accommodate hundreds of thousands of subscribers without the congestion occurring today in some big-city analog-served systems," said Michael Patriarche, vice president, Cellular Systems, Northern Telecom Inc.

"This projected subscriber increase will heavily tax the capacity limits of existing switching architectures. Northern Telecom plans to introduce digital cellular radio equipment in the near future. The enhancements we are announcing today will basically take the issue of switching capacity off the table for Northern Telecom's digital cellular customers."

A new sub-system, called the Intelligent Cellular Peripheral (ICP), is collocated with the DMS-MTX cellular switching system. The ICP provides a distributed processing approach to managing cell site communications by off-loading call processing input and output tasks from the basic switching system. The resulting load reduction on the switch central processor can substantially increase the peak capacity of the system.

An integral part of Northern Telecom's cellular system program is a series of ongoing DMS-MTX SuperNode processor capacity enhancements. The current processor operating with ICPs is capable of 180,000 busy hour call attempts (BHCA). Planned evolution will bring BHCA capacity to 500,000.

"The new ICP complements the current cell site controller equipment installed in Northern Telecom Cellular networks," said Piyush Sodha, director of cellular product management, Northern Telecom Inc. "With ICP, cellular service providers can boost the performance and the top capacity of their cellular systems. The architecture was designed to allow for quick handoff in small cell configurations, without impacting system capacity."

Handoff messaging and paging messaging, previously controlled by the central processor, can be controlled by the ICP within a block of cells, making handoff faster and more reliable. Each ICP supports up to eight cells, and a DMS-MTX system supports up to 64 ICPs.

Communication between cell sites and the ICPs takes place over T1 links, with 23 channels carrying voice and data traffic and the remaining channel carrying messaging and control information used by the system.

#90016b0706 01/16/1990 ~Business Wire

CAMBRIDGE BAY, WOMBAT-HOPE BAY PROPERTY, N.W.T. (JAN. 16) BUSINESS WIRE - HLX Resources Ltd. ("HLX") is pleased to announce it has successfully reached an agreement in principal with Noranda Exploration Co. Ltd. ("Norex") whereby HLX may acquire a 25 percent interest in two located mineral claims and a mining lease comprising 122 unpatented mining claims.

HLX and Norex are now in the process of preparing a formal agreement. This property is located in the Hope Bay area of the NorthWest Territories approximately 125 kms. southwest of Cambridge Bay and 725 kms. northeast of Yellowknife.

Under the terms of the agreement HLX will fund the first $500,000 of exploration work ($100,000 paid) and one half of the next $2,750,000 for total investment by HLX of $1,875,000. Upon completion of this work HLX and Norex will each hold a 25 percent working interest, while Norex may earn an additional 25 percent working interest, by taking the property to production.

The property as a whole is subject to either a three percent Net Smelter Return royalty or 15 percent net profits interest.

This general area has been explored since the mid-1960's during which time four areas of interest were identified. High grade silver deposits were explored in 1973 and approximately 70,000 ozs. of silver was extracted. Recent interest has focused on gold showings in two areas.

On the WOMBAT zone a number of encouraging samples (See Sampling Results) were obtained during a trenching program conducted on outcrop along the shore of Roberts Lake. The results of this work were very encouraging and prompted Norex and HLX to become involved. The IDA POINT Showing also generated some high grade sample results as indicated below.

SAMPLING RESULTS WOMBAT SHOWING (Norex Sampling)

	GRADE	WIDTH
Trench 1	10.96 g/t Au	1.65 m
	6.94 g/t Au	1.0 m
Trench 2	5.8 g/t Au	5.64 m

Trench 3	18.1	g/t Au	3.5 m

IDA POINT SHOWING (Abermin Sampling) Trench Assay Range from

a Maximum of:	75.3	g/t Au	1.0 m
to an Average of:	12.01	g/t	1.35 m

During the fall of 1989 two geophysical surveys were conducted to define the mineralized areas. This work was successful in delineating three anomalous zones which will be followed up in early spring with additional geophysical surveys and diamond drilling.

TUSTIN, CA (JAN. 16) BUSINESS WIRE - Trimedyne Inc. (NASDAQ: TMED) announced Tuesday it received approval from the U.S. Food and Drug Administration ("FDA") to market its OPTILASE Model 1000 laser system for a significant number of addditional medical applications.

The OPTILASE 1000 laser is now approved for use in plastic, dermatological and general surgery, as well as for earlier approved uses in cardiovascular, pulmonary, urology, gynecology, gastrointestinal, and neurological medicine.

In commenting on the approval, Howard K. Cooper, president of Trimedyne said, "Our Model 1000 laser is now approved for the widest range of medical applications of any laser in the United States. In addition to providing a less painful therapy, shorter recovery period and reduced risk to the patient, this approval will enable hospitals to use our laser for many additional applications, substantially reducing its cost per procedure. As such, the marketability of the system is expected to be substantially enhanced."

Trimedyne is the leading manufacturer of proprietary lasers and laser catheters for removing blockages from blood vessels as an alternative to bypass surgery or balloon angioplasty and markets these products in the United States and 32 foreign countries.

MANCHESTER, NH (JAN. 16) BUSINESS WIRE - Bank of New Hampshire Corp. Tuesday reported net income for 1989 of $7.8 million, and earnings per share of $2.32.

Both of these figures are six percent less than the previous year's earnings of $8.3 million and $2.47 per share. Fourth quarter income was $1.3 million as compared to $2.5 million in 1988, representing 40 cents and 74 cents in earnings per share, respectively.

Davis P. Thurber, chairman, pointed out that the decline in earnings is largely the result of the previously announced fourth quarter addition of $1.5 million to the Provision for Possible Loan Losses, an impact of approximately 29 cents per share.

He stressed, however, that despite a generally softer economy and an increase in the number of problem loans, the company's net income was only $475,000 less than the record earnings in 1988 of $8.3 million.

Bank of New Hampshire Corp., headquartered in Manchester, is a five-bank holding company. There are 28 offices of the affiliates in 16 different communities throughout the southern, central, coastal and lakes regions of the state.

#90016b0719 01/16/1990 ~Business Wire

ATLANTA (JAN. 16) BUSINESS WIRE - Stouffer Hotel Co. Tuesday announced plans for a $50 million, 400-room luxury hotel at Hartsfield Atlanta International Airport.

The project is a joint venture of Stouffer and London & Edinburgh Trust PLC and Balfour Beatty Developments Ltd., both of London. The hotel will be part of the Hartsfield Centre complex which will include premium office space developed by London & Edinburgh and Balfour Beatty.

Stouffer, a unit of Nestle Enterprises Inc., will operate and jointly own the hotel, to be located on airport property at the site of the original terminal building. Construction is expected to begin in fall 1990, with completion scheduled for summer 1992.

The 10-story hotel will feature a restaurant, entertainment lounge, indoor swimming pool and health club with sauna and steam rooms. Meeting space will total 21,000 square feet including a grand ballroom of more than 11,000 square feet, 11 conference rooms and two executive boardrooms. The property will contain 19 luxury suites including a Presidential Suite. Guest rooms and suites overlooking the airport's north runway will offer balconies.

The top level will be a Club Floor, a Stouffer feature offering concierge service, private lounge, complimentary continental breakfast and evening hors d'oeuvres, and special in-room amenities. The hotel will offer 24-hour room service and airport shuttle service.

The property will be the company's third in the Atlanta area, joining the Stouffer Waverly Hotel in northeast Atlanta and Stouffer PineIsle Resort in Lake Lanier Islands.

''The Stouffer Concourse Hotel will be one of the finest hotels in Atlanta and the premier property at the airport,'' said William N. Hulett, president of Stouffer.

Stouffer has given the ''Concourse'' designation to its airport hotels which are located in Denver, Los Angeles, St. Louis and Washington D.C. The Stouffer Concourse Hotels at Stapleton International Airport in Denver and Los Angeles International Airport were named the top two airport hotels, respectively, in a recent ranking of the 10 best airport properties in the U.S. by the prestigious Andrew Harper's Hideaway Report, a ''privately published newsletter dedicated to the discovery of peaceful vacation and executive retreats for the sophisticated traveler.''

Architects for the hotel are Thompson, Ventulett, Stainback & Associates Inc. and Carl Trimble Architects Inc., both of Atlanta.

Stouffer owns or operates 41 hotels and resorts located throughout the continental U.S., Hawaii, Mexico and the Caribbean.

CLINTON, N.J. (JAN. 16) BUSINESS WIRE - Foster Wheeler Corp., has acquired Barsotti's Inc., one of the largest asbestos abatement contractors in the United States. Barsotti's is headquartered at Santa Fe Springs, Calif.

Barsotti's was founded in 1980 as an industrial coatings contracting firm and began asbestos abatement work in 1982. The company has grown rapidly, building a reputation for top quality and workmanship in over 3,000 completed projects.

The firm has handled jobs ranging from small abatement projects to major high rise buildings and large industrial sites and is recognized as an industry leader in full floor removal and encapsulation of asbestos in large buildings under time-pressured situations.

''The acquisition of Barsotti's significantly enhances our presence in the national asbestos abatement industry,'' said Louis E. Azzato, Foster Wheeler's chairman and CEO, ''and advances our established worldwide commitment to environmental cleanup.'' Terms of the acquisition were not released.

Foster Wheeler Corp. is an international engineering, construction, manufacturing and management services organization with 23 subsidiaries operating worldwide.

The corporation is involved in a number of remedial investigations, feasibility studies and remediation projects for private customers and government agencies, in addition to its traditional activities of serving the power and process industries.

Foster Wheeler is heavily involved in other environmentally related activities such as resource recovery and the supply of fluidized bed boilers and Low NOx coal burners to industry and electric utilities. These latter clean-burning technologies lower boiler stack emissions which could contribute to acid rain.

Foster Wheeler's world headquarters are in Clinton, N.J.

WALTHAM, MA (JAN. 16) BUSINESS WIRE - Meditrust announced Tuesday an 18 percent increase in cash flow from operating activities and a 56 percent increase in revenues for the year ended Dec. 31, 1989, as compared to 1988.

Cash flow from operating activities, the basis on which dividends are determined, was $2.21 per share, or $34,761,000, for 1989 vs. $2.05 per share, or $29,407,000, for 1988.

As a result of increased cash flow, Meditrust has declared dividends relating to the year ended Dec. 31, 1989, of $2.185 per share, compared to $1.97 per share in 1988, an increase of over 10 percent, including a special dividend of 3 cents per share in each year.

Revenues for the year ended Dec. 31, 1989, were $71,601,000, up from $45,897,000, for the year ended Dec. 31, 1988. For the year ended Dec. 31 1989, net income was $1.37 per share, vs. $1.17 per share, in 1988. These increases were primarily the result of additional investments made by Meditrust.

The company specializes in the sub-acute sector of the health care industry, including investment in rehabilitation hospitals, long term care faciliites, alcohol and substance abuse treatment centers, psychiatric hospitals, and retirment living communities. A.M.A. Advisory Corp., a Delaware Corporation, is engaged as the advisor to Meditrust.

ALEXANDER CITY, AL (JAN. 16) BUSINESS WIRE - Russell Corp. (NYSE:RML) Tuesday reported record results for the fourth quarter and the year ended Dec. 30, 1989.

The fourth quarter produced record sales of $203,849,000, a 35 percent increase over the $151,428,000 posted in the fourth quarter of 1988. For the quarter, net income advanced 23 percent to $21,422,000 from the $17,431,000 reported for the like period in 1988. This represented a per share increase of 18 percent, 52 cents vs. 44 cents, the prior year.

The company finished the year with $687,954,000 in sales, a 30 percent increase over the previous year's $531,136,000. Net income for the year increased 19 percent to $64,163,000 compared to $53,728,000 in income for 1988. On a per share basis, earnings increased from $1.36 in 1988 to $1.57 in 1989, a 15 percent increase.

Russell attributed the record year to continued attention to its basic business focusing on the company's dedication to the use of the latest technology to produce the highest quality products with the best customer service in the industry.

A company spokesman stated that throughout the year the largest gains in sales were under the JERZEES and RUSSELL ATHLETIC labels. Excluding acquisitions, sales increases were up almost 17 percent for the year. For the fourth quarter sales of those traditional Russell products increased almost 23 percent over last year's fourth quarter.

The spokesman added that in its first year after acquisition, Cross Creek Apparel Inc. (formerly Quality Mills) did not make a positive contribution to earnings. The company is optimistic that changes made at Cross Creek during 1989 will result in a profit for 1990.

Russell Corp. is an integrated manufacturer and marketer of leisure apparel, athletic uniforms and a comprehensive line of lightweight woven fabrics. The company's common stock is listed on the New York Stock Exchange and several regional exchanges under the symbol RML.

FAIRFAX COUNTY, VA (JAN. 16) BUSINESS WIRE - Atlantic Research Corp. (ARC) has won a $1.2 million contract for a National Institute of Health research project on Auto-Immune Deficiency Syndrome (AIDS).

The Information Systems Division of ARC Professional Services Group will develop and manage a computerized database to track the collection and analysis of blood specimens used in AIDS research. The company is teamed in the five year award with Research Triangle Institute, the prime contractor on the project.

ARC Professional Services Group has been providing biomedical computing support to NIH since 1978. Under the new contract, blood specimens will be collected from numerous geographical areas and occupational categories. Analyses will be performed to determine the incidence of AIDS and to hypothesize which occupations are at higher risk.

ARC's computer research and analytical services assist scientists investigating the cause, treatment and prevention of cancer; a major real-time program helps to screen 40,000 cancer treatment agents each year. ARC computer scientists also generate databases that, for instance, depict cancer patterns through family histories, geography, treatment records and death reports.

Others compute various epidemiologic statistics such as relative risk estimates, lifetime risks of particular cancers and age/calendar year-specific death rates.

In addition, the company has developed a microbiological system for the Food and Drug Administration and the Center for Disease Control that is used around the world to classify types of microorganisms.

In addition to the ARC Professional Services Group, which supplies professional and technical services to both government and commercial clients, Atlantic Research Corp. is also a leading developer and producer of solid propellant rockets, gas generators, liquid propulsion systems and advanced composite materials through the ARC Aerospace Group.

Atlantic Research is a wholly owned subsidiary of Sequa Corp. of New York, a diversified technology-based company with principal interests in the fields of aerospace, machinery and metal coatings, marine transportation, especialty chemicals and professional and technical service. Sequa is Fortune 500 company listed on the New York Stock Exchange.

BARTLESVILLE, OK (JAN. 16) BUSINESS WIRE - Phillips Petroleum Co. Norway (NYSE:P), operator for license 018, completed the drilling and testing of the 2/7-21S well in the Norwegian sector of the North Sea.

The well was drilled deviating from the same location as the 2/7-20 discovery well drilled in 1988. The well's bottom hole location was about 3,700 feet southeast of the 2/7-20. The actual vertical depth was approximately 15,400 feet.

Drill stem tests yielded a maximum production of 7,772 barrels of oil per day and 15.8 million cubic feet of gas per day through a 48/64-inch choke.

Drilling was performed by the Ross Isle rig in a water depth of about 230 feet.

The well will be temporarily abandoned pending a review of the test results. Meanwhile, the rig will be moved to re-enter and test the 2/7-19X well.

The partners in license 018 are: Phillips Petroleum Co. Norway (operator), 36.960 percent; Norske Fina A/S, 30.000 percent; Norsk Agip A/S, 13.040 percent; Elf Aquitaine Norge A/S, 7.594 percent; Norsk Hydro A/S, 6.700 percent; Total Marine Norsk A/S, 3.547 percent; Statoil A/S, 1.000 percent; Eurafrep A/S, 0.456 percent; Coparex A/S, 0.399 percent; and Cofranord A/S, 0.304 percent.

LOS ANGELES (JAN. 16) BUSINESS WIRE - Jeff H. Reynolds, chairman of California Pacific International Holdings Co. PTE Ltd. of Singapore and of Weatherby Investments Inc., announced Tuesday that their organization was withdrawing from negotiations with Bond Corp. Holdings Ltd. regarding the acquisition of a controlling interest therein.

Reynolds cited the continuing legal and mounting financial problems at Bond Corp. as the principal reasons for the withdrawal.

Reynolds stated that their bankers and investment partners had not been successful in obtaining satisfactory financial commitments to proceed with the negotiations in a manner consistent with California Pacific's

objectives.

Reynolds stated that his organization was still interested in exloring opportunities for acquisitions and joint ventures in Australia and the Pacific Rim.

TEMPE, AZ (JAN. 16) BUSINESS WIRE - FCS Laboratories Inc. (NASDAQ:FCSI) Tuesday announced a net loss of $568,213, or 13 cents per share, for the fiscal year ended Sept. 30, 1989.

In the year earlier period FCS incurred a loss of $461,167 which equalled 10 cents per share.

Sales decreased 15 percent to $4,287,220 from $5,052,039 in the prior year period.

''These results are of course disappointing,'' said Nicholas A. Gallo, III chairman and president of FCS.

''We executed an aggressive expense reduction program which largely offset the impact of the sales decline but which, without doubt, itself contributed to that decline. You can't drastically cut sales and marketing expenses and expect to maintain market share in an increasingly competitive and difficult segment. However our limited resources simply required this short-term orientation.''

Gallo pointed out that the preponderance of the loss came from the company's overseas obligations, specifically in France, and that further reduction in this involvement was in turn made extremely difficult by the company's limited resources.

''At the moment France represents a 'Catch 22' '', added Gallo.

Gallo noted that sales of animal health products increased 52 percent in fiscal 1989. ''We also launched a line of human infectious disease diagnostic kits in early December 1989. These are from an outside source of the highest quality and we will be the exclusive distributor of these to the primary care physician,''said Gallo. ''Thus there are some good basic things happening.''

Gallo delineated the company's strategy going forward as: ''Continue tight cost control and strive to offset decreased sales of human allergy

products with the increased sales of animal health products and with sales of other unique products for the primary care physicians obtained from other companies.''

Gallo also noted that the company was aggressively searching for new investors, perhaps even at the domestic operating subsidiary level, so that the company can be placed on a sounder financial footing thus permitting a longer-term orientation to be pursued.

FCS Laboratories is a healthcare company engaged in serving the general practice physician and veterinarian with diagnostic and therapeutic products for various diseases, including allergy.

TORRANCE, CA (JAN. 16) BUSINESS WIRE - Epson America Inc. Tuesday expanded its 24-pin, letter-quality dot matrix printer line with the introduction of the LQ-1010.

This new economical, wide-carriage printer satisfies the growing demand for brand-name, entry-level output devices in the 136-column format.

Epson's new LQ-1010 combines high quality printing and superior paper handling with an affordable price for small- and medium-sized businesses, work-at-home and home office users who require added carriage width for correspondence, spreadsheet and entry-level desktop presentation applications.

With a manufacturer's suggested retail price of $699, the LQ-1010 is the lowest-priced 24-pin letter-quality dot matrix printer on the market with Epson-brand performance, compatibility and reliability in a wide carriage format. It is immediately available from Epson Authorized Resellers nationwide along with a complete line of optional accessories.

''The new LQ-1010 was developed in response to increasing demand from users in small- and medium-sized businesses,'' said Eugene R. Kunde, executive vice president and general manager of Epson. ''These users are satisfied with their current 9-pin dot matrix models but need a low-priced full-featured 24-pin, letter-quality unit in a 136-column format. As the industry leader in 24-pin technology, we used our expertise to build a printer that is extremely versatile and functional, yet remains affordable.''

Kunde said that with the introduction of the LQ-1010, and the continued strong sales of the LQ-510, 24-pin, letter-quality dot matrix printing is now available to a broader audience of users. He added that while many competitive models are available on the market, Epson is the only brand-name manufacturer that offers such an extensive line of 24-pin, letter-quality dot matrix printers that are recognized for their high-performance, durability and reliability.

In addition to its 136-column carriage width, the LQ-1010 includes such standard features as: print speeds of 180 characters per second (CPS) in draft elite mode and 60 CPS in letter-quality elite mode; Epson's easy-to-use SmartPark paper handling feature set; 360 by 360 dots-per-inch graphics resolution; and a SelecType front control panel.

Epson America Inc. is a leading manufacturer and marketer of microcomputer printers and a major force in Industry Standard Architecture (ISA)-compatible personal computers serving the overall North American marketplace.

#90016b0758 01/16/1990 ~Business Wire

CHICAGO (JAN. 16) BUSINESS WIRE - United Airlines and GTE Airfone Inc. Tuesday announced the signing of an agreement that calls for GTE Airfone to equip more than 400 of United's aircraft with the SeatfoneTM system.

The new inflight service will allow passengers on United's domestic flights to place telephone calls without leaving their seats.

The contract calls for GTE Airfone to install the system in United's fleet of Boeing 737-300, 757-200 and 727-200 aircraft, plus in any future models of these aircraft that the airline might acquire. Terms and conditions of the agreement were not disclosed.

''The addition of the Seatfone system to our fleet represents yet another service enhancement for United Airlines' customers,'' said Stephen M. Wolf, United's chairman and president. ''We think our customers will appreciate both the convenience of the seatback phones and the improved call quality.''

''United's decision to offer passengers access to public telephone service at their seats while in flight is evidence of the increasing need for mobile communication options as well as United's confidence in GTE Airfone to meet those needs,'' said Sumpter Logan, president of GTE Airfone.

''Our Seatfone system is one of the newest innovations being offered by GTE in an effort to provide the public with a convenient and reliable way of keeping in touch with their business and personal associates while traveling.''

GTE Airfone will begin installing the Seatfone system on United's aircraft in May. United has offered GTE Airfone's cordless system since April 1985, when four DC-10s were equipped with the Airfone service.

The Seatfone system offers a telephone in each first class seatback and in the center seatback of each coach row. It allows passengers to make telephone calls to anywhere in the world without leaving their seats while flying over the United States.

Air travelers use the Seatfone system by inserting any major credit card accepted by the system into a slot in the seatback, which releases the telephone handset from the seatback. Passengers then slide the same card through the handset's built-in card reader, which verifies the card and records billing information. After that, a passenger simply dials the area code and telephone number.

DAYTON, OH (JAN. 16) BUSINESS WIRE - Universal Energy Systems Inc., a $30 million, high-tech, Ohio-based computer research, development and engineering company, has acquired controlling interest in Paravant Computer Systems, a Florida-based computer R & D, engineering, and manufacturing corporation.

This new relationship creates strong high-tech, turn-key operation with significantly strengthened manufacture and distribution capabilities, and expands the product line of the fastest, most rugged, and most versatile hand-held and lap-top computers in the world.

According to Dr. Krishan K. Joshi, president and chief executive officer of UES, the advanced technology implemented in UES/Paravant products results in front-line capabilities beyond those of all other computers on the market.

''For example, the ultra-high speed RISC co-processor allows the computer to perform analytical functions five times faster than the 386 desktop computer,'' said Dr. Joshi. ''And the Knowledge-Based Integration Shell (KI Shell) can integrate a wide variety of separate programs and provide well-structured decision-aiding based on information from the various

programs.''

Paravant's Vice President/Marketing, Ronald R. Simmons, points out that increased product capability will be extremely valuable to the end-user.

''We do a great deal of work with military, industrial, and commercial clients for whom the most rugged and highly versatile computer systems available are required,'' said Simmons.

''And rugged accurately describes our products which have been especially designed for harsh applications, such as underwater, in the presence of corrosive and explosive fumes, and with severe vibrations and temperatures.''

Paravant/UES products include the award-winning RHC88 and 1553 Model 100 Data Bus Analyzer, the Parabus, the RHC44, the RLT 88 and the 1553 Model 200 Data Bus Analyzer.

PAWTUCKET, RI (JAN. 16) BUSINESS WIRE - Hasbro Inc. (ASE:HAS) announced Tuesday that it has reached a tentative agreement to sell its Lancaster, Pa., manufacturing facility to the Bulova Systems and Instruments Corp.

Bulova will use the facility to consolidate its Lancaster operations as well as its operations which will be moved from Freeport, Long Island. The terms of the sale were not disclosed.

Hasbro said it would close the facility effective June 30, 1990, and would cease manufacturing in late March or early April. Operations would be shifted to existing Hasbro manufacturing facilities in Pawtucket and Central Falls, R.I., and East Longmeadow, Mass.

In making the announcement, Alan G. Hassenfeld, chairman and chief executive officer of Hasbro Inc. said, ''We will endeavor to minimize the adverse effects of the move on our employees.''

The plant was acquired by Hasbro in January, 1986, when it purchased the assets of the CBS Toy Division. The facility produces toys for Hasbro's Playskool Division and employs approximately 750 people.

Hasbro has notified the Dislocated Workers Unit in the Department of Labor and Industry of its intentions and will work with that unit to assist its Lancaster employees.

The company is developing severance packages for the salaried employees and will negotiate, with the Glass, Molders, Pottery, Plastics and Allied Workers Local 173B, equitable severance benefits for the hourly employees they represent.

''This was a difficult decision, reached through a careful analysis of our manufacturing capacity,'' said Alfred J. Verrecchia, Hasbro's co-chief operating officer. ''But, as difficult as it was, it is vital to Hasbro's future that we continue to balance our plant capacity with the manufacturing needs of our company.''

Above and beyond providing severance benefits to the effected employees, Hasbro will work with the Department of Labor to provide outplacement services. It is also in the process of contacting other employers in the Lancaster area, notifying them of the availability of these high-quality employees.

Hasbro Inc. had 1988 revenues of $1.358 billion. The company's three operating divisions include Playskool Inc., the baby and preschool division; Milton Bradley Inc., manufacturer of puzzles and board games; and Hasbro Inc., manufacturer of girls' and boys' promotional toys.

#90016b0769 01/16/1990 ~Business Wire

EVENDALE, OH (JAN. 16) BUSINESS WIRE - GE Aircraft Engines and its partners announced Tuesday that they will offer the GE90, a new high thrust, high bypass engine, to airlines as a powerplant for the Boeing 767-X and other potential widebody applications.

GE's partners in the program will include SNECMA of France and MTU of West Germany. The final go-ahead on this program is subject to the board approval of all the companies.

The GE90, which is rated from 75,000 to 95,000 pounds (333 to 422 kN) takeoff thrust, will be certified at 80,000 pounds (355.5 kN) in May 1994 and is expected to enter service on the Boeing 767-X in mid-1995 at between 70,000 and 75,000 pounds (311 to 333 kN) thrust.

The GE CF6-80C2 and -80E1, the engines currently offered for Airbus, Boeing, and McDonnell Douglas aircraft, provide thrust levels up to 75,000 pounds, with excellent performance and reliability. These engines will continue to lead the industry in this thrust class.

The GE90 extends the product line to 95,000 pounds of thrust, while maintaining GE's leadership role, with the contributions of its partners, in high thrust engine technology, reliability, and performance, as well as in reduction of noise and emissions levels.

Many factors contribute to the growing need for larger twin-engine widebody aircraft and, thus, a higher thrust engine. Worldwide air travel is steadily increasing at a rate of 5 to 6 percent annually, and that rate is even higher in Asia.

This situation adds to the problem at airports that are already overly congested. In turn, aircraft noise and emissions levels have become more and more a prime focus throughout the industry. As airlines look to replace their aging fleets, the new larger twins are proving to be the solution.

Many of the advanced technology features of the GE90 will make the twins even more attractive by reducing noise and emissions levels significantly compared to today's turbofan engines, as well as by greatly reducing specific fuel consumption.

GE plans to continue development of the CF6-80 engine family and expects to introduce further enhancements over the next decaded to improve performance, reliability, and total cost of the engines. The CF6-80E1 will be certified in 1993.

MORRISTOWN, NJ (JAN. 16) BUSINESS WIRE - Digital Microwave Corp. and AT&T Network Systems Tuesday announced a new supply and distribution agreement for an expanded line of DMC's microwave radio and fiber-optic transmission equipment.

The three-year agreement calls for AT&T to distribute the equipment, on a private-label basis, separately or as part of systems it sells to telephone companies and business and government customers both domestically and internationally.

Typically, this equipment will be used in short-haul, low-capacity systems.

The agreement builds on the companies' existing relationship, adding fiber-optic systems, additional microwave radio products, and products designed for international markets.

They also agreed to look for ways to cooperate in joint product development and manufacturing.

''Digital Microwave Corp. radio and fiber-optic systems are important to AT&T's product line as we move into the 1990s,'' said Peter D. Fenner, president of AT&T's Transmission Systems business unit.

''They have supplied us with microwave radio equipment since 1985 and have proven to be a first-rate supplier,'' he said.

''I believe that this contract should lead to a greatly enhanced relationship between our two companies,'' said William E. Gibson, president and chief executive officer of Digital Microwave Corp.

''We consider AT&T to be a partner and are looking forward to working with them in developing the worldwide market for digital transmission.''

Headquartered in San Jose, Calif., Digital Microwave Corp. (DMIC on NASDAQ) is a leading supplier of high-performance short-haul transmission products designed for both domestic and international markets.

CINCINNATI (JAN. 16) BUSINESS WIRE - Manhattan National Corp. (NYSE:MLC) Tuesday announced the resignation, effective Feb. 16, 1990, of Michael A. Conway, its president and chief executive officer.

Conway, also will resign from the board of the company and from the positions he holds with several affiliates. The board has not met to name Conway's successor.

Conway, who has held the positions since September, 1988, has been associated with Manhattan National Corp. and its majority shareholder, the Union Central Life Insurance Co., Cincinnati, in a number of capacities since 1984. Conway will be joining Aon Corp., Chicago, in March.

Commenting on the resignation, Harry Rossi, chairman of Manhattan National Corp. stated, ''We appreciate the valued work of Conway on behalf of Manhattan National Corp. and are sorry to see him leave. We wish him all the best in his future position.''

ATLANTA (JAN. 16) BUSINESS WIRE - Three Turner Broadcasting System Inc. (ASE:TBS.A, TBS.B) networks -- CNN, TBS SuperStation and TNT -- won 12 Awards for Cable Excellence (ACE) at the 11th Annual Network ACE Award ceremonies in Los Angeles, Friday, Jan. 12, and Sunday, Jan. 14.

The annual awards, presented by the National Academy of Cable Programming, are the industry's most prestigious for national cable programming. Among the six awards received by CNN is cable's highest honor, the ''Golden ACE '' presented to the network for outstanding achievement in cable television for its comprehensive coverage of the historic domestic upheaval in Beijing in May 1989.

CNN, TBS SuperStation and TNT received a total of 48 nominations for this year's awards, the highest combined total ever received by the Turner networks.

ROCKAWAY, NJ (JAN. 16) BUSINESS WIRE - RTI Inc., (NASDAQ: RTII) a provider of gamma radiation services for the medical and pharmaceutical industry announced Tuesday the appointment of R. Stephen Maico as controller and chief financial officer.

Maico was formerly controller for the DeKalb County Board of Health, located in Decatur, Ga., a county agency which provides comprehensive public, mental, substance abuse and environmental health programs for the general public.

Maico graduated from Georgia State in 1977 receiving a BA in business administration. He is also a certified public accountant.

In making this announcement John Scandalios, president and CEO stated, ''Mr. Maico's background and 15 years of progressive management experience in both public and private accounting will help support the planned growth during 1990 and further strengthen its management team.''

RTI previously announced revenues for the nine months ended Sept. 30, 1989 of $2,325,822 and a loss of $370,695 as compared to 1988 revenues of $2,170,601 and a loss of $2,326,958 for the same period.

CAMBRIDGE, MA (JAN. 16) BUSINESS WIRE - Eric Kim has been appointed general manager of Lotus Development Corp.'s OS/2 database development project, the company announced Tuesday.

Kim, whose appointment takes effect Feb. 5, will report to David Gilmour, vice president of Lotus' Database Systems division.

Kim will be responsible for managing a database software development project for the OS/2 operating system already underway at Lotus, and for the product's subsequent market introduction. He also will assume overall management of Lotus' OS/2 database products for end users and applications developers.

As vice president of the Database Division at Ashton Tate Corp. in Torrance, Calif., Kim had responsibility for U.S. and international database strategy, business development and marketing. After October 1989,

Kim had responsibility for a major part of the database division's development organization.

''In the past year, Lotus has strengthened its long-term commitment to client/server computing and the database market by establishing new partnerships, accelerating product development and committing more resources to the database organization,'' Gilmour said.

''Our OS/2 product effort is a major element of our database strategy, and Eric's extensive management experience and database-industry knowledge make him the ideal person to lead this effort.''

Kim, who joined Ashton Tate in March 1985 as senior group product manager, has more than 10 years of computer industry marketing and development experience.

Prior to Ashton Tate, he held various positions at Pearlsoft Inc., Televideo Systems Inc. and Amdahl Corp.

Kim, 35, earned a bachelor's degree in physics from Harvey Mudd College in Claremont, Calif., a master's degree in systems engineering from the University of California at Los Angeles and a master's degree in business administration from Harvard.

Lotus Development Corp. is the leading developer of applications software for personal computers and information services delivered on CD-ROM.

LONDON (JAN. 16) BUSINESS WIRE - TVS ENTERTAINMENT PLC Tuesday announced that it has retained Wertheim Schroder & Co. Inc. and J. Henry Schroder Wagg & Co. Limited, investment bankers, to review strategic options with respect to its wholly owned subsidiary MTM Entertainment Inc. which will enhance the TVS Group's shareholder value.

These options may include the introduction of a substantial investor into MTM which would be assisting with the objective of placing

TVS in the strongest possible position to retain its franchise region after 1992.

MTM Entertainment is primarily engaged in the development, production and distribution of television series programming. Since its establishment in 1970, the company has produced such well known and successful television

series as as ''The Mary Tyler Moore Show,'' ''The Bob Newhart Show,'' ''Rhoda,'' ''Lou Grant,'' ''WKRP in Cincinnati,'' ''Hill Street Blues,'' ''St. Elsewhere,'' ''Remington Steele'' and ''Newhart.''

TVS ENTERTAINMENT PLC operates the independent television program franchise for the South and South East of England ITV region. The TVS Group's operations include the sale of television air time to advertisers and the production, sale and distribution of television programs.

LYNNFIELD, MA (JAN. 16) BUSINESS WIRE - Boston Acoustics Inc. (NASDAQ: BOSA) Tuesday announced its financial results for the third quarter ended Dec. 30, 1989.

Because the company works on a 5-4-4 week quarter there is an extra week every five years, third quarter fiscal 1990 represents 14 weeks of sales and earnings compared to 13 weeks during third quarter fiscal 1989.

Net sales increased 30 percent, from approximately $6.2 million to a new quarterly high of $8.0 million, while net income rose 27 percent, from $879,000 to $1,117,000. Earnings per share, which increased from 44 cents to 55 cents, surpassed all previous quarterly figures.

Year-to-date net sales increased 21 percent, from $15.4 million to $18.7 million. Net income increased from $1,839,000 to $2,431,000, a gain of 32 percent. Earnings per share were $1.20 versus 92 cents last year.

	Three Months Ended	
	Dec. 30, 1989	Dec. 24, 1988
Net sales	$ 8,037,605	$ 6,161,719
Net income	$ 1,117,252	$ 879,086
Earnings per share	55 cents	44 cents
Weighted average number of shares outstanding	2,024,219	2,000,710

	Nine Months Ended	
	Dec. 30, 1989	Dec. 24, 1988
Net sales	$18,747,495	$15,437,625
Net income	$ 2,431,336	$ 1,838,666

EDISON, NJ (JAN. 16) BUSINESS WIRE - Verbex Voice Systems Inc., leading developer of Conversational Voice I/O systems for financial, manufacturing, and package handling applications, announced Tuesday the closing of its third round of financing.

Previous investors contributed significantly to the new round, with Boston Capital Ventures and Arete Ventures/Utech Funds joining in as new backers. The continuous speech recognition technology of Verbex systems is a major advancement over previous speech recognition products that recognize only one word at a time with forced pauses between each word.

Users perform transactions and capture data by speaking naturally, in senetences and number strings - even in high noise and regardless of accent or language.

"We have surpassed three critical milestones in our corporate development. We have built up strong customer credibility through the delivery and effective implementation of our systems at customer sites; we have broken open a new market with the annoucement of our Voice Trader for financial trading; and now we have closed our third round of financing," said Al Stromberg, president and CEO of Verbex Voice Systems.

"This provides us with working capital to maintain the rapid growth of development of our targeted vertical markets and support the release of major new products during the coming year."

The reaction to the Verbex Conversational Voice I/O solution has been positive in both the marketplace and the analyst community. In the 1989 Report on the Speech Recognition Market, the Yankee Group wrote that, "Verbex had the highest growth rate (of all voice recognition companies) in 1988, increasing its market share from four percent to almost 11 percent...We also project by 1992, voice recognition will be a $120 million market (in manufacturing applications alone)."

Datapro, another respected analyst group, concurs that the Verbex technology is on the leading edge: "...Verbex' products represent a significant breakthrough in voice recognition technology...(the Verbex Voice Trader) has made a significant impact on the industry and has proven itself worthy by operating almost flawlessly in a hostile environment." In addition to the two new investors, Verbex's major backers include:

RFE Investment Partners
Xerox Corporation
InnoVen
Meridian Venture Partners
Joseph Murphy

#90016b0805 01/16/1990 ~Business Wire

NEW YORK (JAN. 16) BUSINESS WIRE - Applied Microbiology Inc. (NASDAQ:APLY) Tuesday announced that Calgon Vestal Laboratories of St. Louis, has exercised its option to use Applied's AMBICIN technology on skin in medical markets including hospitals and physicians in the United States and Canada.

Since the granting of the option in April, 1989, the two companies have been working together to create new antimicrobial products to reduce hospital-acquired infection, a costly and prevalent problem. Calgon Vestal is a division of Calgon Corp., a subsidiary of Merck & Co. Inc., the research intensive healthcare company based in Rahway, N.J.

Through Applied's research capabilities, particulary its DNA technology, the company develops products that kill disease-causing human and animal bacteria on contact, including those resistant to conventional antibiotics. These products, known as AMBICINs, have shown very low toxicity in preliminary testing.

Walter R. Maupay Jr., president of Calgon Vestal Laboratories, said, ''We are very optimistic about continuing the excellent cooperative spirit enjoyed by our companies. Thus far in our efforts to commercialize this technology, we have found our organizations complementary.''

David Guttmann, chairman and CEO of Applied Microbiology, added, ''The key to this partnership is the combination of our technology with Calgon's knowledge of the needs of the medical customer, its skill in product formation, and experience with regulatory agencies.

''Calgon has a well-established position in the institutional healthcare market and we have the ability to produce large quantities of our bacteriocin raw materials economically.''

Applied's strategy is to forge alliances with companies that have established track records in particular industries. Its bacteriocin AMBICIN formulations have proven effective against a broad range of both

gram positive and negative bacteria. The company is concentrating the application of its products in the areas of human healthcare, animal healthcare, and food and sanitation industries.

#90016b0806 01/16/1990 ~Business Wire

BELLPORT, NY (JAN. 16) BUSINESS WIRE - Biopharmaceutics Inc. (AMEX:BPH) announced results for the year and fourth quarter ended Sept. 30, 1989.

For the year ended Sept. 30, 1989, net sales from continuing operations increased 48.3 percent to $7,341,224 from $4,951,689 in the prior year. The net loss was $1,076,576 compared to $1,580,763 in 1988. Net loss per share was 13 cents vs. 20 cents last year.

The loss from continuing operations before other deductions narrowed from $1,326,260 to $524,445 in 1989 reflecting a gross profit improvement of $485,600 and $315,688 in lower research and development expenses.

Net sales from continuing operations decreased 16 percent to $1,183,544 for the fourth quarter ended Sept. 30, 1989. The net loss in the quarter was $973,428, or 12 cents per share compared with a net loss of $715,828, or 9 cents per share in the prior year.

The fourth quarter loss from continuing opertions before other deductions was $525,465 vs. $436,518 in the prior year. The widened loss reflects the lower sales volume and higher year-end inventory adjustments.

The balance of the net loss in the 1989 period includes a $247,179 accounting charge related to the August 1989 settlement of all legal issues with Interpharm Inc. and a $205,000 charge to discontinued operations, which established a $173,650 reserve for the fine imposed in Federal District Court in the Medicare legal proceeding and associated legal costs for the appeal of that decision. Payment of the fine has been stayed pending the appeal in Federal Circuit Court later this year.

The balance of the net loss in 1988 included $79,310 of charges related to discontinued operations, and a $200,000 investment writeoff unrelated to current operations.

The company has informed the SEC that it will require additional time to file form 10-K for the year ended Sept. 30, 1989.

Biopharmaceutics Inc. is a manufacturer of generic over-the-counter and prescription drugs.

#90016b0810 01/16/1990 ~Business Wire

FORT MYERS, FL (JAN. 16) BUSINESS WIRE - First Federal Savings and Loan Association of Fort Myers Tuesday reported net earnings of $2,448,831 or 78 cents per share for the quarter ended Dec. 31, 1989 compared to earnings of $1,344,534 or 43 cents per share for the quarter ended Dec. 31, 1988.

Earnings increased primarily due to a gain on a transaction involving the exchange of mortgage-backed bond which more than offset a decrease in net interest income.

Effective Dec. 31, 1989, the Association exchanged a mortgage-backed bond with a carrying value of $15.9 million and a note with a fair value of $1.1 million for mortgage loans with a fair value of $18.5 million. This non-cash transaction resulted in a gain of $1.5 million by the Association.

Stockholders' equity at Dec. 31, 1989 was $77.9 million or $24.98 per share compared to stockholders' equity of $73.1 million or $23.42 per share at Dec. 31, 1988, representing an increase of 6.57 percent over the past 12 months. Shareholders' equity as a percentage of total assets was 8.90 percent at Dec. 31, 1989.

Savings deposits for the quarter ended Dec. 31, 1989 increased $15.9 million compared to a decrease of $9.2 million for the comparable quarter ended Dec. 31, 1988.

Loan originations for the quarter ended Dec. 31, 1989 were $30.2 million compared to loan originations of $29.7 million for the quarter ended Dec. 31, 1988. The average rate on new loans during the period was 10.08 percent compared to 8.80 percent during the comparable quarter of last year.

The combined yield on all interest earning assets at Dec. 31, 1989 was 9.63 percent and the cost of deposits was 7.58 percent resulting in an interest rate spread of 2.05 percent. At Dec. 31, 1988, the combined yeild on all interest earning assets was 9.37 percent, the cost of deposits was 7.00 percent with an interest rate spread of 2.37 percent.

First Federal, serving Southwest Florida through its 24 offices, reported assets at Dec. 31, 1989 of $876.1 million. The shares of common stock of

the Association are traded in the over-the-counter market and quoted through the NASDAQ National Market System under the symbol ''FFMY.''

WASHINGTON (JAN. 16) BUSINESS WIRE - Strategic Planning Associates, Inc. (NASDAQ NMS:SPAIB) (''SPA'') Tuesday announced results for the first quarter ended November 30, 1989.

Revenues increased 40 percent to $13,154,815 for the first quarter ended November 30, 1989 from $9,406,687 for the first quarter of the previous year. The Company reported that strong revenue growth occurred both in the United States and Europe.

SPA showed a significant improvement in profitability for the first quarter of fiscal 1990. Income from operations was $2,392,318 or 18 percent of revenues. In the first quarter of the prior year, SPA reported a loss from operations of $2,738,797.

Strategic Planning Associates previously announced its intention to merge with The TBS Group, Inc., a wholly-owned subsidiary of Marsh & McLennan Companies, Inc. In the current first quarter SPA accrued $1,000,000 for legal, accounting and investment banking services related to the merger. For financial reporting purposes, SPA has assumed that these expenses are not deductible for tax purposes thus raising the Company's tax rate to 78 percent and reducing earnings in the first quarter by $.20 per share.

Net income for the period was $352,671 or $.07 per share. In the first quarter of the prior year, SPA reported a loss of $1,606,437 or $.42 per share.

SPA also announced that it has scheduled a stockholders' meeting for February 14 to vote on the merger. The combined prospectus/proxy statement relating to the SPA stockholders' meeting was mailed to stockholders of SPA on Friday, January 12.

Headquartered in Washington, D.C., Strategic Planning Associates, Inc. is an international management consulting firm. The Company maintains offices in New York, London, Paris, Geneva and Singapore.

SCOTTS VALLEY, CA (JAN. 16) BUSINESS WIRE - Borland International Inc. (NASDAQ:BORL) Tuesday reported that revenues and net income for the third fiscal quarter were the highest in its history.

The company also announced it has sold approximately 100,000 copies of its new QUATTRO PRO spreadsheet since the product was introduced last quarter.

For the third quarter ended Dec. 31, 1989, Borland recorded revenues of $30.2 million, a 20 percent increase over its second fiscal quarter revenues of $25.2 million and a 28 percent increase over the $23.6 million revenues reported in the third fiscal quarter last year.

Net income for the third quarter rose to $3.2 million, or 24 cents per share, a 14 percent increase over the net income of $2.8 million, or 22 cents per share in the second fiscal quarter, and a 268 percent increase over the $874,000, or 7 cents per share, reported in the third fiscal quarter last year.

Revenues for the nine months ended Dec. 31, 1989 were $78.4 million

compared with $64.6 million in revenues for the same period last year. Net income was $7.6 million, or 60 cents per share, compared with a net loss for the nine months of last year of $4.9 million, or 42 cents per share.

In commenting on the results, Philippe Kahn, chairman, president and CEO said, ''Our third quarter performance reflects strong initial sales of QUATTRO PRO and continued strong worldwide sales for our Paradox relational database.''

QUATTRO PRO, which began shipping during the quarter,is Borland's new high-end spreadsheet product which incorporates VROOMM (Virtual Real-Time Object-Oriented Memory Manager), an advanced, proprietary memory management technology.

Initial sales of QUATTRO PRO, Kahn explained, were a combination of sales to resellers and upgrade sales to original QUATTRO users and to competitive spreadsheet owners, primarily users of Lotus 1-2-3.

Borland International Inc. (Scotts Valley, Calif.) is a leading developer of high-performance software products. Borland offers in its Professional Business Series some of the world's most widely used business applications such as Paradox, QUATTRO PRO, QUATTRO, SideKick Plus, Reflex and SideKick for Presentation Manager -- the first application for IBM's OS/2 Presentation Manager.

#90016b0835 01/16/1990 ~Business Wire

CLEVELAND (JAN. 16) BUSINESS WIRE - Continental Airlines (ASE:TEX) Chairman Frank Lorenzo, in Cleveland to discuss details of the airline's planned facility improvements at Hopkins International Airport, Tuesday announced that another significant increase in flight activity is scheduled to occur this spring and summer.

Continental's current 126 daily departures will grow to as many as 159 by this summer, Lorenzo said, as the carrier continues with its plans to build a major hub here.

Lorenzo also announced the appointment of Gilbane Building Co. as contruction manager for the facility, which is being designed by Cleveland-based Robert P. Madison International Inc.

Lorenzo conducted a walking tour of the facility, accompanied by the builder, architect and city officials. The group studied facility changes that are the key to enabling Continental to significantly increase local flights and employment. Currently the airline is ''facility constrained.'' Ground-breaking will occur with the spring thaw, with a completion date in early summer 1991.

The project includes an expansion from 10 to 19 gates, the renovation of a two-aircraft hangar, the construction of a $10 million, 40,000-square-foot kitchen, and changes to an administration building.

In the terminal and concourse, customers will benefit from a more spacious baggage claim facility, moving sidewalks to cut time and effort required to get to the farthest gates, and a $1 million Presidents Club for pre-flight relaxation.

In tandem with future growth could come hundreds of new jobs, on top of

Continental's current local employment of more than 700 agents, pilots, flight attendants, mechanics and other personnel.

Continental currently provides 126 daily departures (77 jet and 49 turboprop) from Hopkins, including Continental Express service to short-range destinations. Nonstop service is provided to 41 cities.

The new facility will incorporate many features that have proven to be popular with travelers at Continental's easternmost hub, Newark International Airport, Terminal C. Moving sidewalks, skylights, high-tech millwork and more comfortable gate-area seating will improve the convenience and appearance of the new Cleveland concourse.

#90016b0837 01/16/1990 ~Business Wire

LITTLE ROCK, AR (JAN. 16) BUSINESS WIRE - William H. Bowen, chairman and chief executive officer of First Commercial Corp. (NASDAQ/NMS:FCLR), announced Tuesday record earnings results and other significant accomplishments for FCC in 1989.

Historical highs were established for net income, earnings per share, return on assets and return on equity. Likewise, the highest levels in FCC's history were attained for year-end total assets, total loans, total deposits, and stockholders' equity. FCC's market capitalization (common shares outstanding times common stock price per share) surpassed $150 million during 1989.

Earnings per share for the year ended Dec. 31, 1989, increased 26.3 percent to $2.21 from $1.75 in 1988. Net income rose 26.6 percent to $17.055 million in 1989, from $13.472 million in 1988. Return on average assets was 1.16 percent and return on average stockholders' equity was 15.23 percent for 1989, vs. 1.01 percent return on assets and 13.31 percent return on equity in 1988.

For the fourth quarter of 1989, FCC reported gains of 14 percent in earnings per share (57 cents in 1989 vs. 50 cents in 1988) and 15 percent in net income ($4.397 million in 1989 vs. $3.826 million in 1988).

Contributing to the 1989 earnings increase were a 12 percent rise in net interest income, a decline in the provision for possible loan and lease losses of 30.6 percent, and a gain of 25.7 percent in mortgage servicing income of First Commercial Mortgage Co.

The increase in net interest income was due principally to higher than

expected yields on short-term and other investments. Also contributing to the 1989 earnings gain was the affiliation of Benton State Bankshares, which was accounted for as a purchase transaction effective Dec. 30, 1988.

At Dec. 31, 1989, FCC reported total assets of $1.583 billion, total loans and leases, net of unearned income, of $865 million and total deposits of $1.395 billion. These represent increases from year-end 1988 of 4.5 percent, 3.7 percent and 3.7 percent, respectively. Stockholders' equity increased 11.9 percent to $119 million at Dec. 31, 1989.

Book value per share was $15.33 at Dec. 31, 1989, up 11.6 percent from $13.74 at Dec. 31, 1988. Stockholders' equity to total assets was 7.49 percent at Dec. 31, 1989, up from 7 percent at the prior year-end. The allowance for possible loan and lease losses at year-end 1989, equalled 2.27 percent of loans and leases, net of unearned income, as compared to 1.89 percent a year earlier.

NEEDHAM HEIGHTS, MA (JAN. 16) BUSINESS WIRE - Damon Biotech Inc. (NASDAQ:DBIO) and Abbott Laboratories (NYSE:ABT), Abbott Park, Ill., Tuesday announced the signing of a definitive agreement for Damon Biotech to be acquired by Abbott, as contemplated by a letter of intent executed by the two companies on Oct. 17, 1989.

As previously announced, the acquisition price will be approximately $9.4 million, less the cost of settling outstanding options and warrants, or approximately $1.02 per share.

The agreement is subject to certain conditions, inciuding the, approval of Damon Biotech shareho3/8ders. A special shareholders' meeting is expected to be called for early March 1990.

Separately, Damon Biotech reported a net loss of $628,610, or 7 cents per share, for the first quarter of fiscal 1990 ended Nov. 30, 1989, compared with a net loss of $2,098,057, or 9 cents per share, for the same period in fiscal 1989. Revenues, exclusive of interest income, for the quarter were $1,401,041 compared with $312,445 for the first quarter of fiscal 1989.

The increase in revenues was the result of $1,273,084 of revenues recognized in the 1990 fiscal quarter under an agreement with Abbott Laboratories for the development and production of a cardiovascular product, partially offset by a $184,488 decrease in contract production and research revenues from other sources.

Damon Biotech develops, manufactures and markets biomedical products including monoclonal antibodies and genetically engineered proteins using its two patented technologies: the Cellular Enhancer technique and ENCAPCEL system.

TULLAHOMA, TN (JAN. 16) BUSINESS WIRE - First Federal Savings Bank of Tennessee (NASDAQ:FTSB) reported Tuesday second quarter earnings of $250,300, or 49 cents per share, for the period ended Dec. 31, 1989.

Murray Brown, president and chief executive officer of the Tullahoma-based institution, said second quarter earnings were up from $238,024, or 47 cents per share, for the corresponding period a year ago.

For the six-month period ended Dec. 31, First Federal had earnings of $538,400, or $1.06 per share, compared with $577,321 or $1.13 per share, for the period a year ago. Brown said that results for the six-month period for 1988 reflected a gain of $165,331 from the sale of Federal Home Loan Mortgage Corp. preferred stock.

As of Dec. 31, assets were $215,159,000, up from $210,033,000 a year ago; deposits were $190,740,000, up from $187,856,000. Net interest income after provision for losses on loans for the quarter was $1,241,000 compared with $1,184,000 for the period ended Dec. 31, 1988.

The bank also showed a gain in loans serviced for others. Loans serviced for others totaled $218,122,000 as of Dec. 31, 1989, up from $174,134,000 as of Dec. 31, 1988. During the quarter shareholder equity increased to $11,600,000 from $10,651,000 a year earlier.

First Federal Savings Bank is the state's 14th largest thrift instituton with mortgage lending offices in six cities, including Nashville and Chattanooga. Full service operations are maintained in five cities.

#90016b0865 01/16/1990 ~Business Wire

MEMPHIS, TN (JAN. 16) BUSINESS WIRE - First Tennessee National Corp. (NASDAQ/NMS:FTEN) Tuesday reported earnings for the fourth quarter of $12,757,000, or 81 cents per share, compared to $13,900,000, or 88 cents per share last year.

Quarterly results for 1989 were reduced by one-time charges of $4.2 million, or 16 cents per share, from the restructuring of several bank operations functions and by the loan loss provision.

Favorably, bond division income more than doubled last year's fourth quarter and net interest income rose 4.3 percent. Return on assets for the quarter was .80 percent and return on equity was 13.43 percent.

Net income for 1989 was $28,790,000, or $1.82 per share, compared to $52,343,000, or $3.34 per share for 1988. Excluding the additional provision of $33 million added to the loan loss reserves in the second quarter and the one-time charges of $4.2 million taken in the fourth quarter, net income increased approximately 9 percent over 1988.

Nonperforming assets totaled $75.4 million at Dec. 31, 1989, compared to $54.4 million for the like period last year. This was a $13.3 million reduction from the $88.7 million reported for Sept. 30, 1989. The decline was attributable to approximately $11 million in loans returned to accruing status and $11.6 million charged off.

Domestic net charge-offs rose to $17.9 million for the quarter or 1.95 percent of average loans, net of unearned income. This compares to $10.3 million, or 1.16 percent for the like period last year. As a result, the provision for loan losses rose to $12.5 million for the fourth quarter compared to $6.6 million last year. The allowance for loan losses at Dec. 31, 1989, was $61.7 million.

Net interest income for the year rose 5.1 percent over 1988. A 14.7 percent increase in interest-bearing core deposits funded the 9.7 percent growth in average consumer loans and strong growth in the other short-term earning assets.

First Tennessee, one of the 100 largest bank holding companies in the United States, reported total assets of $6.4 billion and shareholders' equity of $380.7 million at Dec. 31, 1989.

WASHINGTON (JAN. 16) COMTEX - The 8-K report filed at the SEC shows on Dec. 16, 1989, Shawsville Bancorp Inc. dismissed the independent auditors of Young & Prickitt, P.C. of Virginia and engaged the services of R.L. Persinger & Co. in their stead. The change was not made because of disagreements over accounting practices, financial statement disclosures or auditing procedures. The report on financial condition of Shawsville Bancorp. for the past two years by Young & Prickitt did contain an unqualified opinion.

This action was taken at the request of Premier Bankshares Corp. in anticipation of the merger between Shawsville Bancorp and Premier Bankshares. R. L. Pershing & Co. are the independent auditors of Premier Bankshares Corp.

According to a press release issued Dec. 15, 1989, Shawsville Bancorp and Premier Bankshares Corp. reached an agreement on amended terms for their merger. Under the agreement, Shawsville shareholders would receive 0.8 share of Premier for each Shawsville share held. Consumation of the merger is expected in April, 1990, and is conditional upon regulatory and Shawsville shareholder approval.

STAMFORD, CT (JAN. 17) COMTEX - Teletech International Holdings Ltd. of Hong Kong has acquired control of TeleQuest Inc., the San Diego-based telephone concern.

On Jan. 25, Teletech bought 475,000 TeleQuest common shares for 42 cents

each, and two warrants to buy up to another 1.6 million common shares for $199,500.

The purchases boost its stake to 81.1 percent or 16.3 million shares, according to a filing with the Securities and Exchange Commission.

Teletech had already acquired 15 million TeleQuest shares under a Dec. 30 agreement in exchange for canceling $1.5 million worth of debt.

MUNICH (JAN. 16) - Red Army Faction (Raf) terrorists have ''strengthened their forces through new members,'' thereby increasing the chances of additional attacks, according to a West German cabinet minister.

''We have to reckon with more attacks at any point in time,'' says Interior Minister Wolfgang Schaeuble in an interview due to be published this week in Bunte Illustrierte magazine.

Schaeuble was quoted as saying West German investigators, who have sifted through 3,400 pieces of evidence, now believe five Raf terrorists were involved in the November 30 bombing death of Deutsche Bank chairman Alfred Herrhausen.

Herrhausen was enroute to work when a roadway bomb was detonated as his car drove by.

Schaeuble said anti-terrorist units achieved a significant breakthrough with the arrests December 7 of two alleged Raf members.

#90016d2910 01/16/1990 ~French/German News Agency
BANGKOK (JAN. 16) - The corpses of 11 Vietnamese women were found washed up on the coast of southern Thailand following a suspected pirate attack, police said Tuesday.

Six of the bodies were found on Monday and the rest on Sunday, police reached by telephone in Nakhon Si Thammarat province, some 775 kilometers (480 miles) southeast of here, said.

The bodies were badly decomposed after floating in the Gulf of Thailand for at least five days, they said, adding that coroners had failed to determine the cause of death.

Police said they presumed that the women were refugees who had fled Vietnam by boat and had been attacked by pirates.

The women were identified as Vietnamese by clothes which remained on the bodies of several of the women, the police said.

Many of the women were naked, and police believe they had been raped.

#90016d2920 01/16/1990 ~French/German News Agency
MANILA (JAN. 16) - The Philippine immigration bureau is reviewing the

case of a Japanese businessman who may have been deported by mistake last month on suspicion of being a wanted gangster, a spokeswoman said here Tuesday.

Kazuhiro Fujita, who left the country in late December after being detained by the commission for more than a month, might have been mistaken for a Yakuza gangster who had the same surname, bureau spokeswoman Sarah Andes said.

The possibility of a mix-up surfaced after another Japanese named Akira Fujita was arrested here last week for possession of an expired passport, and on suspicion of involvement in gun smuggling. He was immediately deported.

Interpol, the international police organization, meanwhile issued a certification that Kazuhiro Fujita, who was arrested for working in Manila without proper permits, had no criminal record.

"There's always a probability that mistakes in judgement are made," an immigration bureau statement said.

Japanese nationals are periodically deported from Manila for gunrunning and other illegal activities. The Philippines has become a major source and transit point for smuggled weapons, as well as a haven for Japanese fugitives.

TOKYO (JAN. 16) - Wholesale prices in Japan rose 0.1 percent in December from the previous month, closing 1989 with a 2.5 percent increase for the first rise in seven years, the central Bank of Japan said Tuesday.

The bank said the wholesale price index for December was up 3.9 percent from the same month of 1988.

Wholesale prices of domestically produced goods were unchanged last month from November but up 2.5 percent from a year earlier. They rose 1.8 percent in the whole of 1989.

Imported products' wholesale prices leveled off from November but were up 15.3 percent from a year earlier. They climbed 7.7 percent in 1989.

Export wholesale prices were also unchanged from November but up 7.2 per cent from a year earlier. They increased 4.4 percent in 1989.

#90016d3120 01/16/1990 ~French/German News Agency
TOKYO (JAN. 16) - Toyota Motor Corp., Japan's biggest automaker, said Tuesday it would export a total of 2,550 ambulance cars to Hungary in the next ten years.

Toyota officials said Toyota and Hungary's Techno Index Trade Co. Ltd. were to sign an agreement estimated to be worth five billion yen (34.5 million dollars) Tuesday in Budapest, where Japanese Prime Minister Toshiki Kaifu is currently on the last leg of his European tour that started on January 8.

The Toyota cars are to replace the Polish-made ones now being used in Hungary, the officials said.

Of the total, 1,300 units will be shipped between 1990 and 1994 and 250 units each year from 1995 to 1999.

Toyota exported 55 units of Corolla passenger cars to Hungary in the first 11 month of 1989.

#90016d3290 01/16/1990 ~French/German News Agency
TOKYO (JAN. 16) - New private-sector machinery orders received by Japanese manufacturers in November registered a seasonally adjusted one per cent rise from October, the Economic Planning Agency said Tuesday.

The November rise followed an 8.6 percent increase in October, it said.

The data excluded orders for ships and those placed by the electric power industry, both of which tend to swing erratically, agency officials said.

Including these and public-sector and foreign orders, November saw an 11.2 percent rise folowing an 18 percent surge in October, they said.

-30- 756
#90016d3490 01/16/1990 ~French/German News Agency
PARIS (JAN. 16) - Consumer prices in France rose by 0.1 percent, continuing a trend of declining price increases, provisional official figures showed on Tuesday.

In November, prices rose by 0.2 percent as the rate of growth of food and industrial prices slowed down, and energy prices were unchanged.

This took the increase in consumer prices throughout 1989 to 3.6 percent compared with a target of 3.2 percent set by the government.

-30- 617
#90016d3530 01/16/1990 ~French/German News Agency
HONG KONG (JAN. 16) - The Hang Seng Index plummeted for the second day here Tuesday, losing 34.90 points to 2,751.79 after a near-50 point plunge on Monday triggered by nervous negative showings on Wall Street and Tokyo.

Trading on the local bourse stayed dull with the day's turnover logged at 635 million Hong Kong dollars (81.4 million U.S.) against Monday's 541 million dollars (69 million U.S.).

Brokers said some of the uncertainty was caused by still-uneasy Sino-British relations, currently highlighted by British Foreign Secretary Douglas Hurd's visit to the British colony which was ending Tuesday.

-30- 785
#90016d3670 01/16/1990 ~French/German News Agency
Budapest (JAN. 16) - Hungary's economy will continue to undergo new strains in the years to come.

Economic experts are saying that for the next three years at least, there will be no rise in peoples' living standards, and some economists say that over the long run, only a complete revamping of the system will bring any improvement.

''State ownership has shown that it cannot function,'' a high-ranking Finance Ministry official said. ''We must come to terms with economic necessities and aim for a social market economy.''

In December, the Hungarian parliament approved an austerity budget which is to pave the way for new credits from the International Monetary Fund.

The plans foresee a 50 percent slashing of the budget deficit, while the trade deficit with capitalist countries is to be cut from 1.5 billion dollars to 550 million dollars.

With a foreign debt burden of 20 billion dollars, Hungary with its some 10 million people has the highest per-capita indebtedness of any country in Eastern Europe.

To achieve the aims set in the budget, there must be a radical cutting of subsidies, state enterprises must be privatised, and money-losing companies must be shut down.

One of the first effects of the new measures came in early January when prices for basic foodstuffs and fuels were increased by around 30 per cent. In early February, public transportation rates are to be hiked by more thn one-half, while rents are also to be raised strongly.

''Even then, only one-tenth of the maintenance costs of state-owned apartments will be covered by rents,'' according to the Finance Ministry official.

-30- 1835

#90016d3770 01/16/1990 ~French/German News Agency

Bonn (JAN. 16) - East German Economics Minister Christa Luft arrived here Tuesday for a two-day visit to review with Bonn political and business leaders the East Berlin economic reforms and areas where West German industry may play a role.

Luft will be meeting her Bonn counterpart Helmut Haussmann, as well as North Rhine-Westfalian state Premier Johannes Rau and private industry representatives during her stay.

Bonn officials said a major topic in the talks between Luft and Haussmann will be East Germany's new investment law. The West German government and industry have sharply criticised it because it limits foreign investment in joint ventures to 49 percent.

But in talks since then between East German Premier Hans Modrow and Daimler-Benz chairman Edzard Reuter, the East German side signalled that exceptions to the 49 percent rule may be permitted.

Other topics expected to be covered here will be currency questions, the problems of medium-sized firms in East Germany, and the foreign trade monopoly exercised by East Berlin.

The talks here are a warmup for the January 23 joint economic commission meeting in East Berlin, at which negotiations on an investment protection accord are to be started. Haussmann will lead the West German side at the meeting, while the East German side will be headed by Foreign Trade Minister Gerhard Beil.

#90016d3830 01/16/1990 ~French/German News Agency
London (JAN. 16) - Coffee prices plunged to 597 pounds sterling per tonne Tuesday, their lowest level in 14 years and 20 pounds cheaper than prices at the end of last week.

The price drop came as the International Coffee Organisation (Ico) was entering new talks between coffee producers and consumers on export quotas.

Reports here said chances for a breakthrough on export quota arrangements on the producers' side appeared slim as Brazil apparently was still refusing to have its 30 percent market share reduced in order to benefit other countries.

The Ico talks here last October broke up in disagreement over the same issue.

-30- 819
#90016d3920 01/16/1990 ~French/German News Agency
ABU DHABI (JAN. 16) - Senior officials from Japan and members of the Gulf Cooperation Council (GCC) will meet in Saudi Arabia next month to discuss ways of boosting economic ties between their countries, a Japanese oil official said late Monday.

"The talks will cover all aspects of economic cooperation including oil," Masaji Yamamoto, head of energy affairs at Japan's Ministry of International Trade and Industry (MITI), told reporters in the United Arab Emirates (UAE).

Mr. Yamamoto and Naoki Kuroda, director of MITI's petroleum department, were concluding a week-long visit to Saudi Arabia, Kuwait and the UAE.

The team left Abu Dhabi early Tuesday after the talks aimed at strengthening Japan's oil relations with its main suppliers, Japanese diplomats said.

A Japanese diplomat said Monday the two officials were trying to secure oil sources for Japan in the 1990s "when oil from the Gulf Cooperation Council is expected to acquire increased importance."

Mr. Yamamoto said Japan was seeking long-term crude oil supplies from the Gulf states but no specific proposals were discussed.

He added that talks in Riyadh sometime next month would be the sixth round between Japan and the GCC which groups Saudi Arabia, Kuwait, the UAE,

Qatar, Bahrain and Oman.

Japanese oil executives in the region say Japan is offering the Gulf states a share of its downstream oil market in exchange for secure long-term crude oil supplies.

The Gulf states supply two-thirds of Japan's annual oil imports of about four million barrels per day, with Saudi Arabia and the UAE accounting for more than a third of the market share.

#90016d4240 01/16/1990 ~French/German News Agency
MIAMI, Florida (JAN. 16) - A lawyer for Manuel Antonio Noriega said he will seek the jailed general's release on bond when a detention hearing requested by the government is held.

Lawyers for the deposed Panamanian strongman had not asked for bail because they argue the U.S. court has no jurisdiction over Mr. Noriega.

But when the government asked for a detention hearing, it "put us in a posture that we would have to deal with that issue (of detention) and we feel we will be successful," said defense lawyer Steve Kollin Monday.

"I don't think the government will be able to establish the facts necessary for the court to pre-trial detain our clients without any bond," Mr. Kollin said. "He's presumed to be innocent, he's entitled to a bond."

Mr. Kollin said the defense team still plans to file pre-trial motions claiming that Mr. Noriega is immune from prosecution because he is a head of state.

Mr. Noriega, who was ousted in a U.S. invasion of Panama and flown to the United States for trial January 4, is accused of money laundering and helping Colombian drug traffickers smuggle cocaine into the United States.

He faces 145 years in prison and fines of up to 1.1 million dollars if convicted.

#90016d4370 01/16/1990 ~French/German News Agency
MELBOURNE, Australia (JAN. 16) - Australian agro-brewing conglomerate Elders IXL Ltd. said here Tuesday it was set to take full control of its English pubs joint venture in a deal valued at up to 262 million pounds (435 million U.S. dollars).

Elders and its joint venture partner, real estate company Hudson Conway

Ltd. announced that Elders had taken a call or purchase option over the remaining half share in Courage Pub Co. Holdings Ltd. (Pubco), which owns 5,000 pubs in the United Kingdom.

Elders said in a statement to the Australian Stock Exchange that the option could take effect at any time up to December 6 this year.

The price depended on the actual exercise date but will be between 250 million pounds (415 million U.S.) and 262 million pounds.

Pubco was formed in June 1988 when Elders' British brewing arm, Courage, completed a sale-and-leaseback transaction of about 5,000 pubs to separate the ownership of the real estate from the brewing operations.

The British brewing industry is currently undergoing a restructuring process after the monopolies commission severely criticised the commercial practices of the country's six leading brewers.

They have been ordered to shed half the pubs they control above a ceiling of 2,000 by November 1992.

#90016d4490 01/16/1990 ~French/German News Agency

SINGAPORE (JAN. 16) - Singapore Airlines (SIA) said Tuesday it had ordered 50 wide-bodied aircraft worth 8.6 billion U.S. dollars.

The airline said in a statement it had ordered 30 Boeing 747-400's worth 5.5 billion U.S. dollars and 20 MacDonnell-Douglas MD-11's worth 3.1 billion U.S. dollars, including the cost of spares and spare engines.

SIA said that the aircraft were intended for growth as well as to replace the airline's older Boeing 747's.

The contract covers 15 firm orders for the latest version of the Boeing 747 jumbo jet with options on 15 more, plus five firm orders for the three-jet MD-11, which has only just flown, and 15 options.

The last time SIA placed an order for aircraft was in 1986 when it ordered 20 B747-400's valued at the then-record price of 3.3 billion U.S. dollars.

The airline is aiming to grow at an average rate of eight per cent per year in the coming decade. The order will provide the necessary capacity to fulfil that objective, SIA said.

By 1999, depending on the number of aircraft options exercised, SIA hopes to have a fleet comprising between 35 and 50 B747-400's, which will be supplemented by the MD-11's and twin-engined A310-300 Airbus aircraft.

SIA also said that it may introduce a fourth aircraft type for regional operations after further evaluation.

The wide-bodied long-range MD-11 will facilitate an increase in the number of SIA's non-stop, long-haul services, particularly between Singapore and Europe.

It is expected to go into service in 1990 and has been ordered by 29 airlines including Delta and Swissair, both of which signed long-term marketing and co-operation agreements with SIA in 1989.

SIA said that it should be able to fully self-finance the purchase but it may take advantage of available finance schemes that can reduce the cost.

The airline has still not decided on the engine type to power these new aircraft.

SIA currently has a fleet of 39 aircraft comprising B747's, A310's and B757's. It flies to 57 destinations in 37 countries.

Deliveries of the new aircraft are scheduled between 1994 and 1999.

#90016d4570 01/16/1990 ~French/German News Agency

LONDON (JAN. 16) - London securities house County NatWest Securities Limited said Tuesday it was axing 79 jobs, including 22 market-makers, in its British equities department.

The cutbacks were the first in the industry in London this year, but came on the heels of a series of cutbacks and pull-outs from equities and gilts markets by London houses in the past two years, due to increasing competition for reduced business volume since the October 1987 world stock market crash.

County NatWest, whose parent company is the major clearing bank National Westminster, said the job cuts were part of "plans for developing its equity securities business into an integrated European operation during the 1990's."

"The changes underline County NatWest's commitment to the equities business and will not affect its trading and research coverage of U.K. stocks", the company said in a statement.

County currently employs a total of 575 people in British equities, plus some 750 in equities in New York, Tokyo, Hong Kong, Paris, Sydney and Melbourne.

"County NatWest makes markets in over 1,000 stocks and remains one of the top three U.K. houses in terms of market coverage," the statement said.

SEOUL (JAN. 16) - South Korean Deputy Premier and Economic Planning Minister Cho Soon said Tuesday that the government would soon establish a special fund to support economic exchanges with North Korea.

The fund, named South-North Economic Exchange Fund, would be capitalized at between 200 and 300 billion won (294 million and 441 million U.S. dollars) he said.

Officials said President Roh Tae-Woo instructed Mr. Cho to prepare various ways of promoting economic exchanges with North Korea when Mr. Cho reported to him on the projected fund.

Mr. Roh said at a new year's press conference last week that Seoul wanted to promote cooperative projects and trade with Pyongyang which he said would be profitable to both sides.

He suggested that the South take part in a joint tourism development of the scenic Kumgangsan (Mt. Diamond) located just north of the Demilitarized Zone dividing the two Koreas.

Chung Ju-Yung, Seoul's leading industrialist, went to North Korea in April for talks on the tourism development project. However, no follow-up talks have been realized as ties between Seoul and Pyongyang deteriorated thereafter.

Press reports said the South planned to offer its surplus rice and electricity to North Korea in exchange for such raw materials as coal and iron ore abundant in the North.

KUALA LUMPUR (JAN. 16) - Foreigners will invest 8.6 billion Malaysian dollars (3.2 billion U.S.) in manufacturing ventures approved last year, Trade and Industry Minister Rafidah Aziz said Tuesday.

The foreign funds for 684 new projects and the expansion of 100 existing plants represented a 75.6 percent increase over approvals granted in 1988 by the Malaysian Industrial Development Authority (MIDA), she said.

Japan was the leading source of new investments with 2.7 billion Malaysian

dollars (one billion U.S.), followed by Taiwan with 2.1 billion Malaysian dollars (785 million U.S.) and Singapore with 910 million Malaysian dollars (337 million U.S.).

The projects included only those involving capital outlays of more than 2.5 million Malaysian dollars (900,000 U.S.), which require licensing by MIDA, a federal government agency set up to promote industrial expansion.

Ms. Rafidah said that factors behind the investment surge included improved incentives such as tax cuts, the appreciation of foreign currencies and relatively lower local production costs.

Most of the new foreign investments will go into export-oriented industries including the electrical and electronics industries, textiles, rubber products and wood industries and plastics.

"The pattern of interest conforms with priorities set by the government to promote resource-based and export-oriented industries," Ms. Rafidah said.

MIDA officials said that the projects approved did not include several unprocessed applications including those by Finland's Neste Oy and Japan's Mitsui and Co. to set up ethylene plants and an Exxon Chemicals-proposed polyethylene project.

Ms. Rafidah said that a high percentage of earlier approvals had already been implemented. Almost 53 percent of all approvals granted by MIDA between 1980 and 1988 had gotten off the ground by the end of last year, while 26 per cent were in various stages of implementation.

Malaysia's manufacturing sector grew by 13 percent last year, well above the overall gross domestic product (GDP) growth rate of 7.6 percent.

MANILA (JAN. 16) - Several prospective investors, including top Japanese bankers and a U.S. electronics group, have backed out of planned investments in the Philippines because of the coup attempt last month, an investments official said Tuesday.

Tomas Alcantara, head of the Board of Investments, told a Senate hearing that among those scared away by the coup bid were a U.S. electronics group a large construction group and a consortium of large Japanese bankers.

Separate European and Taiwanese investment missions were also frightened off, as were Japanese investors looking into possible technology transfers Mr. Alcantara said.

He did not identify the prospective investors or say how much they had planned to invest.

He also said foreign investors were now eyeing Thailand rather than the Philippines due to its "relative political stability."

They were also looking at eastern Europe due to the economic and political changes there.

The bloody coup attempt by some 3,000 renegade soldiers claimed 119 lives and resulted in injuries to over 400 people.

#90016d5060 01/16/1990 ~French/German News Agency
TUNIS (JAN. 16) - The supreme Islamic council of Tunisia has condemned as blasphemous the publication of a pictured narrative version of the Koran.

Tunisian professor of philosophy and journalist, Yussuf Seddik, who was responsible for the comic, was no longer to be regarded as a Moslem, the council ruled late Tuesday.

The council compared the work with The Satanic Verses of Indian-born British author Salman Rushdie whose book has been damned by Moslems around the world.

Last February, then Iranian spiritual leader Ayattolah Ruholla Khomeini issued a religious edict calling on Moslems to kill Rushdie, who has been in hiding now for nearly a year.

The Director of Islamic studies at Kuwait University, Fayehallah, has said Seddik and Rushdie should be treated alike.

The Tunisian council demanded a ban of the comic throughout the Islamic and non-Islamic world.

It described the pictorial representation of the word of god as a gross violation of Islamic tenets and objected as well to the drawing of the figure of the prophet Mohammed.

The French-language comic is being printed in Belgium for the Swiss Alece company.

AMSTERDAM (JAN. 16) - A major exhibition of Van Gogh's works is set to open in March to mark the 100th anniversary of the celebrated Dutch

painter's death.

Vincent Van Gogh, who put a bullet through his chest on July 29, 1890, in the French village of Auvers-sur-Oise outside Paris, will be given a commemorative tribute the Van Gogh Foundation claims will stand as the most impressive to date.

A retrospective show of the artist's work is to be inaugurated on March 30 and will simultaneously display 135 paintings at the Vincent Van Gogh Museum in Amsterdam and some 250 drawings at the Kroeller-Mueller Museum in Otterlo, a town 100 kilometers (60 miles) southeast of Amsterdam.

The two exhibitions are scheduled to close on July 29, the anniversary of the date of the painter's suicide.

Tickets went on sale in the Netherlands and abroad on Monday under a new system of reservations which will limit entries to 800,000 for the Amsterdam museum and 600,000 for the Otterlo museum.

Each ticket purchaser must commit himself to showing up on a given date during a specific two-hour time slot, for example from 9:00 a.m. to 11:00 a.m.

Tickets are non-exchangeable and non-refundable.

Half were on sale in the Netherlands and the rest were divided among groups and other countries. No tickets will be available at either museum but instead will be sold by exclusive distributors in each country.

European countries, the United States and Canada will be handled by these exclusive distributors, according to the organizers.

The new sale system, tested on a much smaller scale in the United States, will rule out any impulse viewing of the show, but will allow those who have made up their minds weeks in advance the luxury of entering a major exhibition without having to stand in line or battle crowds at the gates.

Bonn (JAN. 16) - West German builders expects a three per cent increase in building volume in 1990, the industry's top executive said here Tuesday.

German Construction Industry Federation president Hermann Becker said that housing construction would rise by a real four per cent, to between 280,000 and 300,000 new units, compared to the 1989 increase of 5.3 percent, when 240,000 units were built.

Commercial building would increase by 3.5 percent, down from 5.9 percent, while public-sector construction would show only a one per cent rise, down from 3.9 percent last year, he said.

Becker called a ''historical chance'' the building market which might open up in East Germany. The need to rescue and modernise buildings in that country have been put at 200 billion marks (117 million dollars).

He proposed that a West German-East German infrastructural fund be established to finance transportation, environmental protection and telecommunications projects in East Germany.

#90016d5380 01/16/1990 ~French/German News Agency

NEW DELHI (JAN. 16) - Indian state governors Tuesday began to resign their posts Tuesday following a call by President Ramaswamy Venkataraman after the new government came to power.

According to news reports, three governors had already sent in their resignation papers, while many more were on the way.

Each of India's 25 states has a seperate governor along with seven lieutenant governors for the federally-controlled union territories. Although mostly a ceremonial post, they act as a constitutional link between New Delhi and the states.

The governors were appointed by the previous government headed by Prime Minister Rajiv Gandhi. Many belonged to the former ruling Congress Party or were appointed to the posts on retirement after holding important positions in the government.

The new government headed by Prime Minister Vishwanath Pratap Singh had requested the governors to quit on their own following the defeat of Gandhi's Party in last November's general elections.

Most of them refused to oblige. Then came the presidential persuasion to do so. Only two governors quit before being asked to do so.

One was Romesh Bhandari, lieutenant governor of Delhi, who refused last month to accept a transfer to faraway Andaman and Nicobar islands. The other was General K.V. Krishna Rao of the northern state of Jammu and Kashmir who resigned on Sunday.

Singh's government said it wanted to change the governors in about half a dozen states, mostly held by ex-Congress Party workers, as ''they were not in tune with the changed political scenario in the country''.

Venkataraman did not agree with this view as this would appear to be discriminatory. Instead he suggested asking all the governors to turn in their papers so that the government could undertake a large scale transfers.

This is for the first time in India that all the governors have resigned enmasse.

#90016d5470 01/16/1990 ~French/German News Agency

HAVANA (JAN. 16) - Cubans are beginning to speak out in what observers regard as the first manifestation of the political impact of the transformations taking place in Eastern Europe.

In an unexpected spirit of "glasnost," the official press have hidden almost none of the changes that have occurred in recent months.

While Cubans generally are complaining openly in private about their troubles, the questioning also has been gaining ground in the heart of such institutions as the Union of Young Communists, some party militants acknowledge.

At the same time, however, two students of mathematics were arrested at the begining of the year for trying to organize an opposition political movement and a strike, university sources said.

Although the students' arrest and expulsion from the university has not been officially confirmed, there are reports of closed-door faculty meetings to discuss discontent in the student body.

The Catholic Church, meanwhile, has recently called for greater participation by all sectors of society in Cuba's political, economic and cultural life.

In a Christmas message read at different dates in every functioning parish on the island, the church also stressed that the opinion of Cuba's youth should be heard.

After the quick-succession collapse of European communist regimes, the climate in Cuba appears to be one of wait-and-see. President Fidel Castro counter-attacked on the domestic front at the end of the year, stepping up his speech-making and appearances at workplaces that were broadcast by state television.

The Communist Party, whose leading role in Cuban society has been reaffirmed by Mr. Castro, has been given more prominence by the media.

LONDON (JAN. 16) - British retail group Kingfisher's 461 million pound (760 million dollars) takeover bid for electrical appliance and property group Dixons is to be referred to the Monopolies and Mergers Commission, it was announced here Tuesday.

Trade and Industry Secretary Nicholas Ridley said he was referring the bid to the commission because it could affect competition in the British household appliances sector.

The Commission is empowered to act if a merger could create a monopoly - a more than 25 percent market share - in a particular product.

Kingfisher said last month that the Dixons acquisition would give it only a 22 percent share in the British electrical appliances and audiovisual market.

The Commission is to give a decision by April 27.

PORT MORESBY (JAN. 16) - Papua New Guinea and Australia are expected to discuss economic and military problems arising from the 13-month Bougainville crisis at top-level ministerial talks here this week, officials said Tuesday.

Papua New Guinea is expected to use the regular forum to ask Australia for more aid to ease its economic crisis, as well as sounding out Canberra on military assistance for the fight against Bougainville guerrillas.

Australia is sending Foreign Minister Gareth Evans, Defence Minister Kim Beazley, Justice Minister Michael Tate and Resources Minster Peter Cook to the ministerial forum here Thursday and Friday.

Papua New Guinea will be represented by Foreign Minister Michael Somare, Defence Minister Benais Sabumei, Finance Minister Paul Pora, and Trade and Industry Minister John Giheno.

Mr. Pora said he would be asking for an extra 20 million kina (20 million U.S. dollars) to offset an anticipated loss of eight million kina (eight million dollars) as a result of last week's 10 per cent devaluation of the currency.

Port Moresby devalued the kina and introduced several tough economic measures aimed at containing the impact of the loss of Bougainville's

copper revenue through guerrilla action and falling commodity prices.

Under the aid agreement reached last year, Australia was to provide its former United Nations trust territory with 275 million Australian dollars (217 million U.S.) in untied aid, to be reduced each year as tied aid increased.

Papua New Guinea Central Bank Governor Sir Henry ToRobert has said Gross Domestic Product will shrink by four per cent next year.

Mr. Evans has said Australia is "very sympathetic" to Papua New Guinea's economic problems.

Mr. Beazley and Mr. Sabumei are expected to discuss a Papua New Guinea Defence Force request for more training money and support to help increase the army by about 350 troops.

Mr. Sabumei is expected to brief the forum on the situation in Bougainville, where more than 45 people have died in a guerrilla war waged by secessionist landowners since November 1988.

#90016d5630 01/16/1990 ~French/German News Agency

BONN Jan 16 - The West German government decided Tuesday to hold off signing any treaty with East Germany prior to the planned free elections there on May 6, government spokesman Hans Klein said.

The ruling coalition of Chancellor Helmut Kohl is however willing to continue cooperation with the reformist government of East German Prime Minister Hans Modrow until then, the spokesman said.

At their Dresden summit December 19, Mr. Kohl and Mr. Modrow had announced that a "good neighbor and cooperation" treaty would be signed this spring.

But such cooperation now with East Berlin has come under criticism from both the parties of the ruling coalition -- Mr. Kohl's Christian Democrats the Christian Social Union and the Free Democratic Party -- and the Social Democrat opposition.

The liberal Free Democrats even urged Mr. Kohl to renounce a second meeting with Mr. Modrow, to be held in West Germany in early February.

Minister at the Chancellery Rudolf Seiters is expected to give a detailed outline of the government's position on relations with East Germany to the Bundestag, or parliament, on Thursday, parliamentary sources said.

STRASBOURG, FRANCE (JAN. 16) - EEC foreign policy, particularly its response to events in Eastern Europe and relations with Washington, will be a priority of Ireland's EEC presidency, Irish Foreign Minister Gerard Collins said here Tuesday.

The 12-member community "must reinforce the process of political reform and economic liberalisation under way" in Eastern Europe, Mr. Collins told the European parliament as he outlined Ireland's programme for its six-month tenure of the rotating presidency, which began January 1.

He said he wanted to see negotiations for a cooperation accord with East Germany concluded during Ireland's presidency.

An informal meeting of EEC foreign ministers in Dublin on Saturday would enable the European Economic Community to "update our evaluation of recent developments" in eastern Europe and "begin discussion on how relations with these countries might develop over the medium and long term," Mr. Collins added.

He stressed the need for "strong and cooperative relations" between the EEC and the United States in all areas, including trade disputes.

"Ireland's long and close friendship with the U.S. allows us, I believe, to play a constructive role during our presidency in exploring ways to strengthen U.S.-EEC relations," he said.

On U.S. Secretary of State James Baker's recent proposal for new transatlantic cooperation, Mr. Collins said "we shall be exploring within the community how best we can respond."

Turning to China, Mr. Collins said the EEC would continue to call for economic and political reform there, and for "respect for human rights and openness to the outside world."

It would also "continue to encourage all efforts to promote a political solution that will prevent the return to power of the Khmer Rouge" in Cambodia.

Mr. Collins stressed that European integration would have to go hand-in-hand with EEC moves towards eastern Europe, saying that social measures, environmental protection, better and cheaper transport and free movement across borders were priority issues.

Ireland will also be actively preparing for an intergovernmental conference on European economic and monetary union to be held at the end of the year, when Italy will have taken over as EEC president.

#90016d5880 01/16/1990 ~French/German News Agency
LONDON (JAN. 16) - Coffee exports by the 50 producer members of the International Coffee Organisation (ICO) totalled 5.2 million bags in November, the highest level for the month in six years, according to figures released here Tuesday.

Exports to ICO consumer members totalled 4.5 million bags, and to non-members 687,800 bags, the ICO said on the first day of an executive committee meeting here.

In November 1988, ICO exports totalled 4.8 million bags, 3.8 million to members and 974,000 to non-members.

Cumulative exports between July -- when an ICO export quota agreement was suspended -- and November were also at their highest level in six years, totalling 32.5 million bags, the ICO said.

Leading world producer Brazil exported 1.25 million bags of coffee in November, down from 1.32 million in the same month of 1988, but cumulative exports between July and November were up to 8.2 million bags from 7.5 million in the same period the previous year.

#90016d5930 01/16/1990 ~French/German News Agency
MOSCOW (JAN. 16) - University students will no longer face tests on Marxism-Leninism as a result of "democratization" sweeping higher education in the Soviet Union, the official news agency Tass said Tuesday.

The tests, part of final exams in all disciplines, are to be replaced by questions on social sciences, Tass said, quoting a university academic.

Instead of "history of the Soviet Communist Party", students can now study "social and political history of the 20th century", while "modern theories of socialism" will substitute for "scientific communism".

Tass attributed the move to "a general democratization" of teaching in the social sciences.

#90016d6030 01/16/1990 ~French/German News Agency
COPENHAGEN (JAN. 16) - Almost 50 per cent of Danes oppose increasing aid to Eastern Europe, and only 38 per cent support the idea, according to a survey published here Tuesday.

Of those in favour, 43 per cent said new aid should come out of Denmark's Third World assistance budget, 15 per cent wanted it financed by public sector savings, while 10 per cent suggested a tax increase.

The Danish Government decided late last year to allocate 300 million kroner (46.8 million dollars) to encourage reforms in the eastern bloc.

The survey of 1,100 people was carried out in November by the Grenns analytical institute, and the results were published in the economic daily Boersen.

#90016d6120 01/16/1990 ~French/German News Agency

LUSAKA (JAN. 16) - The leadership of the African National Congress, reunited after a quarter century of imprisonment and exile, began talks here Tuesday to chart the guerilla-backed movement's future course.

High on the agenda will be the possibility of negotiations with Pretoria, although ANC information chief Pallo Jordan expressed scepticism ahead of the meeting about the readiness of the South African government to negotiate seriously.

In an interview with Agence France-Presse, Mr. Jordan said he did not believe South African President Frederik de Klerk was prepared to "grasp the very unpleasant nettle that serious negotiations mean the loss of power" for the white-minority government in Pretoria.

"They would like to bring about change at a pace that is confortable to them and bring about changes which are such that at the end of the day what they foresee as the unpleasant consequences of democracy in South Africa will in one way or another be evaded," Mr. Jordan said.

The government made concessions only when it was forced to do so by international and domestic pressures, he said, and he did not foresee an early start to negotiations.

But sources close to the ANC suggested that other senior officials were more optimistic on the time scale for the start of negotiations.

Mr. Jordan reiterated the ANC's commitment to its blueprint for negotiations, which has become known as the Harare declaration.

This sets out the ANC's preconditions for talks with the South African government, which include the release of all political prisoners, the unbanning of the ANC and other outlawed organisations and the lifting of the state of emergency.

Talks here over the next few days will bring together the views of ANC members operating underground or in exile since the movement was banned in 1960, and others, led by former secretary-general Walter Sisulu, who have been in prison for more than 25 years.

Mr. Sisulu leads a delegation of seven other senior ANC men, most of whom were convicted in 1964 of planning acts of sabotage and sentenced to life imprisonment.

#90016d6410 01/16/1990 ~French/German News Agency

LONDON (JAN. 16) - The Isosceles consortium said Tuesday it suffered losses of 30 million pounds (50 million dollars) in its first four months of operation, largely due to debt servicing costs.

Isosceles was set up to take control of the Gateway supermarket chain, which it did at the end of July after a hostile two billion pound (3.3 billion dollars) takeover.

The loss figures released Tuesday covered the four-month period from the takeover to November 11.

Isosceles did not give Gateway's sales for the first four months under its control, but said that in the six months to November 11 its sales rose 3.1 per cent to 1.93 billion pounds.

The figures released Tuesday did not take into account the results of the 86 Medicare pharmacies sold to Superdrug in December, or 61 Gateway supermarkets sold to the Asda group for 705 million pounds as their sale had already been planned when Isosceles took control of Gateway.

The consortium is also to shed other assets as part of a policy of refocussing activity on large stores.

Isosceles said it had had to pay out 67 million pounds in interest on debts contracted to finance the Gateway takeover.

#90016d6790 01/16/1990 ~French/German News Agency

STUTTERHEIM, SOUTH AFRICA (JAN. 16) - Police Tuesday briefly detained some 200 black people in Kubusie village near this eastern Cape Province town after declaring it an operational area, effectively putting the law into the hands of security forces.

An Agence France-Presse correspondent said police distributed pamphlets

apologising to residents for "doing things wrong in the past", but then loaded them onto trucks and took them to a makeshift camp, where they were teargassed.

The villagers said they were later taken to Stutterheim where they were photographed and their fingerprints taken.

A police spokesman confirmed that 200 people had been detained for questioning and another seven people arrested.

Regional police commissioner Major M.J.Rust said the police had launched a full-scale crime prevention operation in Kubusie. "Several serious cases of unrest occurred during 1989 in Kubusie township and there is at present an escalation in incidents," he said in a statement.

Residents said they have been engaged in a two-month-long boycott of white-owned businesses in Stutterheim because demands to upgrade their community had not been met.

#90016d6800 01/16/1990 ~French/German News Agency

ISLAMABAD (JAN. 16) - U.S. Undersecretary of State Robert Kimmitt arrived from Riyadh Tuesday for talks on the Afghan conflict with top Pakistani officials and Afghan resistance leaders, diplomatic sources said.

Mr. Kimmitt was accompanied by the special U.S. envoy to the Afghan resistance, Peter Tomsen, and is considered a key figure in Washington's policy on Afghanistan.

The visit is the first by senior State Department officials under Prime Minister Benazir Bhutto's one-year rule.

The three-day trip was aimed at reassessing the United States' Afghan policy with the military stalemate that has developed since the Soviet Union withdrew its troops from Afghanistan in February 1989, reports here said.

Mr. Kimmitt held talks with Saudi Arabian leaders on ways to seek greater unity among the Afghan guerrillas and to broaden the base of the mujahedeen's one-year-old government, as in-fighting in rebel ranks has marred their effectiveness.

Mr. Kimmitt will have an important meeting with Army Chief of Staff General Mirza Aslam Beg and hold detailed discussions with Foreign Minister Sahabzada Yaqub Khan on Tuesday, the diplomatic sources said.

Another round of talks in the foreign ministry was scheduled for Wednesday

and Pakistan-based Afghan resistance leaders may participate in the session, the sources said.

Mr. Kimmitt was to meet President Ghulam Ishaq Khan and Mrs. Bhutto Wednesday afternoon and attend a dinner hosted by Mr. Ishaq Khan.

On Thursday he will visit the border city of Peshawar, which houses Afghan refugees and the rebels' headquarters. The U.S. officials will leave Peshawar for New Delhi the same day.

#90016d6910 01/16/1990 ~French/German News Agency

PARIS (JAN. 16) - Differences persisted Tuesday over the balance of power within a special development bank for Eastern Europe but delegates said a two-day international meeting on setting up the bank had made good progress.

Delegates from 36 countries and institutions ended the meeting Tuesday after discussing in detail the 56-point proposed statutes of the European Bank for Reconstruction and Development of Eastern Europe, drawn up by the European Economic Community (EEC).

They also set what several delegates described as an ambitious but feasible work programme aimed at reaching agreement by March.

During Tuesday's meeting, east European representatives outlined their countries' economic policies and what they wanted from the bank, in which east European countries will hold stakes although it will also offer them aid, sources close to the talks said.

Delegates stressed the constructive tone of the talks, but said that differences remained, particularly over the sharing out of capital participation.

Under the EEC proposal, the Community would have a 53 percent stake, with east European countries taking 15 percent.

But the Soviet Union alone would have 8.5 percent, the same level as the United States and Japan who have both expressed concern over the issue.

"The distribution of the capital has not been discussed in any depth," one Western delegate said.

"It is a delicate problem, more political than technical because it touches on the division of decision-making power within the bank."

"The real work is starting now," he added.

#90016d7030 01/16/1990 ~French/German News Agency
WARSAW (JAN. 16) - Several hundred coal miners in two pits in southwestern Poland went on strike Tuesday to press demands for a 28-dollar monthly pay rise, PAP press agency said here.

Workers in the Kazimierz Juliusz and Czerwone Zaglebie pits currently earn an average 60 dollars a month, a spokesman for the Upper Silesian Solidarity trade union told Agence France-Presse.

The union, headed by Lech Walesa, was "serving as an intermediary" between the strikers and management, he added.

Miners employed at the Kazimierz Juliusz pit went back to their work places after a walkout which lasted several hours following a telephone call by Solidarity Prime Minister Tadeusz Mazowiecki but the other pit continued to be paralyzed late Tuesday.

Mr. Mazowiecki reportedly pledged to meet miners here Thursday to discuss their problems.

#90016d7110 01/16/1990 ~French/German News Agency
BUCHAREST (JAN. 16) - Another mass grave has been found in the western Romanian city of Timisoara containing bodies of people tortured and killed in the revolution, the newspaper Adevarul said Tuesday.

Emotion was running high as a result of the report, with residents searching cemeteries for more bodies, local people interviewed by telephone told Agence France-Presse.

Thirty unidentified bodies were found in a similar grave last month after the ouster of the Ceausescu regime.

The new grave, found at Heroes Cemetery, contained bodies of people killed during a crack-down on demonstrations December 17 at the start of the revolution which toppled dictator Nicolae Ceausescu, the newspaper said.

It did not specify how many bodies were found, but said relatives had identified four of them.

Cemetery director Dorel Cinade said the bodies were transported from a local hospital on December 27. Timisoara funeral director Axente Bociort was in charge of them, he added.

They were put into standard coffins and buried the next day, according to the report.

"Many bodies bore marks of sadistic torture. Pieces of adhesive tape were stuck on the bodies with numbers upon them such as 71078, whose meaning is not known," the newspaper said.

A piece of paper stuck to the chest of one body said "arrived the 19th at 8:30." The savagely mutilated body of a young girl had the number 61063 on it.

The fact that some bodies had bandages on them showed the victims "died or were killed in hospitals", according to the newspaper.

It said that a mother had identified her son, "killed December 18 on the steps of the cathedral" and that another woman recognized her husband "who disappeared during the December 17 demonstrations".

Two other victims were also identified.

The total number of people killed in Timisoara, where the uprising began, is not yet known. Reports putting the death toll at 3,000 to 4,000 have not been confirmed.

RANGOON (JAN. 16) - Burma's opposition leader Aung San Suu Kyi, under house arrest since July, has been banned from running in the country's upcoming elections by Rangoon's electoral authorities, sources in her party said here Tuesday.

The sources from the National League for Democracy (NLD) said the decision was reached by the authorities on the grounds that Aung San Suu Kyi, 44, maintained "unlawful associations with insurgent groups."

The multi-party elections, the first in Burma in almost 30 years, are slated for May 27.

A plea requesting a revision of the decision by Rangoon's elections sub-commission has been entered by an aide of Aung San Suu Kyi, the daughter of Burma's independence hero General Aung San, the NLD sources said.

The ban came when the elections sub-commission upheld an appeal by a rival candidate who is running in the same constituency in Rangoon as Aung San Suu Kyi had intended to, the sources said.

The ruling, if confirmed, would overturn a decision last week by the sub-commission waiving an objection against Aung San Suu Kyi's candidacy by Labang Grawng, a candidate for the National Unity Party (NUP).

The NUP is believed to be supported by Burma's military authorities, who seized power in a coup in September 1988 to crack down on a nationwide pro-democracy movement.

Aung San Suu Kyi was placed under house arrest in July for up to one year after Rangoon's military government accused her of inciting unrest.

BONN (JAN. 16) - West Germany's three coalition partners met here Tuesday to discuss cuts in social aid granted to East German immigrants as more than 25,000 refugees arrived in the country in the first two weeks of January.

The three partners -- the Christian Democratic Union (CDU), the Christian

Socialist Union (CSU) and the Liberal Party (FDP) -- agreed on the need to reduce the benefits automatically accorded to East German immigrants and ethnic Germans from other countries, according to participants at the meeting.

But despite the agreement in principle, differences on what concrete measures to take remained and a special working committee was formed to submit specific proposals within the next few days, they said.

Although the East German authorities have announced plans to hold free elections on May 6, the stream of East German refugees into West Germany has continued practically unabated.

Bonn said 25,554 East Germans immigrated to West Germany in the first two weeks of January. In 1989, West Germany granted asylum to some 720,000 East Germans and ethnic Germans from other countries.

Several CDU and CSU officials said a law on retirement benefits which treats East German immigrants as if they had spent their careers working in West Germany should be changed. The FDP opposed that plan for the time being.

Interior Minister Wolfgang Schaueble was careful to assure that Bonn was not trying to build a "dam" to stem the refugee flow.

#90016d7490 01/16/1990 ~French/German News Agency

BLIDA, ALGERIA (JAN. 16) - A "suicide commando" shouting Moslem slogans burst in on the trial of an 89-year-old accused of murdering his wife and started a fight that left three dead here Tuesday, state prosecutor Ameur Benguerrah said.

Hours after the drama in this town near Algiers, the motives of the six youths, aged 16 to 20, were still not known, he said. "Nothing supports the theory that it was an operation with political motives," he added.

Islamic Salvation Front chairman Abassi Madani told Agence France-Presse his party had "no connection" with the attack, which left two of the assailants and a policemean dead.

The six had entered the courtroom quietly as the judge was about to sentence the defendant, the prosecutor said. They were dressed normally and only one sported the beard favoured by Islamic militants.

But after a brief discussion with police guarding the elderly man, one of the youths pulled a knife and seized a policeman's automatic rifle, shouting "Allah Akbar!" (God is great!) and "We will fight you, enemies of

God!".

A fight broke out, shots were fired and the commando seized an 18-year-old gendarme and the defendant as hostages.

Police reinforcements arrived and after a 30-minute gunbattle forced their way into the courtroom. Four of the youths surrendered, but two others were killed, along with the policeman they had seized.

Police identified the survivors in the group as two schoolboys, a student and an unemployed man. They said none had a police record.

They were unable to identify the dead youths.

None of the six had identification papers, although two of the men who surrendered were carrying 18,000 and 13,000 dinars (about 3,000 and 2,000 dollars), respectively.

Police transferred the surviving assailants to Algiers where, hours after the drama, they were refusing to answer questions.

The four were to be charged with murder, hostage-taking, criminal association and armed aggression.

PRAGUE (JAN. 16) - The Czechoslovak government has presented the Soviet Union with a proposed timetable for the staged withdrawal of Soviet troops posted in Czechoslovakia since 1968, the official CTK news agency said Tuesday.

The proposal was presented during Soviet-Czechoslovak talks here Monday and Tuesday. The talks are to resume in Moscow early in February, CTK added.

Prague also submitted proposals on the "status" the Soviet troops would have in the country prior to their withdrawal, CTK said, without giving further details.

The timetable said the pullout would be accomplished "in stages" but gave no deadline for the completion of the withdrawal of the 80,000 Soviet troops stationed in Czechoslovakia.

The two-day talks here focussed on the "political, military, legal, financial and other aspects" of a Soviet troop pullout from the country, CTK said.

The leader of the Soviet delegation, Deputy Foreign Minister Ivan Aboimov,

met with Czechoslovak Foreign Minister Jiri Dienstbier but there was no word on the outcome of their talks.

A spokesman for the Czechoslovak Foreign Ministry, Lubos Dobrovsky, said last week that the troop withdrawal could be completed by the end of the year.

But that forecast has been judged too optimistic by some western military analysts who say it would be difficult to meet given the complexity of the Soviet military infrastructure in the country.

On December 20, Soviet President Mikhail Gorbachev and Czechoslovak Prime Minister Marian Calfa agreed to work toward a "definitive" accord on the question of the Soviet military presence in Czechoslovakia.

An agreement could be reached "in the framework of a multilateral accord drawn up at the negotiations in Vienna" on conventional disarmament in Europe, the two leaders said.

Prague has said it considers the treaty under which the Soviet troops are stationed in the country to be "null and void." It was signed October 16, 1968, less than two months after the Soviet-led invasion of Czechoslovakia.

#90016d7690 01/16/1990 ~French/German News Agency

BEIRUT (JAN. 16) - The pro-Syrian Amal militia Tuesday released a 37-year old French woman captured by its fighters in southern Lebanon three weeks ago for allegedly spying for the rival Iranian-backed Hezbollah.

Anne Sournia, whose abduction was kept secret, was handed over by a group of armed Amal militiamen to the French ambassador, Rene Ala, in Syrian-controlled west Beirut, witnesses said.

Ms. Sournia, a converted Moslem who now calls herself Leila, was abducted on December 24 in Cana, a village in southern Lebanon where she had been living for almost three years, informed sources said.

The sources said she had been held and questioned in several Amal bases in the southern port city of Tyre.

A close aide to Amal leader Nabih Berri, Hassan Youssef, who was in the escort which handed Ms. Sournia over to the ambassador, said she had been arrested "because she was spying for Hezbollah."

Hezbollah, vying with Amal for control of Lebanon's Shia Moslem community, had the day before Ms. Sournia's abduction begun a battle against the

pro-Syrian group for strategic villages in southern Lebanon.

The fighting, during which Amal has detained several people in villages under its control on suspicion of belonging to the Iranian-backed fundamentalists, has continued despite mediation efforts by Iran.

Hezbollah Tuesday refused to comment on Ms. Sournia's abduction.

According to various sources, Ms. Sournia, who spent some of her childhood in Beirut, returned to Lebanon in the early 1980s and works for a group trying to find out the fate of prisoners held in Israel's self-declared "security zone" in southern Lebanon.

Mr. Youssef said his group had decided to release her "because of the good relations between Amal and France, and on humanitarian grounds due to the fact that she is a woman."

Mr. Ala said France had offered nothing in exchange for Ms. Sournia's freedom and said her release by Amal "was a sign of friendship towards France."

JOHANNESBURG (JAN. 16) - Talks Tuesday between striking transport workers and management to end an 11-week dispute which has seen 27 deaths ended with the strikers agreeing to answer new proposals Wednesday, a management spokesman said.

South African Transport Services (SATS) spokesman Leon Els would give no details of the company's proposals and strikers' representatives also refused to comment.

The strike, sparked by demands for higher pay and recognition by the unofficial South African Railway and Harbour Workers' Union (SARHWU), has been described as the bloodiest since 1922 by the liberal Democratic Party.

On January 9, nine men were killed and at least 67 injured when strikers and non-strikers clashes at a station east of Johannesburg.

Scores of people have been injured over the course of the dispute.

More than 22,000 of some 26,000 strikers have been dismissed by the state-run company, to be replaced by temporary labour.

Damage to SATS property resulting from strike-related violence stood at 38.5 million rands (15 million dollars), according to management, and workers have lost a reported 41 million rands (16 million dollars) in

wages.

The company has been refusing to accede to pay demands, stressing it signed a pay deal last April with the 12 unions representing its 150,000 workers.

COLOMBO (JAN. 16) - New Delhi has responded to a proposal by Sri Lanka to sign a friendship treaty by submitting a counter-draft, India's top envoy here said Tuesday.

Indian High Commissioner here, Lakhan Lal Mehrotra, said the counter-draft on the proposed Indo-Sri Lanka friendship treaty was submitted Friday.

Mr. Mehrotra declined to give details of the orIginal proposal or the amendments suggested by New Delhi, but said the final draft will be a "very forward-looking" document.

The new agreement is likely to be finalised by the middle of next month, officials here said.

KARACHI (JAN. 16) - Minister for Petroleum and Natural Resources Jatangir Badar on Tuesday inaugurated Pakistan's first off-shore oil rig, official sources said here.

The Sadaf-1 exploratory well is being drilled by the U.S.-based Occidental Oil and Gas Corp. in collaboration with Pakistan Oil Field Limited, Attock Oil Company and the Oil and Gas Development Corporation of Pakistan, about 150 kilometers (90 miles) southwest of here in the Arabian Sea, the sources said.

The well is in the 7,338 kilometer (2,833 mile) square Indus Delta concession, the sources said.

The drilling started on December 22 and the target depth is 3,960 meters (about 13,000 feet). Drilling has already reached 2,000 meters (6,700 feet), the sources said.

Based on hydro-carbon samples collected during the survey, experts are optimistic about the prospects of finding oil. The drilling is expected to be completed in 100 days.

Other countries have found oil in the same part of the Arabian Sea, the

experts said.

Pakistan currently produces 58,000 barrels of oil per day and consumes 122,000 barrels per day.

LUSAKA (JAN. 16) - African National Congress (Anc) veteran Walter Sisulu, 77, said Tuesday he believed apartheid would be abolished in South Africa within his lifetime.

''A democratic South Africa is just a question of time,'' said Sisulu, the former Anc secretary-general, who is here for consultative talks with the executive of the movement which is outlawed in South Africa.

At a reception hosted by Zambian President Kenneth Kaunda for Sisulu and seven other Anc leaders who were released from prison in South Africa last year, Kaunda pledged Zambia's continued support for the Anc.

He stressed the need for the issue of unification of warring splinter groups within South Africa to be addressed.

''Let them (Pretoria) not saddle you with coming to power with a divided South Africa,'' he said. Without unity in South Africa, the whole region will suffer, he added.

#90016d7900 01/16/1990 ~French/German News Agency

PARIS (JAN. 16) - Delegations from 34 countries ended in Paris Tuesday a first two-day conference round on establishing a European bank for reconstruction and development in Eastern Europe.

The negotiations will be continued March 10 and 11 in Paris to work out the statutes of the bank, it was announced by Jacques Attali, adviser to French President Francois Mitterrand.

He said the foundation charter could be signed ''this spring'' by the governments involved. Offices and a management could be made available within six months of the ratification of the charter.

Attali was described as mentor of the project which was suggested by Mitterrand to the European Parliament in Strasbourg last year.

The primary purpose of the bank will be to provide credits for the private sector, although measures to improve the infrastructure were not ruled out.

The bank's starting capital will be 10 billion Ecu (European Currency Units, or 12 billion U.S. dollars).

-30- 1147

#90016d7950 01/16/1990 ~French/German News Agency

WASHINGTON (JAN. 16) - The United States Tuesday reminded Israel, one of its closest allies, that U.S. military and economic aid it was receiving was not meant to be used to settle immigrants in the occupied territories of West Bank and the Gaza strip.

"Our current (Israeli aid) program is explicitely limited to Israel and not the occupied territories," said U.S. State Department spokeswoman Margaret Tutwiler.

Israeli Prime Minister Yitzhak Shamir was quoted Sunday by the Yediot Aharonot daily as saying that an expected massive immigration of Soviet Jews required them to be settled in a "greater Israel," a term which would include the West Bank and the Gaza strip captured by Israel following the 1967 Arab-Israeli war.

The United States, which pumps into Israel three billion dollars in aid every year, has persistently demanded it abandon its dream of a greater Israel and return to its pre-war borders.

Miss Tutwiler admitted her government was "seeking to clarify what he (Mr. Shamir) said," referring to the quote in Yediot Aharonot, but emphasized that the United States was not prepared to finance the settlement of new Jewish immigrants in the occupied territories.

"We do not provide U.S. Government resources or funds for settlement of new emigrants in the occupied territories," the spokeswoman said.

However, Miss Tutwiler was unable to explain if the United States had any control over how its aid was used in Israel.

#90016d8080 01/16/1990 ~French/German News Agency

BANGKOK (JAN. 16) - Cambodia's Prince Norodom Sihanouk said in a statement released here Tuesday that he would not appear before a French court to respond to a libel suit unless the United Nations lifted his "immunity as a head of state."

Prince Sihanouk, the head of a resistance coalition seeking to overthrow the Hanoi-backed Phnom Penh government, is wanted by a French court to respond to a libel suit filed by a Cambodian official.

In a statement released here by his representative in Bangkok, the prince said he was recognized by the United Nations as Cambodia's "legal" head of state.

The coalition he heads holds Cambodia's U.N. seat. It is dominated by the radical Khmer Rouge and includes two non-communist factions.

Noting that he was issued a summons to appear before a French court in May, the prince said that as "a member of the U.N., France should respect its decision when it recognizes me as legal head of the Cambodian state."

"I will not appear before a French court unless France first gets the U.N. to lift my immunity as head of state," he said in the statement.

The Phnom Penh government's Deputy Foreign Minister Hor Nam Hong filed a libel suit against the prince in France after the former monarch accused him of being responsible for the deaths of several people in his entourage during the 1975-1979 Khmer Rouge rule.

Mr. Hor Nam Hong, like many members of the Phnom Penh government, was a member of the Khmer Rouge regime before it was toppled by invading Vietnamese forces in 1979.

The Khmer Rouge are blamed for the deaths of hundreds of thousands of people during their rule.

While critical of the Khmer Rouge, the prince has argued that he needed to ally himself with them to free his country from Vietnamese domination.

SUMTER, S.C. (JAN. 16) PR NEWSWIRE - NBSC Corporation (NASDAQ-NMS: NSCB), parent company of The National Bank of South Carolina, reports net income for the year ended Dec. 31, 1989 of $4.003 million, or $1.28 per share, a 3.9 percent increase over earnings of $3.854 million, or $1.23 per share, reported in 1988.

Net income for the quarter ended Dec. 31, 1989 was $1.278 million, or $.41 per share, an increase of 16.2 percent over 1988 fourth quarter earnings of $1.1 million, or $.35 per share. "Earnings for both the quarter and the year are record highs for the company," Marvin D. Trapp, NBSC Corporation chairman and president, said.

Total assets reached $562.565 million at year end, an 18.3 percent increase over assets of $475.557 million at year-end 1988. Total loans were up 6.4 percent, reaching $371.783 million on Dec. 31, 1989. Total deposits reached $505.512 million at year end, a 21.9 percent increase over 1988. Total shareholders' equity grew 7.8 percent in 1989 to $36.150 million at year end.

NBSC paid a regular quarterly cash dividend of $.11 per share to shareholders on Jan. 2, 1990. NBSC declared dividends totaling $.44 per share during 1989, for a total cash distribution to shareholders of $1.375 million.

NBSC Corporation's common stock is traded over-the-counter and is quoted under the symbol NSCB on the NASDAQ National Market System. NBSC's primary subsidiary, The National Bank of South Carolina, has 28 offices in 15 cities and towns in South Carolina.

#90016p0016 01/16/1990 ~PR Newswire

ATLANTA (JAN. 15) PR NEWSWIRE - Georgia Gulf Corp. (NYSE: GGC) announced today that its board of directors has adopted, subject to stockholder approval, a plan of recapitalization where each share of the company's common stock will be converted into $38 in cash, one share of a new series of exchangeable pay-in-kind preferred stock of the company, and one newly issued share of common stock.

In connection with the plan of recapitalization, each stockholder will have the right, subject to certain limitations and in lieu of being paid the aforementioned cash and securities, to convert up to 30 percent of his common shares into a number of shares of the company's newly issued common stock. The company said that the number of shares will vary depending on how many stockholders make this election, but the amount will not be less than 11 or more than 14 shares for each share submitted for conversion.

The cash payment to be made to stockholders and the expenses incurred in connection with the plan of recapitalization will be financed through senior bank debt of up to $730 million and the sale by the company of approximately $200 million in senior subordinated debentures. According

to Georgia Gulf, a written commitment has been accepted from The Chase Manhattan Bank (National Association), Canadian Imperial Bank of Commerce and Security Pacific National Bank to provide the necessary senior bank financing. The senior subordinated debentures are expected to be solely underwritten by Goldman, Sachs & Co. The financing is subject to various conditions, including completion of due diligence and execution of definitive loan documentation.

It is estimated that the consideration payable in respect to each share of common stock in the recapitalization will have a total value of up to approximately $55 per share, the company said. The value will depend upon market conditions and the number of shares as to which the election is made to receive only common stock.

The preferred shares to be issued as a result of the plan of recapitalization will have a redemption price of $17 per share and are expected to trade at a price per share that is significantly less than the redemption price, the company said. These preferred shares will be entitled to a quarterly dividend at an annual rate of 16 percent of the redemption price. Such dividends will be paid in cash or in additional shares of preferred stock, at the company's option, for five years after issuance, and thereafter will be payable only in cash, the company added. The preferred stock will be redeemable at the company's option at any time subject to mandatory redemption on the fifteenth anniversary of issuance and will be exchangeable in whole or in part at the company's option for junior subordinated debentures at any time after the second anniversary of issuance.

The plan of recapitalization will be submitted to the company's stockholders for approval. Although no date for a meeting of stockholders to approve the plan has been set, the company stated that it believes a meeting may be held in April of this year. It is anticipated that closing of the transactions contemplated by the plan of recapitalization, if approved, would take place shortly thereafter, the company said.

#90016p0019 01/16/1990 ~PR Newswire

HARTFORD, CT (JAN. 16) PR NEWSWIRE - Magellan Petroleum Corporation (NASDAQ: MPET) said its subsidiary, Magellan Petroleum Australia Limited, and its joint venture partners have made another oil discovery on the Navajo Indian Reservation in Utah's Paradox Basin.

The wildcat well, Anasazi No. 1, is a dual-zone discovery that initially flowed at the rate of 1,635 barrels per day through a one-inch choke during an eight-hour test of a 24-foot section of the Desert Creek

formation. It subsequently flowed 705 barrels per day from a higher, 56-foot interval of the same formation, the company said.

According to a Magellan spokesman, Anasazi is the second algal reef mound discovery by the Navajo venture, which has identified a number of these structures within its concession area to the south of the Aneth oil and gas field. The first, Saghzie No. 1 -- about one-half mile south of Anasazi -- has been producing high-gravity crude at the rate of 350 barrels per day for the past two months, he said.

The Navajo venture thus far has completed four wildcat wells (two have been abandoned as non-commercial) and will continue drilling exploratory wells over the next six months, the spokesman said. He also noted the Jan. 11 commencement of a development drilling program at the Black Rock gas field, where the partners are seeking to increase output to about 20 million cubic feet per day from the current 8 mmcfd.

Magellan's Australian unit has a 12 percent working interest in the Navajo venture, which holds exploration rights to 254,000 acres of reservation lands in Utah, Arizona, and New Mexico.

COSTA MESA, CA (JAN. 16) PR NEWSWIRE - Cummins Alabama has been named by Parker Automotive Corp. (OTC) as the exclusive distributor of CarbonClean Industrial Diesel Tune in the state of Alabama, the panhandle of Florida and in coastal Mississippi.

With branch facilities in Birmingham, Decatur, Mobile, Montgomery and a special marine branch in Mobile, Cummins Alabama is the factory distributor for Cummins Engine Co. in the trucking, construction and marine industries.

CarbonClean Industrial Diesel Tune (IDT) is a patented method for cleaning diesel fuel systems, which restores engine performance and economy and greatly reduces particulate emissions. IDT cleans these fuel systems in about an hour, as opposed to normal manual techniques which can take up to eight hours to perform.

"We are delighted to add Cummins Alabama to our exclusive distribution network," said Michael E. Parker, chairman and chief executive of Parker.

"Our plan is to utilize the distributorships that possess the largest market share in each region of the country, and who have the reputation

and facilities to best market CarbonClean," continued Parker.

"In Alabama, Cummins Alabama is that distributor," he added.

Parker Automotive Corp. is a publicly held company headquartered in Costa Mesa. Manufacturing facilities are in Fountain Valley, Calif., and regional sales offices are maintained nationwide. The company sells its products worldwide and is the acknowledged world leader in flushing systems for internal combustion engines.

SOUTH PLAINFIELD, NJ (JAN. 16) PR NEWSWIRE - Enzon, Inc. (NASDAQ: ENZN), announced today that it has signed a letter of intent with Erbamont, N.V., the pharmaceutical subsidiary of Montedison S.p.A. (ADS - NYSE: MNT), Milan, Italy, to enter into a marketing alliance involving Enzon's lead drug for the treatment of leukemia.

Under the proposed agreement, Erbamont will acquire foreign marketing rights to PEG-L-asparaginase, which is currently under study for the treatment of acute lymphoblastic leukemia (ALL), lymphoma and other cancers. Erbamont will be responsible for foreign clinical trials, international registrations, and marketing while Enzon will receive royalties on all sales. In addition to receiving a significant up-front payment, Enzon will retain worldwide manufacturing rights as well as marketing rights in the United States, Canada and the Soviet Union.

"We are pleased that the positive results from clinical trials with PEG-L-asparaginase warrant a full development and marketing effort by a leading oncology company on a worldwide basis," said Glenn Kazo, Enzon's vice president of corporate development. "An agreement with Erbamont will give Enzon a strong marketing partner with the proven capability to bring new cancer products to the marketplace."

Enzon recently announced plans to file a Product License Application with the Food and Drug Administration (FDA) to obtain marketing approval for PEG-L-asparaginase in the United States.

Erbamont is a world leader in the discovery, manufacture and sale of anticancer chemotherapeutic drugs. Its ethical drugs are sold in over 120 countries. Adriamycin(TM) is the company's principal ethical pharmaceutical and is the largest selling anticancer drug in the United States and Western Europe. Its major business units include Farmitalia Carlo Erba S.R.L., a leading pharmaceutical company in Italy; Antibioticos Farma S.A., a leading pharmaceutical company in Spain; and Erbamont Inc.,

with its Adria Laboratories division located in Columbus, Ohio.

Enzon is a pharmaceutical company developing therapies for life-threatening diseases through the application of its proprietary technology Pegnology(SM), to enhance the delivery of protein-based drugs. Four products developed by the company are undergoing clinical studies, including Adagen(TM) (PEG-ADA), currently awaiting FDA approval for the treatment of a form of severe combined immunodeficiency disease, also known as "bubble boy" disease.

#90016p0030 01/16/1990 ~PR Newswire

BEVERLY HILLS, CA (JAN. 16) PR NEWSWIRE - Hilton Hotels Corp. (NYSE: HLT) announced today that fourth quarter net income declined 24 percent from the 1988 level. On a full year basis, 1989 net income declined 16 percent.

For the three months ended Dec. 31, 1989, net income totaled $26.9 million or 55 cents per share, down from $35.2 million or 73 cents per share in 1988.

Hotels income contribution increased five percent in the fourth quarter to $36.0 million, while gaming declined 28 percent to $20.7 million. Total income contribution for the quarter decreased 10 percent to $56.7 million.

Hotel occupancy for the quarter was 67 percent compared with 68 percent in 1988. Nevada gaming occupancy was 88 percent, up from 85 percent in 1988. Average room rates improved six percent for hotels and one percent for the Nevada gaming operations.

Net interest expense decreased $1.6 million from the 1988 level due to increased capitalized interest. Pre-tax income from operations of $38.9 million was 14 percent below the 1988 level. The effective income tax rate for the period was 31 percent compared with 22 percent in 1988.

Barron Hilton, chairman and president, commented: "Hotel income improved in our biggest markets -- New York City and Hawaii. Our overall hotel improvement comes despite the anticipated soft first-year results from six new equity hotels and the impact of the San Francisco region's earthquake.

"Our Nevada operations were negatively impacted by a low win percentage in the casino, continuing construction on the Las Vegas Strip and start-up costs at our new theme casinos."

Net income for the year was $110.1 million, equal to $2.27 per share, down

16 percent from net income of $130.9 million or $2.72 per share from operations last year. The 1989 results include a $2.4 million after-tax loss or five cents per share from a property transaction.

Hotels income contribution for the year improved 12 percent, while gaming declined 20 percent. Total income contribution decreased five percent to $231.9 million.

FREMONT, CA (JAN. 16) PR NEWSWIRE - Vitalink Communications Corporation (NASDAQ: VITA) announced today that net sales for the first quarter ended Dec. 31, 1989, were $18.3 million, an increase of 64 percent over the $11.2 million reported for the quarter ended Dec. 31, 1988. Both income from continuing operations and net income for the first quarter of fiscal 1990 were $4.4 million, or $0.31 per share. Income from continuing operations increased 97 percent from $2.2 million, or $0.19 per share, from the first quarter of fiscal 1989. Net income for the first quarter of fiscal 1989 was $4.6 million, or $0.40 per share, and included a $1.4 million gain on sale of discontinued operations and a $1 million extraordinary tax benefit. Per share data is based on a weighted average of 14.1 million shares for the first quarter of fiscal 1990, compared to 11.6 million shares for the like quarter a year ago.

Gross profit for the quarter ended Dec. 31, 1989, was 69 percent, compared to 66 percent for the quarter ended Dec. 31, 1988. "Lower material costs and increased volume, along with changes in the product and distribution channels contributed to the higher gross profit for the quarter," according to Chairman and CEO George Archuleta.

Archuleta commented on the excellent results for the quarter saying, "This is our fourteenth consecutive profitable quarter. We believe this quarter's sales growth reflects the continued success of our family of internetworking products worldwide. The fact that over half of our business comes from repeat orders attests to the integrity and reliability of our products and service."

Vitalink Communications Corporation, founded in 1980, manufactures, markets and services internetworking products which connect geographically dispersed local area networks (LANs) worldwide.

NEWTON UPPER FALLS, MA (JAN. 16) PR NEWSWIRE - GZA GeoEnvironmental Technologies, Inc. (NASDAQ: GZEA) today announced its results for the quarter and the nine months ended Nov. 30, 1989. For the third fiscal quarter, net revenue, the company's primary measure of business growth, was $8.5 million, 20.9 percent higher than during the comparable period last year. Third quarter net income increased by 58.0 percent to $806,000. Earnings per share for the quarter were 22 cents compared to 20 cents last year.

For the nine months ended Nov. 30, 1989, net revenue increased by 17.0 percent to $24.0 million while net income rose 30.4 percent to $1.8 million. Earnings per share for the first nine months of fiscal 1990 were 60 cents compared to 56 cents in fiscal 1989.

The company attributed higher revenue and earnings results to an increase in volume of the company's environmental consulting and geotechnical engineering services, and increased interest income attributable to investment of the proceeds of the company's initial public offering.

GZA GeoEnvironmental Technologies, Inc. provides a wide spectrum of environmental consulting and remediation services and geotechnical services to industrial companies, firms involved in real estate development and finance, the solid waste industry, the construction industry, and public agencies.

The common stock of GZA GeoEnvironmental Technologies, Inc. is listed on the National Market System of NASDAQ, symbol GZEA.

BOSTON/GENEVA, SWITZERLAND (JAN 16) PR NEWSWIRE - The Ares-Serono Group

today reported sales of US$519.0 million for the year ending Dec. 31, 1989 a 23.4 percent increase compared with 1988 sales of $420.5 million. Excluding unfavorable currency fluctuations, actual sales growth for the year was 28.0 percent.

"1989 sales in excess of the half-billion dollar benchmark is a significant achievement for the company and a credit to its people, who made it possible. With a compound annual growth of 33.7 percent during the last five years, Ares-Serono is far exceeding industry averages," said Fabio Bertarelli, chief executive officer of The Are-Serono Group. "The 1990s will see Ares-Serono continue to expand and to strengthen its leadership role in the markets it serves around the world."

The strong performance of the company is attributable to increased sales in all divisions, improved utilization of capacity and product launches in new markets.

Ethical pharmaceutical sales for the year increased 19.2 percent to $421.0 million from $353.2 million in 1988. After adjusting for currency effects growth in sales of pharmaceutical products was 23.6 percent. The Ares-Serono Group expanded its worldwide position as the leader in the human infertility market. The company also introduced Saizen(R), a human growth hormone made by genetic engineering, in more than 12 countries.

Growth also continued to be strong in the Diagnostic division, where sales increased by 43.6 percent to $83.7 million from $58.3 million in 1988. In 1989, the Diagnostics division began shipments of the SR1 System, a fully automated enzyme immunoassay diagnostic instrument for use in physicians' group practices, clinical laboratories and hospitals.

Sales of over-the-counter (OTC) products in 1989 were $14.3 million compared to $8.9 million in 1988, a 60.7 percent increase.

Both the August 1988 acquisition of Baker Instruments Corp. in the United States and the January 1989 acquisition of Kalopharma S.p.A. in Italy favorably affected the results of the Diagnostic and OTC divisions, respectively.

BOSTON (JAN. 16) PR NEWSWIRE - Cognos Incorporated and Digital Equipment Corporation (NYSE: DEC) today announced two new worldwide cooperative marketing and distribution agreements. Under the agreements, Cognos will distribute Rdb/VMS, Digital's relational database , and Digital will

resell PowerHouse, the fourth generation application development language from Cognos, as part of Digital's Enterprise Integration Services (EIS) Third Party Business Program.

The agreements represent one of Digital's first such worldwide cooperative marketing and distribution programs. The reseller program for Rdb provides the Digital and Cognos sales forces with incentives and quota credits equivalent to the sale of parent company products. The EIS Third Party Business Program allows the Digital salesforce to make Cognos products directly available to customers as part of the EIS portfolio. These agreements are augmented by a comprehensive marketing support program.

The agreements further expand the long standing relationship between the two companies, which is founded on the tight integration of the PowerHouse fourth-generation language (4GL) and report writing products with Digital's VAX architecture and operating system.

This relationship was strengthened with the release of PowerHouse 5.12, the latest version of the 4GL, which supports Digital's Rdb/VMS 3.0 and VMS 5.0, and is fully integrated with Digital's strategic repository.

Cognos has been a leading participant in Digital's Cooperative Marketing Program (CMP) since 1985 and today is one of the largest CMPs. PowerHouse is currently the leading 4GL on VAX systems, with over 28 percent of the market and more tha n 3,000 VAX licenses worldwide. Rdb is the leading VMS database system with more than 13,000 development licenses. It is a critical component of the VMS operating system environment. The market share information for both PowerHouse and Rdb is according to research conducted by Computer Intelligence.

Cognos sales worldwide were $107.9 million (CDN) for the fiscal year ended Feb. 28, 1989. Cognos is a developer and marketer of a powerful set of software tools used for application development and data management. Its flagship product, the PowerHouse fourth-generation language, now has over 13,500 installations on mid-range computers worldwide in over 70 countries.

SEOUL, KOREA (JAN. 16) PR NEWSWIRE - Cadence Design Systems Inc. (NASDAQ: CDNC) a worldwide leader in electronic design automation (EDA) software, today announced the opening of its Korean subsidiary, Cadence Korea Ltd., to define and provide ongoing comprehensive post sales technical support

to the company's Korean customer base.

Cadence Korea will coordinate its technical support efforts with the marketing and sales functions provided by Daou Technology Inc., Cadence's exclusive Korean representative. Over the next several years, Cadence Korea's goal is to define how Cadence's product lines can be customized for the Korean electronic industry. The new Cadence subsidiary's headquarters are located at 1305, Daeheung Building 648-23, Yuksam-Dong, Kangnam-Ku, Seoul, Korea. Seyul Choe, formerly a Cadence application manager based in the United States and most recently the company's Korea-based applications manager, has been named general manager of Cadence Korea.

Dr. Chung Duk Kim, vice president, semiconductor division of the Korea Electronics Telecommunications Research Institute stated, "I'm pleased to recognize the commitment that Cadence Design Systems has made to the Korean electronics industry which, in 1990, will firmly establish itself as one of the top two Asian electronics forces competing in the global market."

K.K. Kim, senior executive director of the research and development center semiconductor business of Samsung Electronics, commented, "The opening of the Cadence Korea subsidiary to serve the expanding technical support requirements of our major electronics companies attest to the critical role of Cadence and its next-generation electronic design automation software will play in the development of our electronics industry. We welcome Cadence to the Korean electronics family and look forward to an invigorating and fruitful relationship."

Joseph B. Costello, president and chief executive officer of Cadence, stated, "Cadence was formed to serve the international electronic design automation marketplace, as it expands into new areas of the world. We clearly foresaw that, in the 1990s, Korea would emerge as a dominant force in the design as well as manufacture of electronics products for worldwide consumption. Our large Korean customers deserve and want our local post sales technical support in Korea as they develop products in the 1990s."

Costello continued, "Through Cadence Korea, we are committed to providing this support and look to the future when Cadence Korea will spearhead the definition of Cadence products targeted for the Korean electronics market. Thus, we're especially pleased to announce our permanent presence in Korea and demonstrate our corporate commitment to this country's explosive electronics industry."

For marketing and sales information, contact I.R. Kim at Daou Technology Inc., 02-556-1251. For technical support information, contact Seyul Choe at Cadence Korea Ltd. 02-558-1761.

Cadence Design Systems Inc., is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronic systems. Cadence operates throughout the United States, Europe and Asia. The company is headquartered in San Jose, Calif., and is traded on NASDAQ under the symbol "CDNC."

#90016p0044 01/16/1990 ~PR Newswire

SAN DIEGO (JAN. 16) PR NEWSWIRE - HNC today announced the IDEPT (TM) (Image Document Entry Processing Terminal) workstation, with OSCAR (TM), HNC's proprietary neural network recognition software, the only desktop system with complete ICR (Intelligent Character Recognition) capabilities. IDEPT recognizes, as well as captures, stores and retrieves images.

On a digit-by-digit basis, IDEPT achieves greater accuracy in reading handprinted numbers and alphabetic characters than any other ICR product on the market. IDEPT also reads characters that may touch one another -- a capability no other ICR product has.

IDEPT reads forms that are scanned into the system. Its OSCAR software recognizes a wide variety of information, including handprinted characters and numbers (segmented or touching), typed characters and printer-generated characaters. It also recognizes and identifies mark sensing, such as checked boxes on forms, or circled letters or numbers.

This easy-to-use turnkey system is particularly well-suited for processing all types of forms from IRS 1040-EZ forms, insurance forms for medical claims, banking forms, to timecards and magazine subscription applications. IDEPT can be trained to work on many different forms, and can read several batches of different form types in one session.

Typically, the user scans a form into the system, and with a mouse, identifies the areas the OSCAR software should scan and recognize. The form is set up only once and IDEPT reads the forms on either single feed or batch mode. With OSCAR software, users can also lay out their own customized forms.

The OSCAR software is an easy-to-use, windows-based system, and uses a point-and-click interface.

The IDEPT workstation can operate in operate in either a standalone or networked configuration. In the networked configuration, IDEPT can be used to recognize characters on forms that have either been stored on a remote image data system or scanned at another location.

The price for the IDEPT workstation is $39,500 for the basic configuration. The system is available immediately directly from the company. HNC is looking for dealers of office products for nationwide distribution of the product.

PITTSBURGH (JAN. 16) PR NEWSWIRE - Mellon Bank Corp. (NYSE: MEL) today reported 1989 income, excluding extraordinary gains, of $181 million, compared with a loss of $65 million in 1988. For the fourth quarter of 1989, Mellon reported net income of $6 million, compared with net income of $48 million in the fourth quarter of 1988.

"By all measures, 1989 was a year of outstanding progress for Mellon Bank Corporation," said Frank V. Cahouet, Mellon chairman and chief executive officer. "We returned the organization to solid profitability, driven by increased earnings from our core lines of business, while taking the steps necessary to ensure our ability to prosper in the future."

The decrease in fourth quarter earnings from the prior year resulted principally from management's decision to reduce the corporation's

exposure to Lesser Developed Countries (LDCs) by recording a $100 million provision for possible LDC losses.

"The increase in LDC provision better positions the corporation," Cahouet said. "More importantly, in the fourth quarter we achieved strong operating performance in our core lines of business, while continuing to control operating expense."

#90016p0055 01/16/1990 ~PR Newswire

STATE COLLEGE, PA (JAN. 16) PR NEWSWIRE - Richard E. Perry, chairman, president and chief executive officer of C-COR Electronics Inc. (NASDAQ: CCBL), today announced the financial results for the second quarter ended Dec. 29, 1989.

C-COR reported net income of $802,000 on sales of $13,067,000. This compares to net income of $1,354,000 on sales of $12,816,000 for the second quarter of the previous year. Earnings per share for the quarter ended Dec. 29, 1989, were $.18. This compares to earnings per share of $.32 for the same quarter of the previous year. C-COR's fiscal year ends on June 30.

Net income for the first six months totaled $1,916,000 on sales of $26,294,000 compared to net income of $2,420,000 for the first six months of fiscal 1989 on sales of $25,035,000. Earnings per share for the first six months were $.44 compared to earnings per share of $.57 for the first six months of fiscal 1989.

Second quarter revenues and profitability were affected by two key management decisions based on the belief that long-term strategic planning is essential for C-COR's ongoing strength and viability. Shipments were slowed as adjustments took place to the new disciplines needed for implementation of the closed-loop, companywide business system called Manufacturing Resources Planning (MRP II). Profitability was affected by the start-up funding for C-COR's joint development project with COMLUX to produce an all-digital fiber optic system for cable television systems. Both decisions were essential for future growth and profitability. Commenting on the situation, Perry stated, "I am comfortable with our choice to go ahead on these projects. We're beginning to see positive results on the MRP II implementation process and industry reaction to initial fiber optic products has been excellent. With strong order input and a backlog of $14.4 million, compared to $12.2 million at the end of the first quarter, and $11.6 million at the end of last year's second

quarter, we expect to make our previously stated annual revenue goal of $65 million."

C-COR, founded over 35 years ago, designs and manufactures high quality electronic equipment used in entertainment cable television and data communication systems. C-COR's headquarters is in State College, Pa., with production facilities in Altoona and State College, Pa. Its marketing arm in Europe, C-COR Europe B.V., is located in The Netherlands. C-COR's common stock is listed in the NASDAQ National Market System under the symbol CCBL.

#90016p0058 01/16/1990 ~PR Newswire

HOLLYWOOD. FL (JAN. 16) PR NEWSWIRE - General Rent-A-Car today kicked off its first-ever national television advertising campaign with four 30-second spots running on cable network stations, including ESPN, CNN, FNN, A&E and Lifetime.

The TV campaign, titled "The Audition," was shot without a script and positions General as the friendly car rental company with low rates and unlimited free mileage from coast-to-coast.

Through flash frame editing, the commercials show out-takes of kids at a casting session as they attempt to deliver their lines. The car rental company's new mascot, a Saint Bernard named "General," patiently waits by each child, as each stumbles through the audition.

General's Vice President of Advertising Debra Gilbert explains, "The concept behind the commercials does not require a perfect performance, but

rather capitalizes on the spontaneity of the children. There's something delightful about kids just being kids, bloopers and all."

The scriptless commercials were created by Paradigm Communications of Tampa, Fla, General's advertising agency of record, which first introduced the company's Saint Bernard mascot in a consumer and trade print campaign initiated last October.

One of the four spots also highlights the company's exclusive new fleet of luxury-class Chrysler Imperials available at the low nationwide rate of $39.99 a day.

The Chrysler Corporation is the only American car manufacturer to include driver's side air bags as a standard safety feature in all its 1990 automobiles.

Since its purchase in May 1989, the new General Rent-A-Car has aggressively sought additional leisure and commercial business through increased advertising and sales activities, while introducing a new company philosophy designed to provide low rates, superior products and total customer satisfaction.

The company also has expanded its rental locations by more than 300 percent during the past 8-month period, now operating 94 rental locations, all corporately owned and located in the Southeast, Southwest, West and Northwest.

#90016p0059 01/16/1990 ~PR Newswire

WEST CHESTER, PA (JAN. 16) PR NEWSWIRE - Commodore International Limited (NYSE:CBU), through its operating subsidiaries, including its U.S.-based subsidiary, Commodore Business Machines, Inc., today introduced a low cost personal workstation targeted at the rapidly growing 25MHz 386 market.

The Intel 80386DX based Commodore PC60-III is designed to offer speed, versatility and access to mass storage at a lower cost than competitive systems. Equipped with nine expansion slots, the PC60- III will run virtually all applications from existing industry standard personal computers and will accept all the new mainstream operating systems and user applications.

The PC60-III is designed in a work-space saving, floor-standing format, rather than in a conventional desk-top layout. It is available in three different models, all equipped with 2MB main memory (extendable up to

18MB). Two are equipped with integral hard disks. Both 5.25 inch and 3.5 inch floppy drives are supplied as standard, enabling the system to read and write disks in virtually any format.

The combination of high performance and nine expansion slots makes the PC60-III an ideal system for experienced users who wish to boost their personal productivity with a more powerful system. In addition, the computer's floor standing format, Super VGA graphics and relatively low cost also make it an attractive system for use as a UNIX or MS-OS/2 processor, a file server in a local area network, or a desk-top publishing or CAD system.

U.S. shipments are expected to begin in February. Announcing the new system today in West Chester, C. Lloyd Mahaffey, Vice President, Marketing Commodore Business Machines, Inc., stated: "The PC60 is designed for users who need power and performance -- but without the premium associated with top-end, state-of-the-art technology."

Commodore International Limited, through its subsidiaries around the world manufactures and markets personal computers for home, education, business and professional users. The Company has three product lines: Amiga computers, PC compatibles and C64 computers.

#90016p0064 01/16/1990 ~PR Newswire

JACKSON, MI (JAN. 16) PR NEWSWIRE - Consumers Power Company set record electric sales in 1989 for the sixth consecutive year, and delivered its highest volume of natural gas since 1981. Despite cooler summer temperatures in 1989, electricity sales for Michigan's largest utility increased 1.3 percent to an all-time record 29.7 billion kilowatt-hours.

Natural gas deliveries by Consumers Power were more than 303 billion cubic feet (Bcf), a 5.6-percent increase compared to 1988 deliveries. Total gas sales were up 3.6 percent compared to 1988. Gas sales to residential customers were particularly strong, up 5.2 percent compared to 1988 levels.

"Strong electric sales and natural gas deliveries are signs of continued strength in Michigan's economy," said William T. McCormick Jr., chairman and chief executive officer of Consumers Power. "Record electric sales in 1989 were achieved despite significantly cooler summer weather than in 1988. This clearly indicates the need for more electric capacity in Michigan, especially since our reserve margin is only 9 percent -- well below the 23 percent margin deemed prudent by the Michigan Public Service

Commission," said McCormick.

Compared to 1988 levels, electric sales to commercial customers increased 3.1 percent. Sales to residential customers were up 1.3 percent, while sales to industrial customers were 0.3 percent higher compared to 1988.

Natural gas deliveries were the highest by the utility since 1981. Natural gas deliveries for the month of December were 53.3 Bcf, the highest for any December in Consumers Power's 103-year history.

Gas sales to commercial customers increased 2.5 percent compared to 1988 levels. Gas deliveries to transportation customers increased 13.7 percent for the year to 66.2 Bcf. Because, in large part, of the increase in gas transported to industrial customers, there was a 7.7-percent decrease in sales to industrial customers.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90016p0068 01/16/1990 ~PR Newswire

STERLING HEIGHTS, MI (JAN. 15) PR NEWSWIRE - Kenneth D. McClain, president of McClain Industries Inc. (NASDAQ: MCCL) today announced that the company will be reporting a loss for the year ended Sept. 30, 1989. Additionally, the company will restate and reduce earnings for the year ended Sept. 30, 1988 by $701,000 before adjustments for income taxes, or $462,000 after income tax adjustments.

The company anticipates that the net loss for the current fiscal year will be approximately $140,000 or $.05 per share. Net income for the prior fiscal year will be restated from $1,940,206 to $1,478,206, a reduction in per share earnings from $.64 to $.49.

Based on preliminary review it appears that the restatement for the year ended Sept. 30, 1988 is attributable to an error in the calculation of the LIFO inventories. According to management, the current year loss is attributable to inventory write-downs resulting from errors in cost build-ups, increased warranty claims and other factors amounting to approximately $1,800,000.

The company anticipates that final, audited data will be announced in the near future.

MORRIS TOWNSHIP, NJ (JAN. 16) PR NEWSWIRE - Allied-Signal Aerospace Company announced today that Iberia, Spain's flagship airline, has selected the company's Traffic Alert and Collision avoidance system (TCAS) for its entire fleet of 45 aircraft.

Terms of the contract were not disclosed.

"Iberia has selected Bendix/King avionics equipment for nearly 50 years and we are honored that the airline is continuing that tradition with TCAS " said Robert M. Handley, director of marketing for Allied-Signal's Bendix/King Air Transport Avionics division in Ft. Lauderdale, Fla.

Iberia is the ninth airline worldwide to select the Bendix/King TCAS system. Others include USAir, Southwest, American, Delta, Cathay Pacific, All Nippon Airways, Continental Airlines and Continental Express.

TCAS is an airborne collision avoidance system mandated by the federal government that operates independently of ground-based radar stations. The system informs pilots of the location of other aircraft in their vicinity, alerts them to potential threats and issues vertical course correction advisories if the situation warrants.

TCAS equipment has been mandated by the FAA for all aircraft carrying more than 30 passengers flying in U.S. airspace by the end of 1993.

Allied-Signal Aerospace Company is an operating unit of Allied-Signal Inc. (NYSE: ALD), an advanced technology company with businesses in aerospace, automotive and engineered materials.

SUMTER, SC (JAN. 16) PR NEWSWIRE - NBSC Corporation (NASDAQ-NMS: NSCB), parent company of The National Bank of South Carolina, reports net income for the year ended Dec. 31, 1989 of $4.003 million, or $1.28 per share, a 3.9 percent increase over earnings of $3.854 million, or $1.23 per share, reported in 1988.

Net income for the quarter ended Dec. 31, 1989 was $1.278 million, or $.41 per share, an increase of 16.2 percent over 1988 fourth quarter earnings

of $1.1 million, or $.35 per share. "Earnings for both the quarter and the year are record highs for the company," Marvin D. Trapp, NBSC Corporation chairman and president, said.

Total assets reached $562.565 million at year end, an 18.3 percent increase over assets of $475.557 million at year-end 1988. Total loans were up 6.4 percent, reaching $371.783 million on Dec. 31, 1989. Total deposits reached $505.512 million at year end, a 21.9 percent increase over 1988. Total shareholders' equity grew 7.8 percent in 1989 to $36.150 million at year end.

NBSC paid a regular quarterly cash dividend of $.11 per share to shareholders on Jan. 2, 1990. NBSC declared dividends totaling $.44 per share during 1989, for a total cash distribution to shareholders of $1.375 million.

NBSC Corporation's common stock is traded over-the-counter and is quoted under the symbol NSCB on the NASDAQ National Market System. NBSC's primary subsidiary, The National Bank of South Carolina, has 28 offices in 15 cities and towns in South Carolina.

#90016p0075 01/16/1990 ~PR Newswire

ROCHESTER, NY (JAN. 16) PR NEWSWIRE - Curtice Burns Foods (AMEX: CBI) today announced that it expects to report lower than anticipated earnings for its second fiscal quarter ended December 29, 1989.

Although the company expects to record a sales increase of 15-20 percent for the quarter, it expects net earnings to fall between 12 and 15 percent below the amount earned during the same period in the previous year.

According to David J. McDonald, president and chief executive officer, "We are disappointed with our second quarter results, however, we do expect earnings to significantly improve by year end.

"The decline in earnings for this quarter can be largely attributed to the following factors: unusually poor growing conditions in the Northeast, the region that supplies the bulk of our vegetable products; higher ingredient costs resulting in lower margins for our meat snack and aseptic operations; and competitive pressures in the chips and dip snack food business.

"Most of the problems are short term and we expect to return to a positive year-to-year net earnings comparison by the end of this fiscal year. It

should also be noted that comparisons to last year's second quarter may be misleading due to the record high net earnings recorded for that period."

Curtice Burns Foods is a processor and marketer of regionally branded, private label, and food service products throughout the United States and Canada. Sales in fiscal 1989 exceeded $800 million.

MORRISTOWN, NJ (JAN. 16) PR NEWSWIRE - In response to extraordinary demand for its newest networked computers, AT&T Computer Systems today announced it has begun manufacturing WorkGroup Systems at its Little Rock, Ark., factory.

"We had firm orders for more than 60,000 computers when we announced them in July, and we've seen that demand double since then," said Richard A. McGinn, AT&T Computer Systems president.

"The bulk of our PCs will continue to be made by the Intel Systems Division," he said, noting the Little Rock production will complement the Intel supply.

"By the end of the first quarter of 1990, the combined output of Intel and Little Rock will more than double the 1989 quarterly production capacity, with more capacity available, if needed," McGinn said.

No newcomer to the field of manufacturing computers -- AT&T manufactures its 3B minicomputer line at Oklahoma City -- this marks the first time the company has manufactured personal computers at one of its plants.

The Little Rock factory currently makes StarLAN hardware, the AT&T family of 6500 communications terminals and controllers, computer keyboards and other AT&T terminals. It also assembles the 6386E/33 WGS, Model S, the company's high-end networked computer, also announced in July.

"AT&T is proud of its history of quality manufacturing excellence, and we are eager to apply that skill to provide customers with the kind of networked computers they need," said Lawrence S. Fetherman, general manager, Little Rock manufacturing operations. "This is great news for us for our community and for our customers."

The 600,000-square-foot Little Rock plant employs about 800 people, who will be able to accommodate the additional work, Fetherman said.

WINDER, GA. (JAN. 16) PR NEWSWIRE - First Federal Savings Bank of Georgia (NASDAQ: FSBG) announced it has reserved $600,000 for general losses on loans and real estate during the remainder of the fiscal year ending March 31.

Half of the reserve will be charged against consolidated earnings during the third quarter ended Dec. 31, 1989, with the remainder allocated to the three months ending March 31.

In a letter to shareholders, chairman and chief executive officer Jerry H. Lassiter said the provision for general loan losses was adopted "due to a slowing U.S. economy and sluggish real estate prices in north Georgia." As a result, he predicted the savings bank would report only a token profit during the third quarter.

However, Lassiter stressed the savings bank continues to exceed the federal standard for risk-based capital, outperforming the industry median in areas such as core earnings.

First Savings Bank of Georgia is a major provider of commercial and residential real estate loans in the 15 counties located between Atlanta, Gainesville, Ga., and Athens, Ga.

ZURICH (JAN. 16) PR NEWSWIRE - Sara Lee Corporation (NYSE: SLE), based in Chicago, USA, and one of the world's largest manufacturers and distributors of high-quality food and consumer packaged products, today reinforced its major presence in European market by listing its common shares on the Zurich, Geneva and Basel stock exchanges.

The Swiss listings complement Sara Lee Corporation's European listings on the London and Amsterdam exchanges as the corporation continues to expand its financial presence in countries where its name, products and activities are already well known.

"We regard these listings to be important, both as a demonstration of our

commitment to our existing operations in Europe, and to provide us with an additional platform on which to build our European stockholder and business base," John H. Bryan, chairman and chief executive officer of Sara Lee told Swiss Investors.

"We view the anticipated changes in Europe's markets as an extraordinary business opportunity, and we have made considerable investments in Europe in recent years. Acquisitions and capital expenditures in Europe have exceeded US$1.4 billion over the last five years."

Sara Lee Corporation has over 100,000 employees and operates in more than 30 countries. Of the corporation's US$11.7 billion of sales in fiscal 1989, food products accounted for 66 percent of revenues while non-food operations comprised the remaining 34 percent. In fiscal 1989, 73 percent of sales were generated in the United States while 27 percent came from operations in growing international markets, principally Europe.

LOUISVILLE, KY (JAN. 16) PR NEWSWIRE - Louisville Mayor Jerry E. Abramson and County Judge/Executive David L. Armstrong today announced that the local Liqui-Dri Foods, Inc., a subsidiary of Quaker Oats (NYSE: OAT), will immediately begin a $25 million expansion that will nearly double its employee base. Quaker Oat's commitment to expand the plant's bakery product lines comes after over two years of negotiations between the corporation and the local Office for Economic Development (OED), which worked with the state to develop an incentive package.

"We are very excited that a major corporation has made a commitment to expand in our community, add a new product line and offer 130 new jobs," said Abramson, "This demonstrates Quaker Oat's confidence in the strength of the relationship between city, county and state governments."

The nine-year old company, located at 12730 Westport Road, was founded by its current president, Leo C. Culligan, Sr., and purchased by Quaker Oats in 1984. Liqui-Dri supplies ready-to-bake biscuits to the food service industry.

The new facility, a 166,000 square foot expansion, will nearly triple the current size of the plant and be financed in part by a $5 million below-market rate interest loan proposed by the state. The state's participation also includes training assistance to the company's new employees. The expansion is Quaker's first frozen foods bakery plant, enabling them to explore the development of other frozen products.

"This news isn't just important to Louisville and Jefferson County, but to this entire region -- from Clarksville to Bardstown and Shively to Shelbyville," Armstrong said. "Every one of us benefits because we're a team and we've got the most marketable commodity of any area in the nation -- good people."

"We've worked over two years to demonstrate to Quaker that this community's business environment is strong enough to support this expansion and more," said OED Executive Director Howard A. Gudell. "This facility gives the plant a base on which to expand even further in the future."

Construction of the new facility will begin immediately and is scheduled to be operational by mid-1991.

JACKSONVILLE, FL (JAN. 16) PR NEWSWIRE - Barnett Banks, Inc. (NYSE: BBI) announced today plans to consolidate six of its banks into three, continuing a trend in recent years to to create multi-county institutions where growing market similarities support a unified approach.

The consolidations include these affiliate banks:

MERGING BANKS	NEW BANK NAMES
Citrus, Hernando	Barnett Bank of Citrus-Hernando
Columbia, Suwannee	Barnett Bank of North Central Florida
Indian River, St. Lucie	Barnett Bank of the Treasure Coast

Leadership changes in connection with these are:

- Citrus-Hernando - H.M. Shirley, CEO of Barnett Bank of Hernando County and a Barnett employee since 1984, will serve as CEO.

- North Central Florida - Joe Williams, CEO of Barnett Bank of Suwannee Valley, N.A. since 1986 and with Barnett for 17 years, will head up the newly combined organization. J.C. Bell, CEO of Barnett Bank of Columbia County, will serve as director of bank support operations for the northern region. He is a career Barnett employee, starting in 1961.

- Treasure Coast - Becky Allen, CEO of Barnett Bank of Indian River County since 1986, will assume the CEO position. She has been with Barnett since 1984. Ken Oden, with Barnett since 1983, will head Barnett Bank of

Manatee County, N.A.

- Dade County - Bill Myers, a 20-year Barnett employee, will serve as CEO of Barnett Bank of Dade County. Myers began his career in Jacksonville and for the last eight years has led Barnett Bank of Manatee County.

- Broward County - Rick Anderson, CEO of Barnett Bank of Naples, will head Barnett Bank of Broward County. Anderson has been with Barnett 10 years. Jim Loskill will take Anderson's place as CEO of Barnett Bank of Naples. Previously he was with Barnett's South Florida affiliate since 1983.

Lee Chaplin, president of Barnett Bank of South Florida, will continue as South Florida regional executive. Hugh Gentry, chairman of the bank, will continue as chairman in Dade County and as Barnett's chief corporate banking officer. Other leadership changes announced by Ernest:

- Pasco County - Doug Smith, CEO of Barnett Bank of Martin County since 1983, will move to Barnett Bank of Pasco County as CEO. Smith has been with Barnett 12 years. Rodger Ingram, CEO of Barnett Bank of Pasco County will move to Barnett Bank of Central Florida as senior vice president in Brevard County.

- Martin County - Jim Ivey will become CEO of Barnett Bank of Martin County. Formerly branch administrator at Barnett Bank of Southwest Florida, Ivey has been with Barnett since 1974.

Both the consolidations and the division are subject to regulatory approvals, which are being sought immediately. When complete, the company would have 33 banks operating 563 offices. Barnett is a two-state multibank holding company with consolidated assets of $29 billion. Its stock (BBI) is listed on the New York Stock Exchange.

#90016p0086 01/16/1990 ~PR Newswire

WHITE PLAINS, NY (JAN. 16) PR NEWSWIRE - The NYNEX Science & Technology Center recently received a patent for a neural network technique which enables computers to read handwriting with greater accuracy.

The invention by Keith Loris and James Euchner, supervisors in the artificial intelligence laboratory at the NYNEX Center, has widespread applications in the financial services, remittance, check and forms processing industries, as well as in mail distribution.

U.S. Patent 4,876,731, officially known as Neural Network Model In Pattern

Recognition Using Probabilistic Contextual Information, applies to a unique method of reading documents which have been scanned into a computer and digitized. It uses neural network technology, external knowledge sources and probability theory to recognize and "read" the documents. In addition to reading handwriting, the intelligent character recognition system could potentially read other symbolic information such as diagrams and graphics. Neural network technology is loosely modeled on how the brain works.

For example, when a customer pays his telephone bill today, a clerk would normally read the amount of the check and manually key in the payment. "The clerk is essentially translating the information from a form the computer does not understand -- handwritten numbers -- to one it does -- a sequence of keyboard strokes. Using the NYNEX system, the computer understands the information directly from the check without human intervention," explains Loris.

According to Loris and Euchner, the patented method of checking the value read by the computer against external information sources significantly increases the accuracy of the NYNEX system.

"We are very excited about this patent awarded to Keith Loris and James Euchner because it is proof of the world-class research and development being conducted at NYNEX," said Casimir Skrzypczak, vice president for Science & Technology.

Skrzypczak noted that 16 patent applications have been filed with the United States Patent Office in 1989 as a result of the work at the NYNEX Science & Technology Center. The U.S. patent process takes approximately 20 months for each submission.

NAPLES, FL (JAN. 16) PR NEWSWIRE - BancFlorida Financial Corporation (NYSE: BFL) (the "company"), whose primary subsidiary is BancFlorida, a Federal Savings Bank, today reported net income of $1,315,000 or earnings per common share of $.28 for the first quarter of fiscal 1990, which ended Dec. 31, 1989, compared to $1,771,000 or $.52 per share for the same period a year ago. Earnings per common share for the first quarter of fiscal 1990 give effect to dividends paid on cumulative convertible preferred stock which was issued by the company in January 1989.

Earnings for the previous year's quarter ended Dec. 31, 1988 include a one-time pre-tax gain of $2.1 million resulting from the curtailment of the company's pension plan.

Net interest income, the company's primary source of earnings from operations, increased $700,000 to $9.7 million for the quarter ended Dec. 31, 1989 compared to $9.0 million for the same period a year ago.

Earnings for the current quarter were also favorably affected by gains on the sale of mortgage-backed securities which totaled $1.3 million compared to $118,000 for the same period last year.

Earnings for the current quarter were adversely affected by an increase in provision for loan losses which totaled $1.4 million compared to $875,000 for the same period last year. The increase in the current quarter is due primarily to an increase in general reserves.

BancFlorida has 41 full-service Banking Centers and 3 Lending Centers serving southwest and south central Florida. BancFlorida Financial Corporation has total assets of approximately $1.8 billion and 3,414,021 common shares outstanding and 1,138,000 cumulative convertible preferred stock outstanding.

#90016p0092 01/16/1990 ~PR Newswire

HOUSTON (JAN. 16) PR NEWSWIRE - Seagull Energy Corporation (NYSE: SGO) announced today that its Alaska Pipeline Company (APC) subsidiary has reached agreement on a major gas supply contract amendment with a large producer in South-Central Alaska.

The contract amendment alters the pricing provisions for an additional quantity of gas committed to APC by the producer, Marathon Oil Company, effective as of May 1988. The Alaska Public Utility Commission (APUC) deferred approving the contract price mechanism when it approved most of the contract in August 1989.

The original 1988 contract provides for APC to purchase an initial commitment of 456 billion cubic feet (bcf) of gas, to be followed by a contingent additional commitment of up to 400 bcf.

However, in its August 1989 action, the APUC deferred approving the contract price mechanism for the contingent commitment to purchase the additional gas, saying that any risk presented by the price should not be borne by Alaska ratepayers. The commitment to acquire these reserves may be made in 1994 for deliveries beginning in 2002.

In August the APUC also denied Seagull's ENSTAR Natural Gas Company

utility division the right to recover certain gas costs incurred from May 1, 1988, through July 15, 1988. May 1, 1988, was the effective date of the agreement.

Seagull responded to the APUC's mid-1989 decisions by filing a Petition for Reconsideration asking the APUC to reconsider the effective date for the gas cost pass-through and its ruling on the contract price mechanism.

In its response to the Petition for Reconsideration, the APUC agreed to permit ENSTAR to recover its gas costs since May 1, 1988, but held to its earlier decision to defer approval of the contract price mechanism for the commitment of additional reserves.

APC responded to this latter APUC decision by reaching the agreement with Marathon to amend the contract. The amendment provides that the pricing provisions for the additional commitment will be submitted to the APUC for approval at the time the first additional commitment, if any, is made. If the APUC does not approve the pricing provisions, Marathon would have the option of proposing alternative pricing provisions, or could cancel all additional commitments. In any case, APC would not be required to purchase gas with pricing provisions not previously approved by the APUC.

The finalized contract amendment has been submitted to the APUC for approval.

CHICAGO (JAN. 16) PR NEWSWIRE - Ziegler Securities, a division of B.C. Ziegler and Company, marketed 47 healthcare financings in 1989, ranking number one nationally in the number of financings marketed for the healthcare industry.

According to information from Securities Data Co./Bond Buyer, Ziegler Securities, based in Chicago, was senior manager for healthcare financings totaling $736 million in 1989, placing the firm among the top 10 healthcare investment bankers in the nation.

In addition, Ziegler Securities was the highest ranked non-Wall Street underwriter of tax-exempt healthcare issues. For the hospital sector of healthcare financings, Ziegler Securities was one of only two non-Wall Street based firms to rank in the top 10 nationally for tax-exempt underwritings by senior managers.

Donald A. Carlson Jr., president of Ziegler Securities, said the firm is unique in the investment banking industry. "Of the nation's top 25

healthcare underwriters, Ziegler Securities is the only firm to almost exclusively specialize in healthcare investment banking." Underwritings by the firm in 1989 covered the full spectrum of the healthcare industry's financial needs with issues ranging from $2 million to $198 million said Carlson.

Ziegler Securities has division headquarters in Chicago and regional offices in West Bend, Wisconsin; Orlando, Florida; and Walnut Creek, California.

ATLANTA (JAN. 16) PR NEWSWIRE - The Banker's Note Inc. (NASDAQ: BKNT) announced today that the company anticipates reporting a net loss for the fourth quarter which will result in a loss for the year ending Feb. 3.

A year ago in the fourth quarter, the company earned $51,000 or $.01 per share, and $679,000 or $.21 per share for the year. Historically, the company has reported a loss in its fourth quarter. The company did not disclose the amount of the projected loss, but had previously reported earnings through the third quarter of $307,000 or $.09 per share.

Management had determined that this year's holiday season would be intensely price competitive due to financial pressures within the retail industry. The company also took an aggressive promotional stance throughout the season resulting in lower gross margins. These reduced margins combined with increased operating expenses resulting from investments in people and programs to enhance future store operations led to the loss.

The company will enter the Spring season with inventory at comfortable levels and a strong balance sheet. Inventory and expense control will be the critical elements of a return to profitability in 1990.

The company currently operates 75 women's specialty stores in Georgia (24) Florida (12), Texas (16), North Carolina (8), Alabama (3), Louisiana (7), South Carolina (1), Mississippi (2), and Tennessee (2).

DUBLIN, IRELAND (JAN. 16) PR NEWSWIRE - CRH plc, the international building materials group, has reached agreement, subject to final due diligence, to acquire the business and net assets, including properties,

of Coalite Building Supplies ("CBS") from Anglo United plc for a cash consideration of fifty million pounds sterling. The consideration will be funded from the group's bank facilities. There is no third-party or inter-company debt.

CBS is the tenth largest builders merchant in the U.K. with thirty- six branches, the bulk of which are in Yorkshire, Humberside, the Midlands and East Anglia.

CRH already owns Keyline Builders Merchants with fifty-four branches concentrated in Scotland, the South of England, South Wales and Yorkshire. CBS is an excellent geographic fit and the branches acquired will be rebranded under the Keyline identity to create the largest U.K. heavyside builders merchants with ninety locations and a combined annual turnover in excess of 250 million pounds sterling.

The existing Keyline business has a strong heavyside bias and although some two-thirds of CBS' turnover is in heavyside products, the acquisition will add a significant lightside builders merchant business, mainly within the Midlands and East Anglia.

In the year to March 31, 1989, CBS achieved trading profits of 5.8 million pounds on sales of 77 million pounds. Nets assets at that date amounted to 26.7 million pounds. A revaluation of properties is expected to show a substantial surplus. CBS employs about 950 people and has strong local management.

CAMBRIDGE, MA (JAN. 16) PR NEWSWIRE - The Charles Stark Draper Laboratory Inc. announced today that it has given layoff notices to 145 employees. Seventy-five professional staff and 70 support staff are affected. The reduction will take place over the next several months.

The reduction is necessary because programs that Draper Laboratory had expected to replace part of the support lost with the successful completion of its work on the Trident II program have been delayed, reduced in size, or cancelled.

The reduction will bring Draper to a level of employment it expects to be able to sustain into the next fiscal year, which begins July 1, 1990.

Draper Laboratory is a nonprofit organization dedicated to engineering of prototype systems, research and development, and education. Functioning as a design agent and skilled in the efficient and orderly transfer of advanced technological applications and methods to industry, Draper is engaged primarily in guidance, navigation, and control systems; autonomous and highly automated systems; space systems; communication and intelligence; and technological insertion into operational systems.

PHILADELPHIA (JAN. 16) PR NEWSWIRE - Geriatric & Medical Centers, Inc. (NASDAQ: GEMC) reported a 12.3 percent increase in revenues and improvement in operating income but a loss after interest expense for the second quarter of fiscal 1990.

Revenues for the quarter ended Nov. 30, 1989 were $31,736,000 versus $28,265,000 in the corresponding period of last year. Net loss for the three months was $673,000, or $.07 per share, compared with net income of $444,000, or $.05 per share, last year. Net income for the second quarter of both years included net nonoperating income, primarily from the sale of assets, of $371,000 for the current period and $4,288,000 for the previous year.

Revenues for the six months of fiscal 1990 were a record $63,632,000, a 13.2 percent increase from $56,226,000 reported in the same period a year earlier. Net income for the first half was $7,362,000 or $.77 per share, compared with a net loss of $3,052,000, or $.32 per share, in fiscal 1989. Net income for the first half of both fiscal years included net nonoperating income, primarily from the sale of assets, of $10,489,000 in 1990 and $4,737,000 in 1989.

Daniel Veloric, chairman of the board and president, stated, "I am encouraged with the company's progress toward becoming profitable from operations after interest expense. Geriatric & Medical Centers has completed approximately seven hundred nursing facility beds in the last three years which are now open and beginning to mature. We have also seen that reimbursement for Medicaid patients is improving and that overall occupancy in company owned and managed facilities is at an all time high."

Veloric further commented that while the company is still hampered by a shortage of nursing personnel and rising costs, management has been able to meet the challenge with continued improved performance, and that overall, the company has continued to grow within the past few years with revenues at record levels in spite of the sale of assets.

In addition, Veloric pointed out that he envisions improved margins and operating results as the company expands its growing home medical equipment, pharmacy and contract management segments.

Geriatric & Medical Centers, Inc. is a full-service health care company supporting the industry with home medical equipment products and services, pharmacy services and long-term care contract management and development.

TROY, MI (JAN. 16) PR NEWSWIRE - Inacomp Computer Centers, Inc. (NASDAQ: INAC) reported today that November and December revenues were up nearly 50 percent from last year's revenues.

Rick Inatome, chairman, president and chief executive officer, said, "We are extremely pleased with Inacomp's sales results for November and December. Inacomp's quarter-to-date growth is the strongest year-to- year growth rate for the company since 1984. We think this performance refutes analysts' projections of a slowdown in the microcomputer industry and we are optimistic about the future."

Inatome further stated, "For most of the year, many of our competitors have used discount-pricing strategies in an attempt to buy market share. Recent announcements by several competitors acknowledge their financial difficulties and a return to more responsible pricing. Inacomp customers continue to respond well to our longstanding, value- added approach and in the last full quarter, margins increased from the previous quarter."

The company will close its second quarter on Jan. 27, 1990. Inacomp Computer Centers, Inc. markets microcomputer systems and related products and services through 110 company-owned and franchise centers in 23 states. The company provides customers with business solution consultation, classroom training, system installation, maintenance and repair. Inacomp also provides short-term rental and long-term leasing of microcomputer systems. Corporate offices are in Troy.

DALLAS (JAN. 16) PR NEWSWIRE - Oryx Energy Company (NYSE: ORX) announced the completion of a record-length, medium-radius horizontal well in the Austin Chalk formation of South Texas that flowed 1,580 barrels of oil per day (B/D) and 600,000 cubic feet of gas per day.

The Stroman-Harris No. 2, located in LaSalle County, Texas, was drilled to a measured depth of 11,046 feet with a horizontal displacement of 4,164 feet, beating by more than 600 feet the old record set by a North Dakota well. Medium-radius drilling technology is the type most commonly used in onshore horizontal drilling.

Speaking before the Texas Independent Producers and Royalty Owners Association today, James E. Roberts, vice-president of production operations, said, "Oryx Energy has led the way in applying horizontal drilling technology. Our expertise gives us a considerable jump on the competition."

Oryx Energy's daily production from 15 horizontal wells in the South Texas Pearsall field, including the Stroman-Harris No. 2, averaged 7,200 B/D and 4.3 million cubic feet per day for the week ending Jan. 4.

In November, the Texas Railroad Commission granted Oryx Energy's petition for special rules and allowables for horizontally drilled wells based on the length of their lateral extensions. The Stroman-Harris No. 2 will qualify for a 1,574 B/D allowable, considerably higher than 1,312 B/D allowable for wells recently completed by Oryx Energy.

"We have two other horizontal wells completing, and five more are drilling in the Pearsall field. By April, we expect to have seven rigs drilling horizontally full-time in the Pearsall field alone. By the end of this year, we'll have drilled a total of 85 horizontal wells in the Pearsall field, 25 exploratory wells and 60 development wells," added Roberts.

Dallas-based Oryx Energy Company conducts its domestic operations through Sun Energy Partners, L.P. Oryx Energy, the managing general partner and 98-percent owner of the partnership, is the largest independent oil and gas company in the world with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels. Oryx Energy trades on the New York Stock Exchange with the symbol ORX and the partnership with the symbol SLP.

TROY, MI (JAN. 16) PR NEWSWIRE - K mart Chairman Joseph E. Antonini announced the election of J. Richard Munro to K mart Corporation's board of directors effective today, bringing the total number of directors to 13.

Munro, 58, is co-chairman and co-CEO of the newly formed Time Warner Inc. A graduate of Colgate University, Munro began his career with Time Inc. in 1957. In 1980, he was made president and CEO, and became chairman and

CEO in 1986. First elected to Time's board of directors in 1978, he is also a director of IBM, Mobil, Kellogg, Genetech and the Rand Corporation.

"Dick Munro is a valuable addition to our board," commented Antonini. "We are very pleased that he has joined us."

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,318 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks and PACE Membership Warehouse Clubs. K mart stock is traded on the New York, Pacific, Midwest and Tokyo stock exchanges. Its trading symbol is KM.

MOUNTAIN VIEW, CA (JAN. 16) PR NEWSWIRE - Quintus Computer Systems Inc., a wholly-owned subsidiary of Intergraph Corp. (NASDAQ: INGR), announced the appointment of Walter B. Samuelson as president. Samuelson replaces Eliott D. James who became president of Intergraph.

Before joining Quintus, Samuelson was vice president and general manager, for the Helios Systems Division of Piiceon Inc., a Dynatech company. He was responsible for the Sun third party memory and storage subsystems businesses. His management experience includes 19 years in sales and marketing management positions with Xerox Corp. During that time, he became a senior executive in the Xerox Artificial Intelligence Systems Business Unit and participated in the Xerox AI spin-out, ENVOS Corp. as executive vice president, Customer Operations. He received his bachelor of science degree in Business Administration from Oregon State University.

"This is an opportune time to join the Quintus team," commented Samuelson. "The excellent technical development talent together with our world-wide distribution and support operations, and the new relationship with Intergraph Corp. will enable Quintus to rapidly pursue the growth opportunities now opening up in the software development productivity tool market. Without dramatic changes in software development techniques, the new, more powerful processors are severely software constrained. Quintus' current and planned products, along with those secured through external development and partnering, will competitively position us to aggressively participate in this exciting market."

Quintus Computer Systems Inc. headquartered in Mountain View, is the premier supplier of Prolog-based software development productivity tools. These tools provide dramatic increases in programmer productivity for traditional and knowledge-based applications. Quintus' products provide

graphics, rule based capabilities and database interface facilities, and integrate easily with software development projects and existing programs. The company's products are supported on 80386-based and Macintosh PC's, leading technical workstations, departmental systems and mainframes.

Intergraph Corp., Huntsville, Ala., offers a product line ranging from microprocessors to workstations and complete application-specific systems for computer-aided engineering, design, manufacturing and publishing, plus numerous earth science applications. A "Fortune 500" company, Intergraph is the world's largest company dedicated to developing and manufacturing interactive computer graphics systems.

Intergraph is a registered trademark of Intergraph Corp. 80386 is a registered trademark of Intel Corp. Macintosh is a registered trademark of Apple Computers Inc.

#90016p0119 01/16/1990 ~PR Newswire

NEW YORK (JAN. 16) PR NEWSWIRE - Acme United Corporation (AMEX: ACU) will

announce today that it will take special charges which will result in a net loss of approximately 44 cents per share for 1989, while the company anticipates earnings of approximately 40 cents per share for 1990.

Henry C. Wheeler, president and chief executive officer, will tell a group of analysts that the writedown results in an after-tax charge of approximately $1 million, or 32 cents per share, in discontinuing the company's line of enteral feeding products, a segment of its medical products business.

The special charges also include an after-tax loss of approximately $550,000, or 17 cents per share, because of higher overhead costs incurred from a planned $2.1 million reduction in inventories. The reduction will increase cash flow and improve profitability by $240,000 annually on a long-term basis, he said.

"Both the product writedown and the inventory charges will favorably affect our cash flow in the future," he noted.

"Total sales will increase from the $37 million level of 1988 and 1989 to approximately $46 million in 1990," Wheeler stated. "Higher sales, combined with lower interest charges, should result in 1990 earnings of approximately $1.3 million, or 40 cents per share."

"Once we are sure that we are moving ahead on a profitable basis, we will ask the board of directors to start paying a dividend again," he added.

Acme United is entering 1990 with its medical product business on a profitable basis, Wheeler said. The company has reduced field selling and manufacturing costs and achieved a higher gross margin on its medical products.

The company's consumer products will be bolstered by the recent acquisition of Emil Schlemper GMBH & Co., West Germany's largest manufacturer of scissors, shears and manicure implements.

Acme United is a leading producer of metal disposable surgical instruments sterile procedure trays, germicidal products and wound-care packs for hospitals and the after-care market as well as the country's largest producer of household shears, scissors, wooden rulers and yardsticks for the consumer.

ORANGE, CA (JAN. 16) PR NEWSWIRE - VTN Corporation (NASDAQ: VTNC), today announced its 11th profitable quarter in a row and record six-month earnings of $1,308,755 for the period ended Nov. 30, 1989. Revenues for the quarter and six months ended Nov. 30, 1989, were $3,107,613 and $6,030,155 as compared to $3,098,468 and $6,189,356 for the comparative periods ended Nov. 30, 1988. Profitability increased 1,254 percent, from $55,315 ($.01 per share) for the second quarter of fiscal 1989 to $748,728 ($.05 per share) for the second quarter of fiscal 1990; and 822 percent, from $141,996 ($.01 per share) for the first six months of fiscal 1989 to $1,308,755 ($.09 per share) for the first six months of fiscal 1990. VTN is an international engineering, land planning and consulting firm headquartered in Orange, Calif.

According to Daniel C. Montano, chairman, "VTN is on course for its best year ever." Montano also reemphasized that VTN's future lies in the development of international, world class, resort/retirement communities targeted at the world aging population. The first of these major world developments will be located in the Philippines and will be joint ventured with major Asian companies.

VTN has offices in California, located in Orange, Los Angeles and San Diego counties; in addition they have offices in Miami, Boston, and Manila Philippines.

#90016p0126 01/16/1990 ~PR Newswire

NAPERVILLE, IL (JAN. 16) PR NEWSWIRE - First Midwest Bancorp, Inc., (NASDAQ/NMS: FMBI) today reported that net income for the fourth quarter and the year ended Dec. 31, 1989 surged to record levels.

Net income for the fourth quarter rose 23 percent on a per share basis to a record $5,641,000, or $0.48 per share, as compared to $4,501,000 or $0.39 per share a year earlier. The record quarter's results contained no unusual or extraordinary items and represent the best performance for any quarter in the company's history.

For the year, net income increased to $23,456,000 or $2.00 per share, an impressive 54 percent increase over 1988's net income of $15,134,000 or $1.30 per share. Included in 1989's results were gains related to the sales of a branch and a bank that total $5,196,000 ($3,135,000 after tax). Eliminating such gains, net income from operations was $20,321,000 or $1.73 per share, a 33 percent increase over 1988.

In commenting on 1989's results, First Midwest President and Chief Executive Officer Robert P. O'Meara said: "The 33 percent increase in the

year's net income from operations is relatable to strong performance across the entire operating statement led by significant growth in both interest income and other operating income. At the same time the net interest margin expanded to a very healthy 4.84 percent. Additionally, operating costs were well controlled as the economies of our recent consolidations are manifesting themselves. All in all, it was a year we are rather pleased with."

The company reported that its return on average equity increased to 17.5 percent from 12.7 percent in 1988, while its return on average assets rose to 1.2 percent from 0.88 percent a year ago. Eliminating the gains described above, return on average equity and average assets for the year was 15.16 percent and 1.04 percent, respectively. Book value per share at year end 1989 was $12.18 as compared to $10.72 a year ago.

With total assets exceeding $2 billion, First Midwest Bancorp is one of Illinois' largest bank holding companies operating 35 banking offices and five trust offices primarily in northern Illinois.

ST. LOUIS (JAN. 16) PR NEWSWIRE - James N. Mills, chairman and chief executive officer of Clarke Industries, Inc., announced that Clarke has signed a long-term contract with the industrial division of Toyota Motor Company for distribution in Japan of a range of commercial floor maintenance equipment manufactured by Clarke.

The products will be marketed under the Toyota brand. Robert H. Elkin, president and chief operating officer of Clarke said, "It is particularly gratifying that Toyota selected Clarke because the Toyota name is synonymous with quality worldwide."

The contract signing took place in early December at Toyota headquarters in Japan during a visit by Elkin and Len Roessler, vice president-marketing, international. Clarke and Toyota have worked together for over two years in order to finalize all of the contract details.

Elkin sees the contract as a major highlight for Clarke in 1989 and beyond and believes that the contract will be expanded in the future. According to Elkin, "Our agreement with Toyota signifies an important step forward in U.S./Japanese trade relations and is indicative of Japanese efforts to work with U.S. companies in improving the trade balance between the two

countries. Further, it will enhance Clarke's ability to grow in the rapidly expanding Asian market."

Clarke was the recipient of the President' "E Star" award for export excellence in 1988 and is continuing its international growth in key markets throughout the world.

St. Louis-based Clarke Industries is the world's largest distributor-based manufacturer of floor maintenance equipment.

OLATHE, KS (JAN. 16) PR NEWSWIRE - Hydrogen Energy Corp. (THEC), Olathe, Kan. (OTC), announces that it has been granted Canadian patent no. 1,262,031, dated Oct. 3, 1989, for a new process to economically extract magnesium and amorphous silica from plentiful ultramafic rock. U.S. patent protection of the technology was granted to the company last January, and patents are also pending in Europe, Asia, Australia and South America.

The process efficiently extracts large amounts of hydrogen gas from the rock at moderate heat. The rock, with the hydrogen liberated, may then be quickly leached with acid to recover magnetite, magnesium and amorphous silica. The efficiencies of this technology result from processing the rock in a hydrogen atmosphere. According to THEC President Douglas Westerhaus, all of the extracted products are very marketable. Magnesium and magnetite are valuable metals, hydrogen gas is in great demand, and the market for silica is in paints, plastics, foods, ceramics and fibre optics.

Consultants to the company suggest possible additional applications of the process in extracting crude oil from oil shale, and also in converting asbestos waste into its elemental form of hydrogen, magnesium and silica.

With the company's recently announced acquisition of West Texas oil and gas production, the patent protection granted for the Morency process, and the apparent economics of this technology, the company is ready to begin marketing efforts for the process, Westerhaus added.

#90016p0134 01/16/1990 ~PR Newswire

BLOOMFIELD HILLS, MI (JAN. 16) PR NEWSWIRE - Stoneridge Resources, Inc.

(NYSE: SRE) reported results of operations for the first quarter ended Nov. 30, 1989. Sales decreased to $24.4 million from $38.7 million in the same period in the prior year. A net loss of $1.7 million, or $.16 per share, compares to a net loss of $.3 million, or $.05 per share, in the same period in the prior year.

The decrease in sales is attributable to a decline in the volume of bulk frozen concentrate orange juice (FCOJ) sales from last year's first-quarter levels which were unusually high. Average prices were also down vs. the same period in the prior year. Last year's net loss was favorably impacted by a pre-tax gain of $1.8 million on the disposition of real property.

The company expects to complete its acquisition of 100 percent of the common stock of Acceptance Insurance Holdings Inc. (NASDAQ: ACPT) in February 1990. Acceptance, a Nebraska-based specialty property and casualty insurance company, is expected to provide Stoneridge with earnings, cash flow and skilled management in the specialty property and casualty insurance field. The company currently owns 18.7 percent of Acceptance's outstanding common stock.

Stoneridge also owns over 50 percent of Florida-based Orange-co, Inc. (NYSE: OJ), a fully integrated citrus grower, processor and owner of 26,000 acres of Florida land. As a result of the December 1989 freeze in the State of Florida, Orange-co expects earnings to be negatively affected. However, the impact will be somewhat mitigated by the rapid increase in FCOJ market prices.

Stoneridge also owns 29 percent of Radice Corporation (NYSE: RI), a Florida-based real estate developer, and 27 percent of Major Realty Corporation (NASDAQ: MAJR), a Florida-based real estate company.

#90016p0136 01/16/1990 ~PR Newswire

DODGEVILLE, WI (JAN. 16) PR NEWSWIRE - Richard C. Anderson, president and chief operating officer of Lands' End Inc. (NYSE: LE), has been elected chief executive officer in addition to his present responsibilities at the direct merchant firm, it was announced today.

Anderson, 60, succeeds Gary C. Comer, who founded the company in 1963 and has served as chief executive since that time. The change in duties is effective Feb. 1.

Comer, 62, will continue as chairman and remain active in the business.

''This is simply another evolutionary step in our ongoing plan that provides for organized management succession within our company. Dick's skill and experience make him eminently qualified to direct the continuing growth of Lands' End as its chief executive, and this will allow me to concentrate on the company's future in a more long-range and conceptual framework,'' said Comer.

''We're a marketing company, and Dick Anderson is one of the best marketers in the business. His contribution since joining the company as a director in 1978 has been a major factor in our rapid growth during that period.

''I expect Dick's leadership will result in ongoing innovation in our merchandising, product development, presentation, and creative techniques '' said Comer.

Anderson will continue in his role as editor-in-chief of the Lands' End catalog and will head the company's two management committees -- executive and policy.

Anderson's association with Lands' End began in 1978 when he was elected a director. He became vice chairman and a full-time employee in 1984.

Prior to joining Lands' End, Anderson had spent most of his career in the advertising field in Chicago and New York.

He held senior management positions at Young & Rubicam, Daniel Starch, and Frankfurt Communications in New York, as well as Needham, Harper & Steers in Chicago and New York, where he rose to executive vice president, director and chairman of that agency's Chicago board of management until he left to join Lands' End.

Lands' End markets a line of traditionally styled casual clothing and accessories for men, women and children. Sales for the fiscal year ending Jan. 31, 1990, will exceed $500 million. The company's shares are listed on the New York Stock Exchange.

#90016p0137 01/16/1990 ~PR Newswire

LAKE HAMILTON, FL (JAN. 16) PR NEWSWIRE - Orange-co, Inc. (NYSE: OJ) announced that it anticipates that its crop will not be as severly impacted as the U.S.D.A. estimated for the Florida citrus industry, as a result of the December 1989 freeze. The company benefited from its geographic diversity of its groves, as they are located primarily south of the freeze line. Earnings will be negatively affected, although the

impact will be somewhat mitigated by the rapid increase in frozen concentrate orange juice (FCOJ) market prices.

The company owns approximately 26,000 acres of Florida land, of which approximately 16,000 acres are citrus producing. Statewide tree damage is unknown at this time. The company projects that the vast majority of its trees will not be severely impacted. This could increase the overall market value of the company's grove assets.

Orange-co reported a loss for the first quarter ended Nov. 30, 1989. Sales declined to $24,401,000 from the $38,722,000 reported for last year's first quarter. The net loss of $1,774,000 or $.17 per share compared to net income of $1,854,000 or $.18 per share during the same period in 1988.

The decrease in sales is attributable to a decline in the volume of bulk frozen concentrate orange juice sales from last year's first- quarter levels which were unusually high. The average FCOJ price was also down vs. the first quarter of last year.

Also affecting this year's results was an increase in interest expense of $536,000. Last year's results included a pre-tax gain of $1,801,000 on the disposition of real property.

Bloomfield Hills, Mich.-based Stoneridge Resources, Inc. (NYSE: SRE), owns 52.46 percent of the outstanding shares of Orange-co.

RICHMOND, VA (JAN. 16) PR NEWSWIRE - Media General, Inc. (AMEX: MEG.A) today announced that Garden State Newspapers, Inc., in which it owns a 40 percent interest, will merge three of its New Jersey daily newspapers with a group of 12 New Jersey weeklies owned by Goodson Newspapers, Inc., to form North Jersey Newspapers Company.

Owned equally by Goodson and Garden State Newspapers, the new company will be managed by Garden State Newspapers and will have circulation of 144,000 daily and 829,000 weekly in the North Jersey market.

Goodson Newspapers publishes weeklies, both free and paid, in Bergen, Passaic and Union counties. Garden State's dailies are The Herald News, a seven-day per week paper serving Passaic and Bergen counties; The Daily Journal, a six-day publication in Union county; and The Hudson Dispatch, a six-day per week paper with circulation in Hudson and Bergen counties.

Garden State Newspapers, Inc., is owned by Media General, William Dean

Singleton and Richard B. Scudder. The newspaper group owns daily and weekly newspapers in nine states.

PALO ALTO, CA (JAN. 16) PR NEWSWIRE - Emery Worldwide, one of the world's leading integrated air freight carriers, has been selected by Jaguar Cars, Ltd. of Great Britain to transport critical parts used in the manufacture of the famed British automobile.

The exclusive contract, effective Jan. 1, calls for Emery Worldwide to provide daily, door-to-door delivery of all U.S.-manufactured production components to Jaguar's assembly plant in Coventry, England.

"We chose Emery Worldwide to handle our air freight requirements because they offered us a totally integrated transportation network, with no third-party involvement, at a competitive price," said Mike Cowlard, Jaguar's purchasing planning and control manager.

Emery Worldwide picks up the parts, used in manufacture the full range of Jaguar models, from 19 different suppliers across the U.S. The parts are flown to Emery Worldwide's international freight-sorting hub in Dayton, Ohio, where they are loaded aboard the daily Emery flight to Manchester, England, the carrier's U.K. hub. From Manchester, the components are transported to Emery Worldwide's Birmingham terminal, where they are cleared through customs for next-morning delivery to the Jaguar plant in Coventry.

According to Jaguar officials, Emery Worldwide's "just-in-time" deliveries enable the auto manufacturer to keep parts inventories to a minimum while ensuring that essential components are available each day to maintain production of their world-renowned cars.

"We are able to provide this fast and cost-effective service to Jaguar and our other customers because we handle every aspect of the move ourselves, including customs clearance," said Mike Benson, Emery Worldwide's in-bound sales executive in Birmingham.

"And with our computerized global freight tracking and tracing system, EMCON, we can pinpoint the location of Jaguar's components at any time, which is vital when dealing with such time-sensitive deliveries," Benson added.

With one of the world's largest freighter fleets, Emery Worldwide delivers any size or weight shipment -- including envelopes, parcels and heavy freight -- to any business address in the world. The carrier provides Same Day, Next Day AM and PM, and Second Day delivery in the U.S. and Canada, and Courier Express, Air Cargo and Air Economy service for overseas shipments.

Emery Worldwide, based in Palo Alto, Calif., is a subsidiary of Consolidated Freightways, Inc., a $4-billion diversified transportation company with businesses in long-haul and regional trucking, air freight, ocean container freight and intermodal rail service.

MILWAUKEE, WI (JAN. 16) PR NEWSWIRE - Universal Foods Corporation (NYSE, PSE: UFC) today reported record revenues, earnings and earnings per share for the first fiscal quarter of 1990 ended Dec. 31, 1989. Revenues were $224,326,000, a 20 percent increase over the comparable period one year ago. Net earnings of $13,354,000 were up 23 percent, and earnings per

share of 53 cents reflect a 20 percent increase over the 44 cents reported for the comparable quarter last year.

In announcing these results, Guy A. Osborn, president and chief executive officer, said, "I am pleased with the overall performance of the company. This is an excellent start towards our earnings-per- share goal of $1.93 for fiscal year 1990. Our dehydrated, frozen french fried potato, and specialty fermentation operations all recorded significant volume gains."

Universal Foods is a national manufacturer and marketer of food ingredients and selected consumer food items. These include the world's most diversified line of yeast products; frozen potato products; food colors and flavors; dehydrated products; and a complete line of Italian-style, imported and substitute cheeses.

NEW YORK (JAN. 16) PR NEWSWIRE - ICM Property Investors Incorporated (NYSE: ICM) announced today its declaration of a distribution of $.12 per share for the fourth quarter of 1989. This distribution will be paid Feb. 21, 1990, to stockholders of record on Feb. 1, 1990. Distributions for 1989 totaled $.70 per share, as compared with $1.36 for 1988. This is the third successive quarterly distribution of $.12 per share; for last year's third quarter, $.34 per share was paid.

ICM Property Investors' 1989 fourth quarter and full-year results will be announced when the company's audit for 1989 is completed in February.

At the end of 1989, 91 percent of the office space in the company's properties has been leased, as compared with 84 percent a year earlier.

Arthur W. Viner, chairman of the board and president of ICM Property Investors, also announced that the third-party mortgage loans on the three Edison Square properties in Edison, N.J., aggregating $29,500,000, the commitments for which were previously reported were closed on Jan. 9, 1990. The proceeds of this financing, Viner said, were applied to the repayment of all but $300,000 of the Company's bank borrowings. Because the mortgage loans were closed after the 1989 year-end, he added, the effect of this transaction will not be reflected in the Dec. 31, 1989, balance sheet.

ICM Property Investors, headquartered in New York City, is a real estate investment trust which invests on a nationwide basis in office buildings and other commercial properties.

BERKELEY HEIGHTS, NJ (JAN. 16) PR NEWSWIRE - Customedix Corporation (AMEX: CUS) announced results for its second quarter and six months ended Dec. 31, 1989.

"Our second quarter showed the highest net income in the company's history more than double last year's second quarter; and for the first six months we had both record revenues and net income. These results were a consequence of improved profit margins and cost containment efforts. In addition, we have put strong emphasis on reducing debt," Dr. Gordon S. Cohen, chairman and chief executive officer, said.

For the second quarter ended Dec. 31, 1989, Customedix had revenues of $13,170,607 against $14,356,951 for the same period last year. Net income for the second three months of fiscal 1990 was $758,032, or $.03 per share

compared with $375,812, or $.01 per share, for last year's second quarter.

For the six months of fiscal 1990, the company had revenues of $25,874,104 compared with $25,740,399 for the first half of last year. Net income for the six months was $1,232,907, or $.04 per share, against $409,702, or $.01 per share, for the same period last year.

In October of 1989 the company announced the early retirement of its 15-1/2 percent senior subordinated debentures; and earlier this month it said it will redeem on March 5, 1990, $100,000 of its outstanding 15 percent convertible subordinated debentures due 1997.

Customedix Corporation, through its subsidiaries, supplies materials, devices and disposables for dental and medical health care.

SAN FRANCISCO (JAN. 16) PR NEWSWIRE - J. Kent Murray, currently general manager of Chevron Corporation's organization, development and compensation department, has been elected president of Chevron Research and Technology Company (CRTC), the new company formed by the combination of Chevron Research Company (CRC) and Chevron's engineering technology department (ETD). Jarold A. Meyer, currently president of CRC, has been elected senior vice president of CRTC. These appointments take effect March 1.

J. W. Martinelli, general manager of ETD, has been named president of Chevron Pipe Line Company, effective Feb. 1. He replaces Richard J. Masiel, who will retire March 1 after 37 years with Chevron.

Murray, 54, holds a bachelor's degree in mechanical engineering from the University of Utah. He joined Chevron in 1956 as a lab technician. Before assuming his present position in 1986, he held a variety of management positions, including manager of Chevron's Salt Lake refinery; refinery manager and, then, vice president, refining, and director of Irving Oil Ltd., a former Chevron subsidiary; assistant secretary in the corporation's secretary's department; and general manager of Chevron's Richmond, Calif., refinery.

Meyer, 51, holds bachelor's and master's degrees in chemical engineering from the California Institute of Technology. He joined Chevron in 1964 as an associate process engineer and held a succession of engineering jobs before being named manager of the process development division of CRC; technical manager of Chevron U.S.A.'s El Segundo, Calif., refinery; vice

president of CRC's process research department; and, in 1986, president of CRC.

Martinelli, 53, holds a bachelor's degree in petroleum engineering and an M.B.A. from the University of Pittsburgh. He joined Gulf, which later merged with Chevron, in 1963 as a senior project engineer. Before assuming his current job in 1986, he was general manager, technical, and, later, general manager, drilling and production; Gulf Oil Exploration and Production; and general manager of Chevron Corporation's Engineering Department.

Masiel, 61, joined Chevron in 1952 upon graduation from California State University (San Francisco), where he earned a bachelor's degree in business. From 1967 to 1976 he worked in management positions in traffic and distribution, supply and distribution, and supply and pipeline for Standard Oil Company of California (Western Operations), a former subsidiary. In 1977 he joined Chevron's U.S.A.'s supply and distribution organization; and in 1981 he was named vice president, administrative and technical, Chevron Pipe Line Company. A year later, he was named president of the pipeline company.

#90016p0162 01/16/1990 ~PR Newswire

WASHINGTON (JAN. 16) PR NEWSWIRE - AT&T (NYSE: T) today lowered prices on its International ACCUNET(R) Packet Service. The service is used primarily by businesses that transmit low-to-medium volumes of data internationally. It is available on a month-to-month basis; long-term contracts are not required.

The rate reduction today applies to 12 of the 42 countries included in the AT&T International ACCUNET Packet Service offering: Austria, Denmark, Finland, France, Iceland, Ireland, Italy, New Zealand, Norway, Spain, Sweden, and Switzerland.

Rates for the service are based on how many packets of data are sent, as well as how long the circuit is used. Both of the charges associated with the service -- the packet charge of $10 per kilosegment (64,000 bytes of information) and the $8 per hour usage charge -- are reduced today to $6.

Last year, rates were lowered to Australia, Costa Rica, India, Korea and West Germany.

The lower charges make the service even more attractive to low- volume users, who would otherwise use a modem and the international voice network to send data to other countries.

By the end of this year, AT&T International ACCUNET Packet Service will have 64 network interconnections with packet services in other countries.

The service assures customers high reliability and quality performance at reasonable cost. The packet data transmissions are delivered primarily over the terrestrial facilities, resulting in minimal delay, high throughput, and improved service availability.

AT&T International ACCUNET Packet Service uses a packet-switching system in which data are broken down into small packets of information, and then transmitted from a customer's premises via a dedicated line to an AT&T switch. The various packets are transmitted separately over the worldwide intelligent network, and then reassembled at their destination into the original message.

SOUTHINGTON, CT (JAN. 16) PR NEWSWIRE - Ralph G. Mann, president and chief executive officer of Southington Savings Bank (NASDAQ: SSBB) reported unaudited net income for the fourth quarter ended Dec. 31, 1989 of $632,000 as compared to $801,000 for the fourth quarter of 1988. Earnings per share for the quarter totaled 35 cents as compared to 44 cents in 1988.

The reduction in earnings for the quarter are a result of security gains which were down by $147,000 over the same quarter of 1988 and the provision for loan losses which was increased by $65,000 over the same quarter for 1988.

Unaudited net income for the twelve months ended Dec. 31, 1989 totaled $2,722,000 as compared to $2,681,000 on Dec. 31, 1988, an increase of 1.5 percent. Net income for the twelve months represents a return on average assets of 1.13 percent as compared to 1.21 percent for the same period of 1988. Earnings per share for the twelve months totaled $1.49 as compared to $1.47 in 1988.

The bank paid a total cash dividend per share in 1989 of 72 cents as compared to 54 cents in 1988.

Shareholders' equity totaled $32,709,000 and represents a book value of $17.89 per share. Total outstanding shares as of Dec. 31, 1989 were 1,827,992.

#90016p0170 01/16/1990 ~PR Newswire

NEW YORK (JAN. 16) PR NEWSWIRE - Citicorp (NYSE: CCI) today reported full year 1989 net income of $498 million, or $1.16 per share, reflecting fourth quarter provisions of $1.0 billion for possible LDC credit losses and $68 million to restructure its United Kingdom equities business.

As a result of the provisions, Citicorp had a net loss in the fourth quarter of $784 million, or $(2.52) per share.

Earnings without the provisions would have been $1,527 million for the year and $245 million for the fourth quarter. Last year, with a final quarter boosted by two years of Brazilian interest payments, net income was $1,858 million, or $5.36 per share, for the year and $747 million, or $2.19 per share, for the final quarter.

After the $1.0 billion provision, common stockholders' equity was reduced to $8.2 billion or 3.6 percent of total assets. Citicorp will rebuild the capital ratio during 1990 from retained earnings, sales of non-strategic businesses and appreciated assets, and asset securitization activities.

The restructuring of the U.K. equities business will cover the cost of closing unprofitable activities and goodwill write-offs in Citicorp Scrimgeour Vickers, which incurred losses of $65 million during 1989.

At its meeting today Citicorp's board of directors declared the regular common stock dividend of 40.5 cents per share, payable Feb. 12 to stockholders of record Jan. 26.

The $1.0 billion provision brings Citicorp's reserve against possible credit losses on its $8.6 billion of medium and long-term outstandings to refinancing countries to $3.3 billion.

PRINCETON, NJ (JAN. 16) PR NEWSWIRE - UJB Financial Corp. (NYSE: UJB) reported net income for 1989 of $118.5 million, compared with the $116.1 million earned in 1988.

Net income per share for the twelve months ending Dec. 31, 1989, was $2.62 up from $2.58 in 1988, it was announced today by T. Joseph Semrod, chairman, president and chief executive officer. Fourth quarter earnings were $24.5 million, down from $28.5 million for the same period of a year ago. Net income per share for the last quarter of 1989 was $.54 versus $.63 in the comparable period of the previous year.

Total loans at Dec. 31, 1989, were $8.3 billion, up 13.9 percent from $7.3 billion Dec. 31, 1988. Most of this growth continues to come from the commercial portfolio, where UJB specializes in the lower end of the middle market which has continued to perform well. Total commercial loans at year end were $4.7 billion, up 16.9 percent.

The allowance for loan losses was up 13.1 percent over the previous year at $121.9 million at year end, with an allowance to loan ratio of 1.46 percent. The provision for loan losses for 1989 was $52.5 million, up 31.3 percent from $40.0 million in 1988. During the fourth quarter, the provision for loan losses was $19.9 million, up 81.7 percent over the $11.0 million for the same period of 1988.

Non-performing loans as a percentage of total loans was 2.33 percent compared to 1.91 percent at the end of the third quarter, and 1.45 percent

at year-end 1988.

Total deposits were $9.3 billion, up 5.0 percent at year end 1989. Total assets increased 11.8 percent to $12.2 billion at Dec. 31, 1989, compared to $10.9 billion a year earlier. For 1989, return on average common equity was 14.52 percent, and return on average assets was 1.05 percent. Book value per common share increased in 1989 by 9.7 percent to $18.67.

At year end, UJB had 256 offices in 22 counties in New Jersey and eastern Pennsylvania. The company has 10 member banks and 10 active non-bank subsidiaries providing financial services to individuals, businesses, not-for-profit organizations, government entities and other financial institutions.

MINNEAPOLIS (JAN. 16) PR NEWSWIRE - Varitronic Systems Inc. (NASDAQ: VRSY) announced today that its co-founder and executive vice president, G.L. Hoffman, has left to form Insignia Systems, a new company focusing on the retail signage market. Varitronics will own a small part of Insignia Systems and Hoffman will remain a member of the Varitronics board of directors.

According to Scott Drill, Varitronics president and chief executive officer, the signage project does not represent a natural extension of Varitronics' business graphics line nor will it utilize the company's existing independent dealership network.

Insignia Systems currently has a completed prototype of its first product with plans for distribution targeted for mid-summer. Joining Hoffman at Insignia Systems is David H. Eiss, who recently resigned his position at Varitronics as executive vice president.

"As an entrepreneur, I enjoy the dynamics of a start-up venture," explained G.L. Hoffman. "Varitronics has successfully gone beyond that phase and I want to pursue a new opportunity."

Insignia Systems will office at Varitronics' headquarters in Interchange Tower, St. Louis Park, for the next six months. Hoffman intends to use his experience with Varitronics to make Insignia Systems a successful start-up.

Varitronic Systems is a Minnesota-based developer, manufacturer and marketer of business graphics products that enhance the quality, professionalism and effectiveness of business communications.

PURCHASE, NY (JAN. 16) PR NEWSWIRE - Asea Brown Boveri Inc. (ABB) said today that the Department of Justice has closed its investigation of the potential impact of ABB's acquisition of Combustion Engineering Inc. (C-E) (NYSE: CSP) on the United States market for air pollution control equipment without taking any action.

In December, the Justice Department had granted early termination of the Hart-Scott-Rodino waiting period, saying that all other aspects of the transaction would not have any significant detrimental impact on competition.

ABB purchased nearly all of the stock of C-E in a tender offer at $40 cash per share, which was concluded in December 1989. The two companies have total sales of some $7 billion and some 40,000 employees in the United States.

HYATTSVILLE, MD (JAN. 16) PR NEWSWIRE - Maryland Federal Bancorp, Inc. (NASDAQ: MFSL), the holding company for Maryland Federal Savings and Loan Association, said today that net income for the third quarter ended Nov. 30, 1989 was $833,000 or $.28 per share, as compared with net income of $1,310,000 or $.45 per share in the comparable period one year earlier.

For the first nine months of fiscal 1990, Maryland Federal's net income was $1,955,000 or $.66 per share, versus net income of $3,179,000 or $1.09 per share for the nine months ended Nov. 30, 1988.

Commenting on the results, Robert H. Halleck, president, noted that the company's net income for the most recent three months rose 51 percent over net income of $552,000 for the second quarter ended Aug. 31, 1989.

"Our spreads improved in the third quarter as deposit costs declined modestly. Operationally, mortgage loan demand remains good, and our credit quality high," Halleck said. He added that, "any further lowering of interest rates should have a beneficial effect on our bottom-line in calendar 1990."

Net interest income after provisions for loan losses for the quarter ended Nov. 30, 1989 was $3,398,000, as compared with $3,724,000 one year earlier. For the first nine months of fiscal 1990, net interest income after provision for loan losses was $9,339,000, versus $10,434,000 in the similar year-earlier period.

Halleck noted that Maryland Federal's regulatory capital as of Nov. 30, 1989, was well in excess of newly-imposed regulatory requirements. He added that through the first nine months of fiscal 1990, Maryland Federal's assets increased 8.4 percent to $628 million. Deposits at Nov. 30, 1990 were $537,269,000 or 8 percent above year- earlier levels.

Maryland Federal Bancorp, Inc. is the holding company for Maryland Federal Savings and Loan Association, which operates 15 offices in Prince George's Montgomery and Charles counties in the Washington, D.C. metropolitan area. As of Nov. 30, 1989, Maryland Federal's assets were $682,026,000.

MIDLAND, MI (JAN. 16) PR NEWSWIRE - Gilbert A. Currie, chairman of CHEMICAL Financial Corporation (NASDAQ-NMS: CHFC), reported net income for the year of 1989 of $10,913,000, a $1,798,000, or 19.7- percent increase over 1988 earnings of $9,115,000. Earnings for the fourth quarter of 1989 were $3,112,000, an 8-percent increase over 1988 fourth-quarter earnings of $2,881,000.

Per-share earnings for 1989 were $3.42, up 17.1 percent over the $2.92 per

share earned in 1988. Earnings per share have been restated for the 10 percent stock dividend declared on Dec. 18, 1989, which will be payable on Jan. 19, 1990. Earnings per share for the fourth quarter of 1989 were $0.96, a 3.2-percent increase over 1988 fourth-quarter earnings per share of $0.93.

Currie stated, "The results for 1989 continue the record of consecutive annual gains achieved each year since CHEMICAL became a bank holding company in 1974."

At Dec. 31, 1989, total assets of the corporation were $1.26 billion, an 11.6-percent increase over year-end 1988, and shareholder equity was $98,056,000, which represented 7.8 percent of total assets, and a 13.9-percent increase over Dec. 31, 1988. During the year of 1989, total deposits increased 10.5 percent and total loans outstanding increased by 11.5 percent.

CHEMICAL Financial Corporation is one of the 10 largest bank holding companies in Michigan, and the company's 10 affiliated banks operate 74 "Chemical Bank" offices in 19 counties across the mid-section of Michigan's Lower Peninsula. CFC Data Corp., Midland, is the company's wholly owned data processing subsidiary.

The company's common shares are traded in the over-the-counter market and are quoted on the NASDAQ National Market System under the symbol CHFC.

HOUSTON (JAN. 16) PR NEWSWIRE - Rowan Companies, Inc. (NYSE: RDC) reported unaudited financial results for the year ended Dec. 31, 1989. The net loss amounted to $33,777,000 compared to a net loss of $31,601,000 in 1988. The loss per share was $.47 versus $.44 in the year earlier. The fourth quarter net loss amounted to $12,413,000 or $.17 per share compared to net earnings of $10,460,000 or $.14 per share in the same period of 1988.

C. R. Palmer, chairman and president said, "Excluding a gain of $24,371,000 or $.34 per share arising from the physical loss of a drilling rig in December 1988, financial results for 1989 were significantly better than the previous year. The recent improvements in rig utilization, currently approaching 100 percent, combined with substantial day rate increases within the past weeks, provide encouragement and confidence of a greatly improved business climate for 1990."

Rowan Companies, Inc. serves the petroleum industry as a contract driller, onshore and offshore in domestic and international areas, and operates a fleet of charter helicopters and fixed wing aircraft.

IRVINE, CA (JAN. 16) PR NEWSWIRE - Medstone International Inc. (NASDAQ: MSHK) received formal notification from the FDA identifying the necessary measures to make the company's gallstone PMA supplement approvable. Based

on the FDA's internal review and the recommendations of the Oct. 19, 1989, advisory panel, the FDA requested additional information in the letter dated Jan. 10, 1990.

The additional information requested by the FDA was consistent with Medstone's expectation that new clinical studies would not be required and that a more detailed analysis of existing data could satisfy the concerns of the FDA staff and its advisory panel.

"We are pleased that our original study concept has allowed us to prepare a more detailed analysis of device and drug issues, present long-term follow up data and review for potential adverse effects," stated Freeman Rose, chairman and chief executive officer.

"We can now proceed with confidence to amend our application." Rose declined to speculate when the FDA advisory panel might review the revised application, but added that preparation of the amendment might take several months.

Medstone International manufactures the Medstone STS non-invasive shockwave therapy system used in this clinical study. Medstone was granted approval by the FDA in April 1988 for general clinical use of the STS on kidney stones and is a pioneer in the use of lithotripsy for the treatment of gallstones.

#90016p0206 01/16/1990 ~PR Newswire

SAN JOSE, CA (JAN. 16) PR NEWSWIRE - Wyse Technology Inc. (NYSE: WYS) announced today that it has entered the mid-range, multiuser systems market in the United States with the first in a series of Wyse-designed UNIX systems based on Wyse's enhanced version of industry standard UNIX System V/386 Release 3.2. The new systems offer breakthrough price/performance advantages over competing products, enabling the company to bring advanced multiuser technology to a much broader class of users through its indirect channels of distribution. Over the next few months, the company will introduce these products in many of its other markets around the world.

The family includes the Wyse Series 9000i, a system incorporating "Pyramid or Sequent-class" technology that has been cost reduced to provide fast, powerful machines at uniprocessor prices. The Series 9000i architecture supports tightly coupled, symmetric processing typically found in systems costing more than $100,000. Wyse significantly enhanced the UNIX kernel operating system to support this architecture, resulting in absolute

linear performance gains as central processors are added.

Both the Series 9000i and Wyse's entry-level Series 5000i use Intel's 80386 microprocessor but support an architecture for Intel 80486 upgradeability. The products were designed to work together using a common operating system, which provides application software compatibility and enhanced performance. The family supports up to 128 active users.

Wyse will sell the Series 9000i and 5000i to value-added resellers (VARs) through specialized distributors -- a two-step distribution strategy Wyse has used successfully to achieve its position as a worldwide market share leader in general-purpose terminals. These new UNIX systems were designed and packaged specifically for indirect distribution, with Wyse choosing a group of seasoned distributors with at least five years of experience selling and supporting advanced UNIX systems. Compared to selling through a direct sales force, products sold through indirect channels generally provide lower costs and broader distribution to end users.

Both the Series 9000i and Series 5000i feature Wyse's Enhanced UNIX System V/386 Release 3.2 software, which preserves the functionality of AT&T's industry standard version, plus provides significant enhancements for performance, ease of use, connectivity and compatibility. The software provides compatibility for thousands of DOS, UNIX System V, and XENIX 2.2 and 2.3 applications.

Wyse Technology is a leading supplier of microprocessor-based products, which include terminals, IBM PC-compatible computers, monitors and multiuser systems.

CONTACT: Shelley Potter, 408-473-2064, or Kathryn Watson, 408-473-2066 both of Wyse Technology; or Mary Carlisle of Thomas Associates, 415-325-6236, for Wyse Technology

CLEBURNE, TX (JAN. 16) PR NEWSWIRE - United Heritage Corporation, Cleburne, Texas-based holding company engaged in the production and sale of lite beef, cattle, and recreational marine products, announced today that Heritage Lite Beef, a product sold by wholly owned subsidiary National Heritage Sales Corporation, is now being carried by Tom Thumb Page Food and Drug Centers, a retail grocery store chain owned and operated by Dallas-based Cullum Companies, Inc.

Heritage Lite beef is initially being introduced in 16 stores in the Dallas/Fort Worth marketplace, with plans to expand to all Tom Thumb stores prior to the end of 1990. The Tom Thumb division of Cullum Companies, Inc. owns and operates 66 retail grocery stores in the state of Texas.

Brokers for the transaction were Carey and Carey, Inc. of Fort Worth, Texas. Joe Carey Sr., president of Carey and Carey, Inc., said that the initial order placed by Tom Thumb for its introduction into the first 16 stores represents annualized gross sales of $880,000.

Heritage Lite Beef is marketed as having 25 percent to 50 percent less fat than typical Choice beef, as defined in USDA Handbook 8-13. National Heritage Sales currently markets its products in the North Central, Southeastern and Northwestern portions of Texas and in Central Oklahoma.

Heritage Lite Beef is produced under a USDA-approved Nutritional Labeling Verification Program.

#90016p0211 01/16/1990 ~PR Newswire

HORSHAM, PA (JAN. 16) PR NEWSWIRE - The Frankford Corp. (NASDAQ: FKFD), parent company of Frankford Trust Co., today reported earnings for the fourth quarter and year ended Dec. 31, 1989.

Net income for the three months ended Dec. 31, 1989, was $1,704,000 or $.59 per share, compared to $1,698,000 or $.59 per share, in 1988.

Net income for the year ended Dec. 31, 1989 increased 5.4 percent to $6,248,000 or $2.16 per share, compared to $5,929,000 or $2.05 per share, earned last year. Average outstanding shares amounted to 2,892,757 at Dec. 31, 1989.

Tax equivalent net interest income for the year increased 8.4 percent to $23,248,000, up $1.8 million from 1988. This increase can be attributed to a 7.3 percent increase in average earning assets as well as an increase in net interest margin which rose to 5.04 percent from 4.99 percent for the year.

Non-interest income amounted to $4,505,000, up from $4,117,000 in 1988, due primarily to increased income from the bank's trust division and from the proceeds from the sale of the bank's 5th and Chestnut streets office. Gains on the sale of securities and mortgages amounted to $668,000 compared to $625,000 in 1988. Non-interest expenses for the 12-month period amounted to $17,566,000 compared to $16,054,000 last year.

Return on average assets for the year was 1.27 percent and return on average equity amounted to 14.26 percent. Book value at year-end amounted to $15.53 per share, compared to $14.64 in 1988.

At Dec. 31, 1989, The Frankford Corp.'s assets totaled $531 million, up 8.8 percent from a year ago. Total deposits increased 8.7 percent to $465 million and net loans rose 16 percent to $361 million.

Frankford Trust Co. has 17 full-service banking offices serving Philadelphia, Bucks, Delaware and Montgomery counties.

#90016p0213 01/16/1990 ~PR Newswire

NORCROSS, GA (JAN. 16) PR NEWSWIRE - CytRx(R) Corporation (NASDAQ: CYTR) announced today that it has begun studies in volunteers with sickle cell disease which are intended to evaluate the safety and dose tolerance of its lead product, RheothRx(R) Copolymer. Previous safety and dose tolerance studies in healthy volunteers have recently been successfully completed.

Sickle cell is a genetic disease which results in fragile, "sickle" shaped red blood cells. Sickled red blood cells are also "sticky" and tend to occlude small blood vessels, resulting in severe pain, organ damage and a shortened life span. Laboratory studies suggest that RheothRx exerts a "lubricating effect" and tends to enhance blood flow through previously occluded vessels.

Studies to test the effectiveness of RheothRx in sickle cell crisis are expected to begin by the end of the first quarter of 1990.

CYTRX Corporation is a development-stage pharmaceutical company engaged in the research and development of therapeutics incorporating copolymers. The company's products are intended for use in the treatment in vascular, immune system, and infectious diseases.

GREENFIELD, MA (JAN. 16) PR NEWSWIRE - West Mass Bankshares Inc. (NASDAQ-NMS: WMBS) today reported earnings of $322,000, or 26 cents per common share and common share equivalents, for the three-month period ended Dec. 31, 1989, compared to $163,000, or 13 cents per common share and common share equivalents outstanding, for the same period in 1988.

For the year ended Dec. 31, 1989, net income was $849,000, or 67 cents per common share and common share equivalents outstanding, compared to $815,000, or 62 per common share and common share equivalents, for the year ended Dec. 31, 1988.

Assets totaled $183 million at Dec. 31, 1989, an increase of 5.7 percent over assets of $173.2 million at Dec. 31, 1988. Net loans at Dec. 31, 1989, were $152.4 million, up 12.3 percent as compared to $135.7 million at Dec. 31, 1988. Total deposits at Dec. 31, 1989, were $161.1 million compared to $151.4 million at Dec. 31, 1988, an increase of 6.4 percent. Non-performing loans outstanding decreased by 40 percent to $1.2 million, or .6 percent of total assets at Dec. 31, 1989, from $2 million, or 1.16 percent of total assets, at Dec. 31, 1988.

Stockholders' equity remained unchanged at $17.8 million from 1988 to 1989. During the year, the company purchased 53,400 additional shares of treasury stock, bringing the total to 148,590 shares as of Dec. 31, 1989.

The board of directors voted to declare a dividend of 7 cents per share, payable on Feb. 28, 1990, to shareholders of record on Feb. 5.

CHICAGO (JAN. 16) PR NEWSWIRE - Shareholders of Exchange Bancorp, Inc. (NASDAQ: EXCG) (EBI), approved an agreement to merge with ABN/LASALLE North America at a special meeting held today. The closing date for the merger is targeted for Jan. 30, 1990.

The terms of the agreement provide that ABN/LASALLE will pay $420 million in cash for all common stock and convertible preferred stock of EBI, which amounts to $24 per common share.

Following the merger of the holding companies, The Exchange National Bank of Chicago and the LaSalle National Bank will merge under the LaSalle National Bank name. John Rau, president of Exchange, will become the new president and CEO of the combined banks.

The entities of LaSalle National Corp. will continue providing commercial, retail and trust services to its customers throughout Chicago and the Midwest. The merged corporation will also include the five community banks of LaSalle and the three now held by Exchange.

Ira J. Kaufman, chairman of Exchange Bancorp, said, "I feel a great sense of pride in the growth and accomplishments that we have achieved over the last ten years, and it's with great pride that I look to the future of this organization as it joins forces with another outstanding financial institution to move into the '90s as the leader in Chicago's commercial middle market."

ST. LOUIS (JAN. 16) PR NEWSWIRE - Landmark Bancshares Corporation (NYSE: LBC) posted record fourth quarter net income, completing 1989 with its highest levels ever of net income and earnings per share. For the year ended Dec. 31, 1989, Landmark's net income was $14,513,000, a 21 percent increase over $12,035,000 for 1988. Net income per common share of $2.14 (primary) or $2.02 (fully-diluted) increased 8 percent and 9 percent, respectively, over $1.98 (primary) and $1.86 (fully- diluted) for the prior year.

For the three months ended Dec. 31, 1989, net income was $3,852,000, a 12 percent increase over net income of $3,450,000 for the fourth quarter of 1988. Net income per common share was $.53 (primary) and $.50 (fully-diluted), unchanged from the same period the prior year.

In announcing Landmark's record earnings, S. Lee Kling, chairman of the board and chief executive officer, stated, "Throughout 1989, we continued our focus on reducing and controlling noninterest expense while expanding sources of fee income. These successful efforts, along with growth in net interest income from a larger base of assets, have contributed to our record year and have built the groundwork for entering 1990."

At Dec. 31, 1989, Landmark's assets were $1,965,851,000, a 6 percent increase over assets of $1,849,909,000, at Dec. 31, 1988; loans were $1,398,028,000, a 4 percent increase over $1,340,084,000; deposits were $1,714,089,000, a 5 percent increase over deposits of $1,638,986,000.

Landmark Bancshares Corporation is a St. Louis-based multibank holding company with 49 locations throughout Missouri and Illinois, including 35 locations in the greater bi-state St. Louis metropolitan area.

ST. LOUIS, MO (JAN. 16) PR NEWSWIRE - Kellwood Company announced today it has completed a $60,000,000 long-term financing agreement with five insurance companies. Continental Bank served as the agent for the financing which has a final maturity of 15 years, an average life of 9.5 years and bears an average interest rate of 9.11 percent. Proceeds from the sale of the notes will be used to pay down short term debt.

William J. McKenna, president and chief executive officer, stated, "This financing provided additional balance to Kellwood's capital structure, and should reduce the company's cost of capital and enhance the stability and predictability of net earnings over the next decade."

Kellwood, a Fortune 500 company, is an international manufacturer and marketer of apparel, home fashions, and camping soft goods.

FALLS CHURCH, VA (JAN. 16) PR NEWSWIRE - First Virginia Banks Inc. (NYSE: FVB), for the 14th consecutive year, has reported an increase in earnings over the preceding year.

For the year ended Dec. 31, 1989, its net income reached $67,374,000, up 11 percent from $60,940,000 earned in 1988. Net income per share of common stock was $3.20 compared with $2.90 in 1988. The 1989 earnings represent a return on average total assets of 1.39 percent compared with 1.32 percent in 1988 while the returns on average stockholders' equity were 15.55 percent and 15.52 percent for the respective years.

For the fourth quarter of 1989, net income was $16,542,000, or $.79 per share, an increase of 5 percent above $15,757,000, or $.75 per share, earned in 1988.

Robert H. Zalokar, chairman and chief executive officer of First Virginia, stated that the increased earnings are attributable to a higher net interest margin coupled with a 5 percent increase in average earning assets. This resulted in a 9 percent increase in net interest income while noninterest expenses increased only 5 percent. The continuing high quality of earning assets -- which contain no foreign loans, leveraged buy-out loans or less-than-investment-grade securities -- also contributed to the higher earnings. On Dec. 31, 1989, nonperforming assets were $16.6 million, only .50 percent of total loans, down from $17.6 million and .55 percent, respectively, one year earlier, and the allowance for loan losses was approximately 2-1/2 times non-performing assets.

First Virginia's total year-end assets, which exceeded $5 billion for the first time at the end of 1989, totaled $5.12 billion, up 7 percent over $4.80 billion at the end of the preceding year. Total deposits were $4.43 billion, up 5 percent from $4.22 billion last year. Total loans rose to $3.29 billion, an increase of 5 percent over the $3.15 billion at the preceding year-end. Stockholders' equity increased 10 percent during 1989 to $454.60 million, up from $412.17 million at the end of 1988. At Dec. 31, 1989, stockholders' equity was 8.78 percent of total assets compared

with 8.59 percent one year earlier.

DECATUR, IL (JAN. 16) PR NEWSWIRE - Archer Daniels Midland Company (NYSE: ADM) today reported net earnings of $132,166,000, equal to $.46 per share, for the three months ended Dec. 31, 1989, based on average shares of ADM stock outstanding of 282,434,000 shares. This compares with earnings of $100,373,000 equal to $.36 per share on 280,745,000 shares outstanding in the same period a year ago, adjusted for the 5-0/0 stock dividend in September 1989 and the three-for-two stock split in December 1989.

For the first six months of the current fiscal year, July through December net earnings after taxes totaled $249,335,000, equal to $.88 per share based on average shares outstanding 281,907,000 compared with earnings of $191,674,000 or $.69 per share on 279,467,000 average shares outstanding for the six month period of a year ago, adjusted as above.

Provisions for federal and state income taxes for the first six months of the current fiscal year were $140,022,000 compared with $110,437,000 in the same period a year ago.

WALTHAM, MA. (JAN. 16) PR NEWSWIRE - Stockholders of Thermo Instrument Systems Inc. (ASE: THI) today voted at the company's annual meeting to approve a merger of Thermo Environmental Corporation (ASE: TEV) with Thermo Instrument.

"We are pleased that shareholders have approved the merger, because this expanded company can now more effectively pursue opportunities for joint marketing and cooperative development of environmental products and services," said Arvin H. Smith, president and chief executive officer.

"Thermo Instrument and Thermo Environmental have served complementary markets by helping customers comply with environmental protection regulations. The larger company now represents a significant presence in the environmental field, with benefits for our current and prospective customers, our employees, and shareholders alike."

Stockholders of Thermo Environmental approved the merger in a separate meeting conducted earlier today. Thermo Environmental's stockholders will receive one-half share of Thermo Instrument stock for each TEV share exchanged. Instructions for exchanging TEV common stock certificates will be mailed to shareholders.

The merger will be accounted for as a pooling of interests and is structured as a tax-free reorganization.

Thermo Instrument Systems develops, manufactures, and markets analytical instruments used to detect and monitor air pollution, radioactivity, complex chemical compounds, and toxic metals and other elements in a broad range of liquids and solids. Thermo Instrument Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

CHICAGO (JAN. 16) PR NEWSWIRE - Northern Trust Corp. (NASDAQ/NMS: NTRS) today reported record unaudited net income for the year ended Dec. 31, 1989.

Core earnings for 1989 reached a milestone of $100.2 million, 23 percent greater than 1988 core earnings of $81.5 million. Core earnings in 1988 exclude a $13.4 million after tax gain from the sale of the Northern Building at 125 S. Wacker Dr., Chicago, and tax benefits of $14.4 million primarily associated with the 1987 provision for losses on loans to less-developed countries (LDCs). For 1989, core earnings exclude similar tax benefits of $13.0 million. Including these non- operating items, net income for the year totaled $113.2 million, compared with $109.3 million in 1988.

Net income per common share totaled $6.23 in 1989 compared with $6.61 a year ago, reflecting the issuance of 1.5 million shares of common stock in January 1989 to the corporation's leveraged Employee Stock Ownership Plan (ESOP), additional shares related to performance incentives and the conversion of the corporation's cumulative convertible preferred stock into 1.1 million shares of common stock in December 1989. These additional shares were partially offset by the acquisition of 445,000 shares of common stock under the previously announced buy back program, which reduced average shares outstanding by 210,000.

The 1989 earnings performance reflects record trust fees and net interest income, higher bond and foreign exchange trading profits, growth in banking-related fees and a lower provision for the loan loss reserve. Increases in noninterest expenses partially offset these positive factors. The results for 1989 produced a return on average assets (ROA) of 1.08 percent versus 1.20 percent in 1988. The return on average common equity (ROE) was 23.9 percent compared with 28.9 percent in 1988. Based on core earnings, the ROA during 1989 was .95 percent compared with .89 percent a year ago, while the ROE was 21.0 percent in both years.

Noninterest income, which accounted for 55 percent of total taxable equivalent revenue, increased 7 percent to $330.1 million from the prior year's $307.4 million. Noninterest income for 1988 included the pretax building sale gain of $21.4 million and a $4.1 million write-down in the carrying values of certain lease residuals and venture capital investments. Excluding the effect of these special items, 1989 noninterest income increased $40.0 million or 14 percent over 1988. Trust fees, representing 72 percent of total noninterest income and 39 percent of total taxable equivalent revenue, increased 15 percent to $237.2 million from $206.8 million in 1988. The $30.4 million increase in trust fees was attributable to growth in both personal and corporate trust businesses. Trust fees have increased at a compound growth rate of 18 percent for the past five years. Trading account profits totaled $10.4 million, up from $7.0 million a year ago. Other operating income totaled

$82.6 million, compared with $93.6 million in 1988. Excluding the effect of special items in 1988, other operating income for 1989 was up $6.3 million or 8 percent over last year. Foreign exchange trading profits, cash management fees, discount brokerage and futures commissions were the principal components of this increase.

Net interest income on a fully taxable equivalent basis totaled $273.4 million, an increase of 7 percent from the $256.1 million reported in 1988. The increase in net interest income resulted from a higher level of average earning assets, which included large increases in domestic loans and in short-term U.S. government securities. Although the addition of U.S. government securities increased net interest income, the net interest margin declined to 2.95 percent from 3.20 percent because of the combination of the lower margin earned on the securities and the receipt of Brazilian interest last year.

Reflecting the corporation's excellent asset quality, the provision for possible loan losses was reduced to $16 million from $20 million last year. Net charge-offs for 1989 totaled $18.6 million, down from $102.3 million a year ago. The decline reflects $10.6 million of net LDC charge-offs in 1989, compared with $97.0 million in 1988.

Nonperforming domestic loans totaled $36.3 million or .68 percent of total domestic loans at Dec. 31, 1989. At Dec. 31, 1989 the corporation's remaining LDC outstandings were $67.1 million, down from $108.4 million at Dec. 31, 1988, and consisted almost entirely of low risk trade-related and U.S. government collateralized loans. It has been concluded that to maintain a loan reserve allocation of $65.5 million for the LDC loans is not necessary.

Although the corporation's overall asset quality is among the best in the industry, management has taken a conservative view in transferring $51.5 million of the LDC reserve to the general unallocated portion of the reserve for loan losses. The remaining LDC reserve of $14 million was equal to approximately 20 percent of the corporation's LDC outstandings at Dec. 31, 1989. The total reserve for loan losses was $150.1 million at Dec. 31, 1989, equal to 2.65 percent of outstanding loans. This compares with $151.1 million or 3.24 percent of outstanding loans at Dec. 31, 1988.

Noninterest expenses totaled $426.6 million versus $388.3 million in 1988, an increase slightly under 10 percent. Of the $38.3 million increase, salaries and employee benefits accounted for $15.8 million while occupancy and other operating expenses accounted for $9.4 million and $13.1 million, respectively.

The income tax provision totaled $11.7 million in 1989, compared with $22.1 million in 1988 which included $8.0 million applicable to the building sale gain. The lower tax provision for 1989 also reflected a

higher level of federal and state tax-exempt interest income.

Total assets at Dec. 31, 1989 were $10.9 billion and averaged $10.5 billion for the year, an increase of 15 percent from the 1988 average. Loans and leases totaled $5.7 billion at Dec. 31, 1989 and averaged $5.0 billion for the year, 17 percent higher than the prior year average. Reflecting the sale of LDC loans, average foreign country loans declined 22 percent from Dec. 31, 1988 while average domestic loans grew 22 percent.

Northern's strong earnings continue to increase stockholders' equity, which at Dec. 31, 1989 amounted to $591.2 million, up 13 percent from $522.2 million a year ago. The conversion of the convertible preferred stock into common stock increased the corporation's common equity by $52.4 million. Common equity totaled $531.2 million and $409.7 million at Dec. 31, 1989 and 1988, respectively. Primary capital as a percentage of total assets was 6.69 percent at Dec. 31, 1989, compared with 6.70 percent last year. Average stockholders' equity to average loans was 11.0 percent in 1989 versus 10.9 percent in 1988.

Results for the Fourth Quarter

Net income for the fourth quarter of 1989 was $32.4 million, compared with $42.1 million in 1988 which included the building gain of $13.4 million. Net income per common share was $1.79 in 1989, compared with $2.59 a year ago. The per share amounts for 1989 reflect the issuance of common stock to the corporation's ESOP, additional shares related to performance incentives and the conversion of convertible preferred stock into common stock, partially offset by the stock buy back program. Adjusting for the effects of the LDC tax benefits and the 1988 building sale gain, net earnings for the quarter were a record $28.3 million, up 28 percent from 1988 net earnings of $22.1 million.

Significant factors contributing to the strong fourth quarter performance were record trust fees and higher bond and foreign exchange trading profits. Partially offsetting these favorable factors was a slight decline in net interest income due to higher noninterest expenses and the receipt of Brazilian interest last year.

Asset quality continues strong as nonperforming assets declined to $43.5 million at year end from $46.6 million at Sept. 30, 1989.

Outlook David W. Fox, the corporation's newly elected chief executive officer, commented as follows with respect to 1990: "Northern's businesses are performing well and, despite a somewhat less certain economic environment, the outlook for 1990 remains positive."

DALLAS (JAN. 16) PR NEWSWIRE - Trinity Industries Inc. (NYSE: TRN) today announced it has reached agreement with Ashland Oil Inc. (NYSE: ASH) to acquire 100 percent of the capital stock of Beaird Industries Inc., a subsidiary of Ashland located in Shreveport, Louisiana.

Beaird fabricates and machines metal products, including large pressure vessels for refineries and chemical plants, high pressure storage tanks, and fabricated and machined weldments. Beaird also produces industrial silencers, desalinators, evaporators, heat exchange equipment and gas processing systems under the BELEX and MAXIM trademarks. Beaird has approximately 650 employees and recorded revenues of approximately $66 million in 1989.

Trinity President and Chief Executive Officer, W. Ray Wallace said, "We are very pleased with this acquisition. We believe it is an especially good fit for our company, and Beaird's reputation, experience and quality products blend nicely with Trinity's metal manufacturing and fabrication core businesses and products."

The acquisition is subject to applicable governmental approvals. Terms of the acquisition were not disclosed.

Trinity Industries Inc., with headquarters in Dallas, manufactures and markets a wide variety of metal products, principally in six business segments: railcars, marine products, structural products, containers, metal components, and leasing.

#90016p0261 01/16/1990 ~PR Newswire
MINNEAPOLIS (JAN. 16) PR NEWSWIRE - Cray Research (NYSE: CYR) today announced plans to bring together its three sales and service regions in the United States and subsidiaries in Canada and Brazil into a single organization, to be called the Americas. Mike Wilhelm, previously general manager for the company's Western Region, was named to head the new organization.

The company said that other key management positions in the Americas are being defined and filled, and that announcements on those appointments would be made in the next few weeks. The sales effort will be divided East and West. All service activities will be brought together under a single function. Another key function will be the development of new sales opportunities with the U.S. government.

Ed Masi, senior vice president of marketing for Cray Research, said that other changes in his organization would be the establishment of a marketing function focused on market development and distinct from sales and sales support, and a clearer separation in technical support functions between programs of a worldwide nature, such as technical training and publications, and problem solution in the field.

Commenting on the reasons for the changes, Masi said, "Our strongest motivation is customer satisfaction -- to build on the strength of our relationships with customers, and to find the most effective means for delivering our products and services to them. We now have rationalized our service activities and shortened the pathway to problem solution for our customers. Our customer base is becoming more diverse, as will the supercomputer products and services we offer over time, and these changes should help us deal with that diversity. We will be able to enhance efforts to find new government business, and be more able to work with customers whose operations span our former regional boundaries."

According to Masi, these changes also will provide opportunities to eliminate duplication of functions, but reassignments will be pursued and the total number of jobs in his organizations most likely will remain very close to what it was. Therefore, there should not be a significant impact on the company's financial performance.

Cray Research Inc. designs, manufactures, markets and supports large-scale high-speed computer systems for scientific and engineering applications.

MONTREAL (JAN. 16) PR NEWSWIRE - Alcan Wire & Cable announced today it will shut down its welding wire and metallizer wire lines at its Saint-Maurice plant in Shawinigan, Quebec, over the next few months. The shut down will affect 26 unionized employees, in addition to the 16 already laid off during the Fall of 1989, and 10 staff. The plant employs 128 people.

Alcan Wire & Cable President, Doug Bland, said: "This difficult decision was taken for market reasons. Since 1985, despite our continued efforts, we have not been able to increase our share of the U.S. market for these products. Our production costs, in particular our labor costs, simply cannot compete with those of offshore and American companies vying for the highly competitive U.S. market. The situation has been aggravated further by the stronger Canadian dollar." Bland added that despite important productivity gains, it had become obvious that it would never be possible for Saint-Maurice Works to make this product line profitable.

Alcan is currently negotiating the sale of its interests in this market segment. Affected employees will be offered early retirement under existing programs as well as work cessation monetary compensation. In addition the company will assist them in their re-employment efforts. Some employees may be included in the recruitment process at Alcan's Shawinigan smelter.

The Saint-Maurice plant will continue to produce quality products such as A.C. strip, cable and other commercial wires. Alcan Wire & Cable is a division of Alcan Enterprises (Canada), a division of Alcan Aluminium Limited (NYSE: AL).

#90016p0271 01/16/1990 ~PR Newswire

ATLANTA (JAN. 16) PR NEWSWIRE - The Citizens and Southern Corp. (NYSE: CTZ) today reported 1989 net income of $238 million, an increase of 15 percent over 1988 net income of $206.3 million.

After deducting dividends on preferred stock, income available to common stock was $225.7 million, an increase of 14 percent over $198.7 million in 1988. On a per common share basis, earnings increased 13 percent to $3.67

for 1989 from $3.25 in 1988.

Fourth quarter net income was $60.3 million, an 11 percent increase over 1988 fourth quarter net income of $54.5 million. Income available to common stock was $56.5 million or $.93 per share, compared to $52.3 million or $.85 per share, for the same quarter a year ago.

Return measures for the year improved significantly. The return on average assets was 1.07 percent for 1989, compared with 1.00 percent for 1988. The return on average common shareholders' equity was 17.60 percent compared with 17.39 percent the previous year. For the quarter, ROA was 1.04 percent and ROE was 17.17 percent compared with 1.04 percent and 17.39 percent for the same period in 1988.

Also today, the C&S board of directors declared a quarterly dividend of $.35, payable March 15 to shareholders of record on Feb. 23. Dividends of $1.32 were paid in 1989, reflecting a 15 percent increase over 1988 dividends and a 36 percent payout of earnings. The dividends paid and stock price appreciation during 1989 represented a 29.6 percent return to shareholders, compared with 11. 4 percent for 1988.

C&S has 506 banking offices throughout Georgia, Florida and South Carolina. On Sept. 26, 1989, C&S and Sovran Financial Corp., a Norfolk, Va.-based bank holding company announced an agreement to merge under a new holding company, to be named Avantor Financial Corp. Shareholders of both C&S and Sovran will vote on the transaction Feb. 2, 1990. If approved by shareholders and regulatory authorities, the transaction is expected to close during the second quarter of 1990.

VALLEY FORGE, PA (JAN. 16) PR NEWSWIRE - Paper Corporation of America, an Alco Standard (NYSE: ASN) company, announced today the acquisition of Distribix Inc., of St. Louis, for an undisclosed amount of cash.

The execution of an agreement had previously been announced on Dec. 4, 1989.

Distribix is a distributor of fine and industrial paper and paper products with nine facilities in the mid-central United States. The company, with annual revenues of approximately $200 million, will remain at its present locations under the leadership of William T. Leith, president and chief executive officer.

Edward N. Patrone, president of Paper Corporation of America, stated, "Distribix emphasizes exceptional customer service, a dedicated sales force and is supported by an innovative and responsive regional distribution network with superior market strength and an excellent cross-section of paper mill franchise relationships. We are pleased to be able to add this fine company and its employees to our organization."

With more than $3 billion in annual sales, Paper Corporation of America is the largest distributor and converter of paper and related products in the United States. PCA serves customers in 50 states through a national network of 21 operating companies in more than 200 locations.

Alco Standard Corp., headquartered in Valley Forge, is a publicly held company specializing in high growth, service-intensive industries. For its fiscal year ended Sept. 30, 1989, revenues were $4.1 billion.

#90016p0282 01/16/1990 ~PR Newswire

TAMPA, FL (JAN. 16) PR NEWSWIRE - TECO Energy, Inc. (NYSE: TE) today announced its board of directors has amended the TECO Energy Group Savings Plan, a tax-qualified benefit plan, to include an employee stock ownership plan (ESOP).

The ESOP is expected to purchase approximately 3.5 million shares of TECO Energy common stock over the next nine months.

The ESOP's purchase of shares initially will be financed through a $100 million loan from TECO Energy, which will be drawn upon by the ESOP as it buys shares. The loan will be repaid from dividends on the ESOP's shares and TECO Energy's future contributions to the ESOP. TECO Energy anticipates obtaining external funding for the loan to the ESOP through a private placement or public offering of debt.

Timothy L. Guzzle, president and chief executive officer of TECO Energy, said, "The new ESOP not only helps provide financial security for our employees, but also further aligns their interests with those of the company and its shareholders. The increased ownership stake in the company will reinforce our employees' commitment to TECO Energy's future growth and success."

The creation of the ESOP is expected to reduce the future cost of providing the company's matching contribution under its savings plan.

After completing its purchases, the ESOP will hold about 6 percent of the approximately 57 million shares of the company currently outstanding.

TECO Energy is listed on the New York Stock Exchange and is a diversified energy-related holding company headquartered in Tampa. Its principal

companies include Tampa Electric, TECO Diversified and TECO Power Services.

#90016p0286 01/16/1990 ~PR Newswire

ATLANTA (JAN. 16) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) today announced it has begun to solicit proxies in support of proposals to be considered at the March 2, special meeting of shareholders of Great Northern Nekoosa Corp. (NYSE: GNN).

At the special meeting, Georgia-Pacific intends to propose that shareholders:

I. Remove the entire board of directors of Great Northern and make related changes to Great Northern's Articles of Incorporation and Bylaws to provide, among other things, that shareholders, not the current board, may fill vacancies created by the removal of directors, that certain pre-notification requirements for shareholder nominees for directors be eliminated and that the size of the board be reduced to five directors;

II. Elect nominees of Georgia-Pacific as directors; and

III. Amend certain antitakeover provisions of Great Northern Nekoosa's Articles of Incorporation and Bylaws that may be used by the current board of directors without approval of the current shareholders to prevent or impede the consummation of the offer and the merger, and adopt a non-binding resolution requesting the board to approve the offer and the merger, thereby rendering the restrictions on business combinations in Section 611-A of the Maine Business Corporation Act and in the Business Combination Article of the company's Articles of Incorporation inapplicable to the merger.

Great Northern Nekoosa's Board of Directors has fixed the close of business on Jan. 12, 1990, as the record date for determining those shareholders who will be entitled to vote at the special meeting. Separately, Great Northern's board has set Jan. 20, 1990, as the record date for determining the shareholders entitled to vote at the March 20, 1990, meeting to consider a proposal that would result in the redemption of Great Northern's poison pill rights plan.

#90016p0288 01/16/1990 ~PR Newswire

PITTSBURGH (JAN. 16) PR NEWSWIRE - Aristech Chemical Corp. (NYSE: ARS) today announced 1989 net income of $82.1 million, or $2.36 per common share on revenues of $996.4 million.

This compares with record 1988 net earnings of $188.2 million or $5.04 per share (approximately $1.06 per common share of 1988 earnings was attributable to nonrecurring items), on revenues of $1.07 billion.

Operating income for 1989 was $139.6 million compared to $196.3 million in 1988.

Fourth quarter 1989 net income was $15.1 million or 43 cents per common share on revenues of $222.6 million. Operating income was $25.4 million. The same quarter a year ago yielded net income of $34.9 million, or 97 cents per common share on revenues of $258.5 million. Operating income was $50.4 million.

In commenting on 1989 performance, Thomas Marshall, Aristech chairman and chief executive officer, pointed to price and margin deterioration in the polypropylene business, which began in the fourth quarter of 1988, as major factors in reduced revenues and operating income. Polypropylene, a thermoplastic resin and one of Aristech's major product lines, suffered from growing industry capacity and a seriously disrupted export market during the year.

Major outages for maintenance and capacity expansions at a number of Aristech plants during the year also had a significant negative impact on operating income, Marshall said, adding that record-breaking low temperatures in December caused unanticipated outages and additional costs in the fourth quarter, further depressing operating results.

Marshall also noted that net income reflects an increase in the effective tax rate for 1989 to 36.5 percent compared to 26.6 percent for 1988.

"All things considered, 1989 was a good year," Marshall said, "with a return on equity of 20 percent and a healthy balance sheet."

At its regular meeting today, the Aristech board of directors declared a 25 cents per common share dividend, payable Feb. 27, 1990, to holders of Aristech common stock as of Jan. 26, 1990.

#90016p0295 01/16/1990 ~PR Newswire

SOUTHGATE, MI (JAN. 16) PR NEWSWIRE - Security Bancorp, Inc. (OTC: SECB) of Southgate announced that 1989 consolidated net income increased 17.0 percent to $28,631,000 as compared to consolidated net income of $24,469,000 in 1988, establishing the seventh consecutive corporate annual record.

After the required dividend on the company's convertible preferred stock, net income applicable to common stock increased 20.1 percent as compared to 1988. Primary net income per common share for 1989 increased 14.5 percent to $2.45 from $2.14 in 1988 and fully diluted net income per common share increased 13.6 percent to $2.17 as compared to $1.91 for 1988.

The company cited increases in its net interest margin, earning assets and non-interest income, as well as essentially unchanged non- interest expenses, as compared to 1988, as the primary reasons for the increase in 1989 net income.

Fourth-quarter consolidated net income increased 13.9 percent to $7,983,000 as compared to the comparable fourth quarter of 1988, also a corporate record. Net income applicable to common stock increased 16.0 percent as compared to the prior year fourth quarter. Primary net income per common share for the fourth quarter increased 13.1 percent to $.69 from $.61 in 1988 and fully diluted net income per common share increased 13.0 percent to $.61 as compared to $.54 for the comparable 1988 fourth quarter.

In addition to record annual and fourth-quarter 1989 earnings, consolidated total assets of $2,725,086,000 and deposits of $2,461,689,000 at Dec. 31, 1989, were both corporate all-time highs.

Security Bancorp, Inc. is the parent company for Security Bank and Trust Company, Security Bank Northeast, Security Bank St. Clair Shores, Security Bank of Monroe, Bank of Commerce, State Bank of Fraser, Trenton Bank and Trust Company and SecureData Corporation.

SECURITY BANCORP, INC.
FINANCIAL HIGHLIGHTS

	For the Year		For the Quarter	
	1989	1988	1989	1988
Net income	$28,631,000	$24,469,000	$7,983,000	$7,011,000
Net income applicable to common	25,208,000	20,992,000	7,129,000	6,148,000
Primary net income per common share	2.45	2.14	.69	.61
Fully diluted net income per common				

share	2.17	1.91	.61	.54
Cash dividends declared on common stock	.877	.727	.23	.187

Primary net income per common share is based on net income less preferred stock dividends.

Fully diluted net income per common share is based on the shares that would be outstanding if all of the company's Series A convertible preferred stock was exchanged for common stock.

The current annualized indicated cash dividend on common stock is $.92.

#90016p0301 01/16/1990 ~PR Newswire

NEW YORK (JAN. 16) PR NEWSWIRE - Manufacturers Hanover Corporation (NYSE: MHC) today reported fourth quarter net income of $62 million, or $.82 per common share, which reflects a previously-reported $35 million after-tax charge resulting from a fraud at the corporation's Geneva, Switzerland, branch. On an operating basis, earnings for the fourth quarter were $93 million, or $1.31 per common share.

For the fourth quarter of 1988, net income was $210 million, or $4.00 per common share, including $146 million after-tax in past due interest payments from Brazil. On an operating basis, earnings in the year-ago period were $78 million, or $1.37 per common share.

For the full year 1989, the corporation reported a net loss of $518 million, or $10.21 per common share, reflecting the addition of $1.1 billion to the corporation's reserve against refinancing country debt. On an operating basis, earnings for 1989 were $383 million, or $6.32 per common share. Net income for the full year 1988 was $952 million, or $18.27 per common share. Excluding asset sales, tax benefits and other one-time events, operating earnings for 1988 were $352 million, or $6.25 per common share.

"Our higher operating earnings reflect the fundamentals of our business plan," said John F. McGillicuddy, chairman and chief executive officer. "Substantial progress continued in several key businesses, including regional banking, worldwide trading and corporate finance. Expenses remained under tight control. Most importantly, domestic credit quality improved, with a continuing decline in domestic net charge-offs and a reduction in non-refinancing country nonperforming assets, most significantly in real estate."

VANCOUVER, WA (JAN. 16) PR NEWSWIRE - Lawrence E. Heiner, president of NERCO Inc. (NYSE: NER) and NERCO Oil & Gas Inc., announced the following officer appointments for the oil and gas unit:

- Deborah L. Cannon, 33, has been promoted to vice president - controller. Cannon is responsible for financial and management reporting, corporate and partnership tax administration, joint owner relations, acquisition accounting, and operations accounting functions. She will manage a staff of approximately 70 people.

- Donald K. Lehto, 43, has been hired as vice president, exploration and acquisitions. He has extensive experience in the energy business including founding and managing an independent oil and gas company. He will be responsible for a variety of exploration and business development functions for NERCO Oil & Gas Inc.

- William T. Strait, 44, has been hired as vice president, land and legal services. Prior to joining NERCO, Strait was vice president of law and secretary for Texasgulf Minerals & Metals Inc. He has nearly 20 years experience in the oil and gas and mining industries in both domestic and international markets. He will manage a staff of about 30 people.

In an earlier release, the oil and gas unit announced that Robert T. Stange, 45, had been promoted to senior vice president, administration and external affairs. Stange is responsible for a variety of functions including personnel, safety, environmental affairs, government and public relations, labor relations, general administration, and management information systems.

According to Heiner, "We are expanding and strengthening our management team to accommodate the growth of the company." During the past three years, NERCO has invested over $550 million in acquiring oil and gas properties primarily in the Gulf Coast area. These investments have resulted in NERCO becoming a significant U.S. independent oil and gas company.

ROSEMEAD, CA (JAN. 16) PR NEWSWIRE - Southern California Edison and Hamilton Cove Associates have agreed to construct a desalination plant on Catalina Island. The plant will be one of the first on the West Coast to convert sea water into public drinking water, according to Keith Lefever, Edison's Catalina district manager.

The plant was jointly engineered by David A. Boyle Engineers in Santa Ana and Edison and will be constructed by Hamilton Cove. Edison will own and operate the plant, which will augment the island's water supply by providing an additional 145 acre feet, or 48 million gallons of water a

year.

In exchange for constructing the plant, Hamilton Cove Associates will receive a water allocation from the project of 75 acre feet, which will allow for project build out of their condominium site at Hamilton cove in Avalon.

Lefever said that the majority of Edison's 70 acre feet will be used as reserve to help offset the impacts of the island's current drought. However, an incremental portion of plant capacity will be made available for other new construction. "It's a winning situation all the way around " he said.

Lefever said that there will be three 40,000 gallon-per-day units and one 12,000 gallon-per-day unit. A prefab metal building to house the equipment will be located at the southern portion of Edison's Pebbly Beach generating station, southeast of Avalon.

The plant will use reverse osmosis technology to produce 132,000 gallons of fresh water from 530,000 gallons of sea water daily, with 398,000 gallons of reject water being returned to the ocean.

Catalina Island is in the midst of a four-year drought cycle, the worst since the mid-1970s. In conjunction with Edison's current fresh water well development program, the desalination plant will offset the draw down from Middle Ranch Reservoir, which has fallen below the 600-acre-foot level for the first time in nearly a dozen years.

The project requires California Public Utilities Commission approval prior to start of construction. Edison has also filed for the required state and local regulatory permits for operation of the desalination facility.

Edison provides water, gas and electric services to 2,600 residential and commercial customers on Catalina Island and about one million island visitors annually.

#90016p0324 01/16/1990 ~PR Newswire

BALTIMORE (JAN. 16) PR NEWSWIRE - Loyola Capital Corp. (NASDAQ: LOYC) today announced 1989 net income of $10.5 million ($2.08 per share), up 1.3 percent from $10.3 million ($2.06 per share) earned in 1988.

Loyola Capital is the holding company for Loyola Federal Savings and Loan, Maryland's second largest thrift institution.

For the fourth quarter, net income was $2.6 million ($.52 per share), up 45 percent from $1.8 million ($.36 per share) earned during the fourth quarter of 1988.

Loyola Capital had 5,029,709 average shares outstanding during 1989, as compared with 5,012,655 shares during 1988. Earnings are reported on a fully diluted basis.

Higher income from real estate joint ventures and from mortgage banking enhanced fiscal year results, Joseph W. Mosmiller, chairman and chief executive officer, said.

"Loyola ends the decade in a stronger financial position than ever before " Mosmiller added, "with a secure loan portfolio and an effective retail franchise."

James C. Johnson, Loyola's president and chief operating officer, said the thrift's solid performance during 1989 resulted from consistent emphasis on expense control and from success in the core businesses of consumer and mortgage lending.

"Publicity about savings and loans that must shrink in asset size to meet new capital standards has obscured the financial strength of most industry members," Johnson said. "Loyola meets all of the federal capital requirements and therefore will have flexibility to take advantage of unique opportunities in our strong regional market."

Customer deposits grew 1.3 percent over the 1988 level. Assets increased 3.9 percent to $2.1 billion, and the ratio of stockholders' equity to assets was 6.1 percent at year-end.

Loyola Capital Corp. also announced today that it is commencing a new stock repurchase program to acquire up to 300,000 shares of the corporation's common stock, which represents approximately 6 percent of the outstanding stock.

Mosmiller said that Loyola's board of directors has authorized the expenditure of up to $7 million for the repurchase program. Completion of the program, expected within 24 months, is dependent upon market conditions, with no guarantee as to the exact number of shares to be repurchased. Mosmiller also stated that Loyola recently completed a program to repurchase 200,000 shares of the corporation's common stock during 1989.

Loyola has 31 branch offices in the state of Maryland and in the Washington, D.C., metropolitan area. With more than a century's experience in retail services and mortgage lending, Loyola has diversified through subsidiaries into real estate appraisal, auto financing, investment

brokerage, insurance and real estate development. Its loan production network encompasses markets in Maryland, Pennsylvania, Delaware, Virginia and South Carolina.

NEW YORK (JAN. 16) PR NEWSWIRE - Municipal Development Corporation (MDC) (NASDAQ/NMS: MUNI) announced today that because of unanticipated delays in the preparation of its financial reports, it was unable to file its Form 10-K for the period ending Sept. 30, 1989 on a timely basis. MDC has applied to the National Association of Securities Dealers (NASD) for a

temporary exception to this filing requirement. Trading in the company's stock will continue prior to a hearing before the NASD on its application. The company anticipates the filing of its Form 10-K on or before Feb. 15 1990.

Based on unaudited financial statements prepared by management, MDC expects to report a consolidated net loss of approximately $4,100,000 for the fiscal year ended Sept. 30, 1989. This includes a loss of approximately $2,300,000 due to the write-off of intangible assets which the company believes has been permanently impaired due to the downsizing of its business operations among other events.

On the basis of discussions held with its auditors, the company believes that it will receive a qualified opinion on its financial statements when they are filed.

The company is currently engaged in the business of providing data entry services to private entities and federal, state and municipal governments through its principal operating subsidiary, Unibase Data Entry, Inc. (Unibase) and owns a majority interest in the operations of a public infrastructure project.

KEARNY, N.J. (JAN. 16) PR NEWSWIRE - Goody Products Inc. (NASDAQ: GOOD) announced today that its subsidiary, Opti-Ray Inc., has signed an agreement for a $10 million secured loan with a group of lenders headed by The First National Bank of Boston.

The loan will provide for Opti-Ray's seasonal financing needs as well as a significant portion of Goody's presently anticipated seasonal financing requirements. Goody will be negotiating with the same group of banks to obtain additional credit to meet the balance of its short- term financing needs.

Goody also reported that it has received waivers or amendments from its lenders to cure its noncompliance as of Dec. 31, 1989, with certain covenants of its present loan agreements.

The owner of a portion of the company's Columbus, Ga., Development Authority Revenue Bonds, that was previously unwilling to waive certain noncompliance with covenants as of Sept. 30, 1989, has sold its holdings to the other holder of the bonds, which has agreed to the necessary waivers.

Leonard Goodman, chairman and chief executive officer, said the company believes it has made meaningful progress in instituting major cost reductions, manufacturing overhead reductions, improved purchasing controls and automation of certain labor intensive production activities.

Goody Products Inc. is engaged in the design, manufacture and marketing of a wide variety of hair accessories and owns and operates four additional consumer products subsidiaries and divisions: Duray, a producer of cosmetic and travel accessories; Opti-Ray, a designer and marketer of high quality fashion sunglasses; Ace Comb, a manufacturer of premium quality combs, and Pretty Neat Products, a producer of plastic cosmetic organizers.

CHICAGO (JAN. 16) PR NEWSWIRE - American National Corp. reported record net income of $22.5 million for the fourth quarter of 1989, up 22 percent from $18.4 million in 1988.

Return on average assets for the quarter was 1.71 percent and return on average equity was 29.95 percent, compared to 1.54 percent and 25.36 percent in the fourth quarter of 1988.

Net income for the year was a record $78.2 million, up 12 percent from the $69.5 million reported for 1988. Return on average assets was 1.57 percent and return on average equity was 27.66 percent, compared to 1.52 percent and 23.08 percent, respectively, in the prior year.

On Dec. 31, 1989, total non-performing assets, which are the sum of non-accrual loans, renegotiated loans and other real estate owned, were $69.7 million, compared to $69.5 million on Dec. 31, 1988. Of these assets, non-performing loans represented 1.2 percent of the $4.0 billion total loans outstanding at year end vs. 1.4 percent of the $3.6 billion outstanding last year. The corporation's reserve for possible loan losses was $42.2 million at year end, or 1.05 percent of total loans outstanding, up from 40.4 million in 1988.

Total assets stood at $5.3 billion on Dec. 31, 1989, up 9 percent from $4.9 billion at the end of 1988. Total deposits at year end also increased 11 percent to $4.3 billion.

Michael E. Tobin, chairman of American National, said, ''We attribute our success and record earnings to a significant increase in our commercial lending activity. This is the result of the vitality and growth of the

Chicago-area business community and our support of customers and their businesses. We look forward to the coming year and remain dedicated to meeting our customers' needs.''

NEW YORK (JAN. 16) PR NEWSWIRE - Citicorp (NYSE: CCI) announced that at today's board meeting the directors approved an organizational realignment that recognizes the growing role of the consumer business within the company and the need to split the sophisticated corporate finance business characterizing Citicorp's operations in Europe, North America, Japan and Australia from Citicorp's more traditional international activities in the emerging economies.

To this end, Richard S. Braddock, who has been Sector Executive running the consumer effort was named President of Citicorp and Citibank, and Lawrence M. Small, who has been Sector Executive running the Institutional Bank, was named vice chairman and chairman of the executive committee. Both are already directors of the corporation and will continue to report to John S. Reed, chairman.

Michael A. Callen, sector executive responsible for the Global Investment Bank, will be responsible for both investment and institutional banking in the major OECD markets, and Alan S. MacDonald, who has most recently been group executive responsible for the North American Investment Bank, has been named sector executive responsible for Citicorp's corporate and investment banking activities in the emerging countries.

COSTA MESA, CA (JAN. 16) PR NEWSWIRE - Ceradyne Inc. (NASDAQ: CRDN) announced today it has acquired the ceramic air armor business of the Norton Company, Worcester, Mass.

Ceradyne acquired the net assets of Norton's air armor business for an undisclosed amount of cash.

This division will be transferred to Ceradyne's Costa Mesa facility where it will be fully integrated into Ceradyne's lightweight ceramic armor division.

The current level of the business Ceradyne acquired is in excess of $2 million annually.

The acquisition consisted of backlog, technology, inventory and Norton's cooperation in assuring an orderly transfer of former Norton contracts.

Ceradyne stated this acquisition fits the company's strategy of making use of its under-utilized West Coast defense plant while focusing on new non-defense advanced technical ceramics such as Ceradyne's highly successful orthodontic ceramic brackets and industrial ceramics.

PONTIAC, MI (JAN. 16) PR NEWSWIRE - Pontiac Division sales in the first 10 days of 1990 totaled 17,494 vehicles, an 81.5-percent increase on a daily rate basis from 8,436 delivered in the Jan. 1-10 period a year ago.

All Pontiac carlines shared in the sales increases, with the exception of LeMans, as 1990 models are just now arriving. Particularly strong were the Sunbird, up 265 percent; Grand Am, up 150 percent; and Grand Prix, ahead of last year's pace by 40 percent.

"The strong Jan. 1-10 performance gives our dealers a good start for the new year," said Pontiac General Manager John G. Middlebrook. "Nearly doubling our sales level of a year ago gives us needed momentum that will be reinforced with the introduction of the new Pontiac Grand Prix STE sedan, restyled '91 Firebird and LeMans availability."

IRVINE, CA (JAN. 16) PR NEWSWIRE - Hadson Corp. (NYSE: HAD) announced today that its subsidiary, Ultrasystems Engineers and Constructors, Inc., had been awarded a $19 million contract in December for the engineering and construction of a 40 megawatt gas-turbine combined cycle/biomass power plant located in Sanger, Calif. The plant is to be built for Dynamis, Inc. Design efforts are to start immediately.

This award was the fifth power plant contract to be signed by Ultrasystems Engineers and Constructors, Inc. in 1989. Earlier, it had been selected to build four 70 megawatt coal-fired units in Virginia. James P. Kelly, president and chief executive officer of Hadson Power Systems, stated, "These 1989 awards provide good balance to our workload as we finish the

last of two wood-fired power plants and two coal-fired cogeneration projects in California."

Hadson Corp. is an independent producer and supplier of energy products and a defense technology firm, as well as an engineering design and construction firm. Hadson has operations in natural gas and gas liquids; the development, construction, operation and ownership of electric power generation facilities; domestic and international oil and gas exploration and production, and defense and space technologies.

CHARLOTTE, NC (JAN. 16) PR NEWSWIRE - First Union Corporation (NYSE: FTU) today reported $256 million, or $2.40 per share, in net income for 1989.

The 14 percent decrease from $297 million, or $2.76 per share, earned in 1988 resulted primarily from fewer discretionary gains in 1989 than in 1988, increased levels of consolidation/merger-related nonrecurring expenses, a higher loan loss provision and pressure on the net interest margin.

"While we are not satisfied with this earnings level, it's important to note that discretionary gains and nonrecurring expenses adversely affected year-to-year comparisons. We made important progress in 1989 with 18 percent growth in average net loans, sound credit quality and rigorous expense control. Non-interest expense was reduced by $10 million, or 1 percent, from 1988," said Edward E. Crutchfield Jr., First Union chairman and CEO.

The 1988 results included after-tax gains of 40 cents per share from the sale of investment securities and mortgage servicing rights and 4 cents per share from the purchase of pension annuities. Results in 1989 included after-tax gains of 14 cents per share from the sale of securities and mortgage servicing rights. After-tax nonrecurring and other unusual expenses were 27 cents per share in 1989, compared with 6 cents per share in 1988.

For the fourth quarter of 1989, net income was $40 million, or 37 cents per share, down from $70 million, or 66 cents per share, earned in the fourth quarter a year ago. Fourth quarter 1989 results were affected by several nonrecurring and other unusual expenses, some of which should benefit future earnings.

SEATTLE (JAN. 16) PR NEWSWIRE - Highland Capital Inc. today filed with the Securities and Exchange Commission preliminary solicitation materials intended for use in opposing a change in domicile of Longview Fibre Co. (NYSE: LFB) proposed by Longview's incumbent board of directors and slated for a stockholder vote at Longview's Jan. 23 annual meeting of stockholders.

As proposed by the incumbent board, the change in domicile from Delaware to the state of Washington would include additions to Longview's charter which would significantly affect the ability of Longview stockholders to change the composition of the incumbent board and to benefit from possible changes in control of the company which was opposed by the incumbent board. Highland Capital owns approximately 56,600 shares of the common stock of Longview Fibre.

On Jan. 12, Highland Capital commenced an action in Delaware Chancery Court seeking to enjoin Longview Fibre's annual meeting from proceeding as scheduled. The complaint charges, among other things, that the proxy materials, together with the Nov. 13, 1989, press release and the annual report released by the incumbent management and board of Longview Fibre in connection with the proposed change in domicile have been materially misleading as to the purposes of the proposal and the significance of its changed charter provisions on stockholders' rights in the event of a possible change of control or offer to buy the company if opposed by the incumbent board. The complaint noted that these proposed changes in Longview Fibre's charter include, among other things, the imposition of a staggered board, the creation of additional common stock and "blank check" preferred stock, and the imposition upon stockholders of so-called "supermajority" voting requirements in matters related to changes of

control of Longview Fibre. A hearing will be held on Jan. 22 on Highland's motion for a preliminary injunction.

Highland Capital's actions follow the independent disclosure in documents filed Jan. 10 with the Securities and Exchange Commission of the holders of 887,900 shares of Longview Fibre common stock (approximately 8 percent of the company's outstanding shares) that they will vote against the proposed change in domicile. The independent holders included Robert M. Bass, Robert M. Bass Group Inc., Texas Partners Ltd., John H. Scully, William E. Oberndorf, TexGenPar, David Bonderman, San Francisco Partners II and the Bonderman Family Limited Partnership.

PORT HURON, MI (JAN. 16) PR NEWSWIRE - Mueller Brass Company today announced the acquisition of U-Brand Corporation from Worthington Industries, Inc., headquartered in Columbus, Ohio. U-Brand manufactures and distributes malleable iron and plastic pipe fittings and valves in a variety of shapes and sizes, as well as pipe couplings, steel pipe nipples and other related products.

Commenting on the acquisition, Mueller Executive Vice President and Chief Operating Officer Thomas L. Kobylarek said, "The addition of U-Brand will substantially strengthen Mueller's leadership position in the industry. The purchase represents a unique opportunity for Mueller to broaden its presence in existing markets, expand into new markets, and take full advantage of its extensive distribution network."

U-Brand brings to Mueller an established customer base for plastic and iron fittings. Consolidation will diversify Mueller's product line, most significantly into plastics, offering customers a choice of materials to meet different fittings requirements. Plastics have replaced copper in drainage applications and offer future opportunities in other applications.

Kobylarek said that U-Brand will operate as a wholly-owned subsidiary of Mueller, and its current management team will continue to have leadership responsibility for the subsidiary, including U-Brand of Puerto Rico.

U-Brand has produced malleable iron pipe fittings since the 1920s and molded plastic fittings since the early 1970s. It has one of the most extensive product lines in the industry, currently including more than 4,000 items. It also manufactures the unique "Dart" union, well- known within the industry as a premier coupling device, as well as a variety of custom-engineered products.

U-Brand products are used primarily in residential applications, with the greatest percentage of sales to wholesalers who supply plumbers, residential contractors and hardware retailers. Remaining sales include custom-engineered products and products used in industrial applications.

Headquartered in Ashland, Ohio, U-Brand has three production facilities in Ohio and one in Puerto Rico. Total employment is approximately 1,000.

Founded in 1917, Mueller Brass is now a leading fabricator of brass, bronze, copper and aluminum products in the United States.

ATLANTA (JAN. 16) PR NEWSWIRE - Bank South Corp. (NASDAQ: BKSO), a $5.1 billion-asset, Atlanta-based multi-bank holding company, and Metro Bancorp Inc., a $170 million-asset bank holding company in Douglasville, Ga., announced today an agreement for Bank South to merge with Metro Bancorp Inc.

Metro Bancorp Inc. owns 100 percent of The Commercial Bank, which has 11 offices in Douglasville and Lithia Springs, Ga. The Commercial Bank has a 32 percent market share in Douglas County -- larger than any other financial institution.

The merger must be approved by shareholders of Metro Bancorp Inc., as well as regulatory authorities, and is expected to be completed during the second quarter of 1990. Terms of the agreement were not disclosed.

The agreement was announced today by Robert P. Guyton, president and chief executive officer of Bank South Corp., and Robert R. Pope, chairman of the board of Metro Bancorp Inc.

Said Guyton: "We are very pleased to enhance our presence in metropolitan Atlanta by merging with Metro Bancorp Inc. The Commercial Bank is a high-quality financial institution and premier corporate citizen in Douglas County. We have a high regard for the management and directors of Metro Bancorp, and share their philosophies of superior customer service and community involvement. We look forward to working with them to continue and build on this outstanding reputation."

Said Pope: "We have enjoyed a correspondent banking relationship with Bank South, so we know the bank and its people well. This merger will allow us to provide increasing levels of products, services and loan commitments which are being required in Douglas County due to its dynamic growth. We will also benefit greatly from Bank South's leadership in the field of

supermarket banking."

Bank South is a national leader in the field of supermarket banking, with 40 offices inside supermarkets -- primarily Kroger stores throughout metropolitan Atlanta. The Commercial Bank has six offices inside the stores of Kroger, Winn-Dixie and Ingles companies.

Douglas County is 17th out of 159 Georgia counties in population with 74,647 residents. The population is expected to grow by 43 percent between 1990 and 2000. The county is ranked seventh in Georgia in terms of median household effective buying income, and 16th in total effective buying income. Per capita income is 18th highest in the state. Douglas County's Master Economic Rank, which is determined by personal income, sales tax receipts, motor vehicle tags, and assessed property value, is also 18th in the state.

The Commercial Bank was established in 1928 and has built and maintained strong financial performance and a leading market share in Douglas County. As of Sept. 30, 1989, total assets were $170 million and total deposits were $155 million.

Bank South Corp. is a $5.1 billion-asset, multi-bank holding company with 135 offices throughout Georgia and Pensacola, Fla. Bank South achieved record earnings of $48.1 million in 1989.

LAFOX, IL (JAN. 16) PR NEWSWIRE - Richardson Electronics (NASDAQ: RELL) today announced that its board of directors voted to declare a cash dividend for the third quarter to all holders of common stock.

A cash dividend of $.04 per share will be payable March 15, 1990, to all stockholders of record Feb. 21. The company currently has 7,900,206 shares of common stock outstanding.

The board also reconfirmed approval of the company's stock repurchase program. Management is authorized to repurchase up to 1 million shares of outstanding common stock and convertible debentures on the open market or in privately negotiated transactions. To date, 100,000 shares of common stock have been repurchased.

Richardson Electronics Ltd., traded on NASDAQ, is a leading international supplier of electron tubes and power semiconductors with 19 offices worldwide.

DALLAS (JAN. 16) PR NEWSWIRE - Elcor Corp. (NYSE: ELK) today reported higher sales and earnings for its seasonally slower second quarter ending Dec. 31, 1989.

Roy E. Campbell, president, said, "Record shipments and improved prices for our premium laminated fiberglass asphalt shingles were primarily responsible for a 93 percent increase in second-quarter earnings before extraordinary item compared to the year-ago quarter. Higher sales of concrete roof tile and solid waste baling and recycling equipment also contributed to the overall increase in sales.

"Looking ahead to our third quarter ending March 31, 1990, continued strength in the premium shingle market could result in a good level of earnings for our seasonally slowest quarter, which had a loss of $1,523,000, or $.22 per share, last year."

For the second quarter ending Dec. 31, 1989, income before extraordinary item increased to $747,000, or $.11 per share, from $388,000, or 6 cents per share, and net income of $1,132,000, or 16 cents per share, was up from $388,000, or 6 cents per share, last year. Net income this year included a tax loss carryforward extraordinary item of $385,000, or 5 cents per share. Second quarter sales rose to $37,496,000 from $35,005,000.

For the first half ending Dec. 31, 1989, income before extraordinary item increased 56 percent to $2,944,000, or 42 cents per share, and net income rose to $4,460,000, or 63 cents per share, from $1,892,000, or 27 cents per share, last year. Net income this year included a tax loss carryforward extraordinary item of $1,516,000, or 21 cents per share. Sales grew to $80,939,000 from $74,064,000 in the year-ago period.

Campbell said, "Cash flow from operations enabled Elcor to reduce long-term debt by $3 million in the second quarter to $33.5 million from $36.5 million at Sept. 30, 1989, and by $6.5 million in the first half from $40 million at June 30, 1989. The outlook is favorable for further improvement in our financial position as operating results improve."

NEW YORK (JAN. 16) PR NEWSWIRE - VNU Business Information Services Inc.

(VNU) announced today that its subsidiaries Interactive Market Systems Inc. (IMS) and IMS/Agency Information Services (IMS/AIS) will be consolidated.

The company will retain the name Interactive Market Systems. Bev Andal, president of IMS, has been appointed president of the consolidated company.

Neil Klar, formerly president of IMS/AIS has been named senior vice president, VNU, and will be responsible for corporate business development in the Marketing Information Services Group.

IMS, the leader in media planning systems for the advertising industry since 1969, has over three hundred agency clients including 35 of the top 50. IMS/AIS offers advertising agencies and media buying services the completely integrated suite of pre-buy, media buying and administrative systems (Adserve).

Commenting on the decision, Peter P. Tordoir, executive vice president of VNU, said: "The consolidation of IMS and IMS/AIS is in line with VNU's commitment to move from a product to a market focus. It will allow us to more efficiently meet an agency's data and systems needs. In addition, this change allows us to take advantage of Neil Klar's broad experience to coordinate business development activities among our Marketing Information Services Companies."

"Over the past two years, IMS and AIS clients have seen real advancements in cost-effective, quality solutions to agency data analysis needs. The new IMS will build on this solid foundation," added Bev Andal. "IMS clients can now consider integrating the sophisticated Adserve buying and administrative product, while AIS clients can link to IMS' state-of-the-art planning systems. All will derive the obvious benefits of dealing with a single vendor."

VNU has been active in the business information services industry since 1981. It is the American subsidiary of Verenigde Nederlandse Uitgeversbedrijven B.V. (United Dutch Publishing Companies) -- the largest publisher in the Netherlands and among the 10 largest in Europe.

#90016p0370 01/16/1990 ~PR Newswire

PHOENIXVILLE, PA (JAN. 16) PR NEWSWIRE - The West Co. Inc. (NYSE: WST) announced today that its board of directors adopted a Shareholder Rights

Plan.

The company said each Right will entitle shareholders of record on Feb. 6, 1990, to buy one one-thousandth of a share of the company's newly established series of preferred stock at an exercise price of $75. The Rights will be exercisable if a person or group acquires 15 percent or more of West or announces a tender offer which would result in ownership of 18 percent or more of the company.

Initially, the Rights will be represented by the existing certificates of common stock and will trade with the common stock. If and when the Rights become exercisable, they will trade separately. These Rights will expire on Jan. 15, 2000, unless they are earlier redeemed by the company.

Rene L. Guerster, president and chief executive officer, said, "The Rights Plan is being adopted in order to enhance the ability of the board to protect the interests of our shareholders and not in response to any specific effort to acquire control of the company. We consider these Rights to be one of the best available means of protecting our shareholders' right to retain their equity investment in West and their right to obtain the full value of that investment, while not precluding a fair acquisition bid for the company. A summary of the Rights Plan will be sent to all shareholders."

The West Co. Inc. is the world's largest manufacturer of specialized packaging systems and components for the pharmaceutical, medical device and consumer products industries, with more than 85 percent of its revenue generated by the health care markets. West's products include stoppers, closures, containers, medical device components and assemblies made from elastomers, metal, plastic, glass and combinations thereof, plus related packaging machinery.

NASHUA, NH (JAN. 16) PR NEWSWIRE - H. Gilbert Mahan has elected to retire from the board of directors of NFS Financial Corp. and its wholly owned subsidiary, NFS Savings Bank, effective Jan. 11, 1990, according to an announcement by NFS CEO James H. Adams.

A former director and corporate secretary of Edgcomb Metals, Inc., Mahan joined the board of NFS Savings Bank in 1978 and the board of the holding company at its formation in August, 1986.

His retirement was accompanied by a gift of appreciation from NFS. "We

will all miss the fine dedication and the many contributions 'Gib' has made over the years, and we wish him the very best in the future," said Adams.

The company said it will fill the board vacancy created by Mahan's retirement.

NEW YORK (JAN. 16) PR NEWSWIRE - Bristol-Myers Squibb Company (NYSE: BMY) today announced the appointment of Anthony W. Ruggiero as senior vice president and controller of Bristol-Myers Squibb Company.

In his new position, Ruggiero is responsible for the company's controllership and information services areas as well as for the company's tax matters.

Ruggiero had been senior vice president and chief financial officer of Squibb Corporation since 1983 and was a director of Squibb from 1984 until Squibb Corporation merged with Bristol-Myers Company in October, 1989. He joined Squibb in 1969 and, over a twenty year period, held progressively more responsible positions in a broad range of financial activities.

Ruggiero received a Bachelor of Science degree in Economics from Fordham University and a Masters of Business Administration from Columbia University. He received a post master certificate in accounting from Iona College.

#90016p0379 01/16/1990 ~PR Newswire

MONROEVILLE, PA (JAN. 16) PR NEWSWIRE - Community Bancorp Inc. (NASDAQ: CBPA) announced today that it had net income of approximately $344,000 or $.23 per share for the quarter ended Dec. 31, 1989, compared to approximately $306,000 or $.20 per share for the quarter ended Dec. 31, 1988.

Kenneth J. Tyson, president of Community Bancorp, stated that the increase in net income was due to a $127,000 or 37.1 percent increase in total other income. The increase in other income was primarily due to gains of $205,000 being recorded on the sale of loans and securities during the quarter ended Dec. 31, 1989, as compared to $65,000 during the December 1988 quarter.

Tyson stated that approximately $178,000 of these gains resulted from the sale of a portion of the association's Federal Home Loan Mortgage Corp. (FHLMC) stock in conjunction with a balance sheet restructuring plan. Under this plan, approximately $29.4 million of fixed rate mortgage-backed securities with interest rates of 9.00 percent and less were sold on Dec. 8, 1989. These assets had been classified as held for sale at Sept. 30, 1989 and recorded at the lower of cost or market. This had resulted in a loss of $125,000 being recognized at Sept. 30, 1989. The sale of the FHLMC stock was to offset that loss. Tyson further stated that the proceeds from the sale will be invested in short-term liquidity instruments and adjustable rate instruments in order to further the goal of minimizing the potential for adverse effects on the association's results of operations due to material and prolonged increases in interest rates.

In addition, at Dec. 31, 1989, the association had 15,812 shares of FHLMC stock with an unrealized appreciation of $859,778. These shares are currently classified as held for sale.

The increase in total other income was partially offset by a $61,000 or 3.4 percent decline in net interest income after provision for loan losses during the Dec. 31, 1989 quarter compared to the Dec. 31, 1988 quarter. This decrease was primarily due to a decline in the average interest rate spread for the quarter ended Dec. 31, 1989 as compared to the quarter ended Dec. 31, 1988.

The association operates through 12 offices in the greater Pittsburgh metropolitan area, and at Dec. 31, 1989, the association's capital exceeded all three capital requirements. Community Bancorp's common stock is quoted on the NASDAQ National Market System under the symbol "CBPA."

#90016p0384 01/16/1990 ~PR Newswire

DALLAS (JAN. 16) PR NEWSWIRE - LTV Missiles and Electronics Group announced today that its Missiles Division has received a $2.6 million increment for rocket research and development as part of a $25.5 million modification contract from the U.S. Army Missile Command.

The cost-plus-incentive-fee contract will fund research and development activities for integration of the Terminal Guidance Warhead with LTV's Multiple Launch Rocket System (MLRS).

The new warhead, known by the acronym TGW, now under development, consists of three terminally guided anti-tank submissiles packaged within the warhead of the MLRS rocket. Once ejected from the warhead each submunition independently searches for, acquires, tracks and engages the target in a top attack mode.

MLRS TGW is managed by an international joint venture called MDTT Inc. consisting of Martin Marietta Corp., Diehl GmbH, Thompson-CSF and THORN EMI Electronics Ltd. Martin Marietta is responsible for developing radar algorithms and for integration, assembly and testing of the overall system.

MLRS is a highly mobile rocket system that, with a crew of three, can accurately shoot a complete 12-rocket load, quickly reload and fire again.

TGW is one of several warheads planned for MLRS adaptation in addition to the current M77 warhead, which contains 644 dual purpose bomblets per rocket. Now under development are the AT-2, which dispenses 28 anti-tank mines per rocket and the Sense and Destroy Armor warhead that dispenses six anti-armor munitions per rocket.

The MLRS launcher is also capable of launching the Army Tactical Missile System, a long-range, guided missile currently in low-rate production.

The Missiles Division manufactures missiles, rockets and space systems and is involved in a wide variety of advanced technology research and applications. It is one of three divisions of LTV Missiles and Electronics Group which also produces electronics, avionics and military vehicles.

DURHAM, N.C. (JAN. 16) PR NEWSWIRE - In 1989, CCB Financial Corporation (NASDAQ-NMS: CCBF) posted record earnings. Net income per share on a fully diluted basis was $3.95 compared to $3.74 in 1988 and primary income per share was $4.17 compared to $3.94. Total assets reached $1,983,812,000 at year-end 1989, a 10.5 percent increase over 1988.

For the fourth quarter of 1989 and 1988, fully diluted income per share was $.96 and $.97, respectively. Primary income per share was $1.01 and $1.02. Net income increased slightly in the fourth quarter of 1989 compared to 1988, but the number of shares outstanding increased at a faster rate.

Return on assets for 1989 was 1.13 percent and return on equity was 15.77 percent which compare favorably with the banking industry and to our North Carolina peer banks according to E.C. Roessler, Executive Vice President of CCB Financial Corporation.

Roessler also stated, "Our capital strength remained high while liquidity and earnings improved throughout the year. Loan demand improved in the fourth quarter compared to earlier quarters, but the loan loss provision increased based on this growth and because of higher than normal loan losses."

Additionally, the Board of Directors of CCB declared a regular quarterly dividend of $.36 per share payable April 2, 1990 to shareholders of record March 15, 1990.

EATONTOWN, N.J. (JAN. 16) PR NEWSWIRE - Syntrex Inc. (NASDAQ: STRX) reported revenues during the fourth quarter were $11,076,570, compared to $14,633,425 for the same period in 1988. Syntrex posted a net loss of $1,188,033, or $.16 per share for the quarter ended Oct. 27, 1989, compared to $323,054, or $.04 per share for the same period last year.

For the fiscal year ended Oct. 28, 1989, Syntrex's revenues were $43,719,216, versus revenues of $57,015,060 in fiscal 1988. The company posted a net loss of $6,605,516, or $.89 per share for the fiscal year ended Oct. 27, 1989, compared to a net loss of $5,418,127, or $.73 per share for the same period last year. The transition of the company from supplying proprietary products for the office to supplying industry standard products and networking was completed this year. Almost all product revenues were derived from non-proprietary products.

Although expenses in all areas were significantly reduced during the year, profitability could not be attained as fixed expenses could not be supported by lower than planned revenue levels and less than anticipated profit margin due to increased competition and pricing pressure.

On Jan. 10, 1990, Syntrex issued a press release announcing the signing of a definitive purchase agreement with Harris Corporation, Melbourne, Fla., to acquire substantially all of the assets and liabilities of Lanier Business Systems, a unit of Harris' Lanier Worldwide subsidiary.

#90016p0390 01/16/1990 ~PR Newswire

TULSA, OK (JAN. 16) PR NEWSWIRE - Williams Telecommunications Group's (WilTel) private network customers were unaffected by systems problems that afflicted AT&T's network on Monday, the company said today.

Because WilTel offers customers fully dedicated private network facilities they are not vulnerable to such problems that can disrupt public network operations.

WilTel, which owns the nation's fourth largest fiber-optic network, had no service interruptions during what AT&T said was an unprecedented nationwide outage.

The nationwide problem "may hasten the development of private networks as a better alternative and accelerate the ongoing evolution toward private networks," said Russ Ray, vice president of engineering for WilTel.

Airlines and hotel reservation operations that rely on AT&T long- distance and 800 service reported huge reductions in call volume during the nine-hour outage, which AT&T reported was remedied about midnight Monday.

An AT&T spokesman said hundreds of company employees around the country worked to diagnose and correct the problem, which apparently affected dozens of the company's switching centers nationwide.

Ray said WilTel's private line offerings do not require switching centers because WilTel circuits directly connect a company's remote facilities in different locations by dedicated circuits.

Customers are increasingly concerned about single points of failure within a network, Ray said.

"Every time you add equipment into a network, you've added another point of potential failure," Ray said. "With increasing complexity comes increased risk."

He said private lines are both a simple and elegant solution because they offer companies a more secure and redundant communications system.

Private lines can be tailored to fit customers' communications needs, with capacity for huge volumes of voice and data transfer between discrete locations nationwide.

Williams Telecommunications Group is an operating company of The Williams Cos. Inc. (NYSE: WMB), a Tulsa-based, $3.8 billion energy transportation and digital telecommunications corporation.

HOLLYWOOD, CA (JAN. 16) PR NEWSWIRE - Explosions of pyrotechnics, dancers motorcycles and videos accompanied Earvin "Magic" Johnson today as he announced a joint business venture with Converse Inc., and unveiled a new collection of athletic shoes and apparel called simply, "Magic by Converse."

The grand style production held at The Palace in Hollywood highlighted a complete array of merchandise that is sure to have Magic Johnson fans storming stores one the items are delivered to retail in June. The new collection includes a variety of soft, lightweight leather shoes with bold graphics and innovative materials for performance and casual use. In addition, the clothing includes an assortment of uniquely styled jackets, sweatsuits, t-shirts and shorts, designed to add spark and flair to every-day wear.

The shoes and apparel are designed for the fashion conscious male. The products have been developed to provide superior comfort and style, without asking consumers to break the bank. The entire array of shoes are reasonably priced at retail between $60.00 to $75.00, and $20.00 to $70.00 for the clothing, with the exception of a fashionable nylon/suede jacket at $150.00.

"I am excited about this new business with Converse," said Johnson. "I've been endorsing the company's products for several years and am thrilled to have my own complete collection of shoes and clothing. I have and will continue to be very active in developing, marketing and and selling the line, almost as if it were by first business venture after basketball."

Converse has been developing the collection for several months and decided the best marketing approach would be to emphasize Magic's outgoing and charismatic personality.

"Everyone is well aware of Magic's exceptional performance on the court," said Converse President Gib Ford. "People are now getting to know the man behind all those amazing moves and startling statistics, and have fallen in love with Magic himself."

Off the court, Magic Johnson is every bit the respected and revered individual he is during the toughest of competitions. His bright smile, his charisma and his enthusiasm for a positive life is manifest in his charity work and his day-to-day energy. This new collection capitalizes on the fact that Magic's worldwide appeal is enhanced by his generous and inspiring personality. This, more than his expertise on the court, is the emphasis of "Magic by Converse."

The advertising will feature Magic off the court relaxing and enjoying the casual life in L.A., as well as on the court thrilling the crowds. The television commercial will break during the NBA All Star Game and will run on national programming. Print and radio advertising, billboards and point-of-purchase materials, including a life-size Magic display, wall banners, counter cards and new packaging will all support the collection.

Converse, Inc., a wholly owned subsidiary of Interco Inc., a St. Louis, Mo. based conglomerate, is the largest U.S. manufacturer of athletic footwear.

CALGARY, Alberta (JAN. 16) PR NEWSWIRE - Shell Canada Ltd. (Toronto: SHC) and Canadian Western Natural Gas Co. Ltd. today announced the signing of a major agreement committing approximately one trillion cubic feet of natural gas reserves from the Jumping Pound Complex to Canadian Western Natural Gas. The agreement will represent annual sales of 46 billion cubic feet (1300 10 6M3) of natural gas, or the equivalent gas to heat approximately 280,000 Alberta households per year.

PanCanadian Petroleum Ltd. and Home Oil Co. Ltd. have working interests in the agreement, with approximately 18 percent of the overall supply.

This agreement means that a significant portion of the production of the Jumping Pound Complex, located 30 kilometers west of Calgary, will be exclusively sold to Canadian Western to help meet the needs of southern Alberta's households and industries. The agreement assures southern Albertans a proven and secure source of natural gas for many years to come.

Deliveries from Shell's Jumping Pound Complex began in 1952, and it continues to be one of the most reliable plants in Alberta. Since its inception the Complex has been a major supplier of natural gas to Canadian Western, having delivered approximately 1.3 trillion cubic feet to date.

Canadian Western provides natural gas service to 300,000 customers in Calgary, Lethbridge and 113 other communities in Southern Alberta. Canadian Western is a subsidiary of Canadian Utilities Limited, an ATCO company.

CONTACT: Brent Shervey, 403-232-2065, of Shell Canada Limited, Gene Zadvorny, 403-245-7605, or Sam McBride, 403-245-7612, both of Canadian Western Natural Gas Co. Ltd.

LARGO, FL (JAN. 16) PR NEWSWIRE - The supervisory board of Nokia Corp. accepted a motion by CEO Simo Vuorilehto to appoint Kalle Isokallio (41) deputy chief executive officer of Nokia Corp. and vice chairman of the board of directors it was announced today.

Vuorilehto, chairman of Nokia's board of directors, will continue as Nokia's CEO until the end of 1993, in accordance with stupulations made at the time of his appointment.

Isokallio joined Nokia in 1981 as president of the company's Swedish subsidiary, Kabmatik. He was general manager of Nokia Cable Machinery from 1983 to 1985, when he was appointed head of Nokia Information Systems. When Nokia Information Systems and Ericsson Data Division were combined to create Nokia Data, he was appointed its executive president, his most recent position.

The Helsinki-based Nokia has its North American cellular telephone operations -- Nokia-Mobira Inc. -- in Largo. The U.S. company also covers a wide range of other U.S. activities including paging products and services, industrial machinery, industrial rubber and basic consumer goods.

IRVINE, CA (JAN. 16) PR NEWSWIRE - Technology Marketing Inc. (NASDAQ: TMKT) today announced the financial results for the third quarter of fiscal year 1990. Revenues in the third quarter ended Nov. 30, 1989 were $1,454,658, resulting in a net loss of $644,041. This compares with revenues of $2,585,455 and a net profit of $269,330 for the same period a year ago. Net loss per share for the current quarter was $.21 versus a net profit of $.09 for the same quarter a year ago.

For the nine month period ended Nov. 30, 1989, TMI recorded a net loss of $379,900 on revenues of $6,081,159. This compares with a net profit of $894,675 on revenues of $8,737,392 for the same period last year. Net loss per share for the nine months ended Nov. 30, 1989 was $.13, compared to net income of $.30 per share for the period ended Nov. 30, 1988.

"The orders which were expected to be placed during the third quarter are now expected to be placed during the fourth quarter. Sales during the fourth quarter are expected to exceed Q-3 sales," stated John S. Kerr, the company's new chief executive officer.

"Management changes were made in November and December, 1989 which included a new president and new director of marketing and sales. Two important activities, a reduction in expenses and an increase in sales support, have been initiated.

"Increased responsiveness to the customer's needs both for TMI's standard 407 and 427 testers, and for new configuration testers to meet the changing customer's needs, are expected to reverse the downward trend in sales. This in spite of the fact the market for TMI testers continues to soften and used equipment dealers are introducing some used models into the marketplace. In addition, opportunities for TMI's Product Support service will be sought.

"TMI continues to seek acquisition candidates to broaden its tester product lines and its customer base," said Kerr.

Technology Marketing Inc., headquartered in Irvine, Calif., is comprised of the Advanced Systems Development group, a design center for development of computer-based high technology products; the Magnetic Certification Products group (formerly TestMaster), specializing in proprietary products using the IBM 3480 1/2" magnetic tape cartridge drives; and the Electronic Test Products group (formerly MacroTest), a supplier of memory/logic board testers used by electronic manufacturers worldwide.

#90016p0429 01/16/1990 ~PR Newswire

ROCKAWAY, N.J. (JAN. 16) PR NEWSWIRE - Osicom Technologies, Inc. (NASDAQ: OSIC), a manufacturer and distributor of computer systems and components, said net losses for the quarter ended Oct. 31, 1989 dropped to $375,350, or 12 cents a share, from $1,988,114, or 64 cents a share, in the comparable period a year ago.

Net sales were $21,073,085 vs. $31,108,176 in the comparable year ago period, a decline of 32 percent.

The results reflect a strategic decision to increase sales of higher margin manufactured systems and lower those of high volume components that carry low margins.

Because of this, gross profit rose dramatically from $820,037 in the year ago quarter to $2,141,689, a gain of 161 percent. Gross margin for the period was 10.2 percent vs. 2.6 percent in last year's comparable quarter.

Broad cost cutting to facilitate the change in product mix lowered general

and administrative expenses 32 percent from $3,195,117 to $2,157,844. Headcount was trimmed 37 percent from 221 at Oct. 31, 1988 to 140, and the company phased out its California sales and stocking facility.

Parvinder S. Chadha, CEO, said preliminary results of the fourth fiscal quarter, which ends Jan. 31, show continuing improvement in margins. The company expects to take a one-time restructuring charge in the quarter related to consolidation of European operations.

"As soon as fiscal 1990 is behind us, we expect to return to profitability with a stronger position in manufactured systems and less revenue dependence on the low margin component segment," he said.

For the nine months ended Oct. 31, 1989, sales totaled $66,417,130, a 16 percent decline from $78,956,585 in the comparable year ago period. The nine month net loss totaled $2,629,262, or 85 cents a share, vs. $1,518,316, or 49 cents a share, a year ago.

Separately, Osicom said Herbert Engelhardt, 63, was elected to its board. Engelhardt served as a vice president of corporate finance of Lazard Freres & Co. and then went on to serve in chief executive posts at Polycast Technology Corporation and Beck Industries. He received an A.B. and M.B.A. from Harvard University.

GREENWICH, CT (JAN. 16) PR NEWSWIRE - American Ventures Inc. (AVI) (OTC "Pink Sheets") announced today it has completed the previously announced acquisition of Pennsylvania Rolling Mills Inc. (PRM) with the result that PRM is now a wholly owned subsidiary of AVI.

PRM is a rolling mill located in New Castle, Pa., with 60 employees. PRM owns approximately 110,000 square feet of production and office space comprised of three buildings, which, together with its machinery and equipment, has an appraised liquidation value of over $8 million.

The plant has an annual rolling capacity of high carbon steel of approximately 36,000 tons which would result in annual sales of up to $25 million, or approximately 84,000 tons of low carbon steel which would result in annual sales of up to $42 million. Different margins on high and low carbon steel make the anticipated profits about the same at these different sales volumes.

Based on current order quotation and inquiry activity, management anticipates that the plant will process a combination of high and low carbon steel, as well as some galvanized steel, which should result in sales in 1990 of $20 million and in 1991 of $30 million to $35 million. Also, PRM has been receiving an increasing number of orders for conversion work and process annealing, which could result in even higher revenues than those indicated above. Production at these levels are expected to generate significant profits.

Prior to being acquired by AVI, PRM had insufficient working capital and little or no trade credit, thereby hindering its acquisition of sufficient raw material. PRM was therefore forced to finance its operations through third parties, primarily Mitsui & Co. (USA) since last spring, which reduced PRM to a tolling- operation with little or no inventory of its own.

In recent weeks, as Mitsui's involvement has lessened, AVI/PRM has been able to obtain substantial trade credit in the steel markets to finance the purchase of raw material. AVI/PRM will ultimately require $5 million to $6 million in inventory financing, and AVI's management feels that such financing will gradually be made available to PRM through a combination of trade credits, new equity (private placements and exercise of outstanding warrants) and more traditional bank financing.

AVI expects to finalize the previously announced acquisition of Wallason Steel Inc. (Wallason) and its affiliate, Heritage Steel, before Feb. 28, 1990. These two entities had combined sales of over $4 million in 1989, and it is AVI's opinion that with proper financing these sales can be increased to about $10 million (exclusive of PRM-sales).

Wallason, which has been acting as PRM's sales force, has already contributed considerably towards bringing new orders and diversification to PRM. Wallason and Heritage together have a total of 10 employees.

#90016p0438 01/16/1990 ~PR Newswire

NEW YORK (JAN. 16) PR NEWSWIRE - AT&T confirmed late today that software in processors associated with its signalling system was the cause of the nine-hour service impairment Monday, Jan. 15.

The company had indicated earlier in the day that it had suspected a software glitch in the processors. It then replicated at AT&T Bell Labs what it believed occurred and confirmed earlier suspicions.

AT&T said that identical software is loaded in signalling processors located at each of its 114 4ESS digital switching systems throughout the country. The problem could have been triggered at any one of the sites. It was actually triggered when a New York City switching system, in totally unrelated events, caused the signalling processor to fault, loading the signalling network with control messages. These messages were of such character that they triggered the fault in the other processors, thus impairing network performance.

AT&T Bell Labs and the company's network engineers have contained the problem and now are in the process of correcting it, which could take several days. The network is performing normally during this correction process.

The problem resulted from a logic error in the AT&T developed software that is an integral part of the signalling system processor.

ALBANY, OR (JAN. 16) PR NEWSWIRE - Synthetech Inc. (NASDAQ: NZYM) today announced Paul Ahrens, a company founder and director, has been named

president and chief executive officer, succeeding Michael Mitton who has held the posts since 1983. Mitton will continue to serve on Synthetech's board of directors and was named chairman. Ahrens was previously vice-president of Technology. M. Sreenivasan, executive vice-president and general manager, was named chief operating officer, a new position. Charles Williams, who has been serving as the company's controller, was named vice-president of Finance and Administration, a new position. Dr. Philip Knutson will continue as vice-president of Research.

"Mr. Mitton has overseen the development and transition of the company from the start-up phase to a profitable fine chemical producer," said Ahrens. "In addition to pursuing outside interests, he will continue to devote his efforts to the company's communications with the financial and investment community."

Synthetech is a biotechnology-based fine chemicals company concentrating on the manufacture and sale of peptide building blocks and other optically active chemicals. The company posted a profit for the quarter ended Sept. 30, 1989, of $75,825 (after a provision for income taxes) on revenues of $402,595. Revenues for the six months ended Sept. 30 were $894,920 with profits $245,259 (2 cents per share, unaudited).

#90016p0448 01/16/1990 ~PR Newswire

ROCKY MOUNT, NC (JAN. 16) PR NEWSWIRE - Peoples Bancorporation (AMEX: PBK) and The Planters Corp. (NASDAQ: PNBT) have agreed to merge into a new company called Centura Banks Inc., which will have total assets in excess of $2.5 billion. The new company will have more than 140 offices throughout North Carolina -- from Kitty Hawk to Boone.

The new name, Centura, is derived from the Latin term centuria and its derivatives centurion, which means protector, and century, meaning 100 years.

The new company will maintain its headquarters in Rocky Mount, which has been home to Peoples and Planters for a combined 150 years. Both chairmen stressed Centura will continue to support Rocky Mount and the other communities it will serve.

Under the definitive agreement, which was approved late today by the boards of directors of both companies, each Planters and Peoples shareholder will receive one share in the new company for each share of Peoples or Planters common stock held on the closing date. The exchange is expected to be tax-free for stockholders and will be accounted for as a pooling of interests. Based on the closing stock price of both companies

on Jan. 12, 1990, Centura would have a pro forma market capitalization of approximately $201 million.

The agreement requires approval by shareholders of both companies and federal and state regulatory authorities. The merger is expected to be completed by the fourth quarter of 1990.

Each company has granted the other an option to purchase up to 19.9 percent of the other's outstanding common stock if certain events occur.

The companies' combined trust operations will have approximately $500 million in assets, considerably strengthening the new organization's ability to market trust and fiduciary services.

The First Boston Corporation has acted as financial adviser to Planters and has rendered a fairness opinion on the share exchange ratio for Planters shareholders. Alex. Brown & Sons Inc. has acted as financial adviser to Peoples and has rendered a fairness opinion on the share exchange ratio for Peoples shareholders.

Peoples is the ninth largest bank holding company in North Carolina with total assets at year-end 1989 of $1.3 billion. Its subsidiaries, Peoples Bank and Trust, Peoples Bank of the Triad and Mid-South Bank and Trust, have 75 offices in North Carolina.

Planters is the 10th largest bank holding company in North Carolina with total assets at year-end 1989 of $1.2 billion. Its sole subsidiary, Planters National Bank and Trust, has 64 offices in North Carolina.

Centura Banks Inc. will be the eighth largest bank holding company in the state.

#90016u0173 01/16/1990 ~United Press International
(JAN. 16) UPI - The Boston Bruins convinced their coach Mike Milbury to stick around this time.

Ray Bourque scored twice and Andy Moog stopped 33 shots Monday night, leading the Bruins to a 4-1 victory over the Hartford Whalers.

''I loved it,'' said Milbury, who left the bench Saturday to watch the third period of Boston's 3-2 loss to the New York Rangers from the radio booth. ''I haven't enjoyed a win more than this at home this season.

''Hartford came in here and beat us two times and they haven't showed us any respect. We wanted to establish some respect. I thoroughly enjoyed the hockey game.''

The victory was Boston's 10th in 12 games and improved the Bruins' point total to 57, best in the NHL. Hartford, which entered with the league's best road record, lost its first game in Boston after winning the first two matches between the teams this season.

Craig Janney collected a loose puck at the left side of the Hartford net and slipped a perfect pass out front to Neely, who redirected a shot by goalie Peter Sidorkiewicz for his team-leading 32nd goal of the season.

The Bruins, who posted their seventh victory in their last eight home contests, increased their lead to 3-1 on Randy Burridge's power-play goal 6:02 into the final period.

Bourque, who scored the Bruins' first goal, added an empty-net score on a 170-foot shot with seven seconds left.

The Whalers's only score came on a goal by Ray Ferraro 9:37 into the opening period.

--- AROUND THE NHL ---

Elsewhere in the NHL, Montreal nipped Minnesota 4-3 and Toronto outgunned Chicago 7-6.

Canadiens 4, North Stars 3

At Montreal, Todd Ewen scored his first goal of the season to lift the Canadiens. Ewen, aquired Dec. 12 from St. Louis, knocked in a rolling puck after Brian Skrudland's shot bounced off Minnesota defenseman Larry Murphy. Minnesota, 0-6-1 in its last seven road games, has not won away from home since a victory at Toronto Dec. 16.

Maple Leafs 7, Blackhawks 6

At Toronto, Wendel Clark broke a tie with a goal at 13:45 of the third period to launch the Maple Leafs. Vince Damphousse's slap shot was stopped by goaltender Jacques Cloutier but Clark, positioned next to the net,

jarred the puck loose and poked it past Cloutier for the winning score.

#90016u0191 01/16/1990 ~United Press International

(JAN. 16) UPI - The NBA's top scorer failed to lead his team to victory, so one of the league's 3-point sharpshooters accomplished the task.

With the score tied 106-106, Michael Jordan, entering Monday's game with a 32.9 scoring average, missed a 3-point shot with five seconds left. With one-tenth of a second remaining, Trent Tucker, seventh in the league in 3-point shooting, connected on a 26-foot basket to lift the Knicks to a 109-106 victory in New York.

''I just threw it up and the Lord answered my prayer,'' said Tucker, who set a Knicks record last season with 118 3-pointers.

Mark Jackson inbounded the ball to Tucker along the right sideline when his original choice, Patrick Ewing, was covered under the basket. Tucker delivered a high-arching shot to provide the Knicks with their third successive victory.

''The play was designed for Patrick (Ewing), we were looking for the lob. But I just kept coming and Mark (Jackson) gave me the ball.''

In the final minute, Jordan committed a turnover when he dribbled the ball off his foot and it bounced out of bounds with 0:47 remaining. The Bulls got the ball back with 21 seconds left but Jordan missed the shot with five seconds to go and Oakley rebounded for New York.

Jackson was fouled by Scottie Pippen with 0:01 on the clock, but it was not a shooting foul, so the Knicks only got to inbounds the ball.

Bulls Coach Phil Jackson, who played 11 seasons with the Knicks, could not believe that Tucker could get off a shot with less than a second left.

''A second or two, maybe,'' said Jackson, ''but in one-tenth of a second it can not be done. You can not shoot a shot in that time. The officials are still getting adjusted to the tenths of a second.''

The victory gave New York a 17-l record at home while the loss left Chicago 9-12 on the road and broke a modest two-game win streak.

Ewing had 33 points and added 12 rebounds. Charles Oakley and Johnny Newman had 16 points each for New York, with Oakley contributing 11 rebounds.

Jordan led Chicago with 26 points, but had an off-game shooting, hitting 9

of 24 attempts. He was only 3 of 13 at the half.

--- AROUND THE NBA ---

Elsewhere in the NBA, Miami ripped Washington 111-105, Cleveland clipped San Antonio 92-89, Denver downed Dallas 101-90, the Los Angeles Lakers defeated Sacramento 111-91, Indiana routed Golden State 144-105, Seattle held off Houston 105-101 and Phoenix defeated Charlotte 118-108 in overtime.

Heat 111, Bullets 105

At Landover, Md., rookie Glen Rice scored 11 points in the fourth quarter and matched his season-high with 27 points, helping Miami end a 13-game losing streak and win for the first time in seven road games. Washington has lost 11 of 13 games.

Cavaliers 92, Spurs 89

At Richfield, Ohio, Mark Price scored 25 points and registered his first career triple-double to help Cleveland past San Antonio. Price passed for 12 assists and pulled down 11 rebounds. He also made 6 3-pointers as the Cavaliers set a team record with 10 3-point shots.

Nuggets 101, Mavericks 90

At Denver, Alex English scored a season-high 29 points, including 10 in the first five minutes of the game. Blair Rasmussen added 20 for Denver. Derek Harper scored 26 points for Dallas, losers of four straight games.

Lakers 111, Kings 91

At Inglewood, Calif., A.C. Green and Vlade Divac scored 25 points each to help the Lakers past Sacramento, losers of three straight games. Magic Johnson added 17 points and James Worthy 14 for the Lakers. Kenny Smith paced the Kings with 20 points.

Pacers 144, Warriors 105

At Indianapolis, Detlef Schrempf and Chuck Person each scored 24 points, leading seven Indiana players in double figures. The Pacers led 44-28 after one quarter and 86-48 at halftime, setting team records for first-quarter points, second-quarter points and scoring in a half. Golden State lost its sixth straight game.

Sonics 105, Rockets 101

At Seattle, Xavier McDaniel scored 25 points and Sedale Threatt added 21

to help Seattle extend its home winning streak to five games. Mitchell Wiggins, playing his third game since coming off the injured list, led Houston with 23 points.

Suns 118, Hornets 108, OT

At Phoenix, Tom Chambers scored 40 points and Kevin Johnson added 23, including 6 in overtime, to lead Phoenix over Charlotte. Johnson, who added 11 assists, hit a driving layup to open the extra period then added two free throws to put the Suns ahead 110-106.

#90016u0218 01/16/1990 ~United Press International

(JAN. 16) UPI - Officials in Costa Rica now say all were killed in Monday's crash of a twin-engine plane in the rugged mountains outside the capital. Government rescue teams reached the remote crash site well after dark and found NO survivors. It appears the plane crashed at full speed into the mountainside. At least one American and seven Canadians were among the 23 people aboard the plane.

The astronauts aboard the shuttle Columbia have been awakened for their eighth day in orbit. The crew awoke late Monday night after being rewarded with an extra half-hour of sleep following a busy day spent catching up on a variety of experiments. Before turning in earlier Monday, the astronauts checked a navigational aid that sounded a false alarm and wrapped a makeshift diaper around a leaky humidity unit.

The intermittent eruptions of Alaska's Redoubt Volcano has forced an indefinite shutdown of the Drift River oil storage facility, located only 20 miles from the restless mountain. The last of the oil is to be pumped out later this week. Officials fear a powerful eruption could cause a major oil spill.

A five-year-old Centreville, Virginia, boy is fighting for his life after spending 40 minutes beneath the ice of a storm drainage reservoir. George Sader was listed in very critical condition tonight as doctors took emergency measures to reheat his blood. Doctors say if the boy survives, it'll take up to two days to determine whether he suffered any brain damage.

The veteran British actor renowned for his portrayal of the butler Hudson in the long-running international t-v series ''Upstairs, Downstairs'' is dead. The B-B-C says Gordon Jackson died Sunday following a brief illness. He was 66.

#90016u0266 01/16/1990 ~United Press International

ATLANTIC CITY, NJ (JAN. 16) UPI - Now that George Foreman's comeback has some credibility, his appetite is bigger than ever.

Foreman was supposed to be finished by the time he fought Gerry Cooney Monday night. Foreman's age (41), his questionable opponents (''I've been fighting bean bags too, not just tomato cans,'' he said), and his weight (253 1/4 pounds) all contributed to the belief his career would end.

Two rounds and one knockout later, Foreman will put the hamburgers on hold - but not the fights.

Foreman knocked out Cooney at 1:57 of the second round Monday, running his comeback to 20-0 with 19 knockouts after a 10-year retirement.

''I want to stay active - I'll fight for $1 million and I'll fight for peanuts,'' Foreman said after the bout that paid each fighter $1 million. ''Boxing matches are the only things that keep me out of the hamburger stores. Otherwise, if I don't (box), I'll eat this planet up.''

Instead, Foreman has plans for the heavyweight champion currently making claim to eating up every fighter on the planet - Mike Tyson.

''The Mike Tyson fight will be a special event ... I think the greatest fight of all,'' Foreman said. ''I had a chance to reaquaint myself with the media and I'm going to help him promote it.

''Because Rip Van Winkle came out of his sleep.''

And what the media has discovered is that George Foreman has become loveable, a new dimension to the former champion Foreman now calls ''antisocial.''

In his dressing room after the fight, Foreman said the public will want Foreman-Tyson above all other available heavyweight fights and it will want Foreman to win.

''Everyone needs somebody, not a manager or trainer to say everything's going to be OK.'' Foreman said. ''I think after this fight, I'll have everybody.''

Foreman, a Houston minister, said he chose a country-western song by Lee Greenwood, ''God Bless the U.S.A.'' because the line ''at least I can say I'm free'' is ''my theme.''

Foreman said in addition to having personal meaning for someone who lives in a country that has come to recognize age discrimination, his song choice had a message for the boxing public.

''People forget why we are able to meet together and boo or cheer for whoever we want,'' he said. ''Because we live here. That song was to remind everybody: The things we have in common are more and greater than our differences.''

#90016u0326 01/16/1990 ~United Press International

(JAN. 16) UPI - Officials in Costa Rica say an investigation into

Monday's crash of a twin-engine plane will begin Tuesday, along with the recovery of the bodies of those aboard. All 23 people were killed when the plane... en route from San Jose to Palmar... seemingly crashed head-on into a mountain 20 miles southwest of San Jose. The dead include passengers from the United States, Canada, Panama and Sweden.

A-T-and-T officials say long-distance service is slowly returning to normal, following a computer problem that disrupted calls nationwide. As of Monday evening, about half of all calls attempted were getting through. But just when the problem would be solved is NOT known. A-T-and-T computer experts were working to fix the software glitch that triggered a false circuit overload signal... blocking most customers from phoning out of their local calling areas.

The lawyer representing the wife of a cult leader charged in the ritualistic slayings of an Ohio family has decided to waive extradition. Kay Sunday says Alice Lundgren... who denies any role in the killings... will go to court in San Diego Tuesday to begin the procedure to return her to Lake County, Ohio. Lundgren was arrested along with her husband and 19-year-old son a week ago at a motel in southern California.

U-S investigators in Hawaii are trying to determine what caused a Philippine Air Lines 747 to lose all power over the Pacific Ocean. An airline spokesman says the flight from Manila to San Francisco by way of Honolulu was 135 miles from the Hawaiian city Sunday when all four engines went out. The plane descended 11-thousand-500 feet before the pilot was able to restart the engines. NONE of the 256 people aboard was injured, and the plane landed without incident in Honolulu.

The parents of children who were sexually molested at a Miami day-care center objected to Monday night's airing of a t-v movie about the case. Said the mother of one victim- ''What we thought would be over and done with years ago is still very much with us.'' The docudrama, ''Unspeakable Acts,'' dealt with the trial of a Miami day-care center owner and his wife convicted in one of the country's biggest child abuse cases. The case led to a Florida law protecting the rights of children who testify in child abuse cases.

#90016u0366 01/16/1990 ~United Press International

(JAN. 16) UPI - Whether it is football or basketball, defense is the key to winning in the rugged Big Ten. The Michigan Wolverines proved that Monday night.

The No. 7 Wolverines won for the first time at Illinois since 1979, holding the sixth-ranked Fighting Illini to 41 percent shooting, in a 74-70 Big Ten victory. Michigan ended Illinois' 28-game home winning

streak in the first meeting between the two schools since last year's memorable NCAA tournament semifinal matchup in which the Wolverines won in the final seconds.

Michigan limited Illinois to 29 of 71 field-goal shooting Monday and outrebounded the Illini 41-31.

''I told the kids in the locker room, in my eight years at Michigan, this is the best defense we have played,'' Wolverines Coach Steve Fisher said. ''If you don't defend and rebound, you can't win.

Terry Mills scored 18 points and pulled down 10 rebounds and Sean Higgins added 16 points for the Wolverines, 12-2 and 2-1. Loy Vaught had 14 rebounds.

Stephen Bardo led the Illini, 12-2 and 2-2, with a career-high 20 points and Kendall Gill had 15.

Michigan downed the Illini 83-81 in their Final Four game last year when Higgins buried a jumper in the final seconds. Michigan went on two capture the NCAA title.

Higgins had three 3-pointers in the first half Monday and four for the game.

Michigan never trailed. The Wolverines led 37-33 at halftime and increased their lead to 10 when Demetrius Calip hit two free throws to make it 54-44 with just over 14 minutes remaining.

Illinois closed the gap to 62-60 with 7:51 left and drew withing 71-70 when Gill hit one of two free throws with 33 seconds left, but Vaught hit two free throws and Rumeal Robinson one to ensure the victory.

--- AROUND THE COLLEGE SCENE ---

Elsewhere in the Top Twenty; Connecticut surprised No. 5 Syracuse 70-59; ninth-ranked Nevada-Las Vegas defeated Fresno St. 84-75; No. 18 Xavier of Ohio buried the District of Columbia 110-52; and co.-No. 19 La Salle downed Canisius 89-77.

At Hartford, Conn., Tate George and Chris Smith scored 17 points apiece and Connecticut benefited from another poor Syracuse shooting performance to upset the Orangemen. Syracuse, 12-2 and 4-2, made just 25 of 71 field-goal attempts (35 percent). The Huskies, 14-3 and 4-2, led from the opening minutes, and built a 30-14 lead in the first half. The Orangeman got no closer than four points the rest of the way. The victory was Connecticut's fourth straight in the Big East, only the second time in the league's 11-year existence that the school has won four consecutive

conference games.

At Fresno, Calif., Larry Johnson scored 28 points to lead the Runnin' Rebels to the Big West victory. Johnson hit 11 of 14 shots, including 7 of 7 in the second half. He also grabbed nine rebounds. Tod Bernard led Fresno State with 27 points. Nevada-Las Vegas improved to 11-3 and 5-1 while the Bulldogs dropped to 6-8 and 1-4.

At Cincinnati, Tyrone Hill scored 12 of his game-high 20 points in the first 10 minutes to lead the 18th-ranked Musketeers. The margin of victory was the largest in school history for Xavier, which improved to 12-1. UDC, 9-10, is playing at the Division I level for only the second year.

At Philadelphia, Lionel Simmons scored 27 points and pulled down 11 rebounds to power the Explorers. Simmons scored seven points during a 10-0 run that extended a 43-42 lead to 53-42 with 14 minutes to play. Doug Overton added added 21 points for La Salle, which improved to 11-1 overall and 2-0 in the Metro Atlantic Athletic Conference. Dyall Nixon led Canisius, 2-12 and 0-6, with 23 points.

Elsewhere it was: Massachusetts 82, St. Bonaventure 55; Penn St. 64, Duquesne 56; Clemson 117, Georgia St. 59; Richmond 51, Wake Forest 49; Virginia Commonwealth 86, Jacksonville 81, OT; Virginia 89, Virginia Military 78; Akron 80, Wright St. 66; St. Louis 66, Butler 64; New Orleans 75, Tulane 59; Colorado St. 65, Wyoming 57; Long Beach St. 72, New Mexico St. 56; San Jose St. 66, Fullerton St. 60; Santa Barbara 91, Utah St. 82 and Washington 83, Miami (Fla.) 67.

#90016u0378 01/16/1990 ~United Press International

CAPE CANAVERAL, Fla. (JAN. 16) UPI - The shuttle Columbia's hard-working crew got back on schedule Tuesday, processing space crystals, studying the effects of weightlessness and beaming down spectacular views of shimmering ice flakes in the black of space.

A navigation device that generated incorrect data Sunday was working properly Tuesday and with a homemade diaper in place around a leaky dehumidifier, flight controllers said the shuttle should have no problem staying in orbit for a full 10 days, with a predawn landing set for Friday in California.

''We feel fairly confident it's not going to happen again,'' flight director Robert Castle said of an unexplained glitch with an ''inertial measurement unit,'' or IMU. ''If it fails again, we would think about it a little bit more but right now, we're planning for a ... landing on Friday.''

With Columbia sailing smoothly through its eighth day in orbit, the astronauts were busy with a smorgasbord of experiments in the fields of medicine, engineering and basic science, back on schedule after staying up two extra hours Monday to make up lost time.

As a result, commander Daniel Brandenstein, 46, co-pilot James Wetherbee, 37, Bonnie Dunbar, 40, Marsha Ivins, 38, and G. David Low, 33, were allowed to sleep an extra half hour, getting up about 11:15 p.m. EST Monday for another busy day in orbit.

They quickly got down to work.

After breakfast, Dunbar climbed into a collapsible canister of sorts for a ''lower body negative pressure'' experiment designed to force fluids back into her legs in an ongoing study of the effects of weightlessness.

The astronauts also ran an experiment to find out how small disturbances, such as Brandenstein's morning exercise, can induce motions in the shuttle affecting the growth of indium crystals, which have applications in electronics.

''You could tell the molten zone (of the crystal) actually (was) undulating while Dan was running on the treadmill,'' Low told mission control. ''It's pretty dramatic.''

And throughout the morning, the crew beamed down television shots of the Earth below and, at one point, spectacular pictures of excess water being dumped overboard into space, instantly freezing into a shower of sparkling ice crystals.

Launched one week ago Tuesday, the astronauts accomplished the primary goal of the 33rd shuttle mission last week with the successful deployment of a Navy communications satellite Wednesday and the equally successful rescue of a giant, 11-ton science satellite Friday called the Long Duration Exposure Facility, or LDEF.

The third major objective of the year's first shuttle flight is simply keeping Columbia in orbit for a full 10 days as part of a program to eventually certify the spaceplane for missions lasting 16 days or more.

So far, the veteran shuttle has performed well with only a handful of problems.

The ship's ''humidity separators,'' used to remove moisture from the crew cabin's air supply, have been leaking slightly, but the astronauts apparently fixed that problem Monday by putting a plastic bag around the leaking gear with a towel inside to sop up any free water.

The only other problem of any significance involved inertial measurement unit No. 1, which generated faulty data five times Sunday night.

The shuttle's IMUs measure the ship's motion and position in space and their operation is critical for good navigation. Despite a thorough investigation on the ground, Castle said engineers were unable to pin down the cause of the ''transient'' data.

''We have ... seen no further problems at all with it,'' he said. ''It has been performing normally ever since.''

#90016u0429 01/16/1990 ~United Press International

TOKYO (JAN. 16) UPI - Maverick Soviet legislator Boris Yeltsin warned Tuesday that Soviet President Mikhail Gorbachev must institute a multi-party system and other radical political and economic reforms or he could fall from power.

Yeltsin, leader of radical reformists in the communist nation, said the Soviet Union ''now is crumbling under growing dissatisfaction of the people.''

''I cannot predict who will preside over the party's next convention this fall unless Gorbachev implements sweeping reforms of the constitution and party principles,'' he told a news conference at the Japan National Press Club.

He criticized Gorbachev for promoting perestroika, or restructuring, under outdated principles.

Also, he called on the Communist Party to convene a central committee meeting to revise the constitution, which now stipulates the party's absolute hold on power, and to make comprehensive changes in party principles.

''If these steps are taken before it is too late, the current very difficult situation can be improved,'' he said.

Yeltsin, who arrived Sunday for a 10-day lecture tour, said a multi-party system should be installed and a market-oriented economy introduced to revitalize the country's ''worsening situation.''

Among his suggestions was the establishment of a Soviet stock market.

While visiting the Tokyo Stock Exchange Tuesday, Yeltsin said, ''Many are scared of the volatility of a market-led economy, but the market controls itself, so I hope Japan can help us establish a stock market in the Soviet

Union.''

This suggestion came even though Tokyo's Nikkei Average suffered one of its worst losses.

Yeltsin also urged the Soviet leadership to grant independence and self-determination to the country's republics in order to end ethnic problems.

The most severe ethnic conflict since Gorbachev took power nearly five years ago was raging in the Asian republic of Azerbaijan, where Moslem-Christian fighting has led to the imposition of a state of emergency and the sending of troops by Moscow to the region.

''The military should not be used to solve ethnic problems,'' Yeltsin said.

#90016u0438 01/16/1990 ~United Press International

(JAN. 16) UPI - Thickening clouds fed by Pacific storms dumped rain and snow in the West Tuesday, whitening ski slopes but snarling traffic, while fog moved into the nation's midsection and the mid-Atlantic Coast amid thawing temperatures.

After a bone-dry December, the second storm of the new year was moving into California, the National Weather Service said, bringing an 80 percent chance for showers in the Los Angeles area Tuesday night.

Scattered light rain and drizzle began falling late Monday afternoon in northern California, with rain expected to spread over the region.

In Nevada, a winter storm dumped 6 inches of snow during a two-hour period Monday in the southern Nevada resort area of Mount Charleston, 40 miles from Las Vegas. State Highway 157 leading into the recreational area from the desert gambling mecca was closed temporarily while police and Nevada Highway Patrolmen unsnarled traffic jams caused by disabled vehicles.

Motorists ignored chain and snow-tire warnings and, at one point, as many as 300 vehicles were stalled along the snow-covered roadway leading into the 6,000-foot mountain recreational and ski area.

The highway was reopened late Monday with warnings drivers would be ticketed for failing to obey chain and snow-tire requirements.

To the north, a Pacific cold front bringing rain swept ashore in Oregon Monday night after a cloudy day with only a few sprinkles.

An upper-level disturbance entered Oklahoma, north Texas, and parts of

Arkansas and Louisiana Tuesday, bringing a chance of isolated evening showers and thundershowers.

A storm centered over the southwestern United States produced scattered snow over the western and northern mountains of New Mexico while fog shrouded the Texas and Louisiana Gulf Coast early Tuesday.

Fog also caused problems in Illinois and Indiana, while south to Missouri skies were clear and temperatures held up into the 50s, the weather service said. A dense fog advisory was issued for several hours for northern and eastcentral Indiana. Patchy dense fog lowered visibilities to less than one-quarter mile.

In northern Illinois, dense fog created hazardous conditions for motorists in the Chicago metropolitan area, reducing visibility and creating slick road conditions. The temperature held at 39 degrees and NWS forecasters said a ''moist south flow over cold ground'' caused the fog to develop.

Winter thunderstorms developed early Tuesday in southcentral Illinois along a cold front, causing dangerous lightning and some brief heavy rains. Unseasonably warm temperatures continued throughout the state, with Peoria, in western Illinois, reaching 46 degrees. In Missouri, Kansas City reported 55 degrees and St. Louis was also warm at 53.

Patchy fog also covered eastern Pennsylvania, southern New Jersey and Delaware overnight, with lows in the upper 20s.

High pressure dominated the South, giving the region partly cloudy and mild weather. Temperatures ranged from 46 degrees in Jacksonville, Fla., to 51 in Atlanta and 70 in Miami.

After a damp day of flurries and drizzle, clouds broke over New England early Tuesday, bringing clear skies in Providence, where temperatures were in the mid 30s. Further north, Vermont reported haze and temperatures in the upper 20s, and light fog and overcast skies covered much of New Hampshire, where the mercury was in the 20s.

#90016u0469 01/16/1990 ~United Press International

CORTLAND, NY (JAN. 16) UPI - The daily New York state ski report compiled by Ski Areas of New York Inc.:

Legend: New, new snow; GM, grooming; SM, snowmaking; NS, night skiing.

Surface condition codes: P, powder; PP, packed powder; WP, wet powder; WBP wind blown powder; MGS, machine groomed surface; FG, frozen granular; LG, loose granular; ICY, icy; WG, wet granular; CRN, corn snow; VAR, variable;

SPR, spring conditions.

Key to Cross-Country: TS, track setting in last 24 hours; SM, snowmaking; KM TRAX SET, distance of groomed trail available in system; KM TRAILS, total trail distance open in system; NS, area offers night cross-country facility.

Note: The absence of a ski center listing in the daily report indicates that no report was received from that ski center or that it may be a weekend facility.

#90016u0475 01/16/1990 ~United Press International

(JAN. 16) UPI - ALMANAC:

Today is Monday, Jan. 22, the 22nd day of 1990 with 343 to follow.

The moon is waning, moving toward its new phase.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include Russian Czar Ivan the Third, known as Ivan the Great, in 1440; English philosopher and statesman Francis Bacon in 1561; French physicist Andre Ampere in 1775; British poet Lord George Byron in 1788; D.W. Griffith, director of silent films, in 1875; U.N. Secretary-General U Thant in 1909; actresses Ann Sothern in 1909 (age 81) and Piper Laurie in 1932 (age 58); actor Bill Bixby in 1934 (age 56); soul singer Sam Cooke in 1935; and actors John Hurt in 1940 (age 50) and actress Linda Blair in 1959 (age 31).

On this date in history:

In 1771, Spain ceded the Falkland Islands to Britain.

In 1944, American troops invaded Italy, landing at Anzio beach in a move to outflank German defensive positions.

In 1985, a cold wave damaged 90 percent of the Florida citrus crop.

In 1987, 27-year-old Glen Tremml pedaled the ultralight aircraft Eagle over Edwards Air Force Base, California, for a human-powered flight record of 37.2 miles.

A thought for the day: Lord Byron wrote, ''The great art of life is sensation, to feel that we exist, even in pain.''

#90016u0477 01/16/1990 ~United Press International
(JAN. 16) UPI - Around the World... Around the Clock... the latest news from UPI...

A-T-and-T officials still areN'T sure what caused yesterday's massive failure of the company's long distance system. But they say they've fixed the problem... whatever it was. Officials say the problem appears to be with the company's computer software. They warn that the remedy is more a bandage than a cure, and say they'll keep working on the problem.

The son of Martin Luther King Junior urged 500 college students in Chicago last night to ''finish the dream'' his father had about brotherhood between blacks and whites. King's widow says her husband's crusade helped inspire recent movements for freedom like the one in China. 15-thousand people gathered in Phoenix to protest the fact that state of Arizona does NOT recognize King's birthday.

East German Prime Minister Hans Modrow is pleading for calm after a mob ransacked the headquarters of the secret police yesterday. Thousands of protesters descended on the headquarters... throwing furniture and files

from the windows. Modrow says violence threatens progress toward democracy.

British Foreign Secretary Douglas Hurd was met by a crowd of chanting and banner-waving Vietnamese boat people at a Hong Kong refugee camp today. The thousands of boat people are angry over London's policy of sending refugees back to Vietnam against their will. Hurd says re-patriation is the only way to stop the mass immigration of Vietnamese to Hong Kong.

There's a state of emergency in the Soviet Republic of Azerbaijan . The Soviet parliament's presidium blames ''extremist'' groups for mining roads and bridges, taking hostages, firing on populated areas and trying to overthrow Soviet power. Soviet troops and the K-G-B are trying stop the fighting.

-30- 1969

#90016u0479 01/16/1990 ~United Press International

(JAN. 16) UPI - ALMANAC:

Today is Wednesday, Jan. 24, the 24th day of 1990 with 341 to follow.

The moon is waning, moving toward its new phase.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include the Roman Emperor Hadrian in 76 A.D., English dramatist William Congreve in 1670, Frederick the Great of Prussia in 1712, British social reformer Sir Edwin Chadwick in 1800, author Edith Wharton in 1862, abstract painter Robert Motherwell in 1915 (age 76), actor Ernest Borgnine in 1917 (age 73) evangelist Oral Roberts in 1918 (age 72), ballet dancer Maria Tallchief Paschen in 1925 (age 65), singer Neil Diamond in 1941 (age 49) and comedian John Belushi in 1949.

On this date in history:

In 1848, gold was discovered at John Sutter's mill near Sacramento, Calif. The discovery touched off the great gold rush of 1849.

In 1908, the first Boy Scout troop was organized in England by Sir Robert Baden-Powell, a general in the British Army.

In 1916, the U.S. Supreme Court ruled that an income tax was unconstitutional.

In 1935, beer was sold in cans for the first time, in Richmond, Va.

In 1965, former British Prime Minister Winston Churchill died at age 91.

In 1987, some 20,000 civil rights activists held a ''brotherhood'' march in all-white Cumming, Ga., population 2,800. It was the South's largest civil rights demonstration since the 1960s. The march came one week after 400 Ku Klux Klan supporters disrupted a civil rights march by 75 people in Cumming.

A thought for the day: English dramatist William Congreve wrote, ''Music hath charms to soothe the savage breast, to soften rocks, or bend a knotted oak.''

-30- 1924

#90016u0480 01/16/1990 ~United Press International

(JAN. 16) UPI - ALMANAC:

Today is Thursday, Jan. 25, the 25th day of 1990 with 340 to follow.

The moon is waning, moving toward its new phase.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include Irish natural philosopher Robert Boyle, a founder of modern chemistry, in 1627; Scottish poet Robert Burns in 1759; soapmaker and philanthropist William Colgate in 1783; novelists W. Somerset Maugham in 1874 and Virginia Woolf in 1882; news commentator Edwin Newman in 1919 (age 71) and actor Dean Jones in 1935 (age 55).

On this date in history:

In 1890, Nellie Bly, a young New York reporter, completed a trip around the world in the astounding time of 72 days, six hours and 11 minutes.

In 1915, transcontinental phone service was inaugurated in a hookup between New York and San Francisco.

In 1971, Charles Manson and three women were found guilty in the murders of actress Sharon Tate and six other people in Los Angeles.

In 1981, 52 Americans held hostage in Iran for 444 days returned to the United States.

In 1988, President Reagan's last State of the Union address called for

approval of the Intermediate Nuclear Forces Treaty by Congress and renewal of aid for the Nicaraguan Contras.

A thought for the day: Novelist Virginia Woolf wrote, ''One of the signs of passing youth is the birth of a sense of fellowship with other human beings as we take our place among them.''

#90016u0484 01/16/1990 ~United Press International

(JAN. 16) UPI - ALMANAC:

Today is Saturday, Jan. 27, the 27th day of 1990 with 338 to follow.

The moon is waxing, moving toward its first quarter.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include composer Wolfgang Amadeus Mozart in 1756; author Lewis Carroll (Charles Dodgson) in 1832; labor organizer Samuel Gompers in 1850; Adm. Hyman Rickover, ''father of the nuclear navy,'' in 1900; bandleader Skitch Henderson in 1918 (age 72); actress Donna Reed in 1921 and actor Troy Donahue in 1936 (age 54).

On this date in history:

In 1880, Thomas Edison was granted a patent for an electric incandescent lamp.

In 1967, three American astronauts died in a fire aboard the Apollo-1 spacecraft during a launch simulation at Florida's Kennedy Space Center.

In 1973, the United States and North Vietnam signed a cease-fire agreement. The same day, the United States announced an end to the military draft.

In 1987, President Reagan acknowledged mistakes and accepted responsibility in the Iran arms scandal. He said his only major regret was the gamble failed to open political channels and free American hostages in Lebanon.

A thought for the day: Inventor Thomas Edison said, ''Everything comes to him who hustles while he waits.''

-30- 1526
#90016u0485 01/16/1990 ~United Press International
(JAN. 16) UPI - ALMANAC:

Today is Sunday, Jan. 28, the 28th day of 1990 with 337 to follow.

The moon is waxing, moving toward its first quarter.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include Canadian prime minister and statesman Alexander MacKenzie in 1822, Cuban revolutionary and poet Jose Marti in 1853, French novelist Colette in 1873 concert pianist Artur Rubinstein in 1887, abstract expressionist painter Jackson Pollock in 1912, sculptor Claes Oldenburg in 1929 (age 61), actor Alan Alda in 1936 (age 54) and ballet dancer Mikhail Baryshnikov in 1948 (age 42).

On this date in history:

In 1878, the first commercial telephone switchboard began operation in New Haven, Conn., with 12 subscribers.

In 1982, kidnapped U.S. Brig. Gen. James Dozier was rescued in Padua, Italy, after 42 days in the hands of Italian Red Brigades terrorists.

In 1986, the space shuttle Challenger exploded 72 seconds after blastoff from Cape Canaveral, killing all seven crew members, including civilian teacher Christa McAuliffe. It was the U.S. space program's worst disaster.

In 1988, members of a polygamist clan surrendered in rural Marion, Utah, ending a 13-day siege.

A thought for the day: The French novelist Colette wrote, ''It takes time for the absent to assume their true shape in our thoughts. After death they take on a firmer outline and then cease to change.''

(JAN. 16) UPI - Police in Trinidad and British Airways officials say a Roselle, Illinois, man committed suicide by thowing himself into the engine of a 747. Police say the man beat up his travel companion... jumped a fence separating the hotel where they were staying and the airport... overpowered four security guards and ran toward the jet engine.

Police in Thailand say the bodies of 11 partially clothed or naked Vietnamese women have washed ashore in southern Thailand. Officials say the bodies appear to have been strangled and thrown into the sea after a pirate attack on a refugee boat. They say many had nylon ropes or stragulation marks on their necks.

An estimated three-thousand abortion opponents marched on the Maryland state capital last night... hoping to convince legislators to use the 1990 session to pass anti-abortion laws. One speaker compared Martin Luther King Junior's fight for black rights to the fight to win rights for the UNborn.

Searchers in Costa Rica found the wreckage of a twin-engine plane that crashed yesterday in rugged mountains about 20 miles southwest of San Jose. The crash apparently killed all 23 people aboard... including a toddler and passengers from Canada, Panama, the United States and Sweden.

A doctor in San Salvador says former Salvadoran President Jose Napoleon Duarte is in ''very critical'' condition and nearly comatose. But he did talk briefly with a doctor. A family member says the cancer-stricken former president was read his last rites yesterday. Doctors say it wasN'T the first time Duarte has received the last rites.

#90016u0519 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - An environmental group, seeking to shame corporate polluters into action, fingered 3,014 plants nationwide Tuesday as major emitters of three chemicals known to deplete Earth's protective ozone layer.

The Natural Resources Defense Council, drawing on toxic chemical release data collected by the government under the federal ''right to know'' law, identified all U.S. industrial facilities that in 1987 reported discharging more than 2,000 pounds of any of three ozone-depleting substances: methyl chloroform, carbon tetrachloride and a type of chlorofluorocarbon known as CFC-113.

The council said it was issuing its report in hopes that Americans would use the information to pressure companies to stop using ozone-depleting chemicals and find substitutes that would not erode the ozone layer, which screens out harmful levels of ultraviolet radiation from the sun.

Without prompt action, the council said heightened ultraviolet radiation will cause millions of additional cases of skin cancer and cataracts, among other health problems, and also damage the environment.

''Critical decisions will be made in 1990 in the board rooms of thousands of companies that use chemicals which deplete the stratospheric ozone layer,'' said the report, entitled ''A Who's Who of American Ozone Depleters.''

''These companies are deciding how quickly to phase out their use of ozone-depleting chemicals,'' it said. ''Armed with knowledge of which companies produce, use and emit these ozone-depleting chemicals, the public can have significant influence over those decisions.''

The group noted CFC-113 already was restricted by the government under an international agreement to protect the ozone layer and that the chemical industry already was working on substitutes in anticipation of a full phase-out.

However, it said methyl chloroform and carbon tetrachloride remain completely unregulated, even though the Environmental Protection Agency has recognized their ozone-depleting potential.

The council said carbon tetrachloride accounts for 17 percent of all ozone-depleting chlorine emitted to the stratosphere by human activities and methyl chloroform provides 16 percent. Chlorine is the main catalyst for ozone depletion in the stratosphere.

The council called on government and industry to immediately move toward a phase-out of those two chemicals, saying substitutes either already existed or could be rapidly developed.

CFC-113 and methyl chloroform are primarily used to clean and degrease electronic components and metal equipment while carbon tetrachloride is used as a raw material in the production of CFCs, petroleum refining and drug manufacturing.

In its study of 1987 emissions, the council found that:

-2,432 plants nationwide emitted 149.2 million pounds of methyl chloroform. The top five emitters were Pratt & Whitney, East Hartford, Conn., 1.9 million pounds; IBM, Endicott, N.Y., 1.5 million pounds; Werthan Industries, Nashville, Tenn., 1.4 million pounds; E.R. Carpenter Co., Russellville, Ky., 1.2 million pounds; and Keystone Steel & Wire Co., Peoria, Ill., 1.1 million pounds.

-898 facilities discharged 52.1 million pounds of CFC-113. The top five emitters were IBM, San Jose, Calif., 1.4 million pounds; IBM, Endicott, N.Y., 1.1 million pounds; IBM, Rochester, Minn., 730,000 pounds; General Motors Corp., Lockport, N.Y., 720,000 pounds; and Lundy Technical Center, Pompano Beach, Fla., 697,800 pounds.

-46 plants released 4.1 million pounds of carbon tetrachloride. The top five emitters were Hercules Inc., Parlin, N.J., 816,670 pounds; Velsicol Chemical Corp., Memphis, Tenn., 598,602 pounds; Vulcan Chemicals, Wichita, Kan., 395,300 pounds; Akzo Chemicals Inc., Axis, Ala., 263,000 pounds; Occidental Chemical Corp., Delaware City, Del., 157,800 pounds.

The council said that, in addition to the three chemicals covered in its report, there were at least seven other substances widely used by U.S. industry that were known ozone-depleting agents.

The group said it could not include those seven chemicals in its report because they are not toxic and, thus, the government has no data on such emissions.

The council, along with the governors of New York, Vermont and New Jersey, last week petitioned the EPA to require polluters to disclose the seven ozone-depleting chemicals as part of their annual ''right-to-know'' filings.

#90016u0581 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - Government figures on the number of American health care workers infected with the AIDS virus are inaccurate because

accidental exposures are ''notoriously underreported,'' The Washington Post said Tuesday.

The newspaper said the Centers for Disease Control in Atlanta has documented only 19 cases in the United States and 27 cases worldwide. However, officials told the newspaper those numbers are unreliable.

''We know they're notoriously underreported,'' said David Bell, chief of the CDC's AIDS activity and hospital infection program. ''Basically, nobody knows how many health care workers have been infected on the job.''

Doctors and nurses who contract the virus that causes aquired immune deficiency syndrome fear they could lose their jobs, and hospitals fear patients would go elsewhere if they learn a worker is infected, The Post said.

But critics charge the release of inaccurate statistics leads to complacency among workers, who may fail to take proper precautions to protect themselves against the human immunodeficiency virus, or HIV, which causes AIDS.

''There is a great deal of sensitivity and even politics behind the figures,'' said Larry Gostin, executive director of the American Society of Law and Medicine.

''Once health care workers perceive that they have a significant risk, then they're going to be asking for things that the CDC and others don't want to have happen,'' Gostin said. As one example, some doctors and nurses have demanded that all hospitalized patients be tested for possible AIDS infection.

One study has shown that accidental needle pokes occur more than 2,000 times a day, the Post said. The CDC maintains the risk of accidental infection is low and can be reduced if workers take proper precautions when exposed to blood or body fluids.

Critics claim statistics of accidental infection among health workers are artifically low because the CDC uses overly stringent criteria to determine which infections are work-related and because investigators are slow to confirm reported infections.

Baltimore physician Hacib Aoun - who sued Johns Hopkins Hospital in 1987, alleging he contracted the virus in 1983 when he cut his finger on a blood-filled tube - said his case is not included in the CDC total.

''I practically had to beg the CDC to come and evaluate the situation,'' Aoun told The Post. ''It was months and months before they came. It's still not counted, even after it was acknowledged by the hospital.''

Aoun, who reached a legal settlement with Johns Hopkins, said he has met several other health care employees who were infected in the workplace but are not recognized by the CDC.

In New York, Dr. Veronica Prego is suing the Kings County Hospital and two physicians, alleging that she contacted the AIDS virus from a needle carelessly discarded by anothere doctor. The information on the number of health care workers infected came in testimony during the case.

Bell said the number of work-related infections recognized by the CDC has risen only from 15 to 19 since June 1988. The agency is investigating about two dozen other cases, he said, but ''the investigations are not complete and we have very few data about them.''

#90016u0590 01/16/1990 ~United Press International

HONG KONG (JAN. 16) UPI - Chanting and banner-waving Vietnamese boat people confronted British Foreign Secretary Douglas Hurd during his visit to a refugee camp Tuesday, condemning London's policy of forced repatriation of asylum seekers.

More than 1,000 Vietnamese at the Hei Ling Chau camp shouted anti-repatriation slogans and waved clenched fists during Hurd's visit, protesting the policy that sent 51 boat people back to Hanoi last month in a secretive, pre-dawn roundup.

While boat people in the camp chanted and marched, Hurd, on the final day of his four-day visit to the British colony, toured screening facilities used to separate some of Hong Kong's 56,000 boat people into two categories - political refugees or economic migrants.

Only genuine political refugees are eligible for resettlement in the West. The rest - an estimated 90 percent of those in the camps - face return to their homeland or years in Hong Kong's squalid detention centers.

Hurd arrived in Hong Kong Saturday in a bid to restore public confidence shaken by China's bloody June crackdown on pro-democracy demonstrators in Beijing and to see first-hand the huge refugee problem faced by the already crowded territory.

Hong Kong is due to be returned to Chinese rule in 1997 at the expiration of Britain's 99-year lease on the colony, but tens of thousands of the colony's 5.7 million people have emigrated due to fears of Beijing's takeover.

At a news conference before leaving the colony, Hurd said many Hong Kong

residents he spoke with were anxious over their future under communist rule.

He said despite Beijing's criticisms, Britain remained committed to democratic reform in the colony, beginning with the introduction of direct elections to Hong Kong's legislature in 1991.

''It is right that Hong Kong should next year start substantially on the upward path toward democracy with the direct election of legislative councilors,'' he said. ''The best way would be to ensure for those running for political office and for those who would elect them, that this process would not only continue but progress during the years that follow.''

Democratic reform in Hong Kong has been a sticking point with China, which wants to limit to fewer than one-third the number of lawmakers directly elected to the colony's legislature.

Hong Kong has demanded at least one-third of the legislature be directly elected in 1991, with a majority of the 60 seats elected by 1997.

Hurd told reporters that repatriation - voluntary or forced - was the only way to stop the mass outpouring of Vietnamese into the South China Sea.

He said Britain would continue forced repatriations in hopes of deterring would-be boat people from leaving Vietnam but gave no schedule for a second group.

''(Forced repatriation) is better and far more humane than keeping people here indefinitely who have been shown not to be refugees,'' he told reporters. ''It is a cruel deception if they think their coming here leads to resettlement in the West.''

Hurd said he hoped nations that have criticized the forced return of 51 boat people in December would take a more practical stance on the policy during a U.N. meeting on refugees in Geneva this month.

''We hope that the international community will accept that (forced) repatriation as well as voluntary returns are necessary,'' he said. ''That is the proposition that we will be putting forth when the Geneva meeting is held.''

A group of 104 boat people willingly returned to Hanoi Tuesday from Hong Kong, becoming the 10th group to participate in a U.N. voluntary repatriation scheme. The latest group brought to 1,093 the number of Vietnamese who have returned through the program.

Although British and Hong Kong officials support the voluntary return policy, they say it is not fast enough and does not appreciably ease

political and economic tensions brought on by the presence of more than 56,000 Vietnamese in the colony's crowded holding centers.

#90016u0618 01/16/1990 ~United Press International

(JAN. 16) UPI - Soviet troops and the K-G-B are standing by in two Soviet republics to prevent further bloodshed that already has left at least 34 people dead.

The Kremlin has declared a state of emergency in sections of Christian Armenia and Moslem Azerbaijan because of the anti-Armenian violence in the Azerbaijani capital of Baku .

Soviet Prime Minister Ryzhkov has warned that military force would be used to prevent civil war between the southern republics.

Soviet television says at least 34 people have died and at least 34 have been hurt in the ethnic fighting. A daily newspaper says the toll would likely rise and that clashes took place for a third sraight day yesterday.

The Soviet government authorized officials to set up document checkpoints and confiscate all weapons, ammunitions, explosives and powerful chemicals. Troops have been authorized to conduct body searches of those who refuse to surrender their arms and to resettle endangered residents.

The emergency order also allows detention of people for as long as 30 days and bans the use of copy machines, telegraphs, radios and other media.

It's the worst ethnic violence since Soviet President Gorbachev came to power nearly five years ago. The imposition of a state of emergency is the toughest step his administration has taken to restore order to the two republics since ethnic clashes erupted there two years ago.

A new series of East-West arms talks begin today in Vienna.

Military chiefs of staff from 35 countries from both sides of the crumbled Iron Curtain will participate in the informal talks.

The three weeks of talks are billed as a seminar on ''confidence and security building measures'' in Europe. According to U-S envoy John Maresca, the talks represent what he called a ''relatively UNexplored approach to security problems''... as well as an opportunity for new ideas to emerge.

The seminar is NOT a formal negotiation... and specific results are NOT expected.

Maresca says the seminar would be an informal meeting to try to understand the intentions behind military force structures and activities.

Maresca says Washington wants to learn how the defense policies of such nations as Poland, East Germany and Hungary are evolving in light of last year's dramatic changes in Eastern Europe.

General Colin Powell, the chairman of the Joint Chiefs of Staff... is the chief U-S representative. He's scheduled to meet briefly with his counterparts at the start of talks.

#90016u0629 01/16/1990 ~United Press International

(JAN. 16) UPI - East German Prime Minister Hans Modrow is begging for calm after thousands of protesters stormed and ransacked the headquarters of East Germany's hated secret police.

East German television says demonstrators yesterday forced their way into the building... threw furniture and files from the windows... smashed doors and glass and threatened employees of the secret police.

They hung a skeleton outside with a slogan against a revival of the secret police.

The protest followed a rally of 100-thousand people at which New Forum called for a quicker dismantling of the state security police, which still employs 55-thousand of its original 85-thousand full-time workers.

Modrow warns that violence and strikes could cause East Germany to ''disintegrate.'' Opposition leaders also rushed to the building to appeal for control.

Costa Rican authorities will be retrieving the bodies today from a plane crash in a remote mountain area southwest of the capital of San Jose.

All 23 people on board apparently were killed when the Spanish-made twin-engine plane crashed at full-speed into a mountainside while navigating a dangerous mountain pass known for strong winds.

Rescuers found a mangled aircraft whose only identifiable structure was the tail section. Bodies of some passengers and crew were found in the twisted fuselage... while others were caught up in sheets of mangled metal. Investigators will try to determine the cause of the crash today.

Passengers included a two-year-old girl, seven Canadians, three Panamanians, one U-S citizen, one Swede, six Costa Ricans and two others. The plane was on a domestic flight from San Jose to the southern Costa

Rica town of Palmar.

#90016u0664 01/16/1990 ~United Press International
MANILA, Philippines (JAN. 16) UPI - President Corazon Aquino Tues accused the United States of reneging on its commitments to maintain key military facilities and said the issue should be resolved in exploratory talks before the future of the bases is discussed.

Lawmakers urged Aquino to cancel the talks, expected either in March or April, after Foreign Secretary Raul Manglapus charged last week that the United States was ignoring the terms of an executive arrangement in October 1988 on the bases.

''The matter of compliance with the existing agreement is relevant to the prospects of negotiating a new one, so this can and should be taken up in the exploratory talks as a prejudicial or threshold issue,'' Aquino said in a statement.

The 1947 treaty covering six U.S. facilities, including the giant Clark Air Base and Subic Bay Naval complex, expires in 1991. Aquino has said she is keeping her options open on a new agreement, which under the constitution requires Senate approval.

Anti-bases sentiment is strong in the Senate, where a majority regard the facilities as an infringement on Philippine sovereignty.

Under the 1988 pact signed by Manglapus and Secretary of State George Shultz, Washington will make its best efforts to secure congressional approval of $962 million in the last two years of the agreement.

Philippine officials said the United States has not made good on its agreement to convert nearly $30 million of accumulated foreign military sales credits and $192 million of development and food aid into grants, provided an additional $18 million to improve base security and increase U.S. military purchases of Philippine goods.

The Philippines' claims are contained in a letter to Secretary of State James Baker that Ambassador Emmanuel Pelaez carried when he left for Washington last Wednesday.

-30- 2059
#90016u0775 01/16/1990 ~United Press International
BOGOTA, Colombia (JAN. 16) UPI - Fifteen heavily armed men wearing military uniforms abducted 32 peasant farmers in the latest episode in a wave of kidnappings, police said Tuesday.

Police said the unidentified kidnappers herded the farmers into trucks Monday and sped off from a village in the northern part of the state of Antioquia. Police started a massive manhunt in the area. A police source said the men may have been members of a right-wing group financed by drug traffickers.

In another incident, a gunman slipped through the security system at Bogota's military hospital Monday and murdered a retired army sergeant who was investigating military drug connections for the police. The gunman escaped after shooting Jose Leon twice, police said Tuesday. Leon, in the hospital for a series of medical tests, had been investigating reported drug bribes to members of a military unit in Pereira in Risaralda state.

The developments came as three former presidents began a peace initiative aimed at ending the nation's war with the powerful cocaine cartels, asking them to free the victims of kidnappings and to stop exporting drugs.

The Roman Catholic Church and the major leftist political coalition joined the former presidents Monday in endorsing the initiative, which set forth the conditions for peace with ''The Extraditables,'' the cocaine gang that has been at war with the nation since August.

The gang is responsible for a string of assassinations and a spate of recent kidnappings, including the son of a prominent member of the administration of President Virgilio Barco.

''The Extraditables'' declared ''total war'' on the nation Aug. 24, days after Barco launched an all-out offensive when gunmen assassinated Sen. Luis Galan, the Liberal Party's leading presidential candidate.

''The Extraditables'' were formed by cocaine cartels after the government began extraditing suspected cocaine traffickers to the United States.

The initiative was not officially sanctioned by the Barco government but was expected to carry political weight because it was endorsed by the former presidents, including two from the ruling Liberal Party, and the church.

''We are making a patriotic call to those persons who have confronted the state ... to avoid more pain to their own families and their fellow citizens,'' the document outlining the initiative said.

It said the cocaine gang should understand that the state ''will impose its sovereignty over the entire national territory and that it is useless to persevere in making Colombia bleed.''

The document was signed by former presidents Alfonso Lopez and Julio

Turbay of the ruling Liberal Party and Misael Pastrana of the Social Conservatives. Also signing were Roman Catholic Cardinal Mario Revollo and the head of the Patriotic Union Party, Diego Montana.

The inclusion of the Patriotic Union means all major political parties were represented in the letter, along with the influential Catholic Church.

Officials said 14 people have recently been kidnapped by cocaine gangs, including Alvaro Montoya, son of the Presidential General Secretary German Montoya, called by newspapers the second most powerful man in government behind Barco.

''The Extraditables'' had threatened to kill Montoya if four people were not released by authorities. The government said the four were not in custody and the kidnappers' deadline expired Friday without word on Montoya's fate.

Police in Cali said Monday they had discovered the body of an electrical engineer, Jose Salazar Montiel, who had been kidnapped Saturday. No group had claimed responsibility for the kidnapping. His body showed signs of torture and a note attached to his clothes said: ''For being a snitch, 39 to go.''

Two people were kidnapped in Medellin and another in Bogota over the weekend, police said Monday.

A Bogota newspaper, El Siglo, has reported that more than 500 people were prisoners of kidnappers in Colombia. Besides the cocaine gangs, there are six guerrilla groups working within the country, and kidnapping is a common crime among them.

The peace proposal comes as the governments of Colombia, Peru and Bolivia prepare for a presidential summit with President Bush Feb. 15 in Cartagena Colombia.

#90016u0811 01/16/1990 ~United Press International

(JAN. 15) UPI - Stock prices on the Tokyo Stock Exchange plummeted Tuesday on a wave of selling by small investors for a combined loss of 3.5 percent of their value in the past two trading sessions.

The key Nikkei Average of 225 selected issues, which tumbled 653.36 points Friday, suffered another massive loss of 666.41 points to close at a seven-week low of 36,850.36.

Tuesday's loss was the Nikkei's sixth worst decline on record. The worst loss of 3,836.48 points was recorded Oct. 20, 1987 in the worldwide stock

crash.

The Nikkei Average has plunged 2,065.51 points, or 5.3 percent, since Dec. 29 when it was at its all-time record high.

The broader-based Tokyo Stock Exchange index of all listed major stocks plunged 62.59 points to 2,723.88 following Friday's loss of 27.66 points.

Trading was thin, with only 450 million shares changing hands, down from 602 million shares traded Friday.

The market was closed Monday for the national holiday of Adults' Day.

Declines widely outnumbered advances 982 to only 63, with 80 issues unchanged.

Elsewhere in Asia, stocks continued to fall in light trading on the Hong Kong Stock Exchange as investors responded to the Tokyo market's sharp declines.

The Hang Seng Index, which tumbled 49.25 points on Monday, fell another 34.90 points to 2751.79. Utilities fell 51.73 points, financials lost 15.73, industrials shed 24.36 and properties closed down 76.07 points.

Turnover amounted to 626 million shares, up from the 550 million traded Monday.

Stocks closed marginally lower in moderate trading on the Singapore Stock Exchange as buying support gave way to profit taking.

The Straits Times Industrial Index, which tumbled 33.63 points Monday, fell 13.04 points to 1512.50.

The narrower All Singapore Index eased 3.32 points to 418.24.

Volume amounted to 138.2 million shares, down from the 155 million shares traded Monday.

In Australia, stocks closed mostly lower in moderate trading on the Sydney Sharemarket.

The All Ordinaries Index, which tumbled 31.9 points Monday, lost 6.3 points to 1675.4. However, gold stocks were in demand, as the Gold Index gained 2.5 points to 1808.8.

#90016u0831 01/16/1990 ~United Press International

(JAN. 16) UPI - American Telephone and Telegraph Company computer specialists are calling their repair work on disrupted nationwide long-distance service ''bandage,'' NOT a ''cure.'' The technicians repaired a software problem that disrupted long distance phone service yesterday. However, they're UNsure if, or when they will find a cure... and they still did NOT know exactly what caused the problem. A-T-and-T spokeswoman Daisy Ottmann says that the ''bandage'' will be tested this morning when businesses open and heavy long-distance use resumes.

The Soviet government is trying to head off a full-fledged civil war in two of its southern republics by sending troops and the K-G-B to keep the peace. The Soviet parliament declared a state of emergency in parts of Christian Armenia and Moslem Azerbaijan following violence that has killed at least 34 people. The parliament also directed officials to ban all gatherings and to tighten control of mass media, prohibit strikes and set curfews.

The son of slain civil rights leader Martin Luther King Junior urged students on his father's birthday to re-commit themselves to King's dream of racial harmony. King's son, Martin Luther King the Third... led a candlelight march in Chicago last night on the national holiday. He told an audience of about 500 college students that the holiday in honor of his father ''should be a day where we re-commit ourselves to finishing his dream.'' King was slain in Memphis, April 4th, 1968.

A liberal think tank in Washington disagrees with Bush administration claims that America's educational system is well funded. The liberal Economic Policy Institute says the United States spends a smaller percentage of its national wealth on educating students in pre-school through 12th grade than do Japan, West Germany and many other industrial countries. Administration officials say the report's statistical methods were flawed.

-30- 2098

#90016u0836 01/16/1990 ~United Press International

(JAN. 16) UPI - General Colin Powell, the chairman of the Joint Chiefs of Staff... is in Vienna today, leading a U-S delegation to a new set of East-West arms talks among army chiefs of staff. Specific results are NOT expected from the three weeks of meetings... which will discuss Eastern European intentions in the wake of last year's dramatic political changes. Officials say they hope to build solid arms agreements on ground broken during these talks.

East German Prime Minister Hans Modrow is pleading for calm after a mob yesterday ransacked the East Berlin headquarters of the hated secret police. East German television reports that thousands of protesters rampaged through the security police headquarters. An estimated

100-thousand others demonstrated outside in a rally. The protest was called by an opposition group to push for quicker dismantling of the state security police, which is being dissolved by the new government.

The Soviet Union and Czechoslovakia have opened talks on the proposed withdrawal of 80-thousand Soviet troops from Czechoslovkia. Prague wants the troops out by year's end. Soviet troops have been in Czechoslovakia since the 1968 Warsaw Pact invasion... and Prague now maintains that their presence is illegal. Moscow reportedly wants to link any withdrawal to the conventional arms reduction talks under way in Vienna... but Czechoslovakia rejects such linkage.

Officials in Centreville, Virginia, say a five-year-old boy is in critical condition after being pulled from a storm drainage reservoir where he spent 40 minutes under water. Police say George Sader and two teenage girls fell through the ice at the reservoir. Both girls were rescued quickly... but it took workers much longer to find the boy. Sader is undergoing cardiopulmonary bypass, in which his blood was removed, warmed and returned to his body.

#90016u0893 01/16/1990 ~United Press International

BUENOS AIRES, ARGENTINA (JAN. 16) UPI - Economics Minister Erman Gonzalez has announced measures to ease a severe cash-flow crisis sparked by the government's aggressive anti-inflation efforts. "We know the difficulties we are causing," Gonzalez said in the nationally broadcast announcement Monday. "But what was our other option?"

Gonzalez repeatedly urged the public in his six-minute address to pitch in and support the latest economic recovery plan, and at one point asked Argentines to find in themselves the kind of public spirit President John F. Kennedy sought of Americans in his 1961 inaugural speech. "As JFK would say, 'Ask not what our country can do for you. Ask what you can do for your country,"' Gonzalez said.

President Carlos Menem said plans to deregulate the economy are moving ahead and should be well advanced by midyear, but resisted questions about the possible collapse of his ambitious plan.

"(The measures) are in the process of execution and are going to have their culminating point in many aspects, more or less in June of the current year," Menem said.

"Please, let's not talk of the failures of a government that has put in action a series of measures that no one has authorized in the last 40 years, and that is bearing its fruits."

Under the new measures, the $3 billion Argentines have tied up in certificate of deposit accounts will be converted automatically Tuesday into domestic dollar-denominated bonds, called Bonex, at the 1989 rate, Gonzalez said.

The tough economic recovery plan, known as the "Bonex plan" and initiated Jan. 1, is the third in less than a month aimed at curbing inflation and cutting government spending.

Depositors seeking to withdraw money from certificate of deposit accounts since the plan took effect have been given either Bonex or bank checks, rather than cash. The plan has had the effect of taking millions of australes, Argentina's currency, out of circulation.

To address the market shortage of australes, Gonzalez said, depositors now may use counter-signed bank checks as a form of currency and that businesses accepting the checks could then re-use them. Businesses using the checks in this manner also must countersign them.

Gonzalez said investors stung by compulsory conversion of their deposits would be able to use the domestic bonds to buy shares of 120 properties taken over by the Central Bank through bankruptcy filings.

Under the new measures, public utilities and other government-owned companies no longer may buy and sell dollars freely in the currency exchange markets, Gonzalez said.

Gonzalez said the state plans to combine a group of energy companies, including the state petroleum company and the state electric and gas companies, into one large entity within the next 60 days.

Gonzalez also disclosed that the World Bank had agreed Jan. 12 to lend Argentina $80 million for energy, with the funds expected before the end of the month.

Argentina has adopted strict summertime energy-conservation measures, including limiting the number of hours government institutions may open to save on air-conditioning. Gonzalez said that as of Tuesday banks could open only for four hours in the morning.

Gonzalez said the government will reduce by 30 percent the number of workers in the state intelligence secretariat.

Since Menem assumed the presidency on July 8, 1989, the government has hiked public utilities between 600 percent and 3,000 percent, initiated an agressive plan to collect back taxes and raised fuel prices over 1,000 percent. But the government has had little success reducing its own spending.

The government freed foreign currency trading in December and devalued the austral to 1,300 australes to the dollar from 650. After trading at 1,950 australes to the dollar on Dec. 28, the currency gained to 1,250 australes to the dollar on Jan. 4 after a five-day bank holiday when sweeping economic measures were announced. The dollar traded Monday at 1,530 australes.

SAN ANTONIO (JAN. 16) UPI - Cocaine use during pregnancy appears to be causing an epidemic of irreversible birth defects, including heart defects and possible retardation, researchers said Monday.

Babies born to women who used cocaine during pregnancy tend to be smaller at birth, have smaller head circumference and may go through withdrawal like babies born to women using heroin and methodone, said Bertis Little of University of Texas Southwestern Medical Center in Dallas.

Little and his colleagues recently reported that ''cocaine infants'' had significantly more congenital heart defects, primarily holes in the heart muscle. Such babies also are thought to face a greater risk of brain hemorrhages and high blood pressure.

The study of 53 women who used cocaine continuously during pregnancy found their babies were 10 times more likely to have heart defects than those born to women who did not use it.

The researchers are keeping track of the children in the study to see how the cocaine exposure affects their physical and behavioral development.

''My major concern right now is that these kids might have some major structural abnormalities'' not detected at birth, Little said Monday at an American Heart Association seminar in San Antonio.

''One of the first things we want to do right now is a physical growth study to see if small birth weight translates into small children,'' said Little. ''We want to see if reduced head circumference (at birth) translates into reduced head circumference later on. If if does, that means they're going to be developmentally delayed.''

Some experts have estimated 10 percent of pregnant women in the United States use cocaine, Little said.

It has been suggested that cocaine children are hyperactive and have behavioral problems similar to those found in infants born to heroin users but it is uncertain whether the problems are due to the child's social

environment or something that happened prenatally, Little said.

''If you look at children born to drug abusers who used the drug during pregnancy and you look at children born to women who started abusing the drug after the birth of the child, you really can't tell them apart,'' Little said. ''Some people think these parents are not good parents. They don't stimulate the child and that causes the problem.''

Little indicated a study which has just begun will include drug-exposed infants who were adopted.

''Last year there were over 1,100 drug-exposed babies adopted in Dallas County,'' he said, adding that an estimated one-half of those children were exposed to cocaine.

#90016u0928 01/16/1990 ~United Press International
CENTREVILLE, VA (JAN. 16) UPI - A 5-year-old boy who spent 40 minutes trapped beneath ice in a storm drainage reservoir remained in critical condition Tuesday but his heart was beating on its own, hospital officials said.

Two teenage girls, who fell through the ice with him Monday afternoon, were recovering from hypothermia.

George Sader was on a respirator and his heart was beating on its own after undergoing cardio-pulmonary bypass, a method of reheating the body's blood, a Fairfax Hospital spokeswoman said.

''His condition has not changed through the night. It was fairly stable and he appears to be having a little more difficulty this morning,'' said Patricia Russo. ''He's holding his own,'' she said.

''If it weren't for his healthy, strong 5-year-old body, he probably wouldn't have made it this far,'' Russo said.

The cardio-pulmonary bypass involved ''taking the blood out centrally at the level of the heart, warming it up and placing it back into the boy,'' Dr. Gary Kavit said.

George's body temperature was only 90 degrees when he was brought to the hospital, Kavit said.

One of the girls with him, Vivian Daniels, 12, pulled herself out of the water. The second, Carol Zakkak, 14, had to be rescued, police said.

Both girls were treated for hypothermia at Fair Oaks Hospital. Zakkak was listed in stable condition Tuesday but Daniels had been sent home, a hospital spokeswoman said.

It was expected to take 24 to 48 hours before it would be known if George suffered brain damage, Kavit said.

''There's no way to tell at this point what status his brain is at,'' Kavit told WJLA-TV. ''He's in a deep dive state right now. His body is

acting like many animals do when they're submerged in cold water to protect.''

The children fell through the ice Monday afternoon at a reservoir behind a private home. It took rescuers about 40 minutes before they found George beneath the ice in about 6 feet of water.

Resuscitation efforts were begun immediately and the child was flown by helicopter to Fairfax Hospital.

Kavit said in cases of hypothermia, oxygen use is reduced, and there have been cases where children were successfully revived after being under water for more than an hour.

WEST BERLIN (JAN. 16) UPI - Holding the Olympics in East and West Berlin would be the ''crowning of the peace process'' in Europe and the greatest triumph of the Olympic ideals in our times, West Berlin Mayor Walter Momper said Tuesday.

''When the Olympic flame will be lit in Berlin, it will be because hardly any other city is better suited than Berlin to promote the peace-seeking idea of Olympic Games,'' Momper said in an interview with the East German newspaper Deutsches Sportecho.

A regional committee is assessing the feasibility of the proposal that the divided city make a united bid to host the games in 2000 or 2004.

''Already now the international contest has begun where we have to prove that both parts of Berlin not only are a strong candidate for the International Olympic Committee, but the very best candidate,'' Momper said.

''Olympic Games in both parts of Berlin together would be the crowning of the peace-seeking process in Europe and at the same time the greatest triumph of the Olympic idea in our times,'' he said.

Since the breaching of the Berlin Wall Nov. 9, several athletic events have been jointly hosted by East and West Berlin, symbolizing the new spirit that has pervaded the city.

Momper and East Berlin Mayor Erhard Krack recently said it was the wish of the population of Berlin to host the games in 2000 or 2004 and called the entire city of Berlin the ''Olympic city of the future.''

Authorities in other West German cities that have applied to host the

Olympics said they would withdraw their bids if the entire city of Berlin agreed to host the Games.

Long before the post-war division of the city, Berlin hosted the 1936 Olympic Games - a spectacular event widely seen as a massive propaganda arena for Adolf Hitler's Nazi regime.

Hitler walked out before the final ceremony - a move attributed to the Nazi leader's annoyance at the success of black American sprinter Jesse Owens, who took four gold medals.

#90016u0950 01/16/1990 ~United Press International

BUDAPEST, HUNGARY (JAN. 16) UPI - Japanese Prime Minister Toshiki Kaifu

began talks with Hungarian officials Tuesday to spell out Tokyo's plans for aiding Hungary's economic reforms through investment and loans.

Hungarian Prime Minister Mikos Nemeth, at a banquet Monday night honoring Kaifu, urged Japan to become deeply involved in Hungary's transition to a market-based economy.

''We rely on international support,'' Nemeth said in a banquet toast. ''We would like Japan to accept a role in Hungary commensurate to its international political, economic and financial weight.''

Kaifu, in his toast, praised Hungary as a ''pioneer of reform,'' saying the economic changes inaugurated by Budapest have strongly influenced other East Bloc nations.

Kaifu, the first Japanese prime minister to visit Hungary, arrived in Budapest late Monday on the final leg of an 11-day European trip. Sunday, he unveiled a massive aid package for Poland that could eventually total more than $1 billion.

Kaifu is expected to announce Japanese aid for Hungary in the range of $500 million, including support for Japanese investments in Hungary.

Forty percent of Hungary's long-term and short-term loans are from Japan, regarded in Budapest as an important source of know-how, new technology and quality high-technology products.

Last week, the Japanese automotive giant Suzuki signed a deal to build a car assembly plant in Hungary. It is scheduled to start production in 1992.

The investment represents the largest Japanese joint venture ever in Eastern Europe. The choice of Hungary, the only country in the East Bloc that does not have an automobile industry, is seen as an acknowledgement of Hungary's commitment to a market economy.

Another deal is expected to be signed Wednesday under which the Hungarian firm Technoimpex will purchase cars from Toyota in exchange for Hungarian-made machine tools.

Budapest's attempts at economic reform, among the most progressive in Eastern Europe, have resulted in sharp price increases for many essential goods.

Monday, about 1,000 people demonstrated at Heroe's Square in Budapest, protesing price hikes and declining living standards.

Speakers at the demonstration, organized by the Hungarian Democratic Forum said the government's economic policies were bringing disaster upon the

country and impoverishing the elderly.

#90016u0968 01/16/1990 ~United Press International
WASHINGTON (JAN. 16) UPI - The Supreme Court agreed to review a lower court ruling Tuesday on the use of hearsay statements in child sex abuse trials.

The court will hear arguments this spring in a case brought by the state of Idaho against Laura Lee Wright, whose conviction for sexually abusing her 2 1/2-year-old daughter was reversed on appeal to the state Supreme Court.

The Idaho Supreme Court found that Wright's Sixth Amendment right to confront her accuser was violated when a trial court judge allowed testimony from a pediatrician who recounted statements made by the youngster about sexual abuse by Wright and the girl's father, Robert Giles.

The child did not testify at the trial.

The lower court found that the pediatrician's statements lacked reliability and trustworthiness because he failed to record his interview with the girl, used leading questions and had a preconceived idea of what the child would disclose.

The state court ruled that those three tests must be met under the ''confrontation clause'' of the Sixth Amendment before hearsay statements can be admitted in child sex abuse trials.

Idaho, however, contends the state court failed to take into account other facts and evidence in the case that bolstered the reliability of the pediatrician.

Idaho also argues that the ruling contradicts Supreme Court rulings on hearsay statements in sex abuse cases, and says it could find no other appellate court ''which has imposed such stringent requirements'' on the admissibility of hearsay statements.

#90016u0977 01/16/1990 ~United Press International
WASHINGTON (JAN. 16) UPI - The Supreme Court agreed Tuesday to review a Maryland case involving a day-care center operator whose child sex abuse conviction was overturned because she was not allow to confront the child in court.

The justices will hear arguments before the end of the term in the state's

appeal against Sandra Craig, who was convicted of sexually abusing a 6-year-old girl over a two-year period at her Howard County day-care center.

At issue is the Maryland appeals court's interpretation of a state law on testimony by closed-circuit television in child sex abuse cases.

That court found Craig was denied the right to face her accuser because the child testified by a live television hookup. Craig was not in the same room with the child but could see the testimony on a television monitor.

The court found that Maryland judges must question youngsters at some point in a trial in the presence of the defendant.

In arguing for high court review, lawyers for the state urged the justices to clarify their views on exceptions to the Sixth Amendment right of face-to-face confrontation.

''The Court of Appeals of Maryland has struck an untrue balance between a defendant's constitutional right to face-to-face confrontation and the compelling governmental interest of safeguarding the physical and psychological well-being of a child,'' the lawyers wrote in court documents.

Craig was convicted in 1987 of sexually, psychologically and physically abusing the young girl at Craig's Country Pre-School in Clarksville, Md. She was sentenced to 10 years in prison but remained free during the appeal. The state appeals court threw out the convictions last summer.

Her day-care center closed in 1986 after abuse allegations emerged, and Craig moved to New York, where she works as a department store manager. She faces charges of child abuse involving 12 other youngsters.

WASHINGTON (JAN. 16) UPI - Business inventories rose 0.5 percent in November to $796.8 billion from $793.1 billion at the end of October, the Commerce Department reported Tuesday.

Inventories of durable goods increased 0.5 percent in November and were up seven percent from the year-earlier level.

The department also reported an increase in the value of trade sales and manufacturers' shipments in November to $523.6 billion, up 4.4 percent from year-ago levels.

Sales and shipments of durable goods gained 1.4 percent from the previous

month and 3.5 percent from year-earlier levels.

The ratio of business inventories to sales was 1.52 percent at the end of November, down .01 percent from the month before and down .03 from year-earlier levels.

#90016u0990 01/16/1990 ~United Press International

LONDON (JAN. 16) UPI - Liberian troops fighting off rebel invaders have burned down villages and killed dozens of civilians, the human rights group Amnesty International said Tuesday.

Amnesty called for an immediate halt to the killings, which it said were indiscriminate reprisals for an invasion by about 100 rebels Dec. 24. The group also called for an immediate judicial inquiry.

Liberian state news agency LINA said last week that the rebel incursion, masterminded by Charles Taylor, a former official of the West African country, had been crushed by two divisions of troops dispatched to the northeastern province of Nimba. Taylor's attempted coup had been put down, it said, and the country returned to normal.

According to Amnesty, however, a local chief claimed that government troops burned down his village, Butuo, on Dec. 29 and killed a village commissioner and his wife.

The chief said troops stripped him and the other two victims, forced them to lie down and shot them where they lay, Amnesty reported.

Amnesty said several people had been murdered in the Liberian capital of Monrovia by unidentified men searching for rebels. Robert Phillips, a former prisoner of conscience, was slain at his home Jan. 4, Amnesty said.

Liberia's minister of justice admitted Jan. 10 that there had been numerous reports of harassment by security forces, Amnesty said. The next day, the authorities said 11 people, including two senior army officers, had been arrested on unspecified grounds.

Amnesty expressed concern at reports that the army had ordered the evacuation of the border zone between Liberia and the Ivory Coast and had said anyone found in that zone would be treated as a rebel.

Captured rebels said last week they had been trained at Libyan commando camps for the invasion. But their claim could not be independently confirmed.

-30- 2080
#90016u1001 01/16/1990 ~United Press International
WASHINGTON (JAN. 16) UPI - The Supreme Court let stand Tuesday an Arizona court ruling that barred judges from forcing operators of adult businesses to turn over their operating licenses as a condition of probation.

The court refused to hear the case brought by the state of Arizona seeking review of a state court ruling that barred the practice.

The case began when Gary Bauer, who ran the Castle Adult Bookstore in Phoenix, was charged with renting obscene films in April 1985. He and his business, Yoco Enterprises, were eventually found guilty of a felony and placed on probation as a first offender.

However, as a condition of probation he was required to surrender his operating licences for the business.

His attorneys charged that surrendering his licenses constituted prior restraint in violation of the First Amendment guarantee of freedom of the press. Appeals courts agreed.

Seeking high court review, the state said the ''Arizona Court of Appeals erred in treating the license forfeitures ... as a prior restraint on the dissemination of particular expressive materials. ...

"The incidental impact license forfeiture has on their First Amendment activities is narrowly tailored to satisy only the punishment due to them as felons. The mere fact that the defendants were convicted of obscenity felonies, or that the licenses were related to the operation of a bookstore, do not prevent the legitimate reach of otherwise valid personal punishment.''

-30- 1658
#90016u1020 01/16/1990 ~United Press International
GENEVA (JAN. 16) UPI - Negotiations on banning chemical weapons resumed Tuesday after a Christmas recess with the Soviet Union saying there could be agreement within a year.

Talks within a special committee of the 40-nation Disarmament Conference are ''in a very advanced stage,'' Soviet delegate Sergei Batzanov told reporters.

''More and more delegations are coming around to the belief that an agreemernt can be achieved within another 12 months,'' Batzanov said.

U.S. officials were more cautious, saying completion of a treaty text may require another two years because of the problems of ensuring destruction

of existing stockpiles and preventing clandestine production.

The full Disarmament Conference is scheduled to begin its 1990 session - and its 27th year - on Feb. 6. It has periodically debated a chemical weapons ban for 14 years but negotiations intensified three years ago when U.S. and Soviet experts began work on a joint draft text.

Verification would be based on regular international on-site inspections and ''challenge'' inspections at short notice if one party is suspected of cheating.

In their bilateral talks, U.S. and Soviet delegates are planning for early recriprocal trial visits to chemical arms production and storage facilities as well as industrial chemical plants.

President Bush proposed last year that the United States and the Soviet Union, the two biggest chemical weapons nations, should immediately reduce their stockpiles by 80 percent without waiting for a treaty.

Bush said the two sides could cut the remaining 20 percent to just two percent during the first eight years of a treaty.

Chemical weapons would then be destroyed completely over the following two years provided all countries capable of producing them have adhered to the treaty - a precaution against non-nuclear nations deploying the so-called ''poor man's atomic bomb'' by non-nuclear nations like Iraq during its war with Iran.

-30- 2183

#90016u1028 01/16/1990 ~United Press International

CINCINNATI (JAN. 16) UPI - Campeau Corp., which filed for federal bankruptcy protection for its Federated and Allied retail subsidiaries, Tuesday announced the the appointment of a new chairman and the renaming of the U.S. operations to Federated Department Stores Inc.

G. William Miller, secretary of the treasury under President Carter and a former chairman of the Federal Reserve Board, was named chairman and chief executive officer of Federated Department Stores Inc.

Campeau also said John W. Burden III, chairman and chief executive officer of Federated and Allied Stores Corp., resigned effective Jan. 31. Campeau said it expects to name a replacement for Burden to serve as chairman of the company's department store retailing operations.

James M. Zimmerman will remain president and chief operating officer of Federated and Allied. Ronald Tysoe, president of both the Campeau Corp. of Toronto and Campeau U.S., will remain president of Federated Stores, but

his responsibilities in Canada will be phased out.

Federated and Allied, which call themselves "indirect subsidiaries of Campeau," filed for protection under Chapter 11 of the U.S. Bankruptcy Code Monday in Cincinnati.

"Federated and Allied are victims of the current business climate in the United States, in which staggering debts can be amassed to finance corporate takeovers and leveraged buyouts," Burden said Monday, one day before his resignation was announced. "Our current situation is due to the large amount of debt accumulated in the acquisitions of Federated and Allied by Campeau."

Officials of Campeau, the Toronto real estate developing company that was left with an estimated $7 billion of debt after buying Federated and Allied, said that Campeau itself had avoided bankruptcy.

Campeau bought Allied in 1987 for $3.6 billion and Federated in 1988 for $6.6 billion in deals that buried the retailers under a mountain of debt.

The bankruptcy filing in Cincinnati, where Federated and Allied are headquartered, came after Campeau failed last week in its last-ditch efforts to refinance its Federated and Allied debt.

Federated and Allied, whose stores include what might be the most famous department store in America, Bloomingdale's, pledged it will be "business as usual" for their outlets despite bankruptcy.

"Federated and Allied filed for Chapter 11 after their boards of directors determined that sufficient progress toward an out-of-court restructuring had not been made," company officials said.

"The decision to seek Chapter 11 relief was based on a conclusion that action was required at this time in order to preserve the operational strength and assets of the two department store companies while the corporate debt is restructured."

Miller had served as a director of Campeau, Federated and Allied before being named chairman of Federated Stores Tuesday. "These actions," Miller said, "represent significant steps as we work to maintain the market leadership and vitality of the company's retail operations while Federated and Allied's capital structure is being reorganized through a Chapter 11 process."

"The company is now positioned with a strong and experienced management team at all levels to manage what has always been a highly successful group of American retail businesses - with a new name that reflects our retailing orientation," he said.

Miller, 64, first joined Federated's board in 1976. He resigned two years later to assume chairmanship of the Federal Reserve Bank. From 1979 to 1981, he served as Secretary of the Treasury.

He was re-elected to the Federated board in 1981 and, following the acquisition of Federated by Campeau in 1987, joined the boards of Campeau and Allied.

Burden became chairman and chief executive officer of Federated and Allied in 1988 after a 30-year retailing career which established him as one of the nation's leading merchants. Before Campeau's acquisition of Federated, Burden was a vice chairman of Federated.

#90016u1041 01/16/1990 ~United Press International

BEIRUT, LEBANON (JAN. 16) UPI - Syrian authorities have barred 60 Iranian Revolutionary Guards from entering Lebanon in a move aimed at curbing Iranian influence in the war-torn country, the An Nahar newspaper reported Tuesday.

The newspaper quoted security sources as saying that Syrian authorities had been restricting Iranians from entering the country since the beginning of the year, including 60 Revolutionary Guards who wanted to enter Lebanon via the Syrian-Lebanese border.

The Revolutionary Guards were to replace an equal number of colleagues who had left Lebanon for home, security sources told the newspaper.

An estimated 2,000 Iranian Revolutionary Guards have been in eastern Lebanon since 1982. They initially arrived to bolster Arab forces during the 1982 Israeli invasion, but they stayed on to provide members of the fundamentalist Hezbollah with training and indoctrination into Iran's Islamic revolution.

Observers said the restrictions apparently were aimed at limiting Hezbollah activity in the country. The pro-Iranian group has been battling the Syrian-backed Amal movement in the Tufah area in south Lebanon since Dec. 23.

Hezbollah is fighting for its return to southern Lebanon under an accord worked out in Syria last year. The accord stipulated the establishment of a joint ''operations room'' to coordinate guerrilla attacks against Israel. But the provisions of the accord have never been materialized.

At least 88 people were killed and 308 others wounded in the fighting for the control of the Tufah area, east of the port city of Sidon, 24 miles

south of Beirut.

The deployment of some 700 Palestinian guerrillas in certain parts of the strategic district two weeks ago checked the advance of the fundamentalists, who had gained the upper hand during 25 days of fighting.

It was not immediately known if the Syrian measures were temporary or permanent. But there have been reports that Damascus may be moving to scale down its alliance with Tehran in favor of the newly established relationship with Egypt.

Syria and Egypt last month resumed diplomatic relations after a 12-year break.

-30- 2345

#90016u1052 01/16/1990 ~United Press International

(JAN. 16) UPI - Two Florida department store chains ran full-page newspaper ads Tuesday reassuring customers and employees that the financial problems that threw their parent, Campeau Corp., into Chapter 11 bankruptcy would not affect local operations.

Burdines and Maas Brothers/Jordan Marsh both ran full-page ads in The Miami Herald, the Fort Lauderdale Sun-Sentinel, the Orlando Sentinel, the Gainesville Sun, the Tampa Tribune and the St. Petersburg Times. The Maas Brothers/Jordan Marsh ad also appeared in the Tallahassee Democrat. There are no Burdines stores in Tallahassee.

Both ads were in the form of letters to "friends and customers." The Burdines ad, signed by company Chairman Howard Socol, promised business as usual in its 28 stores. "The financial problems ... are at the corporate level, not with Burdines," Socol's letter said.

The ad noted that credit plans and refund policies would remain unchanged and that new merchandise would continue to arrive at the stores. "Our associates will continue to receive their paychecks, benefits and their retirement funds are secure," the letter said.

A similar letter signed by Maas Brothers/Jordan Marsh president J. David Scheiner, contained the same assurances. "Our stores are strong and healthy. We believe in ourselves and each other, and with your continued support and patronage, we are optimistic about our future," Scheiner's letter said.

Burdines has headquarters in Miami and has operated in Florida for 91 years. It employs 10,000 people at its 28 stores, all in Florida. Maas Brothers/Jordan Marsh, which merged in August, has operated in Florida for 103 years. Its headquarters are in Tampa and it employs 10,000 people at

its 39 stores in Florida, Georgia and South Carolina.

The companies are operated by Federated Department Stores Inc. and Allied Stores Corp., two U.S. divisions of Campeau Corp.

Campeau was placed under federal protection from creditors Monday in Cincinnati. The company hit financial straits when it was unable to meet its debt payments on almost $10 billion in junk bonds that it sold to buy Federated and Allied.

In addition to the two Florida chains, Federated and Allied operate eight other department store chains, including Bloomingdale's, Abraham & Straus, Lazarus, Rich's, Goldsmith's and Sterns. Together the ten chains have 258 stores and employ 100,000 people.

Burdines and Jordan Marsh said they would not lose any suppliers because of the terms of the Chapter 11 filing, which ensures vendors that obligations made after the filing will be honored. A Burdines spokesman said Monday the chain had posted "huge" profits and had no plans for job cuts.

Maas Brothers/Jordan Marsh also posted profits last year and had a successful Christmas season, a corporate officer said. It also had no plans to cut jobs.

There was speculation the chains would eventually be sold to pay off debt. But Socol, chairman of both Florida chains, said it would be "business as usual" for both.

#90016u1054 01/16/1990 ~United Press International

LAFAYETTE, LA (JAN. 16) UPI - A federal jury acquitted 16 of 20 defendants of a scheme to import more than 1 million tons of marijuana into Louisiana.

The verdicts came Monday in the three-month-old trial, leaving most of the defendants jubilant and relieved.

''Thank God, the truth came out,'' said Clark D. Nash of Eldon, Mo., one of those acquitted.

The men were accused of conspiring to import Colombian marijuana into Louisiana for distribution to the Midwest.

One prosecution witness, Steven Kalish, testified he gave a $300,000 ''gift'' to Panamanian dictator Manuel Noriega, who allowed the smugglers to launder drug profits in the Central American country.

Prosecutors refused comment on the verdict and said they would proceed with a second drug-smuggling case.

''We can't make any comments; we have a second case to try,'' said Assistant U.S. Attorney Judy Lombardino.

Those convicted were Max Wade and James Swope, both of Houston, Stephen Ellender of Houma, La., and Jerry Hughey of Austin, Texas.

The prosecution tried to prove that there was a single conspiracy, rather than several smaller ones, that men were involved in a 1982 smuggling case in North Carolina, and a plan to import 1.3 million pounds of marijuana into Louisiana and Missouri in 1983 and 1984.

U.S. District Judge John Shaw instructed the jury that if it believed there was an overall conspiracy, the men should be found guilty. But if the jury believed that more than one conspiracy existed, the defendants should be acquitted.

''You just can't lump everybody in toone trial and get convictions,'' said defense attorney Patrick Michot. ''I think it showed that the system was strained and just about broke it.''

Prosecutors said the next trial, scheduled to begin Feb. 12, will focus on a plan to import cocaine into the U.S. Twenty-four men, including Colombian national Cesar Cura - the alleged supplier - will be tried.

Max Jordan, another defense attorney, questioned whether the government could get convictions in the cocaine trial based on the acquittals.

''This may send a message to the government that a megatrial is not the wave of the future,'' he said.

RIO DE JANEIRO, BRAZIL (JAN. 16) UPI - A bus load of Argentine tourists overturned on a remote highway in southern Brazil Tuesday, killing 18 people and injuring 10 others, a police spokesman said.

The spokesman said the bus left Monday on a multi-day excursion from the Argentine city of TrenqueLauquen, 360 miles southwest of Buenos Aires, and wrecked Tuesday at 3:30 a.m. in the Brazilian state of Rio Grande do Sul between Porto Alegre and Osorio.

Among those killed were four children, six women, and eight men, police said.

The injured were taken to the Municipal Hospital of Osorio and a rescue center in Porto Alegre, the spokesman said. There was no immediate word on the cause of the accident or whether other vehicles were involved.

WASHINGTON (JAN. 16) UPI - The Supreme Court refused to disturb a lower court ruling Tuesday that found high school officials can be sued for failing to protect students from criminal assaults, including sexual molestation by a teacher.

The justices, without comment, rejected the appeal by three Bradford Area High School officials who were sued for damages by two female students who were sexually assaulted by their band director.

At issue in the case is whether a school official can be held liable for a teacher's criminal actions against students.

It is the second time the case, which originated in McKean County in northwestern Pennsylvania, has reached the Supreme Court.

Last spring, the justices sent the case back to the 3rd U.S. Circuit Court of Appeals for reconsideration following a decision in another case, which found the state has no constitutional duty to protect children from abusive parents.

The federal appeals court in the Bradford High case, however, still found the school officials were not immune from liability.

The case emerged after band director Edward Wright pleaded guilty to various sex-related charges involving the two students between 1979 and 1983. The girls then sued the principal, assistant principal and

superintendent for damages.

#90016u1135 01/16/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (JAN. 16) UPI - President Alfredo Cristiani denied Tuesday that fear of a military coup forced him to postpone a U.S. trip and insisted that leaders of the Salvadoran armed forces support the prosecution of soldiers accused of killing Jesuit priests.

Cristiani, in interviews with U.S. network television news programs, also said Salvadoran officials believe they have ''almost all those directly involved'' with the slayings, and that the suspects would be handed over to the courts ''today or tomorrow.''

The nine suspects - accused of killing six Jesuit priests, their housekeeper and her teenage daughter last November - ''obviously will stand trial,'' Cristiani said. He said that, despite ''problems with the judicial system in the past,'' he hoped the courts would ''come through'' as the investigation did.

Cristiani disclosed last weekend that a colonel who headed the national military academy and three other officers are among those suspected of carrying out the killings, which occurred during an offensive by leftist rebels but in an area under military control.

One Western diplomat, noting El Salvador's U.S.-trained Special Investigations Unit had been effective, has said that if any officers were convicted, the justice system would be breaking new ground because ''colonels have always been above the law in El Salvador.''

Cristiani, asked about the colonel's involvement, said that ''he, in testimony, denies participation, but junior officers expressly have testified they received a direct order from him.''

While acknowledging there might be ''a few'' expressions of military dissatisfaction with the investigation, he said, ''I believe generally the armed forces are behind the investigation and that, no matter who the culprits turned out to be, they should be punished for it.

''I do not think a coup is a possibility at this moment because ... I have spoken with all the commanders and they all seem very comfortable in trying to come down to the bottom of this and have the armed forces as an institution cleaned of what individual members do,'' he said.

He also downplayed possible retaliation by right-wing paramilitary squads, saying, ''I think we do not have to worry about small radical minorities.''

Rumors have circulated in El Salvador's diplomatic circles in recent weeks that Salvadoran commanders might be considering an attempt to oust the conservative president because of his relatively aggressive stance against military human rights abuses.

But Cristiani insisted his planned trip to the United States this week was postponed because of a scheduling problem with U.N. Secretary-General Javier Perez de Cuellar.

Cristiani was to have traveled to U.N. headquarters in New York Tuesday to discuss the U.N. role in restarting peace talks between the Salvadoran government and leftist rebels. He said the trip was postponed because Perez de Cuellar was visiting Moscow.

Foreign Ministry spokesman Leopoldo Herrera has said Cristiani probably will now make the trip the week of Jan. 29.

Earlier, however, U.N. officials contradicted the Salvadoran assertion, saying the secretary-general had planned to be back in New York in time for the meeting with Cristiani.

Sources with access to Cristiani's itinerary said the president also had planned to meet with President Bush, congressional leaders and American reporters while in the United States.

U.S. Embassy spokesman Barry Jacobs said scheduling difficulties were ''the only reason'' Cristiani postponed his trip.

But tension over the investigation of the Jesuits' killings was palpable in El Salvador, where the military ruled for more than a half-century until Christian Democrat Jose Napoleon Duarte was elected president in 1984.

Cristiani took office June 1 after defeating the Christian Democrats at the polls. His right-wing Nationalist Republican Alliance party, known by the Spanish-language acronym ARENA, has close ties with the military.

Cristiani's planned side trip through Washington was to have ended Saturday, only days before the scheduled Jan. 24 start of congressional hearings on the huge economic and military aid El Salvador receives from the United States.

Lawmakers outraged by the priests' slayings and other human rights abuses in El Salvador had vowed to look closely at how more than $500 million a year - $1.4 million a day - in U.S. aid is being spent in the small Central American country.

The nation's decade-old civil war has claimed more than 72,000 lives.

Representatives of Cristiani's government and the rebels held talks in September and October, but the rebels pulled out of a scheduled November meeting, instead launching a huge offensive against the capital and other major cities.

Little progress was made during the first two rounds of talks, and some political observers said the offensive may have been an attempt to force the government into concessions.

But Tuesday, Cristiani said he was ''more optimistic'' about future talks because the rebels learned through the offensive - which included a call for a popular insurrection that never materialized - that ''the Salvadoran population does not back them.''

#90016u1140 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - The Supreme Court refused Tuesday to disturb a $1.5 million judgment in favor of a former member who charged a church with fraud, emotional distress and assault.

The court refused to hear an appeal brought by the church seeking review of a ruling by the California appeals court that upheld the jury award.

The case began with Gregory Mull's attendance in 1974 at church services in San Francisco. Mull, who was then 53 and has since died, became more and more involved in the church and eventually mortgaged his home to make contributions to the church.

Later, at the urging of the church's leader, Elizabeth Clare Prophet, abandoned his architectural business and moved to a church retreat to work on various architectural projects on promises the church would handle his expenses and pay for the upkeep of his home.

According to court records, the church reneged on the promises and Mull was forced to sell his home and was sued by the church for money they claimed he owed them.

Mull, who by then had left the church, counter-sued claiming fraud.

He claimed the church used coercive persuasion to reduce him to a slave of the church and testimony was introducted at trial that the religion was a cult.

After a six-week trial he was awarded $1.5 million against the church and Mrs. Prophet.

The church appealed but the award was upheld by a state appeals court in 1989 and the state supreme court refused to review the case.

Seeking Supreme Court review, the church argued the decisions violated its First Amendment rights to freedom of religion.

Attorneys for Mull's family, however, said that liability ''against a church for fraud and deceit in inducing (Mull) to pay money and to labor long hours in a land development project, which (the church) knew to be phony and which (the church) intended soley as a means of raising money for their private profit only, imposes no substantial burden on the free exercise of (the church's) religion.

''Surely, (they) cannot seriously argue that a land fraud scheme is part of their religion.''

WASHINGTON (JAN. 16) UPI - The Supreme Court refused Tuesday to disturb a ruling that a Chicago cable company could be required to provide a certain percentage of local programming as part of its franchise.

The court refused to hear a case brought by Chicago Cable Communications seeking review of a ruling by the 7th U.S. Circuit Court of Appeals.

At issue was part of the agreement the company entered into to get the franchise that required it to air a certain amount of local programming each week. When the company allegedly fell behind in the agreement in 1987 the city cable commission fined it $60,000.

The company challenged the fines on a variety of grounds including that the local programming requirement violated the First Amendment guarantee of freedom of speech, but the fines were upheld in federal courts.

NEW YORK (JAN. 16) UPI - Latest metal market prices as quoted Tuesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 71.00-72.00 c-lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 118.70 c-lb.

Lead, common, U.S. primary producers 40.00 c-lb.; U.S. non-primary (secondary) producers 42.00-47.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, bettes delivered to customers, merchant, N.Y., $3.67-$3.87 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $135.00-138.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $507.00-$508.50; dealer-approx., $490.00-$502.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $100.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $102.00 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 316.00 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 68.00-68.75 c-lb.

#90016u1192 01/16/1990 ~United Press International

ATHENS, GREECE (JAN. 16) UPI - A high-ranking Albanian official is scheduled to visit Greece later this month, apparently to reduce diplomatic tension between the two countries following allegations of human rights abuses in Albania.

Greek Foreign Minister Antonis Samaras told journalists Tuesday that Albanian Foreign Undersecretary Sokrat Plaka is scheduled to visit Greece on Jan. 26 at Albania's request.

Plaka will meet with Samaras and other Greek officials but it was not immediately clear how long he would stay. Samaras hinted thst he would raise the issue of human rights in Albania.

The Albanian official's visit was scheduled days after reports surfaced in Greece that four ethnic Greeks, identified only as the Prassos brothers, were murdered by Albanian police after they tried to slip across the border into Greece.

Albania denied the charges but an Albanian exile in Athens said at least two witnesses confirmed the killings.

Samaras said last week Albania turned down a request that the Greek charge d'affaires in Tirana be allowed to visit Pepele, the village in southern Albania where the Prassos brothers were from.

The Greek foreign minister said he would not discuss border issues with Plaka but that it was his duty, as Greek foreign minister to raise the question of human rights for 400,000 ethnic Greeks living in Albania.

Last week about 5,000 people, mainly Albanian exiles of ethnic Greek origin, demonstrated in Athens to protest violations of human rights in Albania.

The demonstrations were held amid reports the Albanian authorities harshly suppressed demonstrations inside Albania by students demanding more freedom of expression and other rights.

Albanian exiles said the authorities in Tirana arrested several protesters and either expelled them from the university or used other methods to prevent them from pursuing their education.

In Athens Monday, Samaras came under fire from a collegue in Greece's all-party government for his stance toward Albania.

Alternate Defense Minister Karolos Papoulias, a member of the Pan-Hellenic Socialist Movement, accused Samaras of exercising ''personal policy'' toward Albania.

The implication was that the foreign minister, a member of the conservative New Democracy party, did not consult with his left-wing collegues in the Cabinet before making public statements on Albania.

It was the second attack in one month against Samaras by left-wingers sharing power with the conservatives in the all-party government of Prime Minister Xenophon Zolotas.

Papoulias, who was foreign minister in the government of Socialist Prime Minister Andreas Papandreou, called for a ''realistic policy that would proceed with seriousness and caution on a very sensitive issue.''

Last month Papandreou and Greek communist leader Harilaos Florakis also scolded Samaras for his critical stance toward Albania.

Zolotas's government has been in office about six weeks and differences on policy toward Albania have emerged as the first public dispute between the three parties making up the government.

#90016u1197 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - The Food and Drug Administration halved the recommended dose of AZT Tuesday, responding to research that shows lower levels of the AIDS-fighting drug work as well and are safer than the original dose.

AZT, or zidovudine, is the only government-approved drug that directly attacks the AIDS virus. More than 40,000 AIDS-infected Americans take AZT, according to the drug's manufacturer, Burroughs Wellcome Co.

Health and Human Services Secretary Louis Sullivan said the decision to reduce the recommended dose means ''that fewer patients may have to discontinue AZT therapy because of serious side effects.''

Side effects, including severe anemia, have forced about half of all users to stop taking the drug. AZT is not a cure for the always fatal disease as it is used to prolong life. There is no known cure for AIDS.

The original dose of AZT was set in March 1987 and recommended patients take 1200 milligrams daily. Under new drug labeling approved by the FDA, doctors are advised to start patients out on 1200 milligrams of AZT daily for one month - and then cut the dose to 600 milligrams per day.

Along with the potential reduction in the number and severity of side effects, the cost of AZT should be less. It now costs about $6,400 a year for the standard AZT dose of 12 capsules daily.

In August, the National Institutes of Health reported its study of more than 500 patients showed relatively low doses of AZT appeared to be just as effective as higher doses in staving off AIDS, while producing fewer toxic side effects.

NIH research also showed AZT not only helps acquired immune deficiency syndrome suffers, but may slow progression of the disease in people who are infected with the AIDS virus, but are not yet sick.

Kathy Bartlett, a spokeswoman for Burroughs Wellcome of Research Triangle Park, N.C., said many doctors switched AIDS-infected patients to lower AZT doses after the NIH findings were announced. But Bartlett said the FDA's official endorsement will probably make the practice more widespread.

Last month, New York's Aids Coalition to Unleash Power (ACT-UP) wrote a letter to the FDA urging the federal agency change AZT labeling to educate more doctors and patients about reduced doses. The institutes of health findings have yet to be published in a medical journal - the traditional way of communicating new care methods to physicians.

''Trial results are meaningless if they are not translated rapidly into clinical practice so they may improve and prolong the lives of people who are sick,'' the New York AIDS coaltion wrote.

Food and Drug Administration officials said the new labeling does not prevent doctors from prescribing AZT at higher or lower dose levels.

#90016u1219 01/16/1990 ~United Press International

CUPERTINO, CA (JAN. 16) UPI - Apple Computer Inc., citing "tougher times," announced cost-cutting moves that will take away jobs and reduce pay raises for its workers and eliminate company cars for its executives.

Apple chief executive John Sculley told employees in a two-page letter Monday that the company was being forced to reduce its operating expenses because of slowing sales.

Analysts have long complained that Apple's expenses are too high compared to other personal computer makers, who are also suffering from an industry slump. Apple shares, trading Over the Counter on the New York Stock Exchgange, closed at $34.25, down 25 cents, Monday. They lost another 25 cents in early trading Tuesday to $34.

Apple, which added 3,000 permanent employees in the fiscal year ended in September and has not had a major layoff since 1985, will eliminate an undetermined number of jobs through "normal attrition," "a significant drop in hiring," transfers from its Cupertino headquarters, consolidation and

some permanent cuts. The company cut a small number of jobs in September.

"We operate in a cyclical industry where even the most successful companies must have the flexibility to move quickly when times get tougher " Sculley said in his letter. "This is one of those times."

The company will begin reviewing salaries every 12 months instead of every six months, with a pay freeze for the next six months; modify its employee profit-sharing plan to more closely reflect Apple's financial performance; and end its tradition of letting its executives use company-owned cars. "We've succeeded in times of rapid growth. Now we must prove we can succeed in times of slower growth," Sculley said.

Apple officials warned investors and industry analysts last month that net income for the quarter ended Dec. 31 would fall below the $1.10 per share posted in the year-earlier period. Its stock lost nearly a quarter of its value.

Apple has about 12,000 employees worldwide, including 5,500 in the Bay Area. The company paid out $49.4 million last year in profit-sharing, even though its profits fell far short of expectations.

#90016u1233 01/16/1990 ~United Press International

(JAN. 16) UPI - Police in Colombia say 15 armed men in military uniforms kidnapped 32 farmers from a village. The so-called ''Extraditables'' group of drug traffickers has launched a campaign of kinapping to scare the government away from its war on the cocaine industry. In another incident, officials say a retired Colombian army sergeant investigating military drug connections was murdered in his hospital bed, despite strict security at the military hospital.

American Telephone and Telegraph is bracing for a full business day with lots of phone traffic. From yesterday afternoon until almost midnight... A-T-and-T officials say customers trying to make long distance calls got recordings telling them to try again later. The company still isN'T quite sure why that happened. But they think they've fixed the problem. They'll find out today when many workers get back from a three-day weekend and start making calls.

British Foreign Secretary Douglas Hurd said today that the only way to discourage more Vietnamese boat people from coming to Hong Kong is to force refugees already there to go back. His words were met with clenched fists and angry shouts from one-thousand refugees who face the prospect of being forcibly shipped back to Vietnam. Hurd's tour of a refugee camp today was marred by the protest.

The man who U-S officials say headed Manuel Noriega's secret police goes to court in Miami today for a bond hearing on drug trafficking charges. Lawyers for Lieutenant Colonel Luis del Cid plan to argue that their client was ''just following orders'' from Noriega when he protected cocaine shipments to the United States. They want his case separated from Noriega's.

#90016u1242 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - The black lung benefit claims system pits ''poor, old, sick coal miners'' against the government establishment and unfairly denies the miners compensation they deserve, a lawyer told the Supreme Court Tuesday.

The justices heard arguments from the Labor Department and a West Virginia lawyer who challenged the constitutionality of the Black Lung Benefits Act which sets up the system for paying lawyers who argue cases for miners suffering from the disease caused by inhaling coal dust.

A decision in the case is expected before the court recess for the summer.

In October 1988, the West Virginia Supreme Court ruled unconstitutional the system of dealing with more than 7,000 applicants a year for black lung benefits, saying the complex procedure deprived miners of their due process rights.

The Labor Department appealed the decision, arguing the current set up is fair to most people and unnecessary changes would only make it worse.

The system currently imposes restrictions on how and when attorneys representing claimants can be paid, causing some lawyers - at least in West Virginia - to refuse to handle the cases.

''Three-quarters of the claimants never finished high school,'' Jane Moran representing West Virginia lawyer George Triplett, told the Supreme Court. ''The system pits poor, old, sick coal miners'' against government lawyers, well-schooled in the benefits laws.

''(The system) is unconstitutional in that the method as it is appliad prohibits claimants from getting benefits,'' Moran said, adding that many cases take from six to 10 years to settle.

The Labor Department argued that Congress drafted the Black Lung Benefits Act to protect claimants from lawyers who might overcharge or otherwise exploit them or their survivors.

Labor officials say that applicants in most cases do not need attorneys

and that they hire specialists whose job it is to help miners apply for the monthly benefits.

''The (state supreme court), by holding that the fee system is unconstitutional, casts a cloud over the legitimacy of the program,'' said Michael Dreeben, representing the government.

''We believe that the attorney fees system is constitutional,'' Dreeben said. ''The benefits go for the benefit of the qualified claimant or the claimants' survivors. The system is structured so that it, in effect, does not turn into a lawyers relief act.''

The case developed in 1987 after a West Virginia state bar ethics committee found Triplett, an Elkins, W.Va., lawyer, charged contingency fees to 15 black lung claimants between 1978 and 1983. Triplett contended he charged the fees because the resolution of the cases were too long delayed.

The committee went to the West Virginia appeals court, seeking enforcement of a six-month suspension for Triplett. The court refused and found the attorney's fees provision unconstitutional.

The Labor Department says the lower court decision does not prevent it from enforcing the attorney's fees provision elsewhere in the nation but it does prevent it from using state bar disciplinary proceedings against lawyers in West Virginia, a major coal producing states.

BANGKOK, THAILAND (JAN. 16) UPI - The bodies of 12 partially clothed or naked Vietnamese women and two boys washed ashore in southern Thailand, apparently strangled and thrown into the sea after a pirate attack on a refugee boat, police said Tuesday.

''On Sunday and Monday villagers reported finding a total of 11 bodies floating near the shore,'' said Lt. Col. Ratakan Kanjanachote, police chief of Tha Sala District, 380 miles south of Bangkok.

On Tuesday, three more bodies - one woman and two boys - were found in the same area, apparently victims of the same incident, a police official said.

Ratakan said the victims, some clad only in pants or underpants, others naked, still had nylon ropes and marks of strangulation on their necks.

They were identified as Vietnamese by their appearance and by the Vietnamese money found on one of the bodies, he said.

He said the corpses were too badly decomposed to determine if they had been sexually assaulted before being killed. It was believed they were killed about 10 days before being found, he said.

The Malaysian news agency Bernama reported earlier that the bodies of 23

Vietnamese men and women came ashore in Malaysia over the weekend.

WASHINGTON (JAN. 16) UPI - Former U.S. Surgeon General C. Everett Koop recommended Tuesday that the federal government adopt uniform standards that would allow private employers to test workers and job applicants for illegal drugs.

Koop said studies show that 14 percent to 25 percent of the nation's workers on any day have illegal drugs in their systems, but that 80 percent of the American work force believes testing would deter narcotics use.

''The American workplace is the proper arena to address our drug problem '' Koop said at a news conference called by Sens. Orrin Hatch, R-Utah, and David Boren, D-Okla., on their bill to establish minimum federal standards for private employers to test workers for drug abuse.

The bill would require the secretary of Health and Human Services to establish a certification program for private laboratories to test private sector workers and job applicants for drugs.

A positive test must be confirmed by a second laboratory before penalties could be imposed. Those in sensitive posts may be reassigned without pay loss pending results of the second test. Standards would guard the privacy of those tested.

Testing would be performed during a physical exam or after an accident on the job. Random drug testing would be permitted only in situations where safety is important and employers would be required to set up drug education programs.

''This legislation does not mandate that employers drug test their employees,'' Hatch said. ''What this bill does do is protect American workers from potential abusive practices in private drug testing programs. It will end discriminatory practices, protect employees' privacy rights, and ensure medical and scientific integrity in conducting such tests.''

The bill, to be introduced during the next congressional session, was endorsed by the National Association of Manufacturers.

BONN, WEST GERMANY (JAN. 16) UPI - East German Economic Minister Christa Luft Tuesday announced during her first official visit to West Germany

that a new East German investment law allowed majority holdings by certain West German companies.

On her two-day trip to West Germany, Luft met with her West German counterpart Helmut Haussmann to discuss the improvement of economic contacts between the two German states.

A main topic on the agenda of the talks was the new East German investment protection law passed by the East German parliament last Friday. Luft announced the new law allowed in most cases minority holdings of up to 49 percent by West German companies planning joint ventures with East German businesses.

But she said an exception would be made for small-sized and middle-sized industries as well as for Western companies bringing technical know-how into the country. Luft said these exceptions were necessary in the "economic interest of the country."

Haussmann welcomed the announcement as a great step toward more concrete economic ties with East Germany, adding, "the German-German economic routine has begun."

The two ministers also agreed on establishing a joint group of economic experts to work out a bilateral investment protection agreement. West German business leaders had been arguing in favor of East Germany abandoning the minority holding clause to encourage foreign investment in East Germany.

In East Berlin last weekend, Luft told a meeting of East and West German business leaders East Germany was ready to begin "the transition to an efficient market economy," indicating East Germany was no longer intent on trying to find a middle way between a centrally planned and free market economy.

#90016u1330 01/16/1990 ~United Press International

WEST BERLIN (JAN. 16) UPI - The demonstrators who stormed the secret police headquarters Monday in East Berlin caused millions of dollars in damage, destroyed offices and looted the barber shop, book store, kitchen and storerooms, the East German deputy interior minister said Tuesday.

Maj. Gen. Dieter Winderlich, who is in charge of all East German police, told reporters the rampage by several thousand people who forced their way into the headquarters of the hated Stasi security police Monday evening lasted about two hours.

He said about 100,000 people were outside the building at 5:25 p.m. for a scheduled demonstration called by the New Forum, a main opposition party, to press Prime Minister Hans Modrow for faster action on dismantling the security police.

The new government has agreed to dissolve the organization, but tens of thousands of employees remain on the security police payroll.

Shortly after the protest began, two groups of several thousand people each broke through two doors into the headquarters, Winderlich said in a news conference statement carried by the official East Germans news service ADN.

''They destroyed offices, fixtures, doors, windows, threw furniture and files and other objects out windows,'' Winderlich said. ''They looted the barber shop, the book store, the kitchen and storerooms.

''The premises were badly damaged and laid waste. Sheet steel safes were broken into and equipment stolen,'' he added. ''There was damage in millions through destruction and theft.''

The demonstrators also broke into the area dealing with counter-espionage, Winderlich said.

He said East Germans were not the only ones involved, hinting that people of other nationalities participated, but he did not elaborate.

The security headquarters received two telephone bomb threats before the demonstration began and 300 construction workers opposed to the Stasi bricked up one of the doors, Winderlich said.

Manfred Sauer, deputy head of the East German Cabinet's administrative department, told the news conference authorities ruled out the possibility that Stasi provocateurs started the invasion to discredit the opposition.

Hannelore Koehler, a spokeswoman for the Citizens Committee for Dissolution of the Stasi, agreed.

At an earlier East Berlin news conference, Maj. Gen. Dirk Bachmann, the chief of the East Berlin police, estimated damage at several hundred thousand dollars.

Bachmann said only opposition appeals for calm, the appearance of Modrow

at the headquarters and the restraint of police prevented deaths and injury.

Witnesses said the invaders forced their way into the building in East Berlin's Lichtenberg district, broke doors and windows, threw files and furniture out windows. They shouted ''Stasi to the factories,'' ''The people are coming'' and scrawled on walls, ''Down with the Communists,'' and ''Stasi, Gestapo, KGB.'' A skeleton left hanging outside carried the slogan: ''Against a revival of the Stasi.''

It was only one of many anti-communist demonstrations Monday in East Germany. About 500,000 people rallied and marched in at least 12 East German cities.

Bachmann said ''hate and vengeance'' motivated the East Berlin demonstrators.

''If there were no dead and seriously injured last evening it is mainly due to the representatives of citizens committees, of those demonstrators who rejected violence, the opposition groups and Hans Modrow personally and the restraint of the People's Police, whose actions in no way led to an escalation,'' Bachmann said.

Witnesses said Modrow's plea to end the action was greeted by both applause and boos and shouts of ''Down with the Communists.''

The police did not interfere and the demonstrators did not encounter any Stasi police in the building. Some thought the Stasi had fled to the cellar.

New Forum called the rally to demand a quicker dismantling of the state security police, which it is believed still employs 55,000 of its original 85,000 full-time workers.

The prime minister, addressing the protesters on a loudspeaker, said he understood the opposition to the secret police but warned that the country's democratic revival should not be endangered by violence. ''Whoever destroys anything here should know that he is hurting himself,'' Modrow told the crowd.

Opposition leaders, interrupting their weekly ''round-table'' meeting with government officials, raced to the building to bring the protest under control. One opposition leader issued an appeal by television for the demonstrators to halt their action.

East German television interrupted its programming to read a government statement that said the country's young democracy was in ''great danger.''

''Irresponsible elements under cover of darkness stormed and wrecked the former headquarters of the Office for National Security,'' the statement said. ''Citizens should preserve calm and caution and show their civic consciousness.''

#90016u1349 01/16/1990 ~United Press International

CHARLOTTE, NC (JAN. 16) UPI - John Wesley Fletcher, one of the more colorful characters in the PTL scandal, pleaded innocent Tuesday to charges he lied to a grand jury about why he introduced Jim Bakker to Jessica Hahn.

Fletcher is charged with one count of perjury stemming from two appearances before the federal grand jury that indicted Bakker.

In a Penthouse magazine article published last year, Fletcher claimed he and Bakker had been sexual partners, an allegation Bakker denied. Fletcher also claimed in the same article he and Hahn had sex before she met Bakker an allegation she denied.

Fletcher appeared frequently on Bakker's ''PTL Club'' television program and traveled with Bakker to Florida in December 1980 for a telethon.

During that time, Bakker confided to Fletcher fears that wife Tammy Faye was in love with country singer Gary Paxton, who became a gospel recording artist after two hits in the 1960s, ''Monster Mash'' and ''One-Eyed, One-Horned Flying Purple People Eater.''

Fletcher subsequently recalled Bakker told him, ''Get me a woman,'' and Fletcher called his one-time babysitter, church secretary Hahn, offering to pay her airfare from New York to Florida to meet Bakker.

But when prosecutors asked Fletcher as he testified before the grand jury on Sept. 24, 1987, if he brought Hahn to Florida so Bakker could have sex with her, he answered ''No, sir.''

Then on Sept. 20, 1988, when asked if he ''brought a woman down to sleep with Jim Bakker,'' Fletcher answered, ''That's right.''

At his arraignment Tuesday, U.S. Magistrate Paul Taylor asked Fletcher how he would plead to the charge. The defendant answered simply, ''Not guilty.''

Fletcher's lawyer, in an interview after the arraignment, conceded he has been one of the more colorful characters in the PTL scandal.

''Colorful may be the understatement of the decade,'' said Fletcher's

court-appointed lawyer, George Laughrun III. ''How about if I just say no comment, no comment.''

Fletcher is a former Durham, N.C. cab driver and bartender who got religion through the Assemblies of God Church, and was ordained and defrocked twice for alcoholism.

His lawyer said Fletcher would not change his plea and expected to stand trial in April.

Bakker was convicted in October on 24 counts of fraud and conspiracy related to money-raising tactics at PTL, where the ministry sold so-called ''lifetime partnerships'' in order to build the 2,000 acre Heritage USA resort and theme park.

The scheme raised $158 million, but much of the money was diverted to other purposes, including about $4 million to enrich the Bakkers and $265,000 to pay Hahn to keep quiet about her sexual encounter with Bakker.

In December, Fletcher and the Rev. Sam Johnson were both charged with perjury for their testimony before the grand jury. Johnson did not appear at the arraignment, which is optional, but his attorney advised the court he will file papers Wednesday indicating a not guilty plea.

Bakker, meanwhile, was sentenced to 45 years in prison and is doing time at the Federal Medical Center in Rochester, Minn. His lawyer has appealed the verdict.

#90016u1369 01/16/1990 ~United Press International

BRUSSELS, BELGIUM (JAN. 16) UPI - European antitrust officials are warily eyeing proposed airline consolidations in France and Belgium in hopes of avoiding "the American situation" of a few dominant carriers, a European Community spokesman said Tuesday.

The proposed takeover by Air France of Union de Transports Aeriens, announced last Friday, and Sabena's plan to link up with British Airways and KLM Royal Dutch Airlines, unveiled Monday, will be carefully scrutinized by the European Community's competition officials.

The EC is committed to liberalizing Europe's air transport industry as part of the 12-nation Community's 1992 open-market program. On the other hand, European airlines, plagued by delays and a shortage of gates at many of the region's aging airports. seek to become competitive in the transcontinental market with large American carriers and, to a lesser extent, with growing Asian airlines.

The 21-member Association of European Airlines reported Tuesday that scheduled passenger traffic increased 11 percent over the past year and nearly 22 percent of all departures were delayed by 15 minutes or longer.

"We are committed to liberalization, but what we want to avoid is the American situation, in which after liberalization there were left a very small number of large carriers," said a spokesman for Leon Brittan, the EC commissioner for competition policy.

Deregulation of the U.S. airline industry, begun under former President Carter in the 1970s, resulted in a wave of mergers in which many well-established regional carriers were swallowed up by larger competitors.

"We want to protect competition," the spokesman said. "One major way of doing it is to give small- or medium-sized carriers a chance to compete." There were also outside calls for a skeptical look at the proposed airline consolidations.

The Financial Times of London, in its lead editorial, said the proposed Air France deal with UTA "appears intended largely to entrench historic dominance" rather than spur efficiency. The newspaper called for "weakening the incestuous relationships between individual countries and their flag carriers, which have long been used to control national markets."

The EC was faced with similar antitrust concerns a few years ago when

British Airways took over British Caledonian. An agreement was reached between British Airways and Community regulators after EC officials insisted that Caledonian's gates at London's Gatwick Airport go to another carrier.

Officials said an initial assessment of the deals involving Air France and Sabena would be made in the next three to four weeks. "Then, if we decide there are serious deficiencies, we would have to take some more time to review both deals," a spokesman said. "We could have a quick agreement with all of the parties involved. In the Caledonian matter, we negotiated with British Airways until we got terms favorable to us."

Air France agreed to pay $667 million for 55 percent of UTA, the principal airline between France and Africa. Air France would also gain control of Air Inter.

Sabena's reorganization called for British Airways and KLM each to own 20 percent of shares in a new airline subsidiary, Sabena World Airways, at a price of about $56 million each.

The Belgian transport minister said Sabena needed to expand with outside investment because it has had "all too low a profile to square up to competition" from large carriers.

#90016u1387 01/16/1990 ~United Press International

DETROIT (JAN. 16) UPI - General Motors Corp. will shift production of its large rear-drive station wagons from plants in Texas and Georgia to its Willow Run plant in Ypsilanti, Mich., a spokeswoman said Tuesday.

However, company spokeswoman Sharon Hines said the consolidation will not mean any new jobs in Michigan or mean fewer jobs at its Arlington, Texas, plant.

''The consolidation of wagons at Willow Run has always been in the plan, thus there will be no changes in employment,'' Hines said.

Production of the current style Chevrolet Caprice wagon and Oldsmobile Custom Cruiser wagon at Arlington will end this April, with the plant's 3,800 hourly workers to be idled as GM changes over to production of its all new Caprice sedan.

Arlington workers will also build the full-sized Cadillac Brougham when they resume production this summer, Hines said.

But the new versions of those wagons will be built at Willow Run, which is already producing GM's all-new 1991 Chevrolet Caprice sedan with about

4,000 workers.

GM's Lakewood, Ga., plant, which employs about 2,200 workers, will be indefinitely idled this March as announced by GM last September, Hines said. Production of the current style Buick Estate Wagon built there will end at that time, with the new version to be built at Willow Run.

The new Caprice sedan is to go on sale this March, with GM's new wagons will debut this fall.

Separately, officials with GM's idled Leeds plant in Kansas City, Mo., told about 3,000 laid off workers during the weekend that the plant was out of the running to produce a new GM product.

Leeds Personnel Director Ken Euritt said Tuesday that local GM officials still hoped to find a use for the plant, but did not want to mislead the workers about the future of Leeds.

Euritt said Leeds was excluded from consideration for any new product line partly because of the plant's age. Leeds was built in 1928 but has been updated over the years.

''Our best background was in automotive assembly, and we don't see anything there,'' he said.

At its height of production, Leeds employed about 4,500 people. In 1987, GM laid off about 2,900; the remaining 1,600 workers were laid off in April 1988.

Elsewhere, about 400 workers employed at GM's BOC-Pittsburgh plant returned to work Tuesday following a two-week layoff because of sagging car sales.

The workers returned to the plant after being laid off Jan. 2, GM spokesman Phil Workman said.

The facility makes sheet metal roofs, hoods, fenders, tailgates and floorpans for all GM vehicles.

#90016u1392 01/16/1990 ~United Press International

LIMA, PERU (JAN. 16) UPI - Assailants hurled three bombs at the building housing Marines who provide security at the U.S. Embassy, a spokesman said Tuesday.

No Marines were injured in the Monday night attack but a private security guard in the area at the time suffered minor injuries from flying glass,

police said.

Three attackers got out of a car and threw bombs at the building before fleeing, the embassy spokesman said. The explosions destroyed the door to the residence, damaged the front of the building and broke windows.

An hour after the attack the car used by the assailants was found abandoned, police said.

The embassy said some 20 Marines normally live in the residence in the Miraflores area of southern Lima.

The attack is the second against the building. The first occurred Oct. 25 when a car bomb exploded in front of the residence but no one was wounded and there was only minor damage.

#90016u1398 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - Defense Secretary Dick Cheney delayed announcement of plans to increase the military's role in the drug war Tuesday as a possible centerpiece of the initiative, warships off Colombia seemed to be in jeopardy of being dropped.

News reports earlier this month that the United States was sending warships to the coast of Colombia to interdict drug traffickers was portrayed in Colombia as a naval ''blockade'' and drew protests from the Colombian government as well as from Bolivia and Peru.

Administration officials said they still hope to implement the plan, but only if Colombia makes an about-face and supports it.

''The idea of using our naval forces to help with interdiction in those areas is something we have discussed and are continuing to discuss with Colombia,'' said White House press secretary Marlin Fitzwater.

''But there will be no decisions along those lines without their full cooperation and consent.''

Fitzwater said, ''our relationship (with Colombia) is that sensitive'' that the administration would not place ships off South America, even in international waters as proposed, without their approval.

The administation put its plan to use warships on hold last week following concerns by Latin American nations about gunboat diplomacy.

An administration official, speaking on the condition of anonymity, said at the time that the United States hoped to have the plan back on track

with a U.S. naval carrier off Colombia, as early as the end of this month.

But those hopes have been dashed by continued Latin American opposition.

Cheney had planned to announce a host of new military anti-drug plans this week. But Pentagon spokesman Pete Williams said Tuesday that the defense secretary has decided to postpone the announcement for ''quite a while.''

No date was set for the announcement, though it could come after President Bush holds a summit Feb. 15 in Cartagena, Colombia, with the governments of Colombia, Peru and Bolivia - the world's major cocaine-producing countries.

Cheney decided to delay the announcement in response to the ''sensitivities'' of the Latin Americans, particularly the Colombians, Williams said.

The Caribbean Task Force is just one of a series of anti-drug missions that the military's 10 top field commanders have proposed to Cheney. They range from launching satellites to spying on cocaine traffickers to interdicting heroin shipments at sea as they are smuggled out of Southeast Asia.

#90016u1416 01/16/1990 ~United Press International

LONDON (JAN. 16) UPI - Stock prices closed sharply lower in moderate trading Tuesday on the London International stock exchange as investors reacted to the losses on Asian markets and worries that British interest rates could move higher.

The key Financial Times 100-stock index, which fell 13.9 points Monday, closed down 17.1 points at 2,349.1. The narrower top 30 industrial average fell 21.2 points to 1,875.7.

Volume amounted to around 480 million shares, compared with 359 million shares changing hands Monday.

Analysts said prices moved lower from the opening bell as investors showed signs of worries over the government's anti-inflation strategy they feel will fall apart unless there is another increase in interest rates.

Adding to the worries, maintenance workers at British Ford began an unofficial strike at two plants and analysts said investors showed growing concern that British wage pressures were developing at a worrisome rate.

Traders said other factors that influenced trading included talk that a major U.S. securities house recommended its clients sell in the face of

global uncertainties and speculation about possible further interest rate increases in Japan and West Germany.

Among the most widely traded stocks, Tilbury Group fell 43 cents to $9.88 on interest rate worries, while Miller Stanley dropped 40 cents to $2.75 following a profits warning.

Other construction stocks also fell on speculation about interest rates.

Wellcome PLC lost 40 cents to $11.76 after the U.S. government recommended that the dosage of Wellcome's Retrovir drug be reduced.

British Airways lost 13 cents to $3.35 as investors worried that the recent surge in oil prices may have an impact on the airline's earnings.

Among the day's other active issues, Eurodisney lost 32 cents to $14.96, Eurotunnel fell 43 cents to $9.73, British Land gained 23 cents to $6.43 and Marina Developments jumped $1.23 to $7.76 on a bid approach.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed sharply lower in active trading for the second consecutive day.

The key German Stock Index, which lost 14.05 points Monday, fell 52.93 points, or 2.87 percent, to 1,788.68.

Traders said the market continued to be depressed by the unrest in the Soviet Union and the sharp decline on the Tokyo Stock Exchange.

Losses were chalked up in all sectors, with the stronger U.S. dollar on foreign currency markets not able to help export-oriented companies that usually benefit from dollar rises, traders said.

#90016u1429 01/16/1990 ~United Press International

BUCHAREST, ROMANIA (JAN. 16) UPI - The Romanian press criticized the interim government Tuesday for bowing to the demands of an unruly mob and hastily issuing decrees, including the outlawing of the Communist Party.

The daily Azedarul, a liberal newspaper that resumed publication after dictator Nicolae Ceausescu was ousted Dec. 22, condemned the interim government's capitulation to the mob, saying, ''A government without justice is a great robbery.''

Interim President Ion Iliescu announced to a noisy crowd in front of the ruling National Salvation Front's headquarters in Bucharest Friday that the Communist Party was outlawed but the following day the government pulled back and said it would hold a referendum on the issue.

A government spokesman admitted Monday that the decision to outlaw the Communist Party was a mistake made in defiance of advice from a group of veteran opposition political leaders.

''We made a mistake,'' said spokesman Aurel Dragos Munteaunu. ''When I speak about learning the process of democracy, that means everyone here has to learn, including the government, even the ruling council of the National Salvation Front.''

Silviu Brucan, president of the Commission for Political Affairs, agreed.

''It was a mistake to outlaw the Communist Party,'' he said, adding that many upstanding citizens of Romania were among the party's 4 million members.

Azedarul, which means 'The Truth,' questioned events leading up to the decision to hold the referendum later this month, saying, ''The decision to have a referendum January 28 needs some explanation,'' but said the public vote was a good idea.

Iliescu announced the ban, unprecedented in the East Bloc, under pressure from a crowd of 10,000 protesters gathered in Victory Square outside his headquarters.

The demonstrators shouted ''down with communism'' and also called for the execution of members of Ceausescu's family and his secret police.

Iliescu withdrew inside, where he had been meeting with members of the National Peasant Party, comprised mostly of elderly men who had been politically active before Ceausescu's 24-year reign of terror. They advised Iliescu and other members of the National Salvation Front against responding immediately to the crowd.

But Iliescu reappeared and told the mob the Communist Party was illegal and announced a referendum on the death penalty Jan 28.

The ruling front had abolished the death penalty after Ceausescu and his wife, Elena, were executed Christmas Day.

The day after Iliescu's dramatic announcement, the former secretary of the Communist Party's central committee said the fate of the party should be left for the people to decide.

Azedarul objected to the swiftness of the Front's decision and advised the interim goverment to give more thought on issues before taking action in the future.

On Monday, West German Foreign Minister Hans-Dietrich Genscher said he would urge the European Community to provide emergency aid to Romania as it struggles to emerge from 24 years of dictatorial rule.

#90016u1458 01/16/1990 ~United Press International

(JAN. 16) UPI - Business officials around the country are holding their breath to see if their A-T-and-T long-distance phone service will run without a glitch today. The communications giant was able to ''bandage'' a computer software problem that disrupted long-distance service nation-wide yesterday, but A-T-and-T officials are NOT sure if they will find the exact cause of the trouble. The problem was discovered last night, and full service appeared to have been restored overnight.

Indiana police say thick fog led to a seven-vehicle pile-up on Interstate 70 near Knightstown that killed an Indianapolis couple. Police say four trucks and three cars were involved in the crash, which left at least three people hurt. Authorities say drivers approaching a thick patch of fog applied their brakes too fast, causing the chain-reaction accident in east-central Indiana. Police say the car carrying Gerald Greene and his wife Viola was crushed between two other vehicles.

The Washington Post says government counts of the number of American health care workers infected with the AIDS virus are incorrect because accidental exposure is- quoting here- ''notoriously under-reported.'' The paper says the Centers for Disease Control in Atlanta documented only 19 cases in the United States and 27 cases world-wide. But officials told the paper that the count is unreliable and- quoting now- ''Basically, nobody knows how many health care workers have been infected on the job.''

#90016u1482 01/16/1990 ~United Press International

NEW YORK (JAN. 16) UPI - CBS came in second in the weekly ratings for the fourth time in the last five weeks thanks to football - CBS had it and ABC did not - it was reported Tuesday.

NBC was No. 1 as usual - the 81st time in the last 82 weeks.

The top-rated show of the week was the one-hour overrun into prime time of the NFL championship, Los Angeles Rams vs. the San Francisco 49ers, and the post-game analysis tied for eighth. CBS had to pre-empt ''Murder, She Wrote,'' but still won the night with its highest Sunday ratings of the season.

The CBS Sunday movie, ''Pair of Aces,'' was the network's third highest-rated Sunday movie of the season, and tied for 19th place with the

NBC Sunday movie, ''Without Her Consent,'' which was that network's best-performing Sunday film this season. ABC's ''Jury Duty: The Comedy'' was in 56th place.

Another part of the picture was CBS winning Monday night, which it did with its usual stream of comedies, including the ''Newhart'' episode devoted to Stephanie's baby, which tied with ''Designing Women,'' also a CBS Monday comedy, and ''Hunter'' (NBC) for 14th place. It was ''Newhart's'' best showing of the season.

With ABC's NFL Monday football finished for the season, the network filled the football time slot with ''Rock Hudson,'' a biopic which tied for 30th. The competition on NBC was the second installment of the three-part ''Drug Wars: the Camarena Story,'' which was 34th.

''Drug Wars'' in its three nights averaged a 15.3 rating and a 23 share - not outstanding, but second highest rating for a miniseries this season, topped only by ABC's ''Small Sacrifices.''

''The Simpsons,'' the outrageous new adult cartoon show on Fox, ranked 48th in its series debut, with a 12.7 rating and a 19 share - three share points below ''The Simpsons'' Christmas special.

In the evening news ratings, ABC's ''World News Tonight'' with Peter Jennings was back in first place with an 11.9 rating and a 21 share. ''NBC Nightly News'' with Tom Brokaw took second place with a 10.9 rating and a 19 share. ''CBS Evening News'' with Dan Rather dropped from first to third place with a 10.8 rating and a 21 share - which is only a tenth of a ratings point behind NBC.

NBC won the ratings race for the week ending Jan. 14, according to the A.C. Nielsen Co., with a 15.4 rating and a 25 share. CBS took second place with a 13.4 rating and a 21 share while ABC was third with a 13.2 rating and a 21 share.

The 17-week-old season-to-date ratings show NBC with a 14.8 rating and a 25 share, ABC with a 12.9 rating and a 22 share, and CBS with a 12.2 rating and a 20 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 programs for the week ending Sunday, Jan. 14, according to the A.C. Nielsen Co., were:

1. NFL championship, Los Angeles vs. San Francisco (CBS)
2. Roseanne (ABC)
3. The Cosby Show (NBC)

4. Cheers (NBC)
5. Different World (NBC)
6. Golden Girls (NBC)
7. 60 Minutes (CBS)
8. (tie) Empty Nest (NBC)
9. Post-game NFL championship (CBS)
10. Dear John (NBC)

#90016u1497 01/16/1990 ~United Press International

FORT WORTH, TX (JAN. 16) UPI - Claiming the rising cost of jet fuel is eating into its profits, American Airlines has announced plans to increase most of its one-way discount fares by ten percent. The carrier Monday said the majority of the fares used mostly by business travelers will go up, effective Feb. 1.

American will join Northwest, Delta and other carriers in adding a $6 jet fuel surcharge for the one-way tickets and $12 for round trip tickets starting Feb. 9. The increases were begun about two weeks ago by Houston-based Continental Airlines.

American officials said they now have to pay 96 cents a gallon for jet fuel, compared with 65 cents in November. This means the company's January fuel bills could be as much as $71 million higher than the same month a year ago.

Oil companies claim the extended cold weather and a series of refinery breakdowns and accidents have combined to hike the fuel's price. But they add the prices are expected to return to lower levels soon.

#90016u1505 01/16/1990 ~United Press International

(JAN. 16) UPI - TODAY'S PEOPLE:

CRUISE MARRIAGE CRASHES: The tabloid stories about Tom Cruise and Mimi Rogers turned out to be true. Cruise, whose career is at a high with the success of ''Born on the Fourth of July,'' and his actress wife issued a joint statement Tuesday to announce they are splitting up. The statement said there had been some ''very positive aspects'' to the marriage but there also were ''some issues which could not be resolved.'' Cruise, 27, and Rogers, 33, were married on May 9, 1987.

IN COURT: Even if Bjorn Borg hadn't retired from tennis, he'd be spending more time in a court than on one this year. Borg was in Stockholm courtroom Tuesday for the first of six lawsuits he's involved in this year. In Tuesday's case, Borg is being sued for $85 million by Lars Skarke

who claims Borg violated the sharehold agreement in their partnership in the Bjorn Borg Design Group, which went bankrupt last summer. On Monday Borg will be taking on a Swedish magazine, Z, in a $620,000 suit because of an article quoting Jannike Bjorling, the mother of his 4-year-old son, as saying he used cocaine. Borg is also suing Z over a T-shirt the magazine produced with pictures of ex-wife Mariana Simonescu and current wife Loredana Berte, an Italian pop singer, under the words ''Bjorn Borg Collection.'' Also on Borg's legal agenda is a $40,000 case against another magazine that said he and Berte had broken up, a suit against still another magazine that published nude pictures of Berte, and a custoday fight over his son.

CAULIFLOWER AND BROCCOLI: No one comes between Brooke Shields and her cauliflower. Shields's latest endorsement is for the Foxy vegetable company, which has released a poster featuring four alluring photos of the actress and a picture of two heads of cauliflower. She also will be doing television commercials for Foxy ... For the first time, a star on Hollywood's celebrated Walk of Fame is going to be awarded to someone connected to the James Bond films who did not play a villan. Albert R. ''Cubby'' Broccoli, 80, who produced 16 Bond movies, including ''Dr. No'' and ''License to Kill,'' was immortalized on the sidewalk Tuesday across the street from Mann's Chinese Theater, where many of his Bond movies premiered. Telly Savalas and Louis Jourdan already have bronze markers on the famous sidewalk honoring their individual career achievements, including their roles as bad guys in James Bond movies.

TYSON IN TOKYO: Heavyweight champ Mike Tyson arrived Tuesday night in Tokyo and indicated he isn't missing ex-wife Robin Givens. ''Two years ago I was married,'' he said. ''Now I'm a bachelor and it's much better being single.'' Tyson, who fought in Japan two years ago and will take on James Douglas at the Tokyo Dome on Feb. 11, showed up in a full-length white fur coat and his promoter, Don King, wore an identical one. ''We look forward to making more Nintendo (video) games and Suntory (beer) commercials,'' said Tyson, who is wildly popular in Japan. He brushed aside a traditional Japanese box dinner of rice and fish and grumbled, ''I want beef.''

GLIMPSES: The Rolling Stones start their nine-show stand in Tokyo on Valentine's Day. Mick Jagger has played Japan as a solo act but this will be the first time the whole band has performed there ... New York lawyer Barry Slotnick, who made a name for himself defending subway gunman Bernhard Goetz, is considering running for Congress. Slotnick, 50, said he was asked by Republican leaders to challenge Democratic Rep. Nita Lowey. ''Washington is where it's at,'' Slotnick said. ''Something is very wrong with this country and I think it can be saved only in Washington.''

#90016u1515 01/16/1990 ~United Press International

WARSAW, POLAND (JAN. 16) UPI - Albanian leader Ramiz Alia flatly denied the nation was under emergency rule and lashed out at Yugoslav news media for saying ''filthy things'' about his country, the Albanian news agency ATA reported Tuesday.

''The state of emergency, demonstrations, unrest and killings are found nowhere in Albania,'' Alia told workers Monday at an automotive plant in the capital, according to an ATA report monitored in Warsaw.

His comments followed reports in both the Yugoslav and Western press that a state of emergency had been declared in parts of Albania following protests in several cities against the Stalinist government.

Yugoslav television has carried reports in recent days of alleged atrocities by Albanian authorities, including the hangings of four student protest leaders and the slaying of refugees trying to flee the country.

A tiny, mountainous country bordering Yugoslavia, Greece and the Adriatic, Albania is the only European nation still ruled by a hard-line communist regime. Its leaders have kept the country almost completely cut off from the rest of the world and have only recently begun to admit a limited number of tourists.

Alia, in his speech Monday, accused Yugoslavia of fabricating stories about unrest in Albania to divert attention from its own problems.

''With such filthy things does the Yugoslav news agency nourish the world public opinion,'' he said.

''We are not at all surprised at that, because the Yugoslav policy has always been anti-Albanian. Yugoslavia has never wanted to reconcile with the existence of the Albanian state and the independence of its people,'' he was quoted as saying.

Describing the country as ''an impregnable fortress,'' Alia said, ''Let the enemies of Albania bark as much as they can, our caravan will always march forward.''

In a related development, Greek officials revealed Tuesday that a high-ranking Albanian official would visit Athens Jan. 26 in an apparent bid to reduce tensions stemming from alleged human rights abuses in Albania.

Last week about 5,000 people, mostly Albanian exiles, demonstrated in Athens against the Albanian government's repressive policies. An estimated 400,000 ethnic Greeks live in Albania.

#90016u1516 01/16/1990 ~United Press International
LISBON, PORTUGAL (JAN. 16) UPI - A mysterious oil slick built up in the Atlantic Tuesday off the Portuguese island of Porto Santo and threatened a nearby nature reserve, officials said Tuesday.

Patches of the oil slick, first spotted Monday evening, were washing ashore along the tiny resort island's northern, eastern and southern shores, naval officials told the Portuguese news agency Lusa.

The slick, estimated at 9 miles long, was about 5 miles off the coast of the island, part of the Madeira Archipelago about 630 miles southwest of Lisbon, the officials said.

The oil slick was moving slowly south toward the Deserta Islands nature reserve about 37 miles away, Lusa said.

Cmdr. James Semedo, the Madeira naval chief, told Lusa the oil slick appeared to be a recent spill and that its origin was unknown.

Authorities said it is unlikely the slick came from the Spanish tanker Aragon, which lost about 25,000 tons of crude in the area two weeks ago, or from the huge spill of an Iranian tanker near the Moroccan coast late last month.

Analysis by JOAN HANAUER

NEW YORK (JAN. 16) UPI - Michael Caine drinks Dr. Henry Jekyll's elixir and howls in agony as his skins seems to boil and writhe and he is transformed into the monstrous Edward Hyde.

''It took four hours to put that makeup on,'' Caine said in a telephone interview from London. ''I didn't mind that so much - it was on their time. But it took an hour to take it off and that was on my time. Everybody'd gone home and there I was, sitting in the makeup room while two people dabbed, dabbed, and dabbed at me with grease.''

The result of this ordeal by makeup is ''Jekyll & Hyde,'' a whopping good retelling of the Robert Louis Stevenson classic, to air on ABC Sunday, Jan. 21, 9-11 p.m. Eastern time.

Caine easily dominates the screen as the complex Jekyll, a scientist who believes that chemistry, not biology, shapes a man and predicts that some day there will be drugs that will actually change personality.

Cheryl Ladd, more beautiful than ever, plays Sara, the unhappily married woman that Jekyll adores - and Hyde wants.

The show moves along at a machine gun pace, tells a rattling good story and ends with a shocking twist. Don't be in a hurry to switch channels. Wait for that last shot.

''It's a marvelous part for an actor, a classic actor's role,'' Caine said. ''I don't do much television - this is only the second television play I've done in 25 years. 'Jack the Ripper' was the first (seen in 1988).

''Both subjects appealed to me, both took place in London and I'd never done any Victorian stuff before.''

Caine said with two very well done film versions of the story - in 1932 with Fredric March and in 1941 with Spencer Tracy - the movie industry was unlikely to make a third. If he wanted to do it, it had to be for television.

The TV film has already played in Britain.

''We got the same kind of ratings that you'd get for the Super Bowl in America,'' he said with satisfaction.

Since the makeup was at best tedious, what makes the dual roles such an actor's delight?

''It's because the character changes all the time,'' Caine said. ''If you look at the first 10 pages of a script and the last 10 pages of a script and your character is still saying the same things, then not very much has happened in the middle. That's the quick way of doing it if you're lazy.

''In the case of Dr. Jekyll, he changes so much. Or course, with Hyde, the monster is the character and once you've got all that makeup on there's not much room for expression. It's the playing of Jekyll and his gradual deterioration into schizophrenia.''

The Stevenson story is considered a classic because although on the surface it's a sci-if horror story, on a more serious level it puts into physical expression the author's views on the duality of personality.

''Ours is a psychological thriller,'' Caine said. ''It's a definite portrait of a schizophrenic. I think it is the case that he did the murders looking just himself. Hyde is how he felt he looked - that's what he saw in the mirror when he looked at himself.''

Caine has mellowed about television.

''Television has come a long way,'' he said. ''Now they do marvelous things. Television used to be something that was a half hour long. Then they went the opposite way and did miniseries that were 30 hours long. Now they've decided miniseries don't work - after they made a lot of bad ones.

''Anything that's good works in entertainment. It's like someone getting a divorce and saying marriage doesn't work.''

Caine has returned to England to live after many years in California for the most obvious reason.

''I got homesick,'' he said. ''It's a very simple answer. Imagine yourself an American living in Europe for years and years. One day you say, I'd really like to have a hot dog and watch baseball on television instead of all this cricket. Living in California all those years, I thought, I'd really like to wake up one morning and have it raining. Now I wake up every morning and it's raining.''

Don't expect to see him on the London stage.

''I refuse to work 10 times as hard for one-thousandth of the pay in order to be lambasted by the critics. And I would be lambasted because as a movie actor I would have to be 10 times better than Olivier. And of course I'm not 10 times better than Olivier. An actor like myself, who went to America and became a movie actor, everyone throws their hands in the air aghast - selling out for the greenback dollar.

''It would be impossible for me to get good or even reasonable reviews in the theater. I'd have to be some sort of genius, and as I'm not, I'm not taking the risk. I'll just keep doing movies. It's what I like to do, what I've been doing for 26 years and I love it.''

Caine's current project is his autobiography for Random House. He will not tell all.

''I'm going to tell the funny bits,'' he said. ''I don't want to upset anybody. Life is too short and biographies are too long.''

#90016u1525 01/16/1990 ~United Press International

AMMAN (JAN. 16) UPI - King Hussein issued a decree Tuesday modifying martial law by transferring jurisdiction of many offenses, including those involving the ban on the Communist Party, from military to civil courts, Radio Jordan said.

The decree easing martial law, which Hussein imposed in 1957, also affects laws involving unlicensed firearms and bank forgery, the radio broadcast

said.

Under the anti-communism law enacted in 1953, any person affiliated with the Jordanian Communist Party found distributing communist leaflets or otherwise espousing communism faced arrest.

Accused members of the Communist Party still would face trial under the new decree, although the proceedings would be in a civil court rather than a military court. People accused of an affiliation with the Communist Party typically have been harrassed by intelligence agents and arrested without trial.

Hussein's decree also said any alleged violators of instructions and orders of the general military governor, who also is the prime minister, would be referred to civil courts rather than martial military courts.

Martial law has been enforced in Jordan for 40 years out of the kingdom's life of 60 years since independence, and the last time it was implemented was in 1967.

#90016u1551 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - Chrysler Motors is recalling thousands of its 1986 AMC Jeep Cherokees, Comanchees and Wagoneers to repair faulty air pollution control devices, the Environmental Protection Agency said Tuesday.

The EPA said only those Jeep vehicles equipped with 2.5-liter fuel-injected engines were subject to the recall, which is necessary to install new catalytic converters.

The agency said about 55,000 vehicles were affected by the recall and 40 percent already have been repaired under warranty provisions. The owners of the remaining 60 percent will receive recall notices from Chrysler and should make appointments with local dealers to receive free repairs, the EPA said.

The repairs are required to ensure the vehicles meet federal auto emission standards set under the federal Clean Air Act.

#90016u1558 01/16/1990 ~United Press International

VIENNA (JAN. 16) UPI - Gen. Colin L. Powell, chairman of the Joint Chiefs of Staff, opened unique informal talks between Eastern and Western military leaders Tuesday by saying those on both sides of the crumbling Iron Curtain agree ''the era of confrontation must end.''

Powell, head of a large U.S. delegation to the three-week conference, also said American troops stationed in Europe are not ''sacrosanct.''

''American troops are not occupying forces,'' he said, noting that President Bush has said U.S. forces will stay in Europe only as long as the governments and people of western Europe welcome them and NATO thinks they are needed.

The general's remarks came as the talks on security and defense began behind closed doors in Vienna's Hofburg Palace between chiefs of staff from 35 nations, including members of NATO and the Warsaw Pact as well as non-aligned European countries.

The unprecedented gathering, billed as a seminar on ''confidence and security building measures'' in Europe, is intended as a unique exercise in informal frankness aimed at making progress on European arms reductions.

But the seminar is not a formal negotiation and specific results are not expected. There will be no concluding document.

Powell said the United States' role in Europe was to serve collective security by supporting the notion of collective defense ''against a threat so great as to overwhelm the defenses of individual states.''

But he indicated such a threat was now diminishing.

''East and West have reached a common conclusion that the era of confrontation in Europe must end,'' Powell said. ''Sharing in this vision, we can all work together to usher in a new era of European peace, security and freedom.''

He said changes in Eastern Europe and the Soviet Union, along with broad arms reduction negotiations and East-West summitry, have brought hope to the world.

NATO, he said, was ''enormously heartened by the declarations and initial evidence of an historic redefinition and restructuring of Warsaw Pact doctrine and forces to a defensive posture.''

Powell said that brought the East Bloc into line with U.S. military policy which was also defensive.

''It is inconceivable that an alliance whose posture and purposes are subject to such intense public scrutiny in 16 democratic societies could ever undertake aggressive military action,'' Powell said.

He said the United States does ''not impose our views or military

strategies on the alliance. Consultations are fundamental to the existence of NATO ... Our disagreements take place under the glare of public scrutiny.''

Powell said there was no reason why military power in Europe should remain as it had for 40 years. He added the United States hoped one day that military demands on European alliances would be greatly diminished.

Agreement to hold a miltary doctrine seminar was reached last fall by delegates of the 16 members of NATO, seven Warsaw Pact states and 12 neutral and non-aligned European countries participating in the confidence building talks.

The proposal was one of several tabled by NATO in March 1989.

Four items are scheduled on the seminar's agenda: each country's military policies in general; the relationship of stated policies to actual force structures in the field; military activities and military training in each country; and military budgets.

John J. Maresca, the U.S. ambassador to the conference, said it would be an informal meeting to try to understand the intentions behind military force structures and activities. The seminar will also serve as a place for bilateral meetings between the chiefs of staff of the participating nations.

#90016u1591 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - A senior member of the House Armed Services Committee cautioned Tuesday against any 1991 budget proposals calling for the United States to unilaterally reduce military troop strength in Europe.

While conceding political change in Eastern Europe and the easing of the military threat to NATO and United States would produce congressional pressure for cuts, Rep. Ike Skelton, D-Mo., said the U.S. government must develop a long-term strategy for Eastern bloc nations before reducing troops.

''There will be an attempt to declare the Cold War over, but uncertainty is just as much an enemy as the Warsaw Pact,'' Skelton told reporters after returning from a trip to NATO points and to Hungary.

Although the Pentagon will not propose reductions, reduced tensions in Europe are expected to prompt congressional liberals to seek troop cuts and other defense reductions, with ''peace dividend'' savings shifted to social programs.

Skelton, like many others, said he expects NATO and Warsaw Pact nations, including the Soviet Union, to wrap up the first stage of a conventional force reduction treaty in the next year.

That pact will eventually lower U.S. troop strength in Europe to 275,000 and require both sides to junk or withdraw thousands of tanks, helicopters armored personnel carriers and artillery pieces.

A second stage, cutting troop levels to about 50 percent of current levels or about 150,000, is expected to follow talks about eliminating or reducing battlefield range nuclear weapons.

Skelton, who ranks ninth among his committee's 31 Democrats, said if the United States fails to develop a long-term strategy for Europe, ''We will have blown this whole situation. ... What we need is a new strategy that reflects changes in the threat to the United States and changes in the threat to the West.''

Skelton also said Warsaw Pact leaders want a conventional arms treaty to assist the withdrawl of Soviet troops from their nations, a hope the congressman said was explicitly spelled out by military officials in Hungary.

Skelton said he expects to see some bases in Europe designated for closure in the new budget. He projected operations of the 401st Tactical Air Wing, scheduled to leave Spain, will, as planned, be shifted to a newly constructed base in Italy.

On a domestic topic, Skelton said if the Bush administration junks the Minuteman 2 missile, some of which are based at Whiteman Air Force Base in Missouri, he will urge Defense Secretary Dick Cheney to find other operations for the base.

Whiteman has been designated as a home for the B-2 stealth bomber, and Skelton declined to predict how the projected 1991 purchase of five of the $532-million-a-copy planes might turn out at the end of the budget cycle.

#90016u1603 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - First lady Barbara Bush said Tuesday that ''Millie is out'' this year in the fashion newspaper ''W'' and to her pet English spaniel ''it was a bitter blow.''

She also reported that fake pearls, her trademark is a three-strand pearl choker, also are ''out.''

Asked if Millie was brooding about the magazine's statement, Mrs. Bush

said she did not think her pet ''gives a darn.''

She made the teasing comments, amid laughter, during an interview with wire service reporters.

''I think actually they're against animals,'' she grinned in referring to the fashion magazine.

The first lady said she is not a subscriber to ''W'' but her friends send her clips on the latest fashion pronouncements.

President Bush, who must have sensed that Millie was not enjoying the interview, sent an aide to fetch her to the Oval Office ''so that she could watch the squirrels'' playing outside.

-30- 1094

#90016u1604 01/16/1990 ~United Press International

CAPE CANAVERAL, FL (JAN. 16) UPI - The space shuttle Columbia, NASA's ''lady of the fleet,'' zoomed around the globe for a second week Tuesday in excellent shape and the ship's five astronauts pressed on in good health and high spirits.

Working a graveyard shift, skipper Daniel Brandenstein and crew devoted their eighth day in orbit to the pursuit of science, photographing the blue Earth below and studying the effects of weightlessness on the human body.

''The crew is in good spirits, doing good work. It's going very well,'' Columbia's lead flight director, Granvil Pennington, said from the mission control center in Houston.

The astronauts, racing along at 17,000 mph on their 10-day mission, also beamed home spectacular television pictures of a man-made snowstorm in space, the dumping of excess water from the shuttle's waste tanks.

''We're continually gaining insights and information on the hardware and the vehicle and this vehicle's performing very good,'' Pennington told United Press International. ''I say it's the lady of the fleet.

''It's a very, very good stout vehicle and it's showed itself to be in really fine shape,'' he added. ''It's doing an excellent job.''

NASA's oldest shuttle - on its ninth expedition into the great void - made a fiery debut April 12, 1981, in mankind's first flight of a reusable spacecraft. Built in the 1970s, Columbia is designed to fly 100 times.

The crew reported a navigational aid that sounded a false alarm Sunday

night behaved properly Tuesday, and a space diaper wrapped around a leaky humidity unit stopped water from trickling into an equipment compartment.

''We're in fat city for the rest of the mission,'' Brandenstein said of the apparently successful plumbing job.

Columbia rocketed into space on America's 33rd shuttle mission, the longest since the 1986 Challenger accident, last Tuesday from launch pad 39A at the Kennedy Space Center carrying Brandenstein, 46, co-pilot James Wetherbee, 37, Bonnie Dunbar, 40, Marsha Ivins, 38, and G. David Low, 33.

Air Force meteorologists reported the weather forecast ''looks real good'' for Friday's scheduled pre-dawn landing at Edwards Air Force Base in California's tumble-weed strewn Mojave Desert.

A major objective of the first of 10 shuttle flights planned for 1990 is keeping Columbia in orbit for a full 10 days as part of a program to eventually fly the spaceplane for missions of 16 days and longer.

During the flight, the astronauts also deployed a Navy Syncom IV communications satellite last Wednesday and used the ship's 50-foot, $50-million robot arm a day later to snare an 11-ton science platform falling back to Earth.

The Long Duration Exposure Facility, tucked safely in Columbia's 60-foot cargo pay, will be returned to scientists eager to study its 57 experiments that submitted a variety of materials to radiation and other hazards.

But in the waning day of the mission the astronauts turned their attention to their flying laboratory.

Dunbar climbed into a scientific sleeping bag for a ''lower body negative pressure'' experiment designed to force fluids back into her legs in an ongoing study of the effects of weightlessness.

The crew also ran an experiment to find out how small disturbances, such as Brandenstein's morning exercise on a treadmill, can induce motions in the shuttle affecting the growth of indium crystals, which have applications in electronics.

''You could tell the molten zone (of the crystal) actually (was) undulating while Dan was running on the treadmill,'' Low radioed mission control. ''It's pretty dramatic.''

Crystals of various materials routinely are grown aboard Columbia, as well as the shuttles Discovery and Atlantis, to take advantage of weightlessness, which allows astronauts to grow specimens larger and more

pure than those grown on Earth.

#90016u1605 01/16/1990 ~United Press International
BOSTON (JAN. 16) UPI - Police Tuesday sought four black youths for questioning in the fatal stabbing of a white college student as the mayor, newly sensitive to racial issues following a bizarre murder case, chastised the media for delays in reporting the slaying.

Mark Belmore, 19, was fatally stabbed early Monday as the city prepared to celebrate Martin Luther King Jr.'s birthday and struggled to resolve racial tensions reignited by the murder of a pregnant white lawyer whose husband - who became the prime suspect before his suicide - blamed on a black man.

Belmore, of suburban Walpole, was returning from his girlfriend's house around 12:25 a.m. Monday when he was attacked barely a block from Northeastern University, which borders the racially tense Roxbury neighborhood.

Belmore was pronounced dead at Boston City Hospital at 12:45 a.m. of stab wounds to the chest and abdomen, the medical examiner's office said.

The student's father, John Belmore, identified the body at 9:30 p.m. Monday, and the victim's name was not released until hours later. However, Mayor Raymond Flynn, whose handling of the Stuart case outraged the black community while making national headlines, rebuked the media for not reporting the case sooner.

''In one case you had almost seconds' response to the (Charles Stuart murder case) situation, and now you have nearly 30 somewhat hours later and the press is finally coming around to understand that a very senseless reckless killing took place,'' Flynn said.

Police spokesman Scott Gillis, however, said the name would not have been released before 11:30 p.m. Monday, when detectives filed their report, and that department spokesmen are not on duty after 11 p.m.

Flynn went to Walpole around midnight Monday to express his condolences to the victim's family, said Mike Lynch, a spokesman for the mayor.

Asked if the visit took place before the victim's name was made public, Lynch said, ''I'm not sure chronologically what happened.''

Police spokeswoman Jill Reilly said investigators were searching for four black teenagers who witnesses said fled the scene. The witnesses heard the victim screaming for help and called police, she said.

Police said investigators had not established a motive for the assault and could not confirm reports Belmore may have been robbed.

Asked if the slaying was racially motivated, Reilly said, ''Until they can find a motive for the attack at all, it can't be considered anything.''

Karen Rigg, Northeastern's dean of students, said there was no indication the attack was racially motivated.

''We see it as a random attack,'' she said.

She said Belmore, a sophmore in the university's College of Criminal Justice, was not carrying any identification when he was attacked about a block from the campus police office.

''He was not identified until late that night, almost 24 hours later,'' Rigg said. ''Campus police were there within one minute of the time they were called.

''We probably have the best department of public safety within any urban college,'' she said. ''Our crime rate is much lower than the average for the city.''

But some Northeastern students said they did not consider the campus safe.

''You don't really go out at night walking alone. It's a pretty bad area '' said student Tim Gallagher. ''A lot of people get mugged, things like that.''

''It's scary, to get stabbed like that for no reason at all,'' said student Laurie Pitts.

The stabbing came as Boston's blacks seethed over the treatment of the slaying of Carol Stuart. The pregnant woman, a white lawyer from suburban Reading, was shot and killed and her husband wounded last Oct. 23. Her husband, Charles, told police they were abducted by a black gunman as they left a birthing class at a Boston hospital.

Police now believe, however, that Charles Stuart, who committed suicide Jan. 4, killed his wife and then shot himself as part of an elaborate ruse.

The revelation that the husband was the likely culprit stunned the city and outraged the black community, who claimed investigators were blinded by racial prejudice. They also blasted police for controversial searches of the minority Mission Hill neighborhood where the Stuart shootings occurred, about 1 mile from the Northeastern campus.

RALEIGH, NC (UPI) - Sen. Jesse Helms, R-N.C., filed Tuesday for a fourth term to represent the Tar Heel state in Washington and said he is ready for whoever emerges as his Democratic rival.

Helms signed the documents at the State Board of Elections about 11 a.m. EST and was joined by four friends who paid his $984 filing fee.

Helms's 1984 race against former Gov. James Hunt Jr. became notorious for its cost, about $26 million between the two, and its negative ads.

Helms, known for his opposition to abortion, homosexual rights and other liberal causes, declined to say how much he expects this election to cost, but said he would be prepared for the fight.

''This will depend on a lot of things. Two years before 1984, the other side had Planned Parenthood, People for the American Way, the ACLU pumping in money in kind to the campaign against me,'' said Helms. ''That's when the mudslinging began. Obviously, if they start that kind of thing again, we're going to have to do the best thing we can.''

#90016u1628 01/16/1990 ~United Press International
WASHINGTON (JAN. 16) UPI - A gay-rights group announced Tuesday it has revised a draft of the American Bar Association's Model Code of Judicial Conduct to specifically ban discrimination within the court system against homosexuals.

The National Lesbian and Gay Law Association, which drafted the language, said the judicial code would apply to judges throughout the country and subject them to discipline if they violate its ethical canons.

''Judges (and their staffs) across the country will be subject to disciplinary action if they do indeed manifest any sort of bias or prejudice against lesbians and gay men,'' said Suzanne Bryant, regional board member of the group.

''It sends a very strong, clear message to the judiciary that lesbians and gay men are to receive fair treatment under the law,'' she said.

The revised draft will be presented to the ABA's House of Delegates at its Feb. 10-11 meeting in Los Angeles. A final vote on the draft may not come until summer.

Last year the ABA House of Delegates passed a resolution saying the ABA

endorsed any local, state or federal legislation prohibiting discrimination against gays.

Documented discrimination by judges in several states sparked the revisions to the draft, said association member Mauro Montoya. She cited a 1988 case in Dallas in which a judge admitted giving lighter sentences to two convicted murderers ''just because the victims were gay.''

Montoya and Bryant believe that with the revisions, gays will be more inclined to report violent crimes against them.

''We're not asking for special rights, we're asking for the same rights,'' said Montoya. ''We want the right to have our jobs without discrimination ... our homes without discrimination ... to be able to live with ourselves without discrimination and I don't believe that's special rights, that's everybody's rights.''

TRENTON, NJ (JAN. 16) UPI - Eight-term congressman Jim Florio was sworn in Tuesday as governor of New Jersey, completing the state's return to Democratic control after an eight-year Republican administration and four years of a split legislature.

Florio, who had failed in two previous bids to become the state's chief executive, was administered the oath of office by state Supreme Court Chief Justice Robert Wilentz before a 2,000-member audience.

Florio, 52, of Blackwood, succeeds Gov. Thomas Kean, the popular two-term Republican who defeated Florio in the 1981 gubernatorial election by less than 1,800 votes, the narrowest margin in state history.

The inauguration of Florio, who resigned his seat in Congress effective at noon, put in place the last of the three major Democratic winners from November's elections. Douglas Wilder took office as governor of Virginia Saturday and David Dinkins was sworn in Jan. 1 as mayor of New York City.

''Let me tell you now that my goal is a simple one,'' Florio said in his inauguration speech. ''I want to be remembered as the governor who brought new ideas to preserve old ideals.''

''If we succeed, we will leave our children a state that is better, healthier, cleaner and greener, more prosperous (and) more full of opportunity than the state we found,'' he said.

Florio offered virtually no specifics in his six-page speech, but promised to offer solutions to sky-high car insurance rates, pollution at the

Jersey Shore, drug abuse, and the state's housing shortage.

''I said during the campaign that bringing down car insurance rates would be one of the first things I do,'' he said. ''We will bring back fairness to a system that has abused the drivers of New Jersey too long.''

Florio said leaders of the Legislature - now controlled by fellow Democrats in both houses after Republicans lost their Assembly majority in the November elections - had agreed to hold a special session next Monday to hear his proposals on insurance. He offered no advance details of the plan.

Florio, author of the legislation that created the federal Superfund program for cleaning up toxic waste dumps, also promised to create an office of environmental prosecutor to battle pollution at the Jersey Shore and elsewhere in the state.

Florio easily defeated Rep. Jim Courter, R-N.J., in November at the conclusion of a campaign dominated by the state's economy, abortion, the death penalty, car insurance rates and the environment. Courter attended the inauguration.

The swearing-in ceremony was followed by the state's first inaugural parade since 1935.

#90016u1653 01/16/1990 ~United Press International

TORONTO (JAN. 16) UPI - Ford Motor of Canada Inc. said Tuesday 5,221 of its workers would be affected by temporary layoffs made necessary by high dealer inventories and lower sales in the United States.

A Ford spokesman, who said the company does not formally announce layoffs, said workers at the car maker's St. Thomas, Windsor, and Oakville plants, all located in Ontario, were subject to layoffs stretching from one to ten weeks.

Ford was adjusting its production to reflect the current market situation, the spokesman added, and the company will continue to assess its manpower needs on an ongoing basis.

At the St. Thomas plant, where full-sized Crown Victoria and Mercury Grand Marquis cars are assembled, 71 hourly-paid workers will face a ten-week layoff commencing Jan. 22.

In Windsor, four of Ford's five plants will idle workers for one week as of Jan. 29. The 2,950 employees to be affected work at three engine plans and an iron casting facility. The plants produce V-8 car engines, two types of V-8 truck engines and engine parts.

In Oakville, 2,200 employees will be off for the week of Feb. 5. The workers assemble Tempo and Topaz cars, 75 percent of them are exported to the United States.

The layoffs followed an earlier announcement involving 6,930 workers to be idled from four days to two weeks. Last week, Ford said 406 production workers and skilled tradesmen would be laid off indefinitely Feb. 5 at its Windsor plants.

#90016u1659 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - The Military Airlift Command is removing restrictions that prohibit women from serving on air crews on C-130 and C-141 transport planes that can be assigned airdrop missions, Air Force officials said Tuesday.

''The Air Force has always been a leader in equal opportunities for women '' said Gen. H.T. Johnson, commander in chief of the U.S. Transportation Command and Military Airlift Command. ''Prior to this decision, 97 percent of Air Force jobs were open to women. Now we have pushed that door open even wider.''

An Air Force official said the MAC decision had nothing to do with the role military women played in the Dec. 20 invasion of Panama, where some Army military policewomen were involved in direct combat.

Women are prohibited by federal statute from serving in combat positions in the Navy and Air Force. The Army follows the same policy, though it is not covered by a specific federal law.

The Air Force said that while developing plans for the new C-17 cargo plane, MAC officials reviewed aircrew assignment policies and took into account recent changes to the combat exclusion policy for women in the Air Force.

''They concluded that women should be assigned not only to the C-17 but also to C-130 aircraft and C-141 airdrop missions,'' the Air Force said, adding that these missions ''do not fall under the new Department of Defense 'risk rule.'''

#90016u1663 01/16/1990 ~United Press International

CAPE CANAVERAL, FL (JAN. 16) UPI - The Navy Tuesday launched its second unarmed Trident 2 missile from a submerged submarine in as many days, pressing ahead with an accelerated test program to clear the way for deployment in March.

The 126,000-pound, three-stage missile was fired from the USS Tennessee at 11 a.m. EST while the Ohio-class submarine was cruising submerged 200 miles due east of Cape Canaveral, Fla., an Air Force spokeswoman said.

It was the 27th test flight of a Trident 2, the Navy's most powerful weapon system, the eighth from a submarine and the second this year for the crew of the Tennessee.

The submarine conducted an identical test firing Monday and ''additional underwater launches of the Trident 2 are scheduled in the months ahead,'' the Air Force spokeswoman added.

Propelled to the ocean surface by a powerful charge of compressed gas, the solid-fuel missile was then ''successfully'' fired toward an undisclosed target in the South Atlantic or Indian oceans, the spokeswoman said.

As was the case with Monday's launch, the news media pool normally activated to cover such launches was not informed of the test ahead of time and no other details were provided.

The environmental group Greenpeace has protested recent launchings and staged demonstrations on the high seas, including a clash with the Navy Dec. 4 in which one of the activists' ships was rammed. No problems were reported Monday or Tuesday.

#90016u1714 01/16/1990 ~United Press International

LONDON (JAN. 16) UPI - Eighteen months after the Piper Alpha oil rig blew up in the North Sea killing 167 offshore workers, Occidental Petroleum said Tuesday it had resumed controversial construction on the Piper field.

Occidental, the brainchild company of U.S. oilman Armand Hammer, was the operator of the Piper Alpha platform, 120 miles northeast of Aberdeen, Scotland, when it was destroyed by explosion and fire July 6, 1988. An inquiry into the accident is still going on, conducted by British law officer Lord Cullen.

Some union workers said it was wrong for the company to return to the field to begin redevelopment work on Piper Bravo before that inquiry is finished. Ronnie McDonald, chairman of a union committee, the Offshore Industry

Liaison Committee, said Occidental was jumping the gun in returning to the Piper field.

Occidental, he said, had booked construction yards in the third quarter of 1989 for the building of a replacement rig long before it received Department of Energy approval to go ahead.

It was not until Nov. 30 last year that approval was given. "That was five months after Occidental decided to go ahead," McDonald said. "There is also a difference of opinion about whether the energy department should have given permission before the Cullen inquiry was finished," he said.

"One aspect it (the inquiry) is looking at is the fitness of the licensee. There are constraints, codes of practice to be complied with," he said. "It's an emotive issue."

The Cullen inquiry, which McDonald said may finish later this month, has recently focused on the extent of government responsibility for the Piper tragedy.

Union lawyers have argued that safety legislation was flawed, that energy department policing of safety rules was inadequate, and that the safety inspectorate was inadequately funded.

Occidental denied that it acted inappropriately in returning to the field. "We have given very positive assurances to the Department of Energy that our plans to redevelop Piper have the flexibility to adapt to any requirements from the inquiry," the company's British spokesman said.

Design of the platform was only 15 to 20 percent complete, he said, and could be changed as required. The designers' intention was to locate the rig's living section as far as possible from working areas. It was in the living quarters section of Piper Alpha that most rig workers died in the 1988 accident.

The early award of construction contracts, the spokesman said, was merely a means of making sure that contractors were lined up when approval was given. He also stressed that Piper Bravo would directly create over 3,000 jobs and involve investment of about $760 million.

What Occidental actually did Tuesday was to begin installation of a "sea-bed template" - a large-bore pipe that is pile-driven through mud as far as the sea's bedrock. The template then acts as a guide for the real drillpipe.

Pipe for the template is laid by a huge derrick barge which is longer than the sea is deep. The start of installation, which is about half a mile from the burned-out wreck of Piper Alpha, was delayed a week by storms.

#90016u1715 01/16/1990 ~United Press International
NEW YORK (JAN. 16) UPI - A fire swept through two floors of apartments above a social club early Tuesday, killing a Nicaraguan emigre and three of her children and injuring 14 other people.

Six of the people hurt were firefighters.

Fire officials said one of the apartments in the borough of Brooklyn contained several industrial sewing machines and may have been used for an illegal ''cottage industry'' sewing operation - such as the type patronized by some Seventh Avenue fashion companies in Manhattan.

But Assistant Fire Commissioner John Mulligan said there was no immediate evidence the fire was connected to ''sweatshop'' activities.

Officials identified the dead as Alicia Castillo, 33, her daughters, Yascarla Urbina, 7 and Griselda Urbina, 4, and a son, Rudy Urbina, 6.

Three members of the family escaped the blaze. Mulligan said Mauricio Jr. and David apparently had been dropped from a window on the third floor, where the family lived and their mother and sisters died. Their father apparently jumped from the window.

Mulligan said the fire may have started on the second floor and spread to the floor above. There were no smoke detectors in the building, which also had people living in the basement. The ground floor was occupied by Our Place, a social club.

''We firmly believe that smoke detectors would have given the early warning that would have saved them,'' Mulligan said, adding that many people tell fire officials they do not need smoke detectors because they have a dog they expect to warn them in case of fire.

The cause of the fire is under investigation, he added.

#90016u1717 01/16/1990 ~United Press International
CHICAGO (JAN. 16) UPI - The grain market tumbled to session lows late Tuesday on the Chicago Board of Trade.

Closing prices were lower across the board in moderate trading.

Soybeans were pressured by aggressive selling and forecasts for rain in the Midwest for a couple of days. Favorable weather conditions in the

South American soybean region contributed to the losses in soybeans, as did sharp declines in soybean oil and meal futures.

Pakistan was in the market for soybean oil which provided underlying support.

Corn was lower on profit-taking and the weakness in the cash market. Lower basis levels were attributed to a slight pick-up in farmer selling.

News that Egypt and Mexico were in the market for nearly 400,000 tons of corn limited the losses.

Wheat ended the day lower, but had underlying support from near-term export business. The Soviet Union was in the market for 525,000 tons of wheat and Mexico for 185,000 tons.

At the close, corn was off 1/4 to 1 1/4, soybeans down 6 to 11, wheat off 1 1/4 to 2 1/2 and oats off 1 to 1 1/4.

#90016u1739 01/16/1990 ~United Press International

LOS ANGELES (JAN. 16) UPI - Two Walt Disney Co. officials each earned more than $50 million last year, more than Disney chairman Michael Eisner, who in 1988 was America's best-paid executive, a newspaper reported Tuesday.

Disney President Frank G. Wells and the company's former head financial officer, Gary L. Wilson, each reaped a large part of their salaries through profit from exercised stock options, the Los Angeles Times said.

By contrast, Eisner, whose $40.1 million pay package in 1988 made him the nation's top-earning executive, received $9,589,360 in 1989, company proxy statements showed.

The Eisner figure is slightly misleading, however, because Wells and Wilson exercised a large number of stock options while Eisner holds unexercised options covering about 1.4 million Disney shares.

Eisner owns or controls about 384,000 shares, and a five-year contract agreement allows him to purchase an additional two million Disney shares at $71 a share. Disney's stock closed Monday at $109.87, up 12.5 cents in composite trading on the New York Stock Exchange.

Wells earned a total of $4,819,680 in salary and bonuses last year and exercised options that netted him another $46,126,100. Wilson received $2.5 million in salary and bonuses and exercised options totaling a profit of $47,488,410, the proxies show.

Disney executive salaries have become top grade since 1984, when Eisner and Wells joined the company, and Disney entered into a particularly successful era.

Disney stock has lost some luster in recent months as stockholders cashed in and Disney films like "Gross Anatomy" and "Blaze" didn't live up to expectations.

Wells and Wilson are near the top of the list of top-earning executives in the nation, but who will top the list remains to be seen. Last year's earnings for Time Warner Inc. Co-Chairman Steven Ross are expected to exceed $180 million as a result of the company's acquisition of Warner Communications Inc. How much of that was paid in 1989 isn't clear yet since the merger was just completed last week.

Wilson resigned from Disney in December to focus his attention on managing his own assets, which includes an investment in Northwest Airlines. He will, however, remain a director and consultant to the company.

WASHINGTON (JAN. 16) UPI - Treasury Department tax officials are studying

an overhaul of the corporate tax structure, a move designed to ease the growing concern over debt-fueled takeovers, tax experts said Tuesday.

Many business executives and policy makers believe that current tax codes encourage debt by permitting companies to deduct interest payments but not dividends from their taxes, said Alan Auerbach, an economist at the University of Pennsylvania.

"Corporations are very concerned about debt. Some are concerned about being taken over by someone using debt and others are concerned about the public policy issues about borrowing," said Auerbach, who frequently consults with the Bush administration and Congress on tax issues. "If you make equity attractive, you make debt less attractive," he said.

The Treasury overhaul is geared toward eliminating the double taxation of dividends. Also under consideration is a plan to curtail tax interest payments that corporations make to pension funds and other tax-exempt entities, according to unnamed officials quoted by The Wall Street Journal.

Treasury officials were unavailable Tuesday to comment on the plan. "I know they are working quite seriously on it," Auerbach said. "This isn't just a smoke screen." The overhaul is designed to eliminate the double taxation of dividends, while at the same time offsetting the expected revenue loss caused by the tax break.

Analysts said the proposal is under consideration, in part, because of the concern on Capitol Hill about the trend toward leveraged buyouts and other debt-financed transactions, which Treasury Secretary Nicholas Brady said was caused in large part by tax policies. Brady last year instructed the Treasury to study a solution to the trend. The Treasury's study is expected to be released in April or May.

Currently, earnings that are paid out in the form of dividends by a company to an individual are subject to be taxed twice, with both the company and the recipient paying. Earnings paid as interest by a corporation to a pension fund are not taxed currently.

Although tax experts have long discussed the possibility of a single corporate tax, the business community has given the idea a collective cold shoulder. Auerbach said many executives now view changes in the corporate tax code "more as a correction of the tax advantage given borrowing."

WASHINGTON (JAN. 16) UPI - An oil company executive said Tuesday that the availability of heating oil was more important than price increases during the December cold snap, but lawmakers pressed for an investigation into alleged price fixing by the industry.

Glenn Tilton, president of Texaco Refining and Marketing Inc., told the Senate Government Affairs Committee that despite a surge in demand during the coldest December on record, his company supplied all its regular customers in the Northeast.

"We know that the first concern of our customers is availability of heating oil supplies," Tilton said. "Higher prices are never popular, but they are far preferable to the personal and economic hardships that would occur with a failure to supply."

While heating oil price averages increased nationwide during last month's cold weather, the Northeast was particularly hard hit, with the average price per gallon costing $1.26 in New York and Rhode Island, $1.37 in New Jersey, and $1.47 in Massachusetts.

Tilton, the first major oil company representative to appear before Congress since the heating oil crisis, attributed the price surges to

unusually cold temperatures in the United States, a Dec. 24 explosion at Exxon's Baton Rouge, La., oil refinery and increased demand in Europe.

But some members of Congress have charged that the oil companies limited supplies in order to raise prices during the cold weather, and state officials joined them Tuesday in urging a Justice Department investigation into whether antitrust laws were violated.

"I am concerned that oil companies have taken advantage of the severe cold weather in December to engage in price gouging," said Maine Attorney General James Tierney. "Local oil dealers have not been making a killing from the dramatic increases in the price of home heating oil."

Connecticut Attorney General Clarine Riddle said although she has already begun a preliminary investigation into companies in her state, there should also be "the widest ranging inquiry by both the legislative and the executive branches of the federal government."

Assistant Energy Secretary John Easton said the Energy Department is conducting a "long-term in-depth analysis" of December's price increases to determine who made extraordinarily high profits and by what means.

"We're still trying to determine who the winners and losers were," Easton said. "We know there are a lot of segments (of the oil industry) who made money but we don't yet know why."

#90016u1845 01/16/1990 ~United Press International

LOS ANGELES (JAN. 16) UPI - Jurors in the McMartin Pre-School molestation trial asked the judge Tuesday for a clarification on how one defendant can be convicted of conspiracy and a second defendant acquitted of the charge.

The eight-man, four-woman jury on Friday asked Superior Court Judge William Pounders whether they can find one of the defendants guilty of conspiracy and the other innocent of the charge.

Pounders on Tuesday told the panel that they can, but a short time later, the jury, in its 35th day of deliberations, sent the judge a note with a follow-up question.

''Please clarify how one defendant can be found guilty of conspiracy and a second defendant innocent of conspiracy,'' the jury's note said.

Former pre-school teachers Raymond Buckey, 31, and his mother, Peggy McMartin Buckey, 62, are charged with one count of conspiracy and 64 counts of child molestation.

The judge said he would research the law and give the jury its answer later Tuesday. He asked attorneys in the case to also research the law.

However, the judge told the lawyers that basically, one of the two defendants can be convicted of conspiracy if the jury finds that he or she conspired with a third party.

''They (the jurors) seem like they are ready to seriously consider that charge,'' the judge said.

The lawyers, citing a gag order, refused to comment on whether they think the jury's question means it is considering finding one of the Buckeys guilty of conspiracy and the other Buckey innocent of the charge.

The jury has returned sealed verdicts on 52 of the 65 counts. The verdicts will not be announced until all 65 verdicts are returned.

The charges stem from the alleged sexual assaults of 11 of the Buckeys' pupils ranging in age from 2 1/2 to 5 1/2 at the now-closed Virginia McMartin Pre-School in suburban Manhattan Beach from 1978 until 1983.

If convicted, the Buckeys, who have steadfastly maintained their innocence could be sentenced to spend the rest of their lives in state prison.

The nearly three-year-old trial is the longest, costliest criminal trial in U.S. history. Since it was filed in March 1984, the case - both in the pre-trial and trial stages - has cost Los Angeles County taxpayers more than $15 million.

When initially filed, the case was also the largest molestation case in U.S. history. Since then, however, five co-defendants and scores of charges have been dismissed because of insufficient evidence.

#90016u1851 01/16/1990 ~United Press International

ANCHORAGE, AK (JAN. 16) UPI - Eskimos and wildlife biologists said Tuesday they are baffled by the sudden appearance of a small herd of tame reindeer on an Alaskan island far out in the Bering Sea and suspect that the animals rode an ice floe from the Soviet mainland.

''All of a sudden, these reindeer almost fell in their laps,'' said Sandy Iknokinok, program director for the Reindeer Herders Association in Nome. ''It's pretty unusual.''

About 45 tame reindeer are wandering near Gambell, a town of 500 Eskimos on St. Lawrence Island, west of the Alaska mainland, 200 miles southwest of Nome and 35 miles from landfall in the Soviet Union.

Iknokinok said she was on her way to Gambell to inspect the herd, take blood tests to make sure it is not diseased and try to trace its origin.

Reindeer live on St. Lawrence Island, but they are larger and have reverted to the wild because there has been no active herding recently, Iknokinok said.

''What we can say with virtual certainty is that they're not caribou,'' said John Coady, regional wildlife supervisor in Nome for the state Department of Fish and Game. ''The question is, could these deer have come from the existing herd on St. Lawrence Island or might they have come from Siberia?''

Inokinok and St. Lawerence Eskimos are convinced the creatures traveled across the Bering Strait on ice from the Soviet northeast coast. Coady said the evidence supports that.

''The existing deer on St. Lawrence are not herded. They are extremely wild,'' Coady said. ''These deer are extremely tame. You can drive a (snowmobile) through (the herd) or walk right up to them. They are also smaller and a different coloration.''

Gambell Mayor Branson Tungiyan said hunters, out on the ice looking for seal or walrus, spotted the reindeer Dec. 27 on a hill above Gambell. Later, more were seen. He said the herd numbered between 40 and 50 deer. Existence of the phenomenon became public Tuesday, and state and Soviet officials have been notified, he said.

Eskimo herders use the reindeer, a domesticated animal related to the caribou, for meat and sell the antlers to Asian buyers who value ground-up horns for medicinal teas and for their reputed aphrodisiac powers.

Alaska's first reindeer came on ships from Russia a century ago, Coady said. St. Lawrence Island got its first reindeer in 1910, Iknokinok said.

Coady said there was no historical record of animals riding ice floes across the Bering Strait from Asia to America and said, ''I think it's unusual. I don't think it's impossible.''

''Our elders have heard of animals coming across,'' Tungiyan said. ''They once saw the bodies of reindeer 10 miles northwest of here back in the '50s. The ice broke and they did not make it. They died out on the ice, maybe of starvation.''

''Our elders are saying they probably went out on the ice to eat salt and the ice broke on them,'' Tungiyan said, noting that winds and currents send ice floes from the Soviet coast to St. Lawrence.

Tungiyan said the small herd was digging through the snow to feed on moss.

He said he called Soviet officials in nearby Provideniya and Novo Chaplino and was told the reindeer probably came from farther north. Coady said that means the animals may have traveled 75 miles on an ice floe.

Iknokinok said it would be prohibitively expensive to return the reindeer to Soviet herders, who have a much larger and more advanced industry and would be unlikely to miss a few dozen animals out of their hundreds of thousands. Tungiyan said the reindeer have no tags or identification markings.

BY VERNON SCOTT

HOLLYWOOD (JAN. 16) UPI - It doesn't happen often that a son directs his distinguished father in a movie, but such is the case in the Charlton Heston family.

Precedent was set by the young John Huston, who directed his father Walter to an Oscar for best supporting actor in ''The Treasure of the Sierra Madre'' back in 1948.

Now comes Fraser Heston, a successful screenwriter, who tackles his first directorial assignment with The Turner Network's production of the Robert Louis Stevenson classic ''Treasure Island,'' to be broadcast Jan. 22.

His father, Academy Award-winning actor Charlton Heston, stars in the role of Long John Silver.

The two worked together on the movie ''Mother Lode,'' which Fraser wrote and in which Charlton starred in one of his rare villain roles. They also worked together in the recent cable TV production of ''A Man for All Seasons.''

Papa Heston directed and starred in both projects. When he appeared in his own scenes, he turned the directorial reins over to Fraser, allowing his son to get his feet wet in the tricky craft.

Both Hestons are aware of the hazards of producing new versions of literary and theatrical classics - comparisons are invariable and seldom flattering.

But father and son are enormously pleased with the reception of ''Treasure Island'' by critics and preview audiences.

In contrast to the 1935 MGM ''Treasure Island,'' which starred Wallace Beery as Long John and Jackie Cooper as Jim Hawkins, and the 1950 version starring Robert Newton and Bobby Driscoll, the Hestons have turned out a serious drama.

Father and son agree that previous versions made caricatures of the pirates, especially Long John, in going for laughs and a light touch.

''In reality,'' said Heston the elder, ''Stevenson wrote Silver and the rest of the pirates as dangerous cutthroats. There were moments of humor, to be sure, but they were killers and made no bones about it.''

Fraser said he went back to the original source.

''I wrote the script from Stevenson's novel,'' he said. ''It made a difference in the final results. Long John has some funny lines, but he's not a laughable figure.

''Rather than remake previous movies, we made the novel. It was a brilliant book, which deserves to be done as a film every 20 or 30 years. Since Dad read me the book when I was 5 years old, I wanted to do my version.

''I looked at both earlier films and then forgot about them when I wrote the screenplay. The dialogue from the novel is great and almost verbatim in our film.''

Heston said the mistake made in earlier ''Treasure Islands'' was in casting Jim Hawkins as 12 years old, ''which makes his courage and resourcefulness implausible.''

That, in turn, ''forced them to cast Long John as a loveable rogue so he wouldn't be as intimidating to the boy. In our picture we don't specify his age, but he's about 15.''

Heston said he and Fraser had just completed ''A Man for All Seasons'' and were at a meeting with Ted Turner, ''who asked what we wanted to do next.

''Fraser immediately said, 'Treasure Island.'''

Turner told them he had ''just the boat'' after buying MGM and all its assets, which included the Bounty from the 1960 'Mutiny on the Bounty' with Marlon Brando. It is the last wooden square rigger ever built.

Heston said he read the book and looked at the two films again before starting and, ''I think we've captured the essence of Stevenson's work.''

Fraser said directing his first picture was made far easier by the presence of his father in the leading role.

His father concurred. ''I felt very comfortable with Fraser directing,'' Heston said. ''What an actor needs in a director is trust in his taste, intelligence and integrity. Fraser and I have that kind of relationship.

''And he knows my work very well from having spent hours on sets with me on almost all my pictures since he was a little boy. He watched me being directed by Orson Welles, George Stevens, William Wyler and Sam Peckinpah. That's a pretty group of fellas.''

#90016u1871 01/16/1990 ~United Press International

SAN DIEGO (JAN. 16) UPI - The wife of a cult leader agreed Tuesday to be extradited to Ohio where she faces conspiracy charges in the ritualistic slayings of a family of five.

Alice Lundgren, 38, one of 13 people indicted in the killings, smiled and whispered goodbye to her lawyer after signing five copies of an extradition waiver during a brief hearing in Municipal Court.

Her attorney, Kay Sunday, appointed to represent Lundgren through the extradition process, said the woman will be extradited to Ohio within 10 days.

Sunday said Lundgren, who was arrested Jan. 7 at a National City motel along with her husband, Jeffrey, and 19-year-old son, Damon, was eager to return to the Midwest and clear her name.

''It is something she was inclined to do all along, but I had advised her to wait beacause I needed more time to talk to the authorities back there '' Sunday said.

Jeffrey Lundgren, 39, a defrocked preacher in the Reorganized Church of Jesus Christ of Latter-day Saints, and 12 of his followers are charged in the shooting deaths of Dennis Avery, 49; his wife, Cheryl, 42; and their three daughters, Trina, 15, Rebecca, 13, and Karen, 6.

At least one of the defendants said he saw Lundgren shoot a member of the Avery family. Other followers said Lundgren admitted killing the Averys and had members of his group help bury the victims.

The Averys were allegedly shot execution-style in a barn on a Kirtland farm on or about April 16, 1989.

Four days after the victims' bodies were discovered Jan. 3, the three

Lundgrens were arrested at a motel near the Mexican border. Two other followers, Kathryn Johnson, 36, and Daniel Kraft, 25, were arrested last week in a remote part of eastern San Diego County.

Alice Lundgren had initially refused extradition, following her husband's lead.

Sunday said there had been no talk of a plea bargain in exchange for Lundgren's testimony.

''I wouldn't say she has been cooperating. ... She innocently and naively told authorities what she knew,'' Sunday said.

Sunday said the woman has not talked with her husband or son since their arrests.

''She has been under a tremendous amont of stress and has been having headaches and trouble sleeping,'' Sunday said. ''I think she is now relieved.''

#90016u1879 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - A lawyer for the state of California told the Supreme Court Tuesday that states and private citizens have the same rights as the federal government to try to derail a merger on antitrust grounds.

The high court heard arguments in a case brought by California challenging the acquisition of Lucky Stores Inc. by American Stores Inc. in a merger that would form the largest supermarket chain in the nation.

California has argued the $2.5 billion takeover was allowed under a misguided federal antitrust policy that has been generally permissive of ''mega-mergers'' during the past decade.

The state claims the merger would severely cripple competition, costing California consumers $400 million a year. American Stores asserts that integration of the two chains would save consumers $50 million annually.

At issue in the case is whether a 1914 antitrust law, the Clayton Act, allows states and private parties, as well as the federal government, to seek divestiture - the undoing of a merger - as a remedy for allegedly monopolistic takeovers.

''Congress went out of its way'' under the Clayton Act to make divestiture available in antitrust suits brought by all parties, state Deputy Attorney General Chestern Horn argued.

Horn said divestiture is clearly warranted in this merger, which he said would result in American Stores ''controlling 25 percent of every grocery dollar spent by California consumers.''

But attorney Rex Lee, representing American Stores, countered that divestiture may only be sought by the federal government. Other parties, including states, may seek to block a merger before it occurs, but not once it is completed, Lee said.

''The proposition that the package of private remedies is identical to those of the federal government is rejected'' under in antitrust statute itself and by court decisions in other cases, he said.

The case began when American Stores, based in Salt Lake City and operator of 252 Alpha Beta and Skaggs Alpha Beta stores in California, purchased Lucky's 340-store chain in June 1988 for $2.5 billion, or a cost of $65 a share.

Lucky Stores is based in Dublin, Calif., 40 miles east of San Francisco.

The merger of Alpha Beta, California's fourth largest supermarket chain, with Lucky, the state's largest chain, would give American Stores about 27 percent of the supermarket business in California. It also would make American Stores owner of the largest supermarket chain in the country.

The Federal Trade Commission initially found the merger violated the Clayton Act but assented to the deal after American Stores agreed to sell 37 of the 592 stores in the combined chain.

The state protested the action, but the FTC gave final approval to the acquisition on Aug. 31, 1988, and the state filed suit the following day.

U.S. District Judge David Kenyon ruled in September 1988 that statistical evidence ''overwhelmingly'' showed the merger ''would substantially lessen competition,'' and he issued a preliminary injunction requiring American to operate Lucky and Alpha Beta as independent chains.

The 9th U.S. Circuit Court of Appeals reversed Kenyon's order on grounds that the Clayton Act did not authorize states to obtain injunctions separating merging firms.

The state then appealed to the Supreme Court, and Justice Sandra Day O'Connor issued an emergency stay reinstating Kenyon's order while the high court considered California's appeal. A decision is expected by July.

Following arguments before the high court Tuesday, Horn said, ''If the federal government doesn't do its job to stop these mega-mergers that

really harm consumers, the states ought to be allowed to do so.''

(JAN. 16) UPI - The Soviet delegate to the just-resumed Geneva talks on banning chemical weapons says an agreement could come within a year. Sergei Batzanov told reporters that negotiations by a special committee of the 40-nation Disarmament Conference are- quote- ''in a very advanced state.'' U-S officials are less optimistic however, saying a chemical weapons treaty could take up to two more years to hammer out. The full disarmament conference convenes for the first time this year on February 6th.

An Panamanian military officer accused with former dictator Manuel Noriega of drug trafficking is scheduled to appear in federal court in Miami for a bond hearing today. Lawyers for Lieutenant Colonel Luis del Cid hope to debunk U-S charges that the Panamanian military officer was actively involved in Noriega's alleged plans to use Panama as a cocaine shipping base. Lawyer Samuel Burstyn says del Cid was only a middle-level officer who took orders.

Armenians demonstrated in Moscow today, blaming Soviet President Gorbachev for the anti-Armenian rioting that has left more than 40 dead in Azerbaijan. More than 300 Armenians stood in the snow in front of the Communist Party headquarters, screaming ''Shame on Gorbachev.'' They say practically NO Armenians remain in the Azerbaijani capital of Baku, once the home of 300-thousand Armenians. Soviet television showed Soviet troops patrolling empty streets in the capital.

British officials are warning the public to be wary of mail bombs. Scotland Yard issued the warning today after army explosives experts de-fused a bomb hidden in a padded envelope that was mailed to a British Army officer. The commander of the police anti-terrorism unit says military personnel and people who are connected with affairs in Northern Ireland may be targets of parcel bombs.

#90016u1936 01/16/1990 ~United Press International

(JAN. 16) UPI - The Supreme Court has agreed to hear appeals of Idaho and Maryland cases that involve efforts to protect alleged child victims of sexual assault from suffering the trauma of appearing in court. Both cases deal with the constitutional right to face one's accuser in open court. In one of the cases, a child gave live televised testimony from another room. In another, an adult who questioned the child privately recounted in court what the child said. In both cases the convictions were overturned on appeal.

In another matter, the justices let stand an Arizona court ruling that bars judges from forcing operators of adult businesses to surrender their operating licenses as a condition of probation. The case involved a

Phoenix adult bookstore owner who was convicted of renting obscene films and forced to turn over his operating license. An Arizona appeals court ruled that surrendering his business license violated First Amendment freedom of speech provisions. The Supreme Court today refused to hear the case.

#90016u1940 01/16/1990 ~United Press International

BOSTON (JAN. 16) UPI - The idea of television for the blind sounds absurd, a cruel oxymoron. It will soon become reality when 32 public television stations broadcast a program enhanced by Descriptive Video Service.

Blind individuals and those with severely impaired vision listen to an average of two to six hours of television per day, about the same amount as sighted people, according to the American Foundation for the Blind.

The obvious difficulty is that television is a medium heavily dependent upon visual cues for its story-telling. Thus, lost upon the blind are many of the talents of writers, actors and directors, and all the efforts of costumers, and the set, scenery, lighting and casting directors.

''This is not radio or books on tape,'' said Laurie Everett, director of DVS at WGBH-TV Boston, which developed the new service. ''It's just TV as it is, but made accessible for blind people.''

Using the second audio channel available on stereo televisions and VCR's, DVS offers narrated explanations of a program's key visual elements. During breaks in the dialogue, descriptions are provided of action, characters' movements and expressions, the sets and scenery.

The PBS broadcast Wednesday Jan. 24 of the drama ''Sense and Sensibility'' on ''American Playhouse'' is the start of regular DVS programming. Among the 32 stations equipped to broadcast DVS are outlets in Los Angeles, Washington D.C., New York, Chicago, Baltimore, Boston, St. Louis, Dallas and Miami. During the coming months, DVS will become available for the popular ''Mystery'' series and the dramas ''Degrassi High '' and ''Masterpiece Theatre.''

The innovation comes 15 years after TV began to adapt itself for the deaf with closed captioning. All prime-time network and public television programs are captioned for the deaf.

Like the closed-captioning system, DVS does not alter or interrupt a program. Narrations, broadcast only over the second audio channel, are timed to fit between sounds, music and dialogue. Each pause is measured and narration writers decide upon a description that fits both the scene and the time.

''You could say that I'm writing a story without writing the dialogue,'' said Michelle Nicholasen, a narration writer who sits in a small darkened room watching a television screen with a timer superimposed. She types her words onto a computer screen with ''in-ques'' and ''out-ques'' noted for the narrator.

''I was worried about giving too much information, but blind people depend so heavily upon their hearing that they have a more developed listening speed,'' said Nicholasen.

''We have to make some assumptions about the knowledge of the visually impaired person and we assume that at some time, that person could see. This is important if you are going to use a color in a description, for you are assuming the person has seen that color,'' she said. ''Also, we are assuming they are knowledgeable enough to understand words like 'corset' or 'bowler hat.'

''We don't use metaphors because they bring to mind a literal picture. For example, 'a sea of soldiers' is descriptive, but it's not literal, it's figurative.''

If Nicholasen has the time, when she receives a program, she will turn off the video, listen to the audio and try to follow the story. This reveals points at which a blind person might become lost or confused.

''We had one show with a 6-minute gap in dialogue,'' said Nicholasen. ''If you couldn't see, you could not follow the story.''

''We don't want to get in the way of the story,'' said Jason Cahill, who also writes DVS narration. ''Sometimes a pause will describe more than we could. You have to give the text breathing room.

''It's important to let actions speak for themselves. A shooting is not very subtle and you must say who is getting shot, who is shooting and who is watching,'' he said. ''The key is to describe faithfully and without judging. We put details before the visually impaired and let them decide. There is a tricky line to tread between being subjective and objective.''

Laura Oftedahl, a development manager for the DVS project and legally blind, said most efforts for blind people focus upon education, rehabilitation and employment. ''But we also have a lot of spare time. The rest of America enjoys the time from 5 to 9 o'clock, so we might as well too.''

''When people at my old office discussed a TV show, I had missed so much I was frustrated I couldn't participate,'' said Oftedahl. ''Now, with the DVS shows, I can talk about them. It makes me feel like more of a whole

person.''

Many blind people live with a sighted person who, when they watch television together, often serves as a narrator.

Everett said that after DVS was test-marketed, ''We got a lot of letters from people who were eager for it, especially letters from the friends or family members who had served as narrators for programs. They are looking forward to just sitting back and enjoying the show. Maybe even more than the blind people.''

#90016u1942 01/16/1990 ~United Press International

WEST BERLIN (JAN. 16) UPI - Prime Minister Hans Modrow Tuesday became the first East German premier to visit West Berlin, traveling to the western half of the divided city a day after protesters ransacked the headquarters of the hated secret police in his country.

Modrow was to meet with West Berlin Mayor Walter Momper for talks on tourism, transport and economic matters. He was accompanied by East Berlin Mayor Erhard Krack.

The visit came a day after thousands of angry protesters ransacked the headquarters of the hated Stasi secret police in East Berlin. The violence erupted during a protest by an estimated 100,000 people calling on Modrow to rapidly dismantle the security police system.

Officials in East Berlin said the protesters had caused millions of dollars in damage to the security police headquarters, hurling files and furniture through the windows and looting shops and businesses inside the building.

Modrow's visit was part of an East German effort to improve political and economic ties to West Germany in the wake of the nation's dramatic move away from exclusive Communist Party rule. Modrow, the former Communist Party chief in Dresden, heads a government that includes 11 non-communist ministers.

Despite Modrow's moves to open the Berlin Wall and scrap the Communist Party's exclusive hold on power, West Germany announced it would not sign a treaty to bring about closer ties with East Germany until after the country's first free elections May 6.

Hans Klein, a West German government spokesman, said government coalition leaders agreed Monday with Chancellor Helmut Kohl that any treaty requiring the endorsement of the East and West German parliaments should not be concluded until after the elections.

West German leaders are opposed to signing a treaty with East Germany's present communist-run government because they believe it might help the party win the elections and remain in power.

Rudolf Seiters, a senior aide to Kohl, told reporters the postponement of a treaty did not mean West Germany would refuse to cooperate with East Germany to improve conditions in the country. He said West Germany would continue its assistance in an effort to stem the flow of East German refugees to the West.

East German Economic Minister Christa Luft also was visiting West Germany Tuesday, pushing the idea of West German investment in the East and telling officials about a new law that would allow West German companies to buy controlling interests in some facilities.

The new law, passed by the East German parliament last Friday, allows only minority holdings in most industries. But she said an exception would be made for small-sized and middle-sized industries as well as for Western companies bringing technical know-how into the country.

Luft said these exceptions were necessary in the ''economic interest of the country.''

The East German visits to the West came as officials in East Berlin began to assess the damage caused when thousands of angry protesters invaded and ransacked the headquarters of the Stasi secret police.

Deputy Interior Minister Dieter Winderlich, a major general who directs all East German police, told reporters the rampage Monday evening lasted about two hours and caused millions of dollars in damage.

He said about 100,000 people were outside the building at 5:25 p.m. for a scheduled demonstration called by the New Forum, a main opposition party, to press Modrow for faster action on dismantling the security police. The new government has agreed to dissolve the organization, but tens of thousands of employees remain on the security police payroll.

Shortly after the protest began, two groups of several thousand people each broke through two doors into the headquarters, Winderlich said in a news conference statement carried by the official East German news service ADN.

''They destroyed offices, fixtures, doors, windows, threw furniture and files and other objects out windows,'' Winderlich said. ''They looted the barber shop, the book store, the kitchen and storerooms.

''The premises were badly damaged and laid waste. Sheet steel safes were

broken into and equipment stolen,'' he added. ''There was damage in millions through destruction and theft.''

The demonstrators also broke into the area dealing with counter-espionage, Winderlich said.

He said East Germans were not the only ones involved, hinting that people of other nationalities participated, but he did not elaborate.

The security headquarters received two telephone bomb threats before the demonstration began and 300 construction workers opposed to the Stasi bricked up one of the doors, Winderlich said.

Manfred Sauer, deputy head of the East German Cabinet's administrative department, told the news conference authorities ruled out the possibility that Stasi provocateurs started the invasion to discredit the opposition.

#90016u1946 01/16/1990 ~United Press International

NEW YORK (JAN. 16) UPI - He is the reputed head of the nation's most powerful Mafia family, the subject of innumerable news stories and even of a Time magazine cover. But many potential jurors questioned at his assault trial Tuesday claimed they did not know who John Gotti was.

''At first, I thought he was the subway ... the guy who shot people,'' a young woman, apparently referring to Bernhard Goetz, told the judge during questioning of potential jurors at the assault trial in state Supreme Court in Manhattan.

Another potential juror in the Gotti case, a middle-aged man once employed as a 911 operator, speculated, ''I'm just guessing, but he may be associated with the city scandals that came out during the election last year.''

In a case that could send Gotti, 49, to prison for life as a ''persistent felon,'' the judge has taken extraordinary precautions to prevent jury tampering. He ruled jurors' first names will remain secret and the panel will be sequestered as soon as it is sworn in.

Gotti, the reputed godfather of the powerful Gambino crime family, is accused of ordering a union official shot and wounded on May 7, 1986, in retaliation for vandalism at a restaurant owned by the Gambino clan. Also charged is Anthony Guerrieri, 60, a reputed Gambino family soldier.

Gotti made international headlines when he allegedly grabbed the helm of the Gambino family after ''boss of bosses'' Paul Castellano was gunned down in front of a Manhattan steakhouse in Manhattan in December 1985.

Defense lawyers in the highly publicized case accused potential jurors of lying when they claimed Tuesday they did not know who Gotti was.

''They will give you any answer they think will get them on this jury,'' Gerald Shargel, an attorney for Guerrieri, complained to the judge. ''I'm just very disturbed by what is happening here.''

Both Gotti and Guerrieri sat in the cavernous courtroom Tuesday while potential jurors were whisked into a jury room for individual questioning by attorneys for both sides.

By noon, only two members of the jury pool of 190 people had been excused. Justice Edward McLaughlin said he expects it will take the rest of the week to pick 12 jurors and four alternates.

Most of the potential jurors described organized crime as a virtual fact of life in New York City. But many said they had no opinion on whether the man before them for trial on assault and conspiracy charges was, in fact, the godfather of the Gambino family.

''Do you believe he is a leader of organized crime?'' Bruce Cutler, Gotti's gravel-voiced lawyer, asked one potential juror, a middle-aged man.

''He may be. He may not be,'' the man replied.

Cutler told the man he wanted to find out if he had any opinions of Gotti, whose flare for double-breasted suits and diamond pinky rings has earned the moniker ''The Dapper Don.''

''Do you have any impressions of Mr. Gotti as he's been here in court?'' Cutler pressed.

''He's a well-dressed man,'' the potential jury member said.

#90016u1990 01/16/1990 ~United Press International

MOSCOW (JAN. 16) UPI - The Soviet leadership rushed 11,000 more troops Tuesday to reinforce soldiers trying to quell fighting between Armenians and Azerbaijanis that has killed at least 56 people and sent thousands of Armenians fleeing the embattled region.

''The situation is extremely tense,'' said Yuri Shatalin, commander of Interior Ministry special forces. ''The information we are getting is more and more like reports from a warfront.''

About 2,000 Armenians fleeing attacks by Azerbaijani nationalists had been evacuated by ferry and plane since Sunday, the official Tass news agency said, and Foreign Ministry spokesman Gennadi Gerasimov said the rescue effort would be intensified.

But the government's redoubled effort to stem the violence appeared to be faltering.

Radio Moscow's Interfax news service said nationalists from the Azerbaijani Popular Front were blocking the airport and train stationin the Azerbaijani capital of Baku to prevent Armenians from fleeing the city.

Tass said ''at least 300 trucks carrying militants'' had massed on the borders of the disputed enclave of Nagorno-Karabakh in Azerbaijan and that supplies to the region were cut off by a rail blockade.

Special forces commander Shatalin said Soviet reporters had been attacked and their equipment smashed. The region was closed to Moscow-based foreign correspondents.

Shatalin said 6,000 of his troops and 5,000 army soldiers were sent to Azerbaijan and Armenia to reinforce a similar number of troops already assigned to the neighboring southern republics.

The parliament's presidium, or executive arm, also ordered navy and KGB units dispatched to the region when it imposed a state of emergency in designated areas late Monday, but officials did not say how many of those troops had been sent.

Troops already in Baku to enforce a state-of-emergency decree and curfew patrolled the empty streets in armored personnel carriers and on foot, shooting repeated bursts from their Kalashnikov rifles into the air to keep people indoors.

''What is going on now here in Nagorno Karabakh and northern Azerbaijan can unambiguously be called civil war,'' said Maj. General Yuri Kosolapov, commander of the embattled region.

The new round of clashes between Azerbaijanis and Armenians was the worst ethnic strife since President Mikhail Gorbachev assumed power in March 1985, and it raised to more than 250 the number of deaths since the violent dispute over the Nagorno-Karabakh enclave in Azerbaijan erupted nearly two years ago.

Interior Ministry official Vladimir Yanchenkov said 56 people had died and 156 were wounded in four days of ethnic clashes in the neighboring republics of Armenia and Azerbaijan.

Yanchenvok said 28 of the dead were Armenians, 10 were Azerbaijanis, 16 were members of other nationalities and two were police officers. He gave no separate casualty figures for Baku where the slaughter of Armenians first erupted Saturday. Soviet news reports had put the Baku death toll at 34.

Shatalin said one Interior Ministry soldier had been killed and 11 ''badly wounded,'' and that four of his troops were missing. He said 49 ''instigators of pogroms'' had been arrested and hundreds of weapons were confiscated.

Eduard Aikazian, the Armenian government's permanent representative in Moscow, said only a few thousand Armenians remained in Baku from a total of 300,000 in the city of 1.7 million.

Aikazian said 220,000 refugees from throughout Azerbaijan had fled to

neighboring Armenia and about 100,000 had gone to the Russian republic, including 8,000 to Moscow.

More than 300 Armenians stood in the snow in front of the Central Committee of Communist Party headquarters in Moscow and screamed, ''Shame on Gorbachev,'' blaming him for the outbreak of anti-Armenian inspired violence in Baku.

The protesters also carried huge black banners saying, ''The slaughter of Armenians is on your conscience Gorbachev'' and ''History will not forgive you Gorbachev.''

EUREKA, CA (JAN. 16) UPI - An earthquake measuring between 5.1 and 5.3 on the Richter scale shook the northern California coast Tuesday, but there were no reports of damage or injuries, the U.S. Geological Survey reported.

The survey said the temblor occurred at 12:08 p.m. PST and was centered in a sparsely populated area about 39 miles south-southwest of Eureka.

The quake occurred along the San Andreas Fault where the fracture moves south from land to the Pacific Ocean.

Residents said buildings swayed gently during the quake, which lasted for several seconds.

''It was a mild rolling quake that came north and south,'' said Rose Ann Hurst, owner of Burger's Market in Eureka. ''Everything moved here but nothing fell.''

The Humboldt County sheriff's office said it had received several calls, but no reports of damage or injuries. ''We felt it, but it wan't awful,'' said sheriff's clerk Ingrid Smallwood.

There were reports of felled trees and mud slides in some areas.

#90016u2066 01/16/1990 ~United Press International

HARRISBURG, PA (JAN. 16) UPI - Weapons are still being discovered in the cellblocks of the riot-torn Camp Hill state prison, despite six complete shakedowns of the institution since inmate uprisings last October, officials testified Tuesday.

Superintendent Robert Freeman, who was suspended after the uprisings, stood by his decision Tuesday not to order an immediate cell-by-cell search of the prison after the first night of rioting. It was his first public comment since October.

''To put tired, angry officers in cells with tired, angry inmates seemed to me to be inviting trouble,'' he said, citing a 1983 incident in which inmates were ''brutally'' beaten after a relatively minor disturbance.

''We could have ended up with staff and inmates beaten and even killed,'' Freeman said, explaining his decision to stall the search for a two-day cool-down period.

That decision prompted Gov. Robert P. Casey to order Freeman's suspension without pay on Nov. 2, and it was cited by Casey's investigating commission as the major cause for a second night of rioting at the prison.

The hearing was Freeman's first public opportunity to present his view of the riots that left 122 people injured and nearly half of Camp Hill's buildings destroyed by fire.

''Forty days later, and after six complete shakedowns, they are still finding weapons and tools,'' Freeman said. ''The institution still has not been completely shaken down.''

Deputy for Operations Richard Smith said he concurred with Freeman's decision to delay an institution-wide search because of the crowding in the cells and the danger of putting the two groups together.

''Nearly the entire institution witnessed their fellow staffers beaten for hours and dragged around,'' Smith said. ''(A cell-by-cell) search did not seem to be the appropriate thing to do.''

Freeman also told the committee he was not informed that inmates were able to get out of their cells after the first night of rioting, although he said he was aware that locking mechanisms in one cellblock were broken.

He appeared to blame the captains and majors - the highest-ranking officers with day-to-day responsibility within the cellblocks - for not communicating the unstable situation to him and his deputies.

''The information I had at the conclusion of the first day of rioting was that the inmates were secure in their cells and the institution could

begin to return to normal,'' Freeman said.

''Decisions were made on the basis of information that was received. Ultimately the decisions were good ones because nobody died, nobody was crippled for life and nobody escaped,'' he said.

Casey's commission, chaired by former federal Judge Arlin Adams, blamed ''misjudgment'' by the prison management for the riots. It said the administration failed to respond to guards' warnings about insecure cells and weapons in the hands of inmates.

It also criticized the prison staff for not putting on a strong ''show of force'' to put down the first riot and for allowing all but 25 state police troopers to leave the prison after the first night.

NEW YORK (JAN. 16) UPI - A defense lawyer Tuesday harshly criticized a doctor who claimed she caught AIDS from a contaminated needle at a public hospital, saying she ignored a physician's advice and waited too long to file her $175 million lawsuit against the city.

The confrontation came on the fifth day of testimony by Dr. Veronica Prego in state Supreme Court in Brooklyn. Prego, 32, is suing the city's Health and Hospital Corp., Kings County Hospital and two doctors for negligence and breach of confidentiality.

In seeking $175 million in damages, the Argentine doctor claimed an intern left a needle contaminated with blood from an AIDS patient on a bed and that Prego pricked her finger on it.

The case is believed to be the first trial in which a doctor has claimed hospital negligence caused her to get AIDS.

Defense lawyer Stanley Friedman attacked Prego for waiting four years after she was infected before she sued the city. The defense has repeatedly tried to pursuade Justice Aaron Bernstein to dismiss the suit, arguing the statute of limitations had passed.

The city claims Prego should have filed suit when she first became infected with the virus, rather than when she became sick in 1987.

Friedman grilled Prego about her actions in the days after Jan. 12, 1983, when she says she caught the virus from the needle.

Citing Prego's medical records, Friedman described how she visited the Kings County hospital student health service to report the accident. A doctor there reassured her there were no reports of health care workers ever contracting AIDS from a needle prick.

But according to the records, the doctor told Prego to return if she displayed certain symptoms, such as fever or swollen glands - early indications of aids-related complex, or ARC.

''What did the doctor say you should do if you had vomiting, fever or swollen lymph nodes?'' Friedman asked.

''He told me if I got sick to come back,'' Prego replied.

''Do you remember being told anything about (swollen glands)'' Friedman asked.

''No,'' she replied.

Friedman's questioning suggested Prego and her doctors suspected ARC, an early sign of AIDS, when a lymph node under her arm became enlarged, but failed to pursue legal action at that time.

Prego's lawyer, Susan Karten, dismissed the idea.

''The condition resolved itself, it's just a red herring,'' she said.

Earlier, the head of the Guardian Angels and a fashion model whose face was slashed in an attack appeared in court to protest what they viewed as the hostile questioning of Prego.

Model Marla Hansen, 28, whose face was slashed by thugs, said that defense questioning of Prego ''reminded me'' of the intense and personal questioning she underwent during the trial of her assailants.

#90016u2110 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - Egyptian Foreign Minister Ismat Abdel-Meguid said Tuesday that the U.S.-led negotiations on setting up an Israeli-Palestinian dialogue have entered a new phase, preparing for a expected three-way conference in Washington.

After meeting with Secretary of State James Baker for more than an hour, Meguid told reporters at the State Department, ''We see that a lot has

been achieved in what I call the first phase.''

He continued, ''We are now in the second phase, which is the preparation for a dialogue in Cairo between the Israelis and the Palestinians and the tripartite meeting of the (Egyptian, Israeli and American) foreign ministers in Washington.''

If such a meeting takes place, it would probably be in late February.

In the Washington conference, Egypt would represent the Palestinians, but in the subsequent Cairo conference, a Palestinian team of 10 negotiators would meet directly with an Israeli group to discuss the ground rules for elections in Israeli-occupied territories.

The Washington conference has been in doubt for the last month with American officials describing a stalemate between the Israelis and the Palestinians. The Israelis have insisted on approval of the makeup of the Palestinian team, while the Palestine Liberation Organization has refused to say in advance who the representatives will be.

The Israelis also have insisted that the talks be limited to the single issue of the election rules, while the Palestinians insist on the right to raise other, wider questions.

On Thursday, Baker is to meet Israeli Defense Minister Yitzhak Rabin, who is in the United States on a private visit, speaking to groups in Los Angles, Washington and New York.

Meguid said that he will meet Baker again on Friday, but he has no plans to meet Rabin.

Meguid said that the Washington conference has not been scheduled yet but added, ''We are certainly very keen on this meeting.''

He described his meeting with Baker as ''very interesting and useful,'' an upbeat description that contrasted with the more measured and cautious American appraisals.

U.S. officials denied Baker was losing hope, but officials also made it clear his patience is running thin with a process that had occupied much of his time for the past four months with little to show for it.

#90016u2136 01/16/1990 ~United Press International

NEW YORK (JAN. 16) UPI - Stocks closed higher Tuesday in active trading, with the blue chips up sharply, boosted by a rally in technology issues and bargain hunting by institutions.

The Dow Jones industrial average, which fell 19.84 Monday, rose 23.25 to 2692.62, after being down as much as 28 points in early trading.

Broader market indicators kept pace with the Dow industrials. The New York Stock Exchange composite index rose 1.66 to 188.37. Standard & Poor's 500-stock index rose 3.75 to 340.75. The price of an average share gained 32 cents.

Advances nosed out declines 800-710 among the 1,971 issues crossing the NYSE tape. Losers had led by as much as five to one in early trading. Big Board volume totaled 186,070,000 shares compared with the 140,590,000 shares traded Monday, the Martin Luther King, Jr., holiday, when banks and government offices were closed.

Analysts said bargain hunting by institutions after the market's plunge last week as well as a rally in the technology sector pushed the market into the plus column. Bolstering computer stocks were surprisingly strong earnings reports from Intel Corp. Tuesday and NCR Corp. Monday, they said.

"Institutions took the opportunity to buy on weakness," said Peter Vandenberg, vice president of equity trading at Shearson Lehman Hutton Inc. "And there's been buying in the technology sector. IBM's earnings are supposed to come out soon and they're supposed to be okay," he said.

Just before midday, a round of computerized program buying, used to profit on price differences between stocks and stock index futures, boosted prices from sharply lower levels, analysts said. The Dow industrials had been down as much as 28 points, having fallen from the opening on a plunge in the Tokyo market overnight and weakness in the bond market.

On the trading floor, Philip Morris was the most active NYSE issue, up 1 1/4 to 39 3/8.

Citicorp followed, down 1/2 to 26 after reporting a loss for the fourth quarter, but one which included a $1 billion addition to reserves for loans to developing countries. Aristech Chemical was third, surging 5 1/2 to 24 5/8 after reports that a management buyout at $26 a share has been proposed.

Among the other blue chips, AT&T rose 1/2 to 43 1/8. The company was quoted as saying it still does no know what caused the computer glitch that left many customers around the country unable to make long-distance calls Monday.

IBM surged two to 100 1/8, leading the technology sector up, and Chevron rose 1 1/4 to 65 7/8. Merck extended its slide, however, down 1/8 to 73 1/8 but rebounded from a sharp loss in earlier trading. Reports said the company has discontinued work on Prodiax, a drug for complications from diabetes. USX was up one to 35 1/2.

Elsewhere in the technology sector, NCR jumped 2 3/4 to 63 3/4, Compaq surged 2 3/8 to 83 7/8, Digital soared 4 1/4 to 89 1/8 and Cray Research gained 1 3/4 to 38 7/8.

Other major banks which released earnings statements posted gains. Security Pacific was up one to 38 5/8 after reporting a rise in

fourth-quarter earnings. And Wells Fargo jumped two to 72 3/8, also after reporting a fourth-quarter earnings gain.

The Big Three automakers were sharply higher after reporting sales gains for early January. Ford rose 1 3/4 to 45, General Motors gained 1 1/4 to 42 1/2 and Chrysler closed up 5/8 to 18 3/4.

Elsewhere, Sea Containers soared four to 63 1/2 after plunging Monday. The company said it would urge acceptance of a bid from Temple Holdings that includes some asset sales. Many players had hoped for a bidding war involving the company and thus a greater return on their investment.

Great Northern Nekoosa surged 2 1/4 to 58 1/2. Georgia-Pacific, which has bid $63 a share for the company, has begun to solicit proxies in support of its proposals to be considered at a special shareholders' meeting Mar. 2, which include a proposal to remove Nekoosa's board and elect nominees of Georgia-Pacific as directors, reports said. Georgia-Pacific closed up 1 3/8 to 48 3/4.

And Georgia Gulf rose 1 1/2 to 44. The company unveiled a $55-a-share recapitalization plan late Monday.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 217,797,910 shares, up from 168,125,080 shares traded in the previous session.

Prices closed lower in active trading on the American Stock Exchange. The Amex Market Value index closed off 0.17 to 368.41. The price of an average share lost one cent. Declines led advances 337-240 among the 821 issues traded. Composite volume totaled 17,873,000 shares, compared with 15,396,480 shares traded Friday.

Kingdom of Denmark "put" warrants on the Nikkei index, which effectively function as bets that the Tokyo stock market will fall, led the Amex issues, off 1/2 to 5 3/8.

The National Association of Securities Dealers composite index rose 3.52 to close at 440.16.

#90016u2160 01/16/1990 ~United Press International

DETROIT (JAN. 16) UPI - The nation's automakers Tuesday posted a 27 percent gain in sales of domestically made cars and light trucks during the first ten days of January, but industry analysts said the robust pace was unlikely to continue.

The latest sales results - fueled by enhanced buyer incentives in late December and a 40.4 percent rise in car sales by industry leader General Motors Corp. - were also being measured against weak year-ago levels, making the gains look even more substantial. Still, the industry posted its first year-to-year ten-day sales gain since the start of the model year last Oct. 1.

Sales of domestically built cars alone during the Jan. 1-10 period rose 29.8 percent from a year ago when measured by sales per day. Light truck sales rose 22.8 percent.

The annual sales rate for domestically built cars - the most common measure of industry performance - was a strong 8.0 million cars during the period, compared with a weak six million units last year.

"Carmakers have put in fairly extensive and expensive incentives during the last part of December, so when compared with last year it looks like gangbusters," said David Healy, an independent auto analyst in New York.

Healy noted that the nation's Big Three automakers are offering close to $1,000 back on each vehicle they sell to spur sales. "I would be real surprised if this rate continues into the rest of January," Healy said, although some factors in the economic outlook, like lower interest rates, could cause sales to strengthen this spring or summer as most carmakers predict.

All top automakers have been forced into idling dozens of plants and thousands of workers in January and part of February to trim stocks of unsold cars, which reached a nine-year high as of Dec. 31.

The eight companies - General Motors Corp., Ford Motor Co., Chrysler Corp., American Honda Motor Co., Nissan Motor Manufacturing U.S.A., Toyota Motor Sales U.S.A., Mazda Motor Manufacturing (USA) Corp. and Mitsubishi Motor Sales of America, Inc. reported combined sales of 158,775 cars and 101,539 trucks in the United States during the latest period. This compares with 107,031 cars and 72,371 trucks sold in the year-ago period, automakers said.

The daily selling rate of 32,539 vehicles compares with 25,629 vehicles per day for the same period last year. There were eight selling days this

year, compared with seven last year.

For the period, sales of GM's domestically made cars soared 40.4 percent, while its truck sales rose 28.4 percent from a year ago. Second-ranked Ford posted a 15.4 percent rise in car sales and a 10.9 percent gain in truck sales.

Chrysler's car sales rose 14.4 percent, while its light truck sales including Jeep jumped 43.7 percent when compared with the combined total a year ago.

Among the smaller companies reporting sales of U.S.-built cars, Honda posted a 21.2 percent gain from year ago levels. Nissan reported a 48.2 percent drop in sales of its U.S.-built cars, while sales of its domestically made compact trucks skidded 63.2 percent from year ago levels.

Toyota reported a 513.1 percent rise in sales from a year ago, when its only domestically built cars were Corolla models at its joint venture plant with GM in California. Mazda sold 713 of its new MX6 coupes produced at its Flat Rock, Mich. assembly plant, vs. 261 a year ago.

Mitsubishi reported sales of 1,344 Eclipse cars built at its joint venture plant with Chrysler in Illinois, vs. 51 a year ago when it was just starting production.

CAPE CANAVERAL, FL (JAN. 16) UPI - The space shuttle Columbia, NASA's ''lady of the fleet,'' zoomed around the globe for a second week Tuesday in excellent shape and the ship's five astronauts pressed on in good health and high spirits.

Working a graveyard shift, skipper Daniel Brandenstein and crew devoted their eighth day in orbit to the pursuit of science, photographing the blue Earth below and studying the effects of weightlessness on the human body.

''The crew is in good spirits, doing good work. It's going very well,'' Columbia's lead flight director, Granvil Pennington, said from the mission control center in Houston.

The astronauts, racing along at 17,000 mph on their 10-day mission, also beamed home spectacular television pictures of a man-made snowstorm in space, the dumping of excess water from the shuttle's waste tanks.

''We're continually gaining insights and information on the hardware and the vehicle and this vehicle's performing very good,'' Pennington told United Press International. ''I say it's the lady of the fleet.

''It's a very, very good stout vehicle and it's showed itself to be in really fine shape,'' he added. ''It's doing an excellent job.''

NASA's oldest shuttle - on its ninth expedition into the great void - made a fiery debut April 12, 1981, in mankind's first flight of a reusable spacecraft. Built in the 1970s, Columbia is designed to fly 100 times.

The crew reported a navigational aid that sounded a false alarm Sunday night behaved properly Tuesday, and a space diaper wrapped around a leaky humidity unit stopped water from trickling into an equipment compartment.

''We're in fat city for the rest of the mission,'' Brandenstein said of the apparently successful plumbing job.

Columbia rocketed into space on America's 33rd shuttle mission, the longest since the 1986 Challenger accident, last Tuesday from launch pad 39A at the Kennedy Space Center carrying Brandenstein, 46, co-pilot James

Wetherbee, 37, Bonnie Dunbar, 40, Marsha Ivins, 38, and G. David Low, 33.

#90016u2203 01/16/1990 ~United Press International

PANAMA CITY, PANAMA (JAN. 16) UPI - The U.S.-installed Panamanian government Tuesday gave a Peruvian diplomat three days to leave the country, and Peru countered by saying the diplomat will take with him a dozen Panamanians who have been granted asylum in its embassy.

Deputy Foreign Minister Juan Manuel Castulovich said the decision to expel Peruvian Luis Sandiga, the commercial attache at the embassy, was taken in response to declarations made by ''Peruvian authorities that make normalization of relations between our two countries difficult.'' He did not elaborate.

Peru has been one of the most vocal critics of the U.S. invasion of Panama Dec. 20 that toppled Panamanian ''Maximum Leader'' Manuel Antonio Noriega and installed Guillermo Endara as president.

Although Endara was widely believed to have won presidential elections held in Panama last May 7 that were later invalidated, he has said that Panama would not hold new elections as Peruvian President Alan Garcia has proposed.

Garcia has branded the U.S. invasion ''brutal, excessive, exaggerated, abusive and arrogant'' and has refused to recognize Endara's government.

In Lima, the Peruvian goverment said it would respond in kind to the expulsion but did not say how many Panamanian diplomats it would expel or when.

Peruvian Foreign Minister Guillermo Larco Cox said in Lima that the 12 Panamanians at the Peruvian Embassy in Panama City, including five top officials of Noriega's Panamanian Defense Force and seven members of their families, ''may be in a precarious position.''

He said Peru would ask for the intervention of the Vatican's chief diplomat in Panama if the Endara government tries to prevent the 12 from leaving the country with Sandiga.

The papal nuncio, Juan Sebastian Laboa, gave refuge to Noriega for 10 days after he sought asylum at the Vatican Nunciature in Panama City on Christmas Eve. Noriega eventually surrendered to U.S. forces and was sent to Miami where he faces trial on drug trafficking charges.

Larco Cox said the Panamanian refugees must be allowed to leave the country under the terms of an agreement called the Caracas Convention, which states that people who have sought asylum in an embassy can leave with an expelled diplomat.

In an apparent reference to former Peruvian Ambassador Mario Castro Arenas

who resigned in a dispute over Peru's policy toward Panama, Larco Cox said the Panamanian decision ''was instigated by someone who has moved to Panama, betraying his country.''

Castulovich said Sandiga had been asked to leave the country by Friday, but he said the Peruvian Embassy was operating and would not be closed.

The Panamanian government also has ordered its first secretary in its embassy in Peru to return to Panama, he said.

Peru recalled its ambassador to the United States, Cesar Atala, in the days following the U.S. invasion, and he has not yet returned to Washington, a spokesman at the Peruvian Embassy said Tuesday.

Castulovich also said the Panamanian government soon would decide the status of future relations with Cuba and Nicaragua, two foes of the United States.

The Cubans have been housing Noriega's wife, Felicidad, at their compound, as well as Noriega's three daughters, a son-in-law and a grandson.

A week after the invasion U.S. troops stormed into the home of Nicaragua's ambassador in Panama City, searching cupboards and closets before leaving with an apology. Nicaraguan President Daniel Ortega responded by ordering 20 top U.S. diplomats out of Managua.

In Washington, State Department spokesowman Margaret Tutwiler said the U.S. military forces in Panama were still checking cars going in and out of the Cuban mission in Panama, and the Cuban ambassador's car had been checked.

She said, ''The Cuban ambassador's car has very dark tinted windows which required those guarding the mission to open the doors to identify the passengers.''

She said the U.S. forces were assisting the Panamanian security units and expected to turn most of their duties over to the Panamanians.

CINCINNATI (JAN. 16) UPI - Thousands of creditors are owed a total of $7.7 billion by Federated Stores Inc., bankruptcy court documents showed Tuesday.

First Boston Corp. is Federated's largest unsecured creditor, owed a total of $526 million - $429 million by Federated and $97 million by Allied stores, the papers revealed.

Although Federated and Allied combined their operations Tuesday under the one name of Federated, bankruptcy documents were filed Monday by both the old Federated and Allied, which sought Chapter 11 protection from creditors.

Federated and Allied were U.S. subsidiaries of Campeau Corp., which was listed as a major unsecured creditor of both Federated and Allied. The bankruptcy records showed Campeau is owed $100 million by Allied and $75 million by Federated.

The documents also included claims against individual stores in the Federated and Allied chains. The top amount owed by Bloomingdale's, the crown jewel in the Campeau retail family, to a single supplier was $731,000 to Chanel Co. Lazarus, another well-known store, listed its largest unsecured creditor as Liz Clairborne, Inc. at $1.4 million.

While the total owed creditors was $7.7 billion, the documents showed Campeau's assets to be $9.1 billion. Despite all the assets, steep interest payments on loans taken out by Campeau for the $6.6 billion purchase of Federated and $3.6 billion purchase of Allied in leveraged deals forced the bankruptcy filing.

''Federated operations are healthy and growing, but they cannot cover all the debt payments incurred by the corporate parent,'' Federated executives said.

Federated, which listed liabilities of $5.3 billion, said it had secured debts of $2.9 billion owed to 310 creditors. It said unsecured debt securities, so-called junk bonds, totaling $795 million were held by 225 creditors. Other liabiliites topping a total of more than $1 billon are owed to 35,000 creditors.

Allied, with liabilities of $2.4 billion, listed $586 million of secured debt owed to 100 creditors along with $700 million in junk bonds and more than $1 billion in other liabilities to 15,000 creditors.

The bankruptcy documents also revealed that lawyers make a lot of money from such filings. In one document, Federated requested bankruptcy court approval to pay $1.7 million to one law firm that has been working on their financial problems.

#90016u2205 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - Senate Republican leader Robert Dole of Kansas called Tuesday for Israel and other big recipients of American foreign aid to take a budget cut so more assistance can be redirected to emerging

democracies in Eastern Europe and Panama.

''Israel is our best ally in that part of the world, but we have got limits,'' Dole told reporters. ''Israel has got a lot of preferential treatment.''

The White House reacted coolly to the suggestion. Press secretary Marlin Fitzwater, while acknowledging the competition for foreign aid will only grow stronger in the next budget year, was not prepared to condone a realignment of current priorities to meet new needs.

Dole said that aid to the five biggest recipients - Israel, Egypt, the Philippines, Turkey and Pakistan - could be trimmed to free money for needier countries in Eastern Europe and Latin America.

Fitzwater said the aid amounts for the five countries reflected ''longstanding'' U.S. policy.

''That doesn't mean we wouldn't like to have some money for other countries and other problems, but we just don't have it,'' he said.

In a column for The New York Times and later at a news conference, Dole said reallocation of current foreign aid commitments is the only ''immediate answer'' to the question of how to sustain progress toward democracy and free-market economies around the world.

Citing ''changing priorities,'' Dole noted that a 5 percent reduction in the amount now going to the five major recipients, which together consume more than two-thirds of the foreign aid budget, would make available about $330 million for Poland, Panama, Hungary and other countries ''that under current allocations would not receive one penny of American aid.''

''They must understand the government has got a big deficit,'' Dole told reporters. ''Where are we going to get the money, where does it come from? It's fair across the board. It is an effort to meet new obligations.''

Israel benefits from a strong lobby in the United States, as do many of the other large aid beneficiaries, and Dole complained that ''pressure groups'' have led Congress to lock in large sums of aid to certain countries that might be better used elsewhere.

''It shouldn't be whether Israel goes along; it should be whether Congress goes along,'' Dole said. ''We are a sovereign nation. That is a judgment we ought to make, rather than some lobbying group, whether it is Israel, Turks, Greeks, or the Philippines.

''It is a new ball game. We've got new players and we've got new obligations. We need to take a look at how we spend our money, and there's

a scarcity of it. Maybe Israel ought to look at their economy and look at some of their inflationary trends and how they can help us save some money.''

Sen. Howard Metzenbaum, D-Ohio, objected, saying the needed money should come from ''unnecessary weapons programs'' as the Strategic Defense Initiative and the B-2 bomber.

The American Israel Public Affairs Committee, a powerful lobbying group in behalf of Israeli interests, said it shares Dole's concern about aiding the emerging democracies, but it ''should not be at the expense of other vital U.S. policy objectives.'' The group call for increasing the foreign aid budget.

At the State Department, spokeswoman Margaret Tutwiler said abolishing the system of ''earmarking'' foreign aid would give the president ''more flexibility to allocate funds in a changing world.'' The largest ''earmarks'' go to Israel and Egypt.

#90016u2207 01/16/1990 ~United Press International

NEWPORT, RI (JAN. 16) UPI - An elderly man apparently shot and killed his wife early Tuesday, then called an emergency 911 line to report his own suicide before fatally wounding himself, police said.

Investigators believe Stanley Radecky, 78, called 911 at 4:48 a.m. to report a suicide in his home, Patrolman Michael McKenna said. Police arrived to find Radecky and his wife, Alice, 81, inside their first-floor apartment, both shot once in the head.

The Radeckys were taken to Newport Hospital. The husband was pronounced dead at 5:30 a.m., the wife at 6:20 a.m.

A note apparently written by the husband said Alice Radecky had been ''sick and suffering'' and ''wanted to die,'' McKenna said.

''This is the only solution,'' the note said.

A .45-caliber handgun was found at the scene. Investigators were looking into reports that Alice Radecky that had suffered a recent stroke, McKenna said.

#90016u2214 01/16/1990 ~United Press International

(JAN. 16) UPI - El Salvador's president is denying that rumors of a possible military coup forced him to postpone a trip to the United States

this week. Alfredo Cristiani told interviewers that the trip was delayed because of a conflict with U-N Secretary-General Perez de Cuellar's schedule. He says doesn't believe a coup is a possibility now because leaders of his nation's armed forces support the prosecution of soldiers accused of killing six Jesuit priests.

Cristiani also says his government thinks it has arrested almost all those directly involved in the November slayings and the suspects will be handed over to the courts ''today or tomorrow.'' Cristiani was to have arrived at the United Nations today to discuss resuming the stalled peace talks with rebels. A Salvadoran Foreign Ministry spokesman says Cristiani now plans to visit the United States the week of January 29th.

Soviet officials say a disputed enclave in Azerbaijan resembles a ''warfront.'' Officials in Moscow have raised the death toll to at least 56 in three days of ethnic violence. A Soviet military commander likens the fighting in the regional capital of Baku to a ''civil war.'' And the official Tass news agency says both the majority Armenians and the minority Azerbaijanis in Nagorno Karabakh dug fox holes and are even using armored personnel carriers.

The Food and Drug Administration is issuing new guidelines for use of the AIDS-fighting drug A-Z-T. Government experts now say patients should use only half the recommended daily 1200-milligram dose... because research shows lower levels of A-Z-T work just a well... with fewer serious side effects. A-Z-T is the only federally approved drug that directly attacks the AIDS virus. Burrough's Wellcome Company, the drug's manufacturer, says more than 400-thousand Americans currently take A-Z-T.

#90016u2215 01/16/1990 ~United Press International

WASHINGTON (JAN. 16) UPI - The Supreme Court Tuesday celebrated the less than auspicious beginnings of that august body 200 years ago with a special session of the court and a reception.

The first meeting of the Supreme Court was held on Feb. 1, 1790, in the Royal Exchange Building in New York. The court adjourned shortly thereafter as only three of the original six justices were able to make it. The court's first chief justice, John Jay, who resigned after serving less than six years, called the postition ''intolerable.''

Attendance, however, was not a problem Tuesday. The court had a quorum plus. Besides the nine members of the current court, retired Chief Justice Warren Burger was in attendance.

''The young Supreme Court did not enjoy the prestige that it has today,'' Burger said in an address to the justices. ''It was not regarded as a

co-equal branch, and some questioned whether it could survive. Even Chief Justice Jay, one of the greats among our founding fathers, did not see much of a future for the court. He resigned after about six years to become governor of New York.''

In addition to Burger, former Solictor General Rex Lee, and current Solicitor General Kenneth Starr delivered speeches, most of a historical nature, to the court.

Chief Justice William Rehnquist closed the session with remarks that noted the U.S. model of a written constitution that guarantees basic human rights has taken hold in the post-World War II years and continues to expand.

''As we look today towards Eastern Europe - where a curtain which had been drawn for nearly half of a century has been lifted only with the past year - it may not be too much to hope that these nations, too, will see fit to re-shape their judiciaries on the American model,'' Rehnquist said.

After the special session, the court and invited guests attended a reception in the court's ornate conference rooms down the corridor from the chamber. In addition to a number of court employees a variety of federal judges, members of Congress and Attorney General Dick Thornburgh attended.

Sugar import quota raised again

WASHINGTON (JAN. 16) UPI - The government, responding to freeze damage in the South, raised the sugar import quota by 13 percent Tuesday - the second time the quota has gone up in two months.

The latest increase was almost exactly the same size as had been requested by a trade group that represents industrial consumers of sugar and other sweeteners.

Agriculture Secretary Clayton Yeutter's decision to expand the quota came a few days after government forecasters lowered their estimates for U.S. sugar production. The crop already had been expected to barely exceed the 1988-1989 crop. It now is projected at 6.62 million tons, 4 percent less than 1988-1989.

The quota was raised by 358,255 tons to a total of 2.85 million tons. In metric measurements, the quota was raised by 325,000 metric tons for a new quota of 2.58 million metric tons.

''This change in the level of the quota is necessary to counter tightness in domestic sugar supplies caused by unexpectedly low production of beet sugar and damage to the Florida and Texas sugar cane crops resulting from the December freeze,'' Yeutter said.

As part of the increase, the United States revised its list of country by country allocations for sugar shipments. The Dominican Republic again had the largest allocation, 426,331 metric tons, followed by Australia, 201,054 metric tons, and Guatemala, 116,272 metric tons.

Panama's allocation was increased to 69,312 metric tons, but it ''is suspended and not allowed to be shipped at this time,'' the government said.

Thomas Hammer, president of the Sweetener Users Association, applauded the government for acting swiftly. He said the increase amounted to ''a mathematical wash'' since it would make up for the decline in U.S. production.

''If they (the government) hadn't acted, it would have had an adverse impact'' on industrial users of sugar and sweeteners, Hammer said.

The sugar import quota is a component of the U.S. sugar program that props up prices for U.S. sugar and guarantees a minimum price to U.S. growers.

The government raised the sugar quota by 300,835 tons Nov. 24 because of predictions of a small crop this season and the unexpectedly low level of sugar reserves.

#90016u2413 01/16/1990 ~United Press International

WORTH, WV (JAN. 16) UPI - Gunmen fired into a crowd of picketing coal miners Tuesday, killing one man and wounding two others at the mouth of two non-union mines in what one lawman called ''a little war'' in rural West Virginia.

One witness told police more than 30 rounds were fired in the mysterious

shooting around 8:30 a.m. on an access road to the two mines.

Authorities said three pickup trucks drove by the demonstrating mine workers, and then shots were fired from a section of woods above the intersection, about 200 yards away.

''It was a little war up there,'' McDowell County Sheriff R.J. Allen said. ''I've never seen so much artillery.''

Police collected more than 30 firearms, most of them handguns, from picketers after the shooting. It was unclear whether there had been an exchange of gunfire.

No arrests were reported in the attack.

A spokesman in the United Mine Workers union office at nearby Welch said the men shot were union members, but he would not say whether they were conducting a sanctioned demonstration or comment on what they were protesting.

All workers at the two southern West Virginia mines were removed ''for their safety'' following the hail of gunfire, state police spokesman Ric Robinson said.

State troopers escorted picketing UMW members and the non-union workers from the scene of the shooting and then began interviewing some 15 witnesses.''They're conducting a very intensive investigation,'' Robinson said.

The mines, both non-union, are owned or run by H.C. Industries of Northfork and Bailey Energies of Panther.

The dead man was identified as John McCoy, 42, of Roderfield. A spokesman at Welch Emergency Hospital said McCoy was shot in the head and neck.

Darrell Morgan, 40, and Steve Morgan, 33, both of Brenton, were wounded in the hail of gunfire. Both were taken to Bluefield Community Hospital and a spokeswoman there said both were in stable condition but had no further details on the nature of their injuries.

The shooting appeared unrelated to bitter disputes between the UMW and Pittston Coal Group. The two sides have reached a tentative contract, but a ratification vote may not be held until February.

Robinson said the site of the shooting, where W.Va. 17 intersects Indian Hollow Road at Worth, has been patrolled by state police because of frequent picketing in recent weeks. The shooting took place about 2 miles from the mines.

''Troopers secured the area,'' Robinson said. ''We took the employees working out, and took the pickets out. We didn't have any problems - no difficulty from anyone.''

In a statement released by his office Gov. Gaston Caperton called the shooting ''an outrage.''

''This unconscionable act of violence offends all West Virginians. I have ordered (State Police Superintendent) Col. Jack Buckalew ... to assign his top investigator to the case,'' Caperton said.

The death Tuesday could be the first in the nation involving a UMW labor dispute since 1984, when a non-union coal truck driver - Hayes West - was killed in Pike County, Ky., during a bitter strike by the union against A.T. Massey Co.

#90016u2416 01/16/1990 ~United Press International

(JAN. 16) UPI - Soviet troops are patrolling the empty streets of the Azerbaijani capital of Baku, enforcing a curfew and state of emergency. The commander of the embattled region describes the situation as- quote- ''civil war.'' At least 56 people have died the latest ethnic violence in Armenia and Azerbaijan.

In Washington, the White House responded to the escalating violence in the two Soviet republics by saying it understands Moscow's need to restore order. But presidential spokesman Marlin Fitzwater says the Bush administration is hopeful for ''as little use of force as possible.''

Defense Secretary Cheney today postponed announcing new anti-drug military operations and the possibility of stationing U-S warships off the Colombian coast appeared jeopardized. The White House says it's discussing the initiative with Colombia but will make NO decision without the ''full co-operation'' of the South American country.

Former U-S Surgeon General C. Everett Koop says the work place is the ''proper arena'' to address the nation's drug problem. Koop spoke in support of a proposed bill that would set up federal standards for private employers to test workers and job applicants for illegal drug use.

A West Virginia lawyer told the U-S Supreme Court today that the current black lung benefits system pits ''poor, old, sick coal miners'' against government lawyers and unfairly denies them the compensation they deserve. The attorney says the unconstitutional procedure deprives miners of their due process rights, adding many cases take six to 10 years to settle.

#90016u2438 01/16/1990 ~United Press International
HOUSTON (JAN. 17) UPI - First City Bancorporation of Texas reported record fourth-quarter earnings Tuesday of $29.1 million, or $1.20 a share, up 15 percent from $25.2 million, or $1.05 a share, in the same quarter last year.

The fourth quarter results brought year-end earnings to $112.2 million, or $4.66 a share. For the period of April 20 to Dec. 31, 1988, following recapitalization, First City earned $66.1 million, or $2.73 a share.

First City does not report earnings for periods before the recapitalization.

First City's loan-loss reserve at year's end was $147.6 million, or 1.79 percent of total loans outstanding and 105 percent of non-performing assets. On Sept. 30, 1989, the reserve was $147.5 million, or 1.90 percent of loans, and Dec. 31, 1988, it was $143.5 million, or 2 percent of loans.

It is expected that, over time, the reserve level will normalize at about 1.5 percent of total loans outstanding, First City said in a statement.

Non-performing assets as of Dec. 31 totalled $140 million or 1.7 percent of loans and other real estate and collateral acquired. The total included loans of $109 million and other assets foreclosed and owned of $31 million.

#90016u2449 01/16/1990 ~United Press International
(JAN. 16) UPI - The East German deputy interior minister says the thousands of demonstrators who stormed the East Berlin headquarters of the secret police yesterday caused Millions of dollars in damage. The minister says the two-hour rampage left the offices, barber shop, book store, kitchen and storerooms ''destroyed.''

A U-S Embassy spokesman in Peru says assailants hurled three bombs at the building housing Marines who provide the Embassy with security. Police say NO Marines were injured in last night's blast. The spokesman says the building, which normally houses 20 Marines, sustained damage to a door and windows.

Police in Thailand say the bodies of 12 partially clothed or naked Vietnamese women and two boys have washed ashore in the southern part of the country, 380 miles south of Bangkok. Authorities say the victims apparently were strangled and thrown into the sea after a pirate attack on a refugee boat about 10 days ago.

A robbery suspect was caught with his pants down in Charlotte, North Carolina. Police arrested Jeffery Link on bank robbery charges after finding the suspect... wearing only his blue boxer shorts... in a laundry washing his clothes. Police say they found the stolen money in Link's shoes.

(JAN. 17) UPI -

Baseball

Baltimore - Signed outfielder Joe Orsulak and pitcher Jay Tibbs to 1-year contracts.

Boston - Signed pitcher Wes Gardner and catcher Rich Gedman to 1-year contracts.

California - Signed pitcher Mike Witt to a 1-year contract.

Cleveland - Signed catcher Joel Skinner to a 1-year contract; announced resignation of media relations director Rick Minch.

Detroit - Signed pitcher Edwin Nunez to a 1-year contract.

Oakland - Signed pitcher Curt Young to a 2-year contract.

Philadelphia - Signed pitcher Roger McDowell to a 3-year contract, pitcher Floyd Youmans to a 1-year contract and third baseman Dave Hollins.

Pittsburgh - Signed outfielder John Cangelosi to a 1-year contract.

San Diego - Signed pitcher Pat Clements to a 1-year contract.

San Francisco - Announced outfielders Kevin Mitchell and Donell Nixon agreed to 1-year contracts.

Seattle - Signed pitcher Jerry Reed and outfielder Mickey Brantley to 1-year contracts.

Texas - Announced pitchers Jose Guzman and Bobby Witt agreed to 1-year contracts.

Basketball

Columbus (CBA) - Announced coach Gary Youmans resigned and was replaced by assistant Bill Klucas.

Dallas - Signed guard Kelvin Upshaw to a second 10-day contract.

College

Alabama - Announced linebacker Keith McCants will give up his final year of eligibility to become available for the NFL draft.

Jacksonville - Announced suspension of basketball center Steve Gilbert.

Lock Haven - Named Dennis Therrell football coach.

Minnesota - Named Mike Pendino football assistant.

Montana State - Named Bart Andrus offensive coordinator; announced resignation of defensive coordinator Don Dunn.

Southeastern Conference - Reprimanded Louisiana State Coach Dale Brown and Kentucky Coach Rick Pitino for misconduct during Saturday's game between the two schools.

Football

Green Bay - Announced coach Lindy Infante received a 2-year contract extention through 1994.

Phoenix - Announced retirement of quarterback Neil Lomax.

Hockey

Boston - Traded center Ken Linseman to Philadelphia for center Dave Poulin.

Hartford - Loaned forward Chris Govedaris to Hamilton of the Ontario Hockey League.

NY Rangers - Called up defenseman Normand Rochefort from Flint of the International Hockey League.

#90016u2690 01/16/1990 ~United Press International

SAN JOSE, Calif. (JAN. 17) UPI - Hewlett-Packard Co. vaulted to the No. 2 position in the booming market for computer workstations in 1989 with the $500 million acquisition of Apollo Computer Inc., a market research firm reported Tuesday.

Hewlett-Packard's 26.7 percent share of the $6.1 billion worldwide workstation market ranked a close second behind Sun Microsystems Inc. of

Mountain View, Calif., which captured 28.7 percent of the market, Dataquest Inc. of San Jose, Calif., said.

Workstations - powerful computers often used by technical professionals - are one of the hottest segments of the computer industry.

The world market for the machines grew 40.2 percent last year and is expected to expand at an annual clip of 30 percent over the next five years, compared with 17 percent for the overall technical computer industry, Dataquest said.

Prior to its purchase of Apollo in 1989, Hewlett-Packard of Palo Alto, Calif., was the third largest workstation maker in the world and Apollo was fourth.

Their merger dropped Digital Equipment Corp. to third place, with a 15.9 percent market share, down from 17.6 percent in 1988, Dataquest said.

Intergraph came in fourth with a 6 percent share, down from 6.8 percent in 1988, Dataquest said.

Fifth-ranked Silicon Graphics captured 5.2 percent of the market, up from 4.2 percent in the prior year.

The overall workstation market has been fueled by new applications for the machines, lower prices and better performance, Dataquest analyst Kathleen Hurley said.

#90016u2707 01/16/1990 ~United Press International

MIAMI (JAN. 17) UPI - Embattled CenTrust Bank, whose chairman has been accused by regulators of squandering the thrift's assets, Tuesday reported it lost $97.3 million for the fourth quarter, compared with a loss of $2.7 million for the same period last year.

Net interest income fell to $1 million from $16.2 million a year ago.

The bank recorded an annual loss of $119.5 million and said regulators were in part to blame.

CenTrust said the loss, which compares with 1988 income of $50.1 million, was caused in part by a new federal thrift law and a regulatory order that proscribes how the south Florida thrift can conduct its business.

The Office of Thrift Supervision issued a temporary cease and desist order against CenTrust on Dec. 8.

CenTrust said its loss includes a charge of about $42 million to write down about $258 million in principal amount of corporate securities that mature after June 30, 1994.

The company said it will not be allowed to hold those securities after that date, under the provisions of the new federal thrift law.

However, CenTrust said it has proposed in its capital plan that the securities be transferred to a new, non-bank holding company.

''Consequently, management expects that the majority of the losses resulting from this accounting treatment will not be realized,'' CenTrust said.

CenTrust also said its loss swelled by $26 million because regulators directed the thrift to carry certain defaulted securities at their current market value. CenTrust failed in its bid to overturn the order in court.

''We think some of the reserves required by the regulators are excessive and result in a picture of CenTrust that is not justified by the facts,'' Chairman David L. Paul said in a statement.

''We think that if we are allowed to carry out our business plan, including the sale of 63 branches to Great Western and the restructuring of our capital base, we can restore the company to profitability. But we can only do that with the cooperation of our regulators,'' Paul added.

CenTrust announced an agreement in July to sell all but eight of its retail branch offices to Great Western Bank of Beverly Hills, Calif. Under the agreement, Great Western would assume CenTrust deposits of about $2.4 billion for a premium of about $100 million.

CenTrust said its net interest income for the year fell to $65 million from $94 million for the previous year.

State regulators have sought to oust Paul from the chairman's seat, accusing the controversial executive of using CenTrust as ''his own personal piggy bank.'' CenTrust is challenging the move.

#90016u2801 01/16/1990 ~United Press International

BOSTON (JAN. 16) UPI - Patients should be alert to the dangerous possibility that drugs dispensed in emergency situations may interact with medications they are already taking.

A new study found about 10 percent of emergency room patients were prescribed new drugs that could cause potentially adverse interactions

with other drugs they were receiving.

''This shows that doctors do not do a very good job of looking for drug interactions,'' said Dr. Mark Beers, an assistant professor of medicine at the University of California-Los Angeles who led the study.

''I would encourage people, whenever given new medication, to ask their doctors if this medication will interact with the medication they are taking,'' Beers said.

In the study, the first of its kind, Beers and his colleagues examined the records of 424 patients who were treated at the emergency room of a hospital in the Los Angeles area.

In findings published recently in Annals of Internal Medicine, Beers and his colleagues reported 47 percent of patients were prescribed new medication.

The researchers also found that in 10 percent of the cases, the new medication the patient was given could potentially cause an adverse interaction with other medication the patients were already taking, they said.

The potential adverse interaction took many forms, including negating the effects of one or both of the drugs or increasing the effects of the drugs perhaps in dangerous ways.

''They could cause serious problems,'' Beers said.

The researchers did not actually follow the patients to determine whether they experienced any of the adverse effects.

Beers noted the problem occurred even though all doctors in the study had been given a list of the drugs that the patients they were treating were taking.

Although the study did not examine why doctors prescribed conflicting drugs, Beers speculated they did not have or take the time to check for potential conflicts.

''They are working fast. They are under a lot of pressure,'' Beers said. ''I also think the doctors don't understand the importance.''

Beers suggested hospitals provide emergency room doctors with computers to check for potential drug interactions to minimize the problem. Currently doctors have to check books, which is time-consuming.

In the meantime, Beers recommended patients, especially the elderly who

are likely to be taking medication, check themselves just to make sure.

#90016u2812 01/16/1990 ~United Press International
(JAN. 16) UPI - Soviet troops patrol Azerbaijan... U-S delays military escalation of drug war... the Supreme Court takes child sex abuse cases... and a new recommendation for A-Z-T users. U-P-I has the top national and world news, next:

The White House says it understands the Soviet Union's need ''to establish order... where order has broken down.'' But White House spokesman Marlin Fitzwater says the Bush administration hopes- quote- ''as little force as possible'' will be needed to curb ethnic violence in Azerbaijan.

The Soviet Interior Ministry reports 56 people dead and 156 wounded in four days of the fierce fighting. A Soviet military commander in the Azerbaijan republic is comparing the violence between Christian Armenians and Moslem Azerbaijanis to ''civil war.''

More than 300 Armenian refugees demonstrated in front of the Communist Party headquarters in Moscow today and shouted- ''Shame on Gorbachev,'' blaming the Soviet leader for the anti-Armenian rampage.

Soviet troops are in the capital of Baku to enforce the state of emergency imposed yesterday by the Soviet parliament.

In a separate development, radical Soviet legislator, Boris Yeltsin, warns that Gorbachev must implement a multi-party system and other radical political and economic reforms or he may fall from power. Yeltsin made the remarks today while addressing a group in Tokyo.

-30- 1548
#90016u2829 01/16/1990 ~United Press International
(JAN. 16) UPI - A Pentagon spokesman says Defense Secretary Cheney is postponing plans to announce new anti-drug military missions. The delay apparently comes in the wake of Colombia's highly negative reaction to U-S plans to station warships off its Caribbean coast to catch illegal drug traffickers.

Spokesman Pete Williams adds Cheney has delayed the announcement because of- quote- the ''sensitivities'' to the proposal in Colombia and several other Latin American countries, including Peru and Bolivia.

Williams also says the announcement of future plans for the military in anti-drug operations will be made after January 29th, when the federal budget is made public.

It's thought Cheney's announcement will come after President Bush meets with the leaders of Colombia, Peru and Bolivia at a February 15th drug summit in Cartagena, Colombia.

The government is responding to the latest research on A-Z-T, the only federally approved AIDS-fighting drug.

The Food and Drug Administration today cut in half the recommended daily dose of A-Z-T after studies showed a smaller dose works just as well and is safer.

The recommendation should come as good news to the estimated 40-thousand AIDS-infected Americans taking A-Z-T. About half of all users of the drug are forced to quit due to toxic side effects that include anemia.

The recommendation also will cut down the cost of the drug, which now runs about 64-hundred dollars a year.

Today's recommendation follows a report issued in August by the National Institutes of Health. The N-I-H study indicated that relatively low 600-milligram doses of A-Z-T appeared just as effective as higher dosages in staving off AIDS.

The AIDS Action Council responded to today's action, saying- ''It's about time.''

-30- 1963
#90016u2839 01/16/1990 ~United Press International
(JAN. 16) UPI - The Supreme Court today agreed to review two appeals involving the constitutional right to face one's accuser in open court as it applies to child molestation cases.

The two cases, from Maryland and Idaho, involve efforts to protect alleged child victims of sexual assault from suffering further trauma by having to testify in open court.

In one case, the child gave live televised testimony from another room. In the other, an adult recounted a private conversation with the child. In both instances, the accused abuser is a woman. And in both cases, the convictions were overturned on appeal.

Videotaped testimony and screen partitions have been two ways courts have tried to shield youngsters. Previous Supreme Court rulings have barred the use of screens, but left possibilities open for other arrangements. This is the first time the justices will directly address the use of videotaped testimony.

In other court action, the high court let stand an Arizona ruling barring judges from forcing adult bookstore operators to turn over their business licenses as a condition of probation.

And the justices agreed to review an Alabama case and decide if police need a search warrant to act on an anonymous tip.

-30- 1401

#90016u2893 01/16/1990 ~United Press International

(JAN. 16) UPI - Romania's interim government is being taken to task for hasty decisions that included outlawing and then re-instating the Communist Party.

The criticism came today in a liberal newspaper that resumed publication after the ouster of dictator Nicolae Ceausescu.

The paper accuses the new government of bowing to the demands of an unruly mob, saying- quote- ''a government without justice is a great robbery.''

Interim President Ion Iliescu told a noisy crowd in Bucharest last Friday that he was outlawing the Communist Party. But the following day the goverment pulled back, saying it would instead hold a referendum on the issue.

The government conceded to making a blunder, with a spokesman explaining yesterday that all Romanians have a lot to learn about democracy.

Congress will reconvene next week without a consensus on the possibility of re-allocating foreign aid in light of sweeping political changes around the globe.

While lawmakers have yet to take up the issue, the White House is giving a cool response to a suggestion by Senate Republican leader Robert Dole. White House spokesman Marlin Fitzwater expressed concern about the Kansas lawmaker's proposal that U-S aid to some nations be trimmed to help other countries.

Dole calls the re-allocation of current foreign aid commitments the only ''immediate answer'' to the on-going changes.

Dole suggests a five percent reduction in aid to the five biggest recipients of U-S aid- Israel, Egypt, the Philippines, Turkey and Pakistan. Dole says money would then be available to nations including Poland, Panama and Hungary.

But Fitzwater says the aid to the five nations named by Dole all reflect

what he terms ''long-standing'' U-S policy.

#90016u3144 01/16/1990 ~United Press International
(JAN. 16) UPI - The shuttle Columbia is continuing its mission for an eighth day. Columbia's flight director says the crew is in good spirits and doing good work, photographing Earth and studying the effects of weightlessness on the human body.

In Vienna, Austria, General Colin Powell, chairman of the Joint Chiefs of Staff, opened informal talks with Eastern and Western military leaders and said both sides agree- quoting now- ''the era of confrontation must end.''

A member of the House Armed Services Committee says the United States should develop a long-term strategy before cutting troops in Europe. Missouri Democrat Ike Skelton spoke following his return from a trip to Europe.

The Air Force is rescinding rules that banned women from serving on air crews on two transport planes that can be assigned air-drop missions. But officials say the move has NOTHING to do with the role military women played in Panama.

In San Salvador, doctors and family members of former Salvadoran President Jose Napoleon Duarte say Duarte has rallied slightly. Duarte suffers from terminal cancer and has been almost comatose in critical condition.

Czechoslovak Parliament President Alexander Dubcek is in France for a 36-hour visit to accept the Andrei Sakharov Prize for human rights. Previous winners of the award include South Africa's Nelson Mandela.

Lebanese military leader Michel Aoun has ordered all news media in Christian east Beirut to stop referring to President Elias Hrawi by his title. Two radio stations protested the order by suspending news programs.

Jordan's King Hussein is easing the martial law he imposed more than 30 years ago. Hussein issued a decree today that transfers the jurisdiction of many offenses... including political ones... from military to civil courts.

-30- 1986
#90016u3178 01/16/1990 ~United Press International
(JAN. 16) UPI - More than 75-hundred coal miners walked off the job today in southern Poland, in the nation's worst labor unrest since the Solidarity government was elected last summer. Solidarity leaders say the

strikes at five mines are mostly over wages, although workers at some of the mines also are pressing for the removal of corrupt managers and changes in working conditions.

The chairman of A-T-and-T says the cause of yesterday's disruption in long-distance telephone service still has NOT been pinpointed. Robert Allen also admits that A-T-and-T operators at first were instructed NOT to give out competitors' access numbers. An estimated 50-Million phone calls were unable to be completed.

The Navy is pressing ahead with its testing of the Trident-2, launching the second unarmed missile in as many days from a submerged submarine off Florida. Officials describe the 27th test flight of a Trident-2 as successful. The Navy hopes to deploy its most powerful weapon in March.

A rolling earthquake shook a sparsely populated area of northern California south of Eureka today. The U-S Geological Survey says the quake measured between five-point-one and five-point-three on the Richter Scale. NO damage or injuries are reported.

An environmental group apparently is trying to shame corporate polluters into action. The Washington-based Natural Resources Defense Council today singled out more than three-thousand plants nation-wide for discharging more than two-thousand pounds of any of three chemicals known to damage the Earth's protective ozone layer. The council says it hopes Americans will use the information to pressure companies into NOT using the harmful substances.

A gay-rights group says it has revised a draft of the American Bar Association's Model Code of Judicial Conduct to specifically ban discrimination against homosexuals. The National Lesbian and Gay Law Association says the judicial code would apply to judges throughout the country and subject them to discipline if they exhibit prejudice against lesbians and gay men.

-30- 2252

#90016u3627 01/16/1990 ~United Press International

(JAN. 16) UPI - Northern California is assessing the damage from a moderate earthquake that struck along the coast this afternoon. The temblor was measured at between five-point-one and five-point-three on the Richter scale- strong enough to cause damage in an urban area. But the northern California coast is sparsely populated, and NO injuries or damages have been reported thus far.

The Panamanian government says a Peruvian diplomat has three days to leave the country. Peru is countering the expulsion by saying the diplomat will leave, but he's taking with him 12 Panamanians who've been granted asylum

in its embassy. Panama's deputy foreign minister says the decision to expel the diplomat is a response to statements from Peruvian officials that make the normalization of relations between the two nations ''difficult.''

A Soviet Interior Ministry official says the situation in Azerbaijan is ''extremely tense.'' Moscow has sent 11-thousand additional troops to the violence-ravaged republic where at least 56 people have died during the past four days of ethnic strife. The official news agency Tass says about two-thousand Armenians, fleeing attacks from Moslem Azerbaijanis, have been evacuated.

The Albanian news agency says Albania's leader, Ramiz Alia , flatly denies reports that the country is under emergency rule. Alia reportedly is outraged at the Yugoslavian news media for reporting what he calls ''filthy things'' about Albania. The news agency says Alia denies any unrest, killings, or demonstrations. The tiny, mountainous country borders Yugoslavia and is the only European nation still governed by a hard-line Stalinist communist regime.

-30- 1844

#90016u3646 01/16/1990 ~United Press International

(JAN. 16) UPI - A lawyer for the state of California today told the Supreme Court that states and private citizens have the same rights as the federal government to try to derail a merger on anti-trust grounds. California argues the multi-BILLION-dollar merger between two grocery store chains will severely cripple competition and cost the state's consumers 400-Million dollars a year.

The five permanent members of the U-N Security Council gave unanimous agreement today to a plan calling for a larger U-N role in Cambodian peace negotiations. China and Cambodia's Khmer Rouge had previously objected to the U-N intervention. The southeast Asian nation is locked in a civil war in the wake of last year's Vietnamese withdrawal.

The five-year-old boy who fell through the ice yesterday into a pond near his Virginia home remains hospitalized in critical condition. Doctors report that the comatose child is on a respirator to keep his breathing regular. Doctors also confirm that most of the boy's major organs sustained damage during his 40-minute stay under the ice- although whether the damage is permanent they cannot say.

Boston police are seeking four black youths for questioning in the fatal stabbing of a white college student early yesterday morning. Today Mayor Raymond Flynn chastized the media for NOT reporting the stabbing earlier. The city has been struggling to resolve racial tensions since the slaying of a pregnant white woman led to the wrongful implication of a black man.

-30- 1669
#90016u3900 01/16/1990 ~United Press International
(JAN. 16) UPI - A strong earthquake struck a remote area along the northern California coast today. The temblor- measured by a Berkeley, California, seismology station at five-point-three on the Richter scale- was centered on the coast about 40 miles from Eureka. But the area is NOT densely populated, and there are NO reports of injuries or damages.

Armenian-Americans are protesting the treatment of their brethern in Soviet Azerbaijan. About 200 people of Armenian descent picketed outside the United Nations today, demanding an end to the ethnic violence in the Soviet republic. 56 people have died in clashes between Christian Armenians and Moslem Azerbaijanis during the last four days.

Senate Republican leader Robert Dole is calling on Israel and other big recipients of American foreign aid to take a budget cut. Dole says the cuts may be necessary in order to provide more assistance to emerging democracies in Eastern Europe and Panama. Says Dole- ''Israel is our best ally in that part of the world, but we've got limits.'' The White House is giving Dole's proposal a cool reception.

The new Panamanian government is ordering a Peruvian diplomat out of the country. In response, Peru says the envoy will take with him a handful of Panamanian military officials and their families granted asylum by the Peruvian Embassy following last month's U-S invasion. Peru also says it'll expel Panamanian diplomats in response to today's action by Panama City.

-30- 1642
#90016u3946 01/16/1990 ~United Press International
(JAN. 16) UPI - Two unrelated bus accidents caused a total of 21 deaths in Brazil today. In one incident, an Argentine tour bus drove off a bridge... falling more than 33 feet to the ground. 18 people were killed and 23 injured. In the second accident, a bus bound for a village clothes market plunged into a ravine... killing three people and injuring 47.

Spring-like weather sent the mercury to record levels in the Midwest and parts of the East today. But warm temperatures brought dense fog to Chicago, causing airlines to cancel flights out of O'Hare International Airport. United Airlines says it was forced to cancel 407 flights. It was balmy along parts of the East Coast, too. Temperatures hit 58 degrees in Philadelphia and 63 in Washington, D-C.

Firefighters in Des Moines, Iowa, evacuated the 10-story Insurance Exchange Building this afternoon after a fire broke out in a second-floor pizza parlor on the city's skywalk system. Firefighters evacuated people

from the building's top floors by outside fire escapes because interior hallways were filled with smoke. Fire officials have now declared the fire under control. NO injuries were reported.

New Jersey is back in Democratic control. Eight-term representative Jim Florio was sworn in as the state's new governor today- ending an eight-year Republican reign. Florio said in his inauguration address that he wants to be remembered as ''the governor who brought new ideas to preserve old ideals.'' Florio resigned his seat in the U-S House today before taking the oath of office.

-30- 1722

#90016u4185 01/16/1990 ~United Press International

(JAN. 16) UPI - A major cocaine trafficker whose 1988 arrest in Honduras sparked deadly anti-American riots was sentenced today in Los Angeles to life in prison without parole.

Juan Ramon Matta Ballesteros is described as one of the world's top 10 drug traffickers. He received the life term for a conviction on charges of operating an ongoing illegal enterprise that netted Millions of dollars for Colombian drug cartels.

Prosecutors recommended the stiff sentence for Matta to illustrate the United States' resolve to win the war on drugs by bringing to justice one of Colombia's most notorious drug kingpins.

U-S District Judge Pamela Rymer handed down the sentencing and said she could NOT- quote- ''imagine what the was for if NOT for this case.''

Matta's drug ring was shattered in 1981 when federal agents raided his Van Nuys apartment and confiscated 114 pounds of cocaine and nearly two-Million dollars in drug money.

-30- 1098

#90016u4193 01/16/1990 ~United Press International

(JAN. 16) UPI - Eastern Europe was dominated by clashes, strikes and demonstrations today as Soviet troops tried to end ethnic violence in Azerbaijan . A Soviet military commander calls the fierce fighting between Moslem Azerbaijanis and Christian Armenians a ''civil war.''

In Moscow, some 300 Armenian refugees gathered in front of the Communist Party headquarters and screamed- ''Shame on Gorbachev .'' The refugees blame the Soviet leader for the anti-Armenian rampage that has left at least 56 dead.

Elsewhere in Eastern Europe, more than 75-hundred Polish coal miners

walked off the job in the most serious labor unrest to face the Solidarity-led government since it came into power last June.

The leader of Albania is lashing out at recent Yugoslav reports of unrest in Albania. The official Albanian news agency says leader Ramiz Alia denies the nation is under emergency rule following anti-Stalinist protests. The tiny country, which borders Yugoslavia, has been untouched by recent reforms in East Europe.

And some good news- Czechoslovakian Parliament President Alexander Dubcek is in Paris to receive the Andrei Sakharov Prize for human rights. Dubcek is being honored for leading Czechoslovakia's reform movement.

-30- 1406

#90016u4204 01/16/1990 ~United Press International

(JAN. 16) UPI - The United Nations may soon take an active part in settling the battle for power in Cambodia.

The southeast Asian country is embroiled in civil war as four major political factions struggle to assume leadership in the wake of last year's Vietnamese troop withdrawal.

But the five permanent members of the U-N Security agreed unanimously today to play the peace-maker's role in the conflict. The plan is to establish a Supreme National Council with NO single faction dominating to govern the nation until an election can be held.

The United States, the Soviet Union, Britain, France and China took the action- apparently after China and the Cambodian Khmer Rouge dropped their opposition.

The Chinese-supported Khmer Rouge was in power in Cambodia until the Soviet-sponsored Vietnamese moved in to unseat the Pol Pot regime in the late '70's.

Military leaders from the East Bloc and the West gathered today in Vienna, where they'll hold three weeks of informal talks on the changing state of Europe.

The chairman of the U-S Joint Chiefs of Staff General Colin Powell placed NO small importance on the talks in his opening statement. He said- ''The era of confrontation must end''... and added- ''We can all work together to usher in a new era of European peace, security and freedom.''

The talks are intended to bolster what's described as ''confidence- and security-building measures.'' The military leaders of 35 countries are in attendance, including those from NATO, the Warsaw Pact and other,

non-aligned European nations.

Powell made strong hints at a major reduction in strategic forces, saying that U-S troops ''are NOT occupying forces'' and that their placement in Europe is NOT ''sacrosanct.''

-30- 1924

#90016u4219 01/16/1990 ~United Press International

(JAN. 16) UPI - Gunmen fired into a crowd of picketing coal miners in Worth, West Virginia, today, killing one man and wounding two others. The incident occurred at the mouth of two non-union mines. One lawman describes the shooting as part of what he calls ''a little war'' taking place in rural West Virginia.

One witness told police more than 30 rounds of ammunition were fired during the early morning shooting.

Authorities say three pick-up trucks drove past the picketers and a short time later shots were fired from a section of woods above the intersection some 200 yards away. Police seized more than 30 handguns from picketers after the shooting. But, it isn't clear if there was any exchange of gunfire. There have been NO arrests in the incident.

A spokesman for the United Mine Workers confirms the victims are union members but is NOT commenting on whether the picketers were conducting a sanctioned demonstration or what they were picketing.

Boston police are on the lookout for four black youths wanted for questioning in the fatal stabbing of a white university student. The city is struggling to resolve racial tensions following the wrongful implication of a black man in the death of a pregnant white woman.

Mayor Raymond Flynn is chastizing the media for NOT reporting the story quickly. Flynn says the media responded to the Stuart case very quickly but didn't report this incident until almost 30 hours after the fact.

19-year-old Mark Belmore was fatally stabbed early yesterday morning as he was returning from his girlfriend's house. He was attacked barely one block away from Northeastern University which borders the racially tense Roxbury neighborhood.

Police say Belmore's name was NOT released until nearly 24 hours after the stabbing because he was NOT wearing identification at the time of the attack. A police spokeswoman says the motive for attack is NOT yet known.

-30- 2099

#90016u4324 01/16/1990 ~United Press International
(JAN. 16) UPI - A-T-and-T says it was a logic error in its computer software that caused yesterday's long-distance phone line failure. Service was back to normal today, but the company says the problem lingers and is expected to take several days to fix.

There were NO reports of injuries or serious damage following today's strong, rolling earthquake that shook the northern California coast today. Police say some roads developed cracks in their pavement, but NONE have been closed.

The head of the Soviet Union's Interior Ministry special forces describes as ''extremely tense'' the situation in Azerbaijan . Four days of fighting between Moslem Azerbaijanis and Christian Armenians have left at least 56 people dead.

In El Salvador, the independent unit investigating November's killing of six Jesuit priests turned the case over to a civilian court today. Eight soldiers suspected in the case were brought in to testify. A ninth is at large. NO Salvadoran military officer has ever been convicted of a human rights crime.

More than 75-hundred coal miners walked off the job today at five mines in southern Poland. It is the nation's worst labor unrest since the election of a Solidarity-led government last June.

About 60-thousand workers at Brazil's huge Petrobras oil monopoly went on strike for higher wages today. The action shut down production at 11 refineries and raised fears of a nationwide gasoline shortage in Brazil.

#90016u4353 01/16/1990 ~United Press International
(JAN. 16) UPI - Authorities in Worth, West Virginia, predict it'll take days to sort out the details of today's shooting near two non-union mines that left a picketing coal miner dead and two more wounded. Non-union coal operators in four trucks told police they were fired upon as they drove by demonstrating mine workers.

Police in Providence, Rhode Island, have arrested a 17-year-old Southeast Asian student after he allegedly opened fire at a high school, wounding two people. Officials say it's the latest flareup of racial violence between Asian and white students at the school.

An off-duty New York police officer is in critical condition tonight after being shot in the head while washing his car in front of a Brooklyn grade school. Witnesses say the officer was shot by a gunman who stepped out of a car and fired at close range.

Hospital officials in Los Angeles say a 70-year-old woman is in critical condition after being severely mauled by her grandson's two pit bulls today. Doctors were forced to amputate her left arm and remove half of the right.

A jury in Santa Monica, California, today convicted rock musician Ike Turner of driving under the influence of cocaine. He'll be sentenced later. Last May, Turner was stopped in West Hollywood by police, who saw a canister of cocaine being tossed from his car.

#90016u4508 01/16/1990 ~United Press International

(JAN. 16) UPI - Increased tensions between the Panamanian and Peruvian governments has prompted Panama to expel a Peruvian diplomat. Panama says the attache has three days to leave the country. Peru says the diplomat will leave but is taking with him 12 Panamanians granted asylum by the Peruvian Embassy. Peru has been one of the most vocal critics of the U-S invasion of Panama and says it does NOT recognize the U-S-installed government of President Endara.

In El Salvador, the independent unit investigating the killings of six Jesuit priests has turned the case over to a civilian court. Eight soldiers suspected in the case were brought in to testify today. The developments came hours after President Cristiani denied that fear of a military coup had force him to cancel a U-S trip.

The new government of Czechoslovakia has put it in writing- it wants all 80-thousand Soviet troops out of the country by year's end. Czechoslovakia presented the proposal during the second day of talks with a Soviet delegation in Prague. The Soviets had NO immediate response to the proposal. Soviet troops led the Warsaw Pact invasion of Czechoslovakia in 1968 and have occupied the country ever since.

A report says the 34-year-old son of President Bush faces possible civil charges on his alleged mismanagement of Denver's Silverado Bank if he does NOT soon reach a consent agreement with federal regulators. It's alleged that Neil Bush made big loans to Republican contributors before leaving the savings and loan in 1988. Silverado collapsed later that year, at a cost of one-BILLION dollars to taxpayers.

SCOTTSDALE, AZ (JAN. 17) BUSINESS WIRE - Broken Arrow Petroleum Co. (OTC) and Kimco Energy Corp. (NASDAQ:KIMC), Denver, announced they have executed definitive documentation to combine the two companies.

When combined the book value of shareholders equity will be on the order of $6 million with total assets of approximately $7 million. The transaction is expected to be closed on or before April 1, 1990. During the interim, the entities will operate effectively as one company, subject to a joint management agreement effective Jan. 1, 1990.

Gary M. Cook, president of Kimco said, ''The directors, management and shareholders of Kimco Energy Corp. are extremely pleased to welcome the outstanding management resources as well as proprietary technology which Broken Arrow brings to the transaction.

''This transaction recognizes both the significant proven undeveloped natural gas reserves which Broken Arrow has identified and acquired in the Arkoma Basin, as well as the values which Kimco has established over the last several years.''

Cook and Larry W. Smith, president of Broken Arrow, who will become chairman of the finance committee of the combined companies, jointly indicated that the goal was to combine Broken Arrow's ability to provide a growing stream of lower-risk gas development projects with Kimco's ability to find, acquire and manage reserves.

The intent is to quickly become a leading low-cost developer of natural gas with the reserves necessary to support a market capitalization in the $100 million range.

The transaction is not contingent upon any further evaluation or subjective negotiations between the parties. The exchange is subject to certain conditions, certain regulatory approvals, an adequate market valuation of Kimco's shares, and shareholder approval.

Broken Arrow shareholders will exchange their shares for Kimco stock on the basis of one share of the common stock of Kimco for 10 shares of the common stock of Broken Arrow or the equivalent. It is projected that at the time of closing Kimco will have approximately 6,900,249 fully diluted common shares outstanding.

ENGLEWOOD, CO (JAN. 17) BUSINESS WIRE - Medical Dynamics Inc. (NASDAQ:MEDY), a leading manufacturer of micro-invasive surgical and

diagnostic camera systems, Wednesday announced it has acquired Med-Pacific Inc., a subsidiary of Viox Corp.

Purchase price was 195,000 shares of Medical Dynamics restricted common stock.

Based in Seattle, Med-Pacific manufactures the patented Laser Doppler Blood Flow Monitor, a device used to measure the flow rate of blood in surface tissue of the human body. One of its most common uses is to measure the viability of tissue involved in skin grafts.

Medical Dynamics intends to incorporate the Laser Doppler for use within the body in conjunction with the company's patented Optical Catheter System (TM).

Dr. Edwin Adair, chairman of the board of Medical Dynamics, said that in acquiring Med-Pacific, Medical Dynamics assumes ownership of all patents, licenses for patents, FDA filings, inventory and miscellaneous equipment. Medical Dynamics also assumes Med-Pacific's customer base that includes more than 200 Laser Doppler installations nationwide.

''We view the acquisition of Med-Pacific as an investment in technology that has tremendous application in areas we're moving into,'' Adair said. ''The Laser Doppler's use to date has been limited to surface tissue applications. We believe there are many more applications inside the body and we will set to work immediately to develop them.''

Adair said all Med-Pacific operations would be transferred to Medical Dynamics' expanded facility in Englewood and the company will eventually add several new production and engineering employees in conjunction with the new product.

This acquisition represents the second significant acquisition of technology in the last three months. In October 1989 Medical Dynamics acquired an exclusive license for the White Light Laser Illuminator, which is based on advanced fiber optics technology that will allow the company cut by 50 percent the size of its Model 5990 Optical Catheter System.

The Model 5990 Optical Catheter is a patented device that couples advanced fiber optics technology with traditional catheter systems. The product allows physicians to examine anywhere in the body with a small incision or through a needle.

The company believes the Optical Catheter, because of its high quality, small size and minimally-invasive nature, will revolutionize numerous diagnostic and surgical procedures.

MINNEAPOLIS (JAN. 17) BUSINESS WIRE - Dayton Hudson Corp. announced Wednesday that Marvin Goldstein has been named chairman and chief executive officer of its Dayton Hudson Department Store Co. Goldstein has been president of DHDSC, overseeing all merchandising and stores functions.

Kenneth A. Macke, chairman and chief executive officer of Dayton Hudson Corp., said, "Marvin's background and experience are broad and qualify him well to take on total responsibility for the Dayton Hudson Department Store Co. I am confident that our department store division can continue its strong record of growth and earnings." Goldstein and the department store will continue to report to Stephen E. Watson, president of Dayton Hudson Corp.

Goldstein, 46, started his retailing career in 1966 as a management trainee at Dayton's. During the next ten years he held a variety of positions with the company including buyer and divisional merchandise manager.

In 1976, Goldstein joined Carter Hawley Hale and in 1981, moved to Macy's California, where he was both director of stores and general merchandise manager. He returned to Dayton Hudson in 1988 as executive vice president, merchandising.

SEATTLE (JAN. 17) BUSINESS WIRE - National Securities Corp. Wednesday announced results for the first quarter of the fiscal year ended Dec. 31, 1989.

Revenues increased 86 percent or $1,704,000, from $1,989,637 in the first quarter of 1989 to $3,694,000 during the same period in fiscal year 1990.

Net income for the quarter increased dramatically from a $91,000 loss in 1989 to a $188,000 profit in 1990. Earnings per share improved from a loss of five cents per share in 1989 to a profit of 11 cents per share in this current fiscal year.

This represents the strongest first quarter in the firm's operating history. Management expressed optimism and confidence that fiscal year 1990 would be an outstanding year for the company.

National Securities Corp. is a full-service brokerage firm based in Seattle. The firm has 200 brokers in 15 offices located in 12 states throughout the country. Established in 1947, National is one of the oldest and largest independent brokerage firms headquartered in Seattle. It is the only one that is publicly held.

National Securities Corp. will be conducting its annual shareholders meeting on Jan. 25 at 2 p.m. at the Four Seasons Hotel in Seattle. For further information contact Mary Ellen Latawiec, 206/622-7200.

LOUISVILLE, CO (JAN. 17) BUSINESS WIRE - Storage Technology Corp. (NYSE: STK) said Wednesday it has signed a memorandum of understanding to establish an OEM (original equipment manufacturer) agreement with EMC Corp. of Hopkinton, Mass., giving it exclusive worldwide marketing rights to EMC's IBM mainframe memory products.

StorageTek will market central and expanded memory products for IBM 3090-class computers as well as main memory for IBM 3080-class systems. StorageTek said this agreement expands on its existing relationship with EMC. Since last year, the company has been marketing the 4080, a solid-state disk drive manufactured by EMC.

"This agreement both expands our partnership with EMC and provides us access to a new level of the information storage and retrieval hierarchy," said Donald Swatik, StorageTek vice president and program manager. "As a company dedicated to high-performance information storage and retrieval solutions, we are now able to offer an even broader capability to our customers."

"StorageTek has been an outstanding partner with a strong presence in the high-end marketplace," said Richard J. Egan, EMC chairman and chief executive officer. "They provide our company with a significant worldwide outlet for our products and an experienced service organization to back them up. We are very pleased to be able to expand on our relationship."

Storage Technology manufactures, markets and services, worldwide, information storage and retrieval subsystems for high-performance computers.

#90017b0025 01/17/1990 ~Business Wire

RACINE, WI (JAN. 17) BUSINESS WIRE - Modine Manufacturing Co. (NASDAQ:MODI) had record sales for both the third fiscal quarter and nine-month period, with record earnings for the quarter, reported Earl E. Richter, chairman and CEO, and Richard T. Savage, president and COO.

They said that net earnings for the three-month period ended in December 1989 rose 24 percent to $6.7 million, or 44 cents per share, from $5.4 million, or 36 cents per share, the year before. Sales increased 5 percent to $111.4 million from $106.2 million.

Net earnings for the first nine months of the fiscal year, at $18.2 million, or $1.21 per share, were down 9 percent from $19.9 million, or $1.32 per share, in the prior year, Richter and Savage said. Sales of $327.8 million were up 5 percent from $313.5 million in the comparable period.

''Sales, while up in total from last year's fiscal third quarter, were somewhat mixed by division,'' Richter and Savage stated.

''Sales were up for international markets from both exports and overseas subsidiaries.

''Third-quarter sales for the heavy duty and industrial division grew 6 percent, reaching a 14-percent increase for the first nine months,'' they said. ''Although earthmoving equipment, construction equipment, and related product markets showed the first overall decline for quite some time in quarter-to-quarter sales comparisons, the agricultural equipment, various industrial, and all international markets reported gains.

''Modine's heating division achieved record results for the quarter and nine-month periods. Sales increased 45 percent during the last three months and 39 percent in the nine months ended in December. Discounting the effect of the acquisition of TRT Heating Products in April, the division's sales were still up six and eight percent in the respective periods.

''Aftermarket division sales slipped 7 percent in the third quarter and were down 13 percent in the nine-month period. The sales decline appears to be leveling off and cost reductions are having a beneficial effect on margins as the division has entered the slow winter period.

''Automotive division sales were down 24 percent in the third quarter and 16 percent in the nine months. Heavy- and medium- truck markets tapered down during the last three months, adding to the comparison problem of last year's in-sourcing and dual- sourcing by certain OEM customers. Automobile air-conditioning components for dealer add-on kits showed a large gain year-to-date.''

In an outlook statement, Richter and Savage said, ''In October, we said that we expected annual sales to be up slightly from the record total last fiscal year.

''We also said that we expected improved earnings during the last half of 1989-90, resulting in annual net earnings being down about five percent, compared with the record established last year. At this time, there is no reason for us to amend these forecasts.''

At its meeting today, the Modine board of directors declared a regular quarterly dividend of 15 cents per common share, payable March 9 to shareholders of record Feb. 26, 1990.

SACRAMENTO, CA (JAN. 17) BUSINESS WIRE - First Commercial Bancorp (NASDAQ/NMS:FCOB), the holding company of First Commercial Bank, reported record earnings for the year ended Dec. 31, 1989.

W. Greg Karr, president and chief executive officer, announced earnings of $5,202,713 compared to $3,371,408 for the like period last year, an increase of more than 54 percent.

Earnings per share increased from 82 cents to $1.09. Return on equity and return on assets for the year were 20.22 percent and 1.86 percent, respectively, compared to 17.49 percent and 1.45 percent during 1988.

The company also reported record fourth quarter earnings of $1,535,614 compared to $1,043,571 for the like period last year, an increase of more than 47 percent.

Return on equity and return on assets for the quarter were 21.14 percent and 1.99 percent, respectively, compared to 19.35 percent and 1.57 percent for the like period last year. Karr noted that the fourth quarter results represented the eleventh consecutive quarter of record earnings posted by the company.

Total assets reached a record $341 million at Dec. 31, 1989, compared to $275 million at Dec. 31, 1988, a 24 percent increase. Total loans were $221 million at Dec. 31, 1989, compared to $179 million at Dec. 31, 1988, a 23 percent increase. Total deposits increased to $306 million at Dec. 31, 1989, compared to $249 million at Dec. 31, 1988, a 23 percent increase.

First Commercial Bank, founded in 1979, and a member of the Federal Deposit Insurance Corp., is an independent bank headquartered in Sacramento, Calif.

#90017b0044 01/17/1990 ~Business Wire

SHREVEPORT, LA. (JAN. 16) BUSINESS WIRE - Arkla Exploration Co. announced Wednesday the successful tests of two new field discoveries, an oil find in the Tuscaloosa Trend of southwest Mississippi and a natural gas

discovery in the Arkoma Basin of north Arkansas.

''Having just recently completed our initial public offering of Arkla Exploration stock in December, we are extremely pleased to be able to start the new year with a pair of completions in two of our primary areas of exploration activity,'' said Carl S. Quinn, chairman of the board and chief executive officer of Arkla Exploration Co.

Arkla Exploration is traded on the New York Stock Exchange under the symbol ARK. Quinn added, ''Building on this success, we expect to follow these wildcat discoveries with additional exploratory and developmental drilling in these two areas in the year ahead.''

The first of the wells, the No. 1-35 Robertson, is located just north of the Louisiana border in Amite County, Miss., three miles southeast of ARK's 1987 Thanksgiving Field discovery.

The Robertson well was drilled to a total depth of 12,500 feet, and was tested at a rate of 265 barrels of oil per day and 232,000 cubic feet of natural gas at a flowing tubing pressure of 1,751 pounds per square inch on a 12/64-inch choke. The well flowed from select perforations in the Tuscaloosa sand formation located between 12,148 and 12,158 feet in depth.

According to Alan M. Warren, president and chief operating officer of Arkla Exploration, the company plans to spud a confirmation well on the prospect in the first quarter of 1990.

Arkla Exploration holds a 50 percent working interest in the Robertson well, and the 2,700 acres of leasehold on the prospect. Harry H. Cullen of Houston and Pennco Energy, Inc., of Baton Rouge, La. each own a 25 percent interest.

Arkla Exploration also completed a Hale formation natural gas discovery in the far eastern end of the prolific Arkoma Basin.

The No. 1 Simpson well is located in Faulkner County, Ark., approximately 35 miles north of Little Rock, or about 12 miles east of the nearest Hale sand production in the Greenbriar Field.

The well was drilled to 6,500 feet in the Mississippian Fayetteville Shale and was plugged back and perforated in an interval between 4,492 and 4,504 feet in the Morrowan Hale sand.

This zone was tested at a daily rate of 1.987 million cubic feet of gas and 199 barrels of water at a flowing tubing pressure of 782 pounds per square inch through a 24/64-inch choke.

Arkla Exploration, which holds a 59 percent working interest in the well,

was joined in the venture by Harry H. Cullen and Nehawka Energy, Ltd. of Phoenix, Ariz., each of which have a 19.7 percent working interest.

Arkla Exploration is the operator of both wells.

Arkla Exploration is ranked as one of the nation's largest independent operators in terms of natural gas reserves, production and drilling activity. The company holds more than 800 billion cubic feet of natural gas and gas equivalent reserves, with interests in more than 1,500 producing wells in Arkansas, Louisiana, Oklahoma, Texas and Mississippi.

Six million shares of Arkla Exploration - or approximately 18 percent of the company - were sold through an initial public offering in December 1989.

Arkla Inc., an integrated natural gas company with assets in excess of $3.5 billion, owns the remaining 27 million shares of Arkla Exploration Co.

DENVER (JAN. 17) BUSINESS WIRE - Colorado National Bankshares Inc. (NASDAQ:COLC) announced Wednesday net income of $819,000, or 8 cents per share, for the fourth quarter of 1989 compared to $2,052,000, or 18 cents per share, for the same period a year ago.

For the year, the company earned $4,589,000, or 42 cents per share, compared to $10,646,000, or 98 cents per share, for 1988.

Will F. Nicholson Jr., chairman of the board and president, attributed the reduction in net income primarily to an increased provision for loan losses. ''Although residential real estate values show signs of improvement, commercial real estate values remain depressed, particularly in Colorado Springs and Denver,'' said Nicholson.

The provision for loan loss expense during the recent quarter was $10 million, up 49 percent from the $6.7 million recorded in the same quarter of 1988. For the full year the provision was $33.3 million, up $8.9 million (36 percent) from the $24.1 million recorded in 1988.

Problem assets at Dec. 31, 1989, totaled $113.6 million, down $1.6 million from Dec. 31, 1988, and down $6.5 million from Sept. 30, 1989. Nicholson added, ''Although our problem assets had increased earlier in 1989, it is encouraging that by year end they had declined to a level slightly below that of a year ago.''

At Dec. 31, 1989, the allowance for loan losses was $53.3 million, up 15 percent from $46.5 million a year ago. The allowance provides a 69 percent coverage of problem loans.

Colorado National Bankshares Inc. is a Denver-based bank holding company which owns 21 commercial banks, an insurance agency, a mortgage company and a leasing company. It is also manager and 50 percent owner of Rocky Mountain BankCard System Inc., a national credit card issuer and one of the largest processors of credit card transactions in the country.

TUSTIN, CA. (JAN. 17) BUSINESS WIRE - The board of directors of Eldorado Bancorp Wednesday declared a 10 percent stock dividend payable Feb. 23 to shareholders of record Feb. 9.

J.B. Crowell, president and chief executive officer of Eldorado Bancorp and Eldorado Bank, said: ''The stock dividend reflects the excellent performance of the company. When 1989 earnings are announced next month, it will show record net income for the fourth consecutive year. The stock dividend will give shareholders an increase in total cash dividends through a greater number of shares owned. Additionally the increase in shares outstanding provides better marketability for the company's

shares.''

Eldorado Bancorp, a one-bank holding company for Eldorado Bank, last paid 10 percent stock dividends in February 1989, in April and December 1987 and in May 1986. During the bank's 17 years, it has issued 11 stock dividends and has split its common shares three times. The company currently pays a quarterly cash dividend of 7 cents per share.

Eldorado Bancorp, through its principal subsidiary, Eldorado Bank, operates through nine locations in Orange, Riverside and San Bernardino counties.

SAN FRANCISCO (JAN. 17) BUSINESS WIRE - Sumitomo Bank of California (OTC:SUMI) reported Wednesday 1989 fourth quarter net income of $9.33 million, a gain of 39.6 percent over the $6.68 million net recorded in the previous year's comparison quarter.

Sumitomo's earnings per common share, on 8,213,743 average shares outstanding, equaled $1.14 vs. 1988's 95 cents a share on 7,040,165 average shares outstanding in the fourth quarter.

For all of 1989, the statewide bank's net income exceeded the 1988 performance by 39 percent: $33.98 million compared to $24.45 million, or $4.37 per common share vs. $3.48.

As of Dec. 31, the San Francisco-based bank had total assets of $4.4 billion, up $682 million over 1988, while total deposits were $3.3 billion a gain of $60 million.

VENTURA, CA. (JAN. 17) BUSINESS WIRE - American Restaurants Corp. reported a third-quarter sales increase of 123 percent over the corresponding quarter in 1988, due primarily to the contribution of the International Eateries Restaurants.

Cost controls continued to perform on target with cost of sales decreasing to 58 percent for the third quarter of 1989 from 59 percent for the same period last year and to 57 percent from 61 percent for the corresponding ten four-week periods.

Operating expenses remained constant in the four four-week periods ending Nov. 6, 1988, and Nov. 5, 1989, and decreased to 28 percent from 33 percent in the respective ten four-week periods.

The two new restaurants which were under construction during the third quarter, opened during the second week of December to take advantage of the Christmas season. American Restaurants will begin marketing franchises for the Hudson's Grill concept during the first quarter of 1990.

In their December 1989 meeting, the board of directors approved a change in the company's operating year from a fiscal year ending on the Sunday closest to the end of January to a fiscal year ending on the Sunday closest to the end of December. This will eliminate much confusion concerning the fiscal vs. calendar year and will more closely align us with the food service industry in general.

The operating results of 1989 will reflect a fourth quarter with only 8 weeks vs. 12 weeks in 1988 and a 48 week vs. 52 week year for 1989 vs. 1988.

In retrospect, the company has been successful in meeting its goals and has seen 1989 as a truly turnaround year. The company believes the momentum felt during the last three quarters will carry forward into the fourth quarter of 1989 as well as 1990.

#90017b0110 01/17/1990 ~Business Wire

ANAHEIM, CA. (JAN. 17) BUSINESS WIRE - Prices are up. Sales are down. That in a nutshell describes the 1989 Southern California housing market compared with 1988, according to TRW Real Estate Information Services.

The average price paid for a residence in Los Angeles, Orange, Riverside, San Bernardino and San Diego counties was $199,480 during 1989 -- an 11 percent jump from the $179,429 average price paid during 1988.

But the number of homes sold during the year in the five-county area dropped 11 percent, from 353,597 units sold in 1988 to 314,606 in 1989, TRW said.

Average prices in the Inland Empire counties of Riverside and San Bernardino, despite appreciation rates of 15 percent, remained $50,000 to $120,000 less than the average prices in the coastal counties of Los Angeles, Orange and San Diego.

As a result, an increasing number of buyers forced out of the coastal housing market moved inland to purchase their homes.

Sales plunged in the coastal counties during 1989 -- 24 percent in Orange, 15 percent in Los Angeles and San Diego -- while jumping 22 percent in Riverside County and 5 percent in San Bernardino County, TRW said.

''Southern California in effect has two housing markets,'' said Edwin Setzer, TRW vice president and general manager. ''There's the coastal market, which has been blessed with tremendous growth in demand and price appreciation in recent years, and there's the inland market, which has only recently begun to experience that same growth.''

Setzer said the high prices in coastal areas are preventing many Southern Californians from owning their own home. By providing affordable housing for first-time and lower-income buyers, inland cities such as Corona, Riverside and Moreno Valley are growing tremendously, Setzer said.

The importance of the Inland Empire relative to the Southern California housing market also is growing and is expected to continue, he said. In January 1988, 18 percent of all Southern California home purchases were made in Riverside or San Bernardino counties. In December 1989, the figure had grown to 28 percent, Setzer said.

TRW monitors real estate activity in California, Nevada, Arizona, Texas, Illinois, Washington and Florida.

The numbers include the sales of all new and existing single-family residences and condominiums. Apartment buildings are classified as commercial and are not part of the home statistics.

SANTA CLARA, CA. (JAN. 17) BUSINESS WIRE - KLA Instruments Corp. (NASDAQ/NMS:KLAC), announced Wednesday that sales for the second fiscal quarter ended Dec. 31, 1989, were $40,199,000 and that net income was $2,503,000, or 14 cents per share.

This compares with sales of $41,453,000 and net income of $2,816,000, equal to 16 cents per share for the prior year's comparable quarter.

For the six months ended Dec. 31, 1989, sales were $83,365,000 and net income was $5,057,000, or 28 cents per share, compared to sales of $80,238,000, net income of $5,651,000, and earnings per share of 32 cents for the previous year's comparable period. Cash flow was positive for the fourth consecutive quarter.

Orders for the KLASIC Division's Printed Circuit Board Products recorded substantial improvement resulting from (1) Progress towards the release of a new applications software package with improved performance for the KLA 3000 and 3005 Automated Printed Circuit Board Inspection Systems and (2) Successful Beta Testing of KLA's new Computer Aided Manufacturing (CAM 3000) system.

KLA's RAPID division also recorded strong order flow for its Automated Photomask and Reticle Inspection products. However, overall company orders were below shipments due to continued softness in the Domestic Semiconductor Capital Equipment Market.

KLA Instruments Corp. is a leading innovator of industrial image automation systems.

MENLO PARK, CA (JAN. 17) BUSINESS WIRE - John M. Carter, chairman of the board and chief executive officer of Carco Electronics, announced the appointment of Paul J. Roberts as president and chief operations officer of the company.

Roberts will also be on the board of directors.

Prior to joining Carco Electronics, Roberts was president of Sigmaform Corp., Santa Clara, Calif., a multinational, publicly traded company, which was acquired in 1989. For 19 years Roberts was with Raychem Corp. as corporate vice president and general manager successively of the international group, electronics group and special alloys group.

He has also worked with Lockheed Aircraft and was a naval officer assigned to the staff of Admiral Rickover in the nuclear submarine program. Roberts received a B.S. in physics from Georgia Tech and an M.S. in physics, University of Maryland.

Carco Electronics is the world's leading manufacturer of precision flight motion simulators used to test and develop aerospace guidance and control systems. Approximately 500 simulators have been installed in major industrial and government aerospace laboratories throughout the free world.

PORTLAND, OR (JAN. 17) BUSINESS WIRE - U.S. Bancorp (NASDAQ:USBC) Wednesday reported the highest earnings in the history of the company.

Net income for 1989 was $150.8 million, up 22 percent from $123.9 million earned in 1988. Per share net income was $3.05 vs. $2.52 the prior year. Per share amounts have been restated to reflect a 20 percent stock dividend paid in September 1989. Return on average assets for the year was 1.00 percent and return on average shareholders' equity was 15.12 percent.

Fourth quarter results also showed improvement from the prior year. Net income was $38.6 million, or $.78 per share, up 11 percent from $34.9 million, or $.71 per share, earned in the fourth quarter of 1988.

Assets at Dec. 31, 1989, were $17 billion, total loans were $11.4 billion, total deposits also reached $11.4 billion and shareholders' equity was $1.1 billion.

''The performance targets set for 1989 have been achieved,'' said Roger L.

Breezley, chairman and chief executive officer. ''Focus is now directed on doing better in 1990 to ensure solid performance for our shareholders. Early signs point to a slower growing economic environment this year but we do expect the Pacific Northwest to experience growth in all major segments,'' Breezley added.

U.S. Bancorp is a superregional financial services company headquartered in Portland.

VALENCIA, CA (JAN. 17) BUSINESS WIRE - The Newhall Land and Farming Co. (NYSE,PSE:NHL) Wednesday announced a regular quarterly cash distribution of 20 cents per partnership unit, payable March 5 to limited partners of record Feb. 2.

The quarterly distribution of 20 cents per unit follows the 2-for-1 split of partnership units. As previously announced, on Jan. 29 unitholders will receive one additional unit for each unit held. On Oct. 18 the quarterly distribution was increased from 30 cents to 40 cents per unit before the split.

The Newhall Land and Farming Co. has paid uninterrupted quarterly dividends and distributions for 54 years. This distribution represents the 217th consecutive quarterly payment.

Newhall owns and is developing one of the most valuable, large landholdings in the United States -- Valencia, a master-planned community that is twice the size of Manhattan and only 35 minutes from downtown Los Angeles.

CLEVELAND (JAN. 17) BUSINESS WIRE - Ameritrust today announced that net income for 1989 rose to a record level of $115.9 million, an increase of 12 percent from $103.5 million last year.

Earnings per share increased 19 percent to $3.11 from $2.62. Return on average stockholders' equity was 16.10 percent, up from 13.65 percent in 1988, and return on average total assets was 1.10 percent in 1989 compared with 1.02 percent last year. In 1988, earnings were significantly impacted by a number of unusual items which contributed $14.1 million, or 36 cents per share, to net income. Excluding these items from 1988 results current year earnings were up 30 percent.

''Our attainment of record earnings was the result of excellent performance by our core banking groups,'' said Jerry V. Jarrett, chairman and chief executive officer. ''We reached new heights in profitability and returns to stockholders in 1989, and we are strongly positioned to enter the decade of the 1990s.''

A principal factor affecting earnings in comparison with the prior year was the strong growth in net interest income which rose to the highest level in the corporation's history. For the year, fully taxable equivalent net interest income advanced 12 percent to $439.6 million reflecting both an improved net interest margin and a higher volume of average loan outstandings. Net interest margin for 1989 rose 35 basis points to 4.66 percent while loan outstandings were up 8 percent. Earnings also benefited from an increase in other income, primarily due to trust fees and securities transactions.

Non-performing assets totaled $208.9 million or 2.55 percent of period-end loans plus other real estate at Dec. 31, 1989, compared with $121.9 million or 1.64 percent at the end of 1988, and were down slightly from third quarter levels.

The year-over-year increase was primarily due to a higher level of domestic non-accrual loans and consisted of several large credits with no industry or geographic concentration. ''While we are pleased with our record performance in 1989, we are not satisfied with the increase in non-performing assets. However, based upon our assessment of the loss potential and collateral protection for significant non-performing credits we believe the current allowance is adequate. Improvement in asset quality remains one of our key objectives,'' stated Jarrett.

Net income and earnings per share for the fourth quarter of 1989 were $27.7 million and 74 cents, respectively, up 6 percent and 7 percent from 1988 levels.

Commenting on the pending acquisitions of MVestment, Jarrett stated, ''We have received approval for the acquisition from the Bankruptcy Court supervising the assets of MVestment's parent company and anticipate approval from the Federal Reserve in the near future. The purchase is scheduled to be finalized in February.''

He added, ''This acquisition will provide us with some exciting opportunities to build on our existing strengths in the trust area and will place our trust operations among the top twenty in the country.''

#90017b0139 01/17/1990 ~Business Wire

SIMI VALLEY, CA (JAN. 17) BUSINESS WIRE - Gibraltar Savings Wednesday announced the reorganization of its executive management team in support of its 1990 business plan.

''The thrift's managing agents and the Resolution Trust Corp. have approved the appointments of five senior-level Gibraltar management officials to positions of even greater prominence in the company,'' says James R. Boyle, Gibraltar's chief executive officer.

This group of people has been, and will continue to be, instrumental in preserving the company's franchise value under federal conservatorship and continuing the process of moving Gibraltar towards acquisition,'' he added.

Appointees include Steve Hamburger to executive vice president and chief operating officer. Hamburger joined Gibraltar in 1988 as senior vice president and director of marketing. In his new position, he will continue to direct the marketing function, along with retail banking, asset management and real estate lending. He has 18 years of banking and thrift management experience in the areas of consumer and commercial lending, trade finance, and marketing and product management. Prior to coming to Gibraltar, he held senior management positions at Bank of America and Crocker Bank.

Patrick Mackin has been appointed to executive vice president and chief financial officer. Mackin, who is also the company's controller, joined Gibraltar in 1984, and has directed -- in various senior-level posts -- the firm's accounting, loan service, investor reporting, budget, corporate planning, facilities and procurement areas.

Mackin, too, has 18 years of banking and thrift management experience for such organizations as First Federal Savings (Merabank) and Sutter Trust Co., both of Arizona.

Anthony Mangan, who joined Gibraltar in 1987, remains MIS director while being promoted to executive vice president from senior vice president. During his 24-year career in information systems management, he has held

similar positions at Financial Corp. of America Computer Services Inc., Norwest Information Services Inc., and Atlantic Richfield.

David Walck is appointed to executive vice president from senior vice president, while continuing as director of human resources. He joined Gibraltar in 1983 and has over 20 years of experience in human resources management. Prior to Gibraltar, he has held management positions at MAI, Basic Four; VOI-SHAN Manufacturing Co., and Deutsch Co., electronic components division.

Dean Harrison, formerly senior vice president, continues as Gibraltar's general counsel while being promoted to executive vice president. Prior to joining Gibraltar in 1986, he was general counsel to a number of major banking services firms, including Visa International, State Street Bank and Lloyds Bank of California.

And Tim Meagher, manager of Gibralter's lending division, moves up from corporate to senior vice president. Before coming to Gibraltar in 1987, he was regional director/single family operations for the Federal Home Loan Mortgage Co. which he preceded with lending-related positions at other thrifts and real estate firms for the past 14 years.

APPLETON, WI. (JAN. 17) BUSINESS WIRE - Preston H. Wilbourne, chairman, president and chief executive officer, has announced a forthcoming change in the top management of Air Wisconsin Inc. and its holding company, Air Wis Services Inc.

Wilbourne stated that he will retire from his positions as president and chief executive officer of both the holding company and the airlines after the Air Wis Services Inc. annual shareholder meeting in May. He will continue as chairman of the board of both companies.

The boards of directors have named William J. Andres as the new president and chief executive officer of both companies. Andres, 46, has held the position of executive vice president and chief operating officer of Air Wisconsin Inc. since joining the firm in 1987 after 24 years as an executive with United Airlines.

Wilbourne, who will soon be 65, has headed the highly successful airline for the past 24 years. Air Wisconsin, with assets of $200 million, began scheduled airlines service between its Appleton headquarters and Chicago O'Hare International Airport in 1965. Today the airline, designated by the

U.S. Department of Transportation as a ''national carrier,'' serves more than 2 million passengers annually. Through a joint marketing agreement with United Airlines, Air Wisconsin has been operating as ''United Express'' in its markets since 1986.

Air Wis Services Inc. is a publicly owned corporation whose stock is traded on the National Market System under the NASDAQ symbol ARWS.

#90017b0151 01/17/1990 ~Business Wire

REDMOND, WA (JAN. 17) BUSINESS WIRE - Microsoft Corp. Wednesday reported revenues of $300.4 million for the second quarter of fiscal year 1990 which ended Dec. 31, 1989, a 43 percent increase over the $209.9 million for the same period of fiscal 1989.

Revenues for the six months ended Dec. 31, 1989, were $535.6 million, 39 percent over the $386.3 million recorded for the same period of fiscal 1989.

Net income for the quarter was $74.5 million, an increase of 57 percent over the $47.5 million for the corresponding period of fiscal 1989. Net income for the first six months of fiscal 1990 rose 48 percent to $124.1 million from $84.1 million for the corresponding period of fiscal 1989.

Earnings per share were $1.25 for the second quarter and $2.13 for the six months compared to 85 cents and $1.50 for the same periods in fiscal 1989.

Jon Shirley, president and chief operating officer, said: ''This record

quarterly revenue demonstrates continuing strength across virtually all facets of our business, with particular growth from retail applications products. For the first time in the company's history, revenue from worldwide applications products accounted for more than 50 percent of the company's total business.''

Frank Gaudette, senior vice president and chief financial officer, added: ''Net income as a percent of revenues was 24.8 percent compared to 22.6 percent in the second quarter last year. A major contribution to these results was lower cost of revenues at 21.9 percent of revenues compared to 26.1 percent in the second quarter last year. This lower cost of revenues was achieved for the second consecutive quarter through many factors including greater contribution from high margin application products, product cost savings and economies of scale in manufacturing.''

Microsoft Corp. (NASDAQ: MSFT) develops, markets, and supports a wide range of microcomputer software for business and professional use, including operating systems, languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

#90017b0153 01/17/1990 ~Business Wire

MILPITAS, CA. (JAN. 17) BUSINESS WIRE - Quantum Corp. (NASDAQ:QNTM), a leading manufacturer of high-performance disk drives for business personal computers and desktop workstations, Wednesday reported third-quarter fiscal 1990 sales and earnings were more than double the results reported a year ago.

Sales for the quarter ending Dec. 31, 1989, were $111.2 million, a 115 percent increase over the $51.6 million recorded in the third quarter of fiscal 1989, but a 2 percent decrease from the record $113.4 million reported in the second quarter of fiscal 1990, ended Oct. 1, 1989.

Net income for the third quarter of fiscal 1990 was $10.3 million, or 37 cents per share, an increase of 212 percent when compared with $3.3 million, or 12 cents per share, in the like period a year ago, and 18 percent below the $12.5 million, or 45 cents per share, reported in the prior quarter (Oct. 1, 1989).

For the first nine months of fiscal 1990, net income was $34.4 million, or $1.25 per share, on sales of $316.5 million. These results compare with

net income of $6 million, or 20 cents per share, on sales of $130.3 million for the first nine months of fiscal 1989.

Gross margin for the third quarter decreased to 28.5 percent from 30.5 percent in the like quarter a year ago and 29.6 percent reported in the prior quarter. According to Quantum chairman and chief executive officer Stephen M. Berkley: ''The margin decline resulted from a change in sales mix during the quarter, in which more lower capacity ProDrive Series products were sold.

''As anticipated, we also continued to see some margin pressure due to high volume pricing to major customers.''

Berkley added that the slight decline in quarter-to-quarter revenue was attributable to pockets of softness in demand among several OEM customers.

Quantum's balance sheet remains very strong with $85.7 million in cash and long-term cash investments, and no bank debt.

''Our aggressive investments in research and development continued to pay off this quarter, with the introduction of four, new one-inch high, 3-1/2-inch ProDrive products, the new ProDrive LPS (Low Profile Series) hard disk drives,'' he said. Volume shipments of these new products are expected within the next few months.

Berkley noted that during the quarter, first customer shipments were made of some of the company's new high-capacity ProDrive Series products (120-210 megabytes), announced in September 1989.

''Additionally, Quantum's OEM account penetration progressed with the addition of important new OEM customers including NeXT Computer Inc. and Zenith Data Systems in the U.S. and Quantum's first penetration of large OEMs in Korea with the recently announced agreement with Lucky Goldstar International USA.''

The company's subsidiary, Plus Development, contributed approximately 13 percent to Quantum's third-quarter revenues compared with 12 percent last quarter. The increase is attributed to normal seasonal increases in retail computer markets served by Plus. On Jan. 9, 1990, Plus Development introduced its Hardcard II line.

These high-performance 40 and 80 megabyte add-on disk drives for the end-user market are extensions of the revolutionary Hardcard technology pioneered by the company.

Quantum Corp. is a leading independent manufactuer of high-performance disk drives for personal computers and workstations. Its products are marketed to original equipment manufacturers and distributors worldwide.

Plus Development Corp., a subsidiary of Quantum, designs and markets high-volume personal-computer storage-enhancement products, distributed to end-users through 2,500 dealers worldwide.

MOUNTAIN VIEW, CA. (JAN. 17) BUSINESS WIRE - Software Publishing Corp. (NASDAQ:SPCO) experienced continued growth and profitability, Wednesday reporting revenues of $30.1 million and record net income of $5.5 million, or 45 cents per share, for its first fiscal quarter ended Dec. 31, 1989.

This compares with revenues of $23.2 million and net income of $3.8 million, or 31 cents per share, for the comparable first quarter of fiscal 1989. Net income per share reflects a 3:2 stock split effective Oct. 31, 1989.

These results represent a 30 percent increase in revenues and 45 percent increase in net income over the first quarter of last fiscal year.

''During the first fiscal quarter, Software Publishing Corp. achieved above-target international sales, a result credited to the outstanding international organization built by Irfan Salim, vice president of international operations,'' said Fred M. Gibbons, president and chief executive officer of Software Publishing Corp.

''In addition, we implemented a successful holiday promotion of our entire product line of business productivity software.''

During the first quarter, Software Publishing Corp. announced and shipped PFS:First Publisher Font Library, a collection of special-purpose fonts for creating professional-looking publications.

Software Publishing Corp., one of the original personal computer software companies, is a leading international supplier of business productivity software for the IBM Personal Computer and compatibles.

The company develops and markets software in four product families: entry-level products through the PFS:First Series; products for the business professional through the Professional Series; graphics and specialty products through the Harvard Series; and full-featured word processing software through the OfficeWriter Series.

CARLSBAD, CA (JAN. 17) BUSINESS WIRE - Peachtree Equities Inc. and Gold Peak Industries, a publicly listed company in Hong Kong engaged in battery manufacturing, have reached an agreement in principle, where Gold Peak will invest up to US$1.25 million in Peachtree for a 50.1 percent interest.

The agreement is subject to acceptable completion of due diligence by Gold Peak, including verification of Peachtree's balance sheet subsequent Peachtree's Nov. 30, 1989 acquisition of substantially all the assets of Energy Concepts.

Gold Peak Industries currently manufactures and sells batteries primarily in the Asian marketplace. The investment by Gold Peak will facilitate Gold Peak's entry in the U.S. markets of its batteries and associated products, and will allow Energy Concepts to expand its markets and products at extremely competitive prices.

Peachtree/Energy Concepts manufactures and sells nickel cadmium battery packs used in communications, medicine, cellular telephones, computers and leisure products.

SEYMOUR, IN (JAN. 17) BUSINESS WIRE - Home Federal Savings Bank (NASDAQ:HOMF) Wednesday reported earnings for the second quarter and first six months of the 1990 fiscal year.

For the three months ended Dec. 31, 1989, net income was $608,000, or 66 cents per share, up from $534,000, or 58 cents per share, for the prior comparable period.

Net income for the six months ended Dec. 31, 1989, was $1,157,000, or $1.26 per share, compared with $1,105,000, or $1.20 per share, for the first six months of 1988, which included the after-tax sale of Federal Home Loan Mortgage Corp. (FHLMC) stock in the amount of $378,000.

Total assets on Dec. 31, 1989, were $367,401,000, up $12,999,000, from the 1988 second quarter figure of $354,402,000.

Total loans outstanding for the quarter ended Dec. 31, 1989, were $306,585,000. Deposits totalled $309,677,000 at the end of the current quarter, up from $299,595,000 on Dec. 31, 1988.

Net interest income, after provisions for loan losses, for the quarter ended Dec. 31, 1989, amounted to $2,258,000, a 30 percent increase, over the $1,731,000, for the 1988 quarter.

Net interest income for the six months ended Dec. 31, 1989, amounted to $4,344,000, up from $3,686,000, during the like period a year ago, an 18 percent increase.

''An increased difference between net interest income and total operating expenses is one of our primary goals,'' said John K. Keach, Sr., chairman of the board and chief executive officer.

''The continued improvement in this measurement has resulted in increased profitability. We continue to concentrate on controlling other expenses '' said Keach, noting other expenses are in line with a 4 percent increase for the three months ended Dec. 31, 1989, as compared to the same period last year.''

Based on the Dec. 31, 1989, book value of $21.20 price per share compared to $19.51 a year ago, Home Federal is trading at 59 percent of book value. The stock price at the end of Dec. 31, 1989, was $15 compared to $8.50 a year ago.

Home Federal is an FDIC insured savings bank founded in 1908 which

currently operates 10 full service offices in southeastern Indiana.

PHOENIX (JAN. 17) BUSINESS WIRE - Valley National Corp., whose principal banking subsidiaries are The Valley National Bank of Arizona and Valley

Bank and Trust of Utah, reported a net loss of $12.8 million (65 cents per share) for the fourth quarter ended Dec. 31, 1989 and a net loss of $149.2 million ($7.55 per share) for the full year 1989.

This compares with net income of $18.7 million (95 cents per share) for the fourth quarter 1988 and net income of $67.3 million ($3.41 per share) for the full year 1988.

''The corporation's results reflect the weakness of the region's real estate market and the need for Valley National to maintain an adequate reserve for possible credit losses,'' said Richard J. Lehmann, chairman. ''Valley National has the fundamental strengths to get through the real estate downturn.'' Lehmann emphasized, ''Our corporation continues to benefit from our strong market franchise. We have excellent liquidity and a strong primary capital position.''

The fourth quarter provision to the reserve for credit losses was $43.5 million and the provision to the reserve for other real estate owned was $8.2 million. Net charge-offs for the fourth quarter were $42 million. The reserve for credit losses at year-end was $297.1 million or 4.07 percent of total loans outstanding and 75.5 percent of nonaccrual loans. This compares to 3.93 percent of total loans outstanding and 75.8 percent of nonaccrual loans at the end of the third quarter 1989.

Nonaccrual loans were $393.3 million at Dec. 31, 1989, compared to $390.2 million at the end of the previous quarter and $356.8 million at year-end 1988. Total nonperforming assets were $535.6 million at Dec. 31, 1989, compared to $523.2 million at the end of the previous quarter and $450.2 at year-end 1988.

In a related action, the corporation continued the suspension of its dividend, which was announced in the previous quarter.

At Dec. 31, 1989 total assets of the corporation were $10.5 billion, and total deposits were $9.4 billion. Shareholders' equity is $446.7 million primary capital is $743.8 million and total capital is $885.5 million at Dec. 31, 1989. The corresponding ratios of shareholders' equity, primary capital and total capital to assets are 4.25 percent, 6.88 percent and 8.19 percent.

SANTA CLARA, CA. (JAN. 17) BUSINESS WIRE - Integrated Device Technology Inc. (IDT) (NASDAQ:IDTI) Wednesday announced revenues for the third

quarter of fiscal year 1990, ended Dec. 31, 1989, of $51,648,000, an increase of 19 percent over revenue of $43,470,000 for the like period a year ago, and a decrease of 5 percent from revenue of $54,118,000 for the second quarter of fiscal year 1990.

Net income for the quarter was $3,010,000, an increase of 4 percent compared with $2,888,000 a year ago, and a decrease of 48 percent from the prior quarter at $5,765,000.

Earnings per share for the third quarter were 12 cents, compared with 11 cents for the same quarter last year, and a decrease from 22 cents for the prior quarter. Shares used in calculating earnings per share for the quarter increased to 25,576,000 from 25,362,000 in the like period a year ago.

'Orders booked during the quarter for shipment within the quarter did not meet our expectations,'' said D. John Carey, chairman and chief executive officer.

''Pricing pressure in some product areas was also severe. The combination of these two effects resulted in a disappointing third quarter. In spite of this setback, we are confident that we are well positioned to prosper and grow in the 90s.''

Integrated Device Technology Inc. designs, manufactures and markets high-speed CEMOS VLSI integrated circuits with sub-micron features sizes. The company's nine product lines are synergistic and are all focused on the high-performance systems user.

The product lines include fast static RAMs, the FCT logic family, high-density modules, FIFOs, complex logic products, specialty memories, ECL I/O BiCEMOS products, RISC SubSystems, and the microprocessor family which includes the 79R3000 and 79R3001 RISController microprocessors.

With headquarters in Santa Clara, IDT employs more than 2,000 people worldwide.

#90017b0193 01/17/1990 ~Business Wire

SUNNYVALE, CA. (JAN. 17) BUSINESS WIRE - Supertex Inc. (NASDAQ/NMS:SUPX) Wednesday announced net income for the third fiscal quarter ended Dec. 30, 1989, of $337,000, or 3 cents per share, on revenue of $5,066,000.

This represents a decrease of 1 percent from revenue of $5,141,000, and a decrease of 63 percent from net income of $910,000, or 7 cents per share, for the like period of the prior fiscal year.

For the nine months ended Dec. 30, 1989, net sales were $15,677,000, a 2 percent decrease from $16,060,000 for the like period prior year, while net income decreased 17 percent from $2,408,000 to $1,993,000 for the like nine-month period last year.

The lower earnings were attributed to higher production costs in bringing new products from development to market.

''The new products have been well received by our customers, but unfortunately they are not yielding as planned, causing the wafer fabrication to use more labor and materials as well as more expensive local assembly services to meet shipment schedules, said Dr. Henry C. Pao, president and chief executive officer. ''We are taking steps to iron out the production problems.''

The board of directors has approved a stock repurchase program whereby up to 550,000 shares of its common stock may be purchased from time to time in the open market.

''The board's decision was made in view of the current low price at which the company's stock has traded,'' Pao said. ''We believe that the true value of the company is not reflected in the current price of our stock. The company has a strong cash position and will finance the purchase with cash. The company may use the stock in connection with the employee incentive stock plan.''

Supertex Inc. is a publicly held, market niche-oriented semiconductor manufacturer, focused on CMOS, DMOS and HVCMOS technologies for use in the computer, telecommunications, medical, instrumentation and defense industries.

#90017b0209 01/17/1990 ~Business Wire

SAN FRANCISCO (JAN. 17) BUSINESS WIRE - Pacific Gas and Electric Co. Wednesday reported net income of $901 million for the year ended Dec. 31, compared with net income of $62 million in 1988.

Net income in 1988 was depressed primarily by writeoffs resulting from the Diablo Canyon Nuclear Power Plant rate case settlement.

Earnings in 1989 were $1.90 per share. For 1988, after provision for preferred dividends, PG&E reported a loss of 10 cents per share.

PG&E directors today increased the quarterly common stock dividend 3 cents to 38 cents per share, effective with the April 15 payment to shareholders of record on March 15.

The new annualized rate is $1.52, an increase of 8.6 percent over the current annualized rate of $1.40 established in June 1988.

Board Chairman Richard A. Clarke, said: ''Our earnings reflect the financial success of the company in 1989 and the dividend increase reflects our confidence in continued solid performance in the years ahead.

''The financial results of our utility business and the operating performance of Diablo Canyon were both excellent in 1989. As a result of continued rigorous cost controls and our strong markets, we earned our authorized return on equity from utility operations. Diablo Canyon operated safely, reliably and efficiently and remained among the nation's top-performing nuclear plants.''

Clarke said PG&E management believes that its business strategy will result in further earnings growth in the 1990s.

''Our strong gas and electric utility businesses are expected to continue to grow,'' he said, ''and with continued excellent operating performance, the Diablo Canyon plant will provide increased earnings.

''Over the longer term, it our objective that PG&E Enterprises, our unregulated subsidiary, will provide new earnings from its investments in electric power generation, gas exploration and development, and development of surplus utility real estate.

''We are committed to a policy of increasing dividends for our shareholders when such increases can be sustained. We believe we have the plans to increase earnings so we can accomplish that objective.''

The board of directors also authorized the purchase on the open market or in negotiated transactions of up to $500 million of the company's common stock.

The purchases will be made over the next two and one-half years and will be used primarily to offset new shares issued through the employees stock ownership plan and the shareholder dividend reinvestment plan.

#90017b0211 01/17/1990 ~Business Wire
KANSAS CITY, MO (JAN. 17) BUSINESS WIRE - US Sprint will reduce rates on Sprint Plus, its premiere Dial 1 product, by 3.3 percent and increase the daytime volume discount to 10 percent.

The company will also reduce basic Dial 1 rates by 2.6 percent. Both reductions are effective Feb. 1.

This is US Sprint's ninth small business/residential service rate reduction in less than four years and represents an overall reduction of 23 percent since the company was formed.

US Sprint also will offer a promotion for new small business and residential customers that pays up to $5 per line for fees involved in switching to US Sprint effective Jan. 22. The promotion is limited to 10 lines or $50.

''With as many as 20 different rates being offered for a single call by the three major carriers, US Sprint wants to simplify the decision making process and the ease of switching to us,'' said Steve Akin, president small business and residential marketing.

''Basically, if you're a small business or residential customer, Sprint Plus offers the greatest overall savings 24-hours-a-day and, now, we'll even pay you to switch to us.''

US Sprint's Sprint Plus provides savings of up to 34 percent vs. AT&T's Reach Out America.

''This latest rate reduction improves the day and evening rates for all of our small business and residential customers,'' Akin said.

US Sprint, which offers the only nationwide all-digital fiber-optic telecommunications network, is a unit of United Telecommunications Inc., a diversified international telecommunications company headquartered in Kansas City.

#90017b0242 01/17/1990 ~Business Wire
LOS ANGELES (JAN. 17) BUSINESS WIRE - Hilton Hotels Corp. Wednesday announced exciting new enhancements to its Senior HHonors discount travel program, including the addition of more than 70 international hotels in 32

countries.

Designed for travelers age 60-plus, the new Senior HHonors program offers members room rate discounts of up to 50 percent for either single or double occupancy and includes a series of special member benefits. For the first time, travel agents earn 10 percent commission on bookings at this discounted rate, in addition to 10 percent commission on each membership sold.

''One of the most outstanding benefits of Hilton's new Senior HHonors program, along with offering mature travelers the opportunity to receive travel discounts worldwide, is free membership for spouses,'' said Michael A. Ribero, senior vice president of marketing for Hilton.

''Through our research we found that a large percentage of mature travelers enjoy travel both with and without their spouse. Our new Senior HHonors program continues to provide members with that flexibility at no extra cost.

''Additionally, at more than 240 Hilton restaurants in the United States, Senior HHonors members are eligible for a 20 percent discount on dinner for two regardless of whether they are staying at the hotel,'' added Ribero.

In 32 countries, more than 65 Hilton International hotels and all five Conrad Hotels, the international subsidiary of Hilton Hotels Corp., are now participating in the program offering worldwide benefits to Senior HHonors members. With the addition of new domestic properties as well, Senior HHonors members can choose from a selection of more than 310 hotels worldwide.

Senior HHonors also features a series of program guarantees including a full refund of membership fees for new members who decide against using the program within 30-days of enrollment, hotel rates guaranteed to be lower than the rate a hotel might make available to AARP members, and rates guaranteed to be Hilton's lowest published rates for that hotel.

Membership fees range from just $25 per year for stays at over 240 domestic hotels, $50 annually for a worldwide membership at over 310 hotels, and $150 for a worldwide, lifetime membership.

Hilton Hotels Corp. is a publicly owned international lodging company with 265 properties in the United States. In all, more than 95,000 rooms are operated under the Hilton name. Conrad Hotels operates properties in Queensland in Australia, St. Martin in the Caribbean, Dublin, London, and Monte Carlo. Hilton International now operates more than 46,000 rooms in over 140 hotels in 47 countries.

Travel agents can call 1-800/932-3322 for additional information.

#90017b0255 01/17/1990 ~Business Wire

ST. LOUIS (JAN. 17) BUSINESS WIRE - Anheuser-Busch Inc. officials have announced that Busch Light beer will be available to consumers in Florida beginning the first week of February.

''Busch Light is the light beer partner of our very successful Busch Beer -- the nation's fifth-largest selling beer,'' said Michael J. Roarty, executive vice president and director of marketing for Anheuser-Busch. ''It was created to fill a need that was indicated by extensive research and field monitoring. Busch Light will be a great complement to the successful Busch Beer family.''

The product has been available on a pilot market basis since May 1989 in a region that includes Louisiana, Missouri, New Jersey, Illinois, Iowa, parts of Kansas and Longview, Texas.

Like all Anheuser-Busch beer products, Busch Light is brewed with the finest natural ingredients, including hops, barley malt, cereal grains and water. Busch Light contains 110 calories per 12-ounce serving, which is comparable with other light beers.

Busch Beer has shown continual sales increases since being introduced in the Midwest in 1955. It is now available in 41 states and the District of Columbia.

The new beer features a different brewing process than Busch Beer that produces a lighter, brisk and invigorating taste.

Busch Light utilizes cold filtering brewing technology that delivers a Busch-like smoothness in a light beer.

''The exact ingredients and brewing and finishing processes for all of our beer brands are selected by our brewmasters to achieve the best balance of characteristics for each particular brand,'' said Roarty.

Busch Light will benefit from the brewing industry's most comprehensive quality control program, which includes the daily tasting of Busch Light by experts at the company's headquarters in St. Louis.

Packaging for Busch Light will feature distinctive blue and silver 12-ounce longneck glass bottles and cans.

The new product will be supported by a wide range of marketing support activities, including television, radio, print and outdoor advertising.

Busch Light utilizes a distinctive advertising campaign entitled ''Make the Easy Choice.'' Advertising for the new brand contrasts humorous, hard situations with the ''easy'' drinking taste of Busch Light.

Busch Light is a product of Anheuser-Busch Inc., the world's largest brewer. In addition to Busch Light, the company brews Budweiser, Bud Dry, Bud Light, Michelob, Michelob Light, Michelob Dry, Michelob Classic Dark, Busch and LA beers and King Cobra, a malt liquor.

#90017b0260 01/17/1990 ~Business Wire

CHICAGO (JAN. 17) BUSINESS WIRE - United Airlines announced Wednesday that, in response to competitive direct-mail promotions in Denver, it plans to reduce vacation fares for round trip travel between Denver and other cities served by United in the 48 contiguous states for travel through March 6, 1990.

The new fares will be mileage based and will be governed by most of the restrictions that apply to the nonrefundable fares used frequently by vacationers. The fares require a three-day advance purchase and a Saturday night stay. Seats are limited.

The round trip fare levels between Denver and Midwest or West Coast states will be $198 peak and $178 off-peak.

Between Denver and Eastern states the fares will be $258 peak and $238 off-peak. Peak fare levels will apply for travel on Saturdays, Sundays and Mondays. Off-peak fares will apply the balance of the week.

Reservations must be made and tickets purchased by Jan. 31, 1990. Tickets must be purchased within one day of making a reservation.

Tickets may be purchased only on a round-trip basis and are nonrefundable.

In explaining its rationale for offering these low fare levels this winter United said it is competing with direct mail promotions by other carriers including coupons which can be redeemed for air travel at fares well below prevailing levels.

#90017b0293 01/17/1990 ~Business Wire
SEATTLE (JAN. 17) BUSINESS WIRE - Alaska Airlines this month unveiled its 1990 vacation packages to Disneyland, San Diego and San Francisco.

The packages include airfare, transfers between most hotels and airports, and hotel accommodations that span the budget spectrum. A Budget Rent a Car option also is available.

Members of Alaska'a Gold Coast travel mileage incentive program will earn 500 bonus miles when they buy one of the vacation packages and another 500 if they rent a car from Budget.

Six hotels each are available for the choosing in San Diego and San Francisco and 11 are available in the Anaheim area.

The Disneyland package includes a choice of one-, two- or three-day free admission to the Magic Kingdom with unlimited use of all adventures and attractions. Knott's Berry Farm, the Queen Mary and Spruce Goose admissions also can be purchased with the vacations.

Added features of the Disneyland package are a discount coupon book for restaurants and attractions in Anaheim and San Diego, and one day's free use of an economy-sized rental car from Budget.

''These packages are some of the most attractive -- both in terms of price bonuses and available options -- that you'll find in the industry,'' said Bill McKnight, Alaska's vice president of marketing.

To illustrate: roundtrip airfare from Portland, Seattle or Bellingham, roundtrip airport-to-hotel transfers and two nights lodging for two adults in San Francisco is available for as little as $285 per person while a similar package to Disneyland can run as low as $341 per person.

Packages are available from each of the more than 60 cities Alaska and sister carrier Horizon Air serve in the West Coast and Rocky Mountain regions.

For more information, call the Alaska Airlines vacations desk at 1-800/468-2248 or your travel agent.

#90017b0300 01/17/1990 ~Business Wire

IRVINE, CA. BUSINESS WIRE - AST Research Inc. (NASDAQ:ASTA) Wednesday announced sales of $130.2 million for the second quarter of fiscal year 1990, ended Dec. 29, 1989.

This compares with sales of $110.9 million for the second quarter of fiscal year 1989.

Net income after taxes was $7.4 million for the second quarter of fiscal year 1990, compared with a net loss of $8.9 million for the comparable prior year period.

Primary earnings per share were 62 cents for the second quarter of fiscal year 1990, and 53 cents on a fully diluted basis. This compares with a net loss per share of 77 cents for the same period last year.

AST's cash position of $50.7 million at Dec. 29, 1989 has nearly doubled from the $27.3 million reported at Sept. 29, 1989. In addition, inventories were reduced to $86.5 million, compared with $90.2 million at Sept. 29, 1989.

''We view these financial results as an important distinguishing mark for the company,'' said AST President Safi Qureshey. ''We now have consistently shown positive earnings for three consecutive quarters at a time when the industry as a whole has reported mixed performance results.''

AST's financial performance was due in part to increasing demand for 386-based personal computers, which accounted for 60 percent of total systems sales. Gross profit margins exceeded 30 percent for the second quarter of fiscal 1990. The company also continued to concentrate on programs aimed at improving manufacturing efficiencies as well as strengthening asset management and operating expense controls.

In January 1989 AST implemented a long-term strategy to assume a leadership role in the personal computer industry. AST has maintained its position at the forefront of technology through the introduction of the Cupid-32 architecture and recent shipments of its i486 computers.

In late December the company was the first to announce shipments of ISA (Industry Standard Architecture) i486 computers based on the revised production version of Intel's microprocessor.

AST also witnessed greater demand for its Cupid-32 architecture, which permits the quick upgrading of AST Premium computers to any number of higher-performing 386 and i486 microprocessors. In October 1989, the company introduced the Premium 386SX/16 as an affordable entry to 32-bit processing power with the Cupid-32 upgrade path. The 386SX/16 accounted for $14 million in revenues during the second quarter of fiscal 1990.

AST plans to ship Premium i486 EISA (Extended Industry Standard Architecture) computer systems within the next three months. AST was one of the original nine founders of the computer consortium that developed the new EISA specification for personal computers.

AST Research is a leading manufacturer of high-performance desktop computing solutions. The AST systems product line ranges from entry-level Bravo systems to the 386-based and i486 high-performance Premium line of personal computers, including the new EISA bus design.

AST Research corporate headquarters are located at 16215 Alton Parkway, P.O. Box 19658, Irvine, Calif., 92713-9658. Telephone: 714/727-4141.

#90017b0606 01/17/1990 ~Business Wire

SAN JOSE, CA (JAN. 17) BUSINESS WIRE - SQL Access Group and X/Open Co. Ltd. Wednesday announced they are working together in developing a specification for heterogeneous SQL application portability and network communication database capabilities based on the existing X/Open

Portability Guide definition for data management and the SQL Access Group's technical specification.

The SQL Access Group is comprised of systems and software vendors committed to defining a specification, based on the existing structured query language standard (a language designed to interrogate and process data in a relational database), that will enable SQL-based relational databases and application tools from multiple vendors to work together.

X/Open is a consortium of international computer systems vendors who are developing the vendor-independent Common Applications Environment (CAE).

X/Open is an independent, non-profit consortium founded in 1984. Its specification of the CAE is based on de facto and international standards achieved through close cooperation with users, independent software vendors and standards organizations worldwide. All members of X/Open are committed to supporting the CAE and more than 100 software companies are building compliant software products.

The X/Open User and Independent Software Vendor (ISV) councils assist the company in establishing technical and marketing directions and priorities. The councils, which meet on a regular basis, are composed of senior executives from large user organizations and software firms in North America, Europe and Japan. The ISV Council is represented on X/Open's board of directors.

The SQL Access Group, with headquarters in San Jose, is a non-profit association open to all vendors with RDBMS application or server products.

REDWOOD CITY, CA (JAN. 17) BUSINESS WIRE - Network Equipment Technologies Inc. (NYSE: NWK) Wednesday reported a 46 percent increase in revenue and a 36 percent increase in net income for the third fiscal quarter ended Dec. 31, compared with the like period last year.

Revenue rose to $52 million from $35.5 million a year ago. Net income increased to $5.7 million, or 39 cents per share (38 cents on a fully diluted basis), from $4.2 million, or 30 cents per share, in the comparable period last year.

For the first nine months of fiscal 1990, N.E.T.'s revenue amounted to

$141.5 million, 44 percent higher than the $98 million reported in the first nine months of fiscal 1989. Net income for the nine-month period was $15.7 million, or $1.09 per share ($1.07 on a fully diluted basis), during the current fiscal year, as compared with $11.3 million, or 82 cents per share, during the like period last year.

"N.E.T. continues to enjoy a brisk pace of business as our client roster doubled during calendar 1989 to nearly 230 clients," said Bruce D. Smith, chairman and chief executive officer. "Among new U.S. customers added during the quarter just ended are Dow Chemical Co., Carolina Power & Light Co., and Newsday Inc.

"We're encouraged by activity overseas, particularly in light of the additional prospects presented by our recent agreement with Ericsson Business Communications AB of Sweden covering systems integration and product development. New European clients include Den Danske Bank (Denmark), and Texas Instruments (European network, in England, Italy, West Germany and France).

"We began shipments of the IDNX/10 Integrated Access Multiplexer during the quarter just ended, and expect to have the IDNX/90 Transmission Resource Manager at customer sites during the first half of calendar 1990.

"Longer term, in view of the uncertain economic environment both domestically and overseas, we remain cautiously optimistic. Our products and services are moving toward a category more traditionally associated with computer and communications systems, and the economic argument for their purchase and implementation is as compelling as ever for large, information-intensive organizations."

N.E.T. develops, manufactures, markets and supports advanced communications products and services that enable large, information-intensive organizations to build and manage wide-area networks.

CONCORD, CA (JAN. 17) BUSINESS WIRE - Microgenics Corp. announced Wednesday a $2 million extension of their development, licensing and marketing agreement with Japan-based Yamanouchi Pharmaceutical Co. Ltd. The agreement represents an addition to the $10 million agreement entered into in 1986.

Fredric Feldman, Microgenics' president and chief executive officer,

commented: "This new agreement strengthens the partnership established three years ago with Yamanouchi. It will allow for the continued development of key, low-concentration immunoassays for hormone testing, for therapeutic drug testing, for vitamin/anemia testing and for cancer markers. These new, automated, recombinant DNA, enzyme-based assays typically will replace labor-intensive, radioactive-labelled tests."

The new assays will be commercialized by Yamanouchi in Japan. Commenting on their distribution, Feldman added, "This agreement will ensure worldwide distribution of Microgenics' tests which utilize bioengineered enzymes for more cost-effective and environmentally sound diagnostic testing."

Microgenics Corp. develops, manufactures and markets CEDIA recombinant DNA-based diagnostic tests for use in hospitals and clinical laboratories. Microgenics markets its products through its development partners, including Boehringer Mannheim GmbH, Technicon Instruments Corp., and Yamanouchi Pharmaceutical Co. Ltd.

In addition, Microgenics' immunoassays are marketed in the United States by a direct sales force and are distributed by Beckman Instruments Inc. and a network of international distributors. Microgenics, founded in 1981, is a privately held corporation based in Concord. CEDIA is a trademark of Microgenics Corp.

#90017b0627 01/17/1990 ~Business Wire

CALABASAS, CA (JAN. 17) BUSINESS WIRE - In a Jan. 16 article, The Wall Street Journal reported that a software glitch in AT&T's common-channel Signaling System 7 (SS7) resulted in cutting off service to tens of millions of AT&T customers nationwide.

"Phone company sources said one of AT&T's signal nodes malfunctioned, telling AT&T's switches that it couldn't take calls." Tekelec manufactures network surveillance systems which monitor potential problems in SS7 networks, not unlike the kind AT&T faced on Jan. 15.

Signaling System 7 is an overlay data network which works in conjunction with the telephone networks for setting up trunks and carrying database information for 800 services. It is now being deployed by large carriers such at AT&T, Spring, and MCI and is interconnected to local operating companies.

"The Jan. 15 incident clearly demonstrates what could happen in a very

sophisticated, software driven network. Carriers need to respond quickly to glitches in the network at all levels, locally or globally, before any services experience down time," stated Peter Vicars, Tekelec president and chief executive officer.

Tekelec foresaw the problems that could occur in a wide spread complex signaling network. Due to the software sophistication of SS7 network nodes, many potential problems may occur. Over two years ago, Tekelec introduced products for testing and monitoring SS7 equipment during development and for later use in the network as SS7 becomes more widely deployed.

These products, the MGTS (Message Generator Traffic Simulator) and the 7MATE (Maintenance, Access and Test Equipment) are now used by many interexchange carriers, local exchange carriers and manufacturers of SS7 related equipment.

A carrier using a 7MATE or MGTS can analyze local and global views of the signaling network's performance. Thresholds can be set to detect timing and protocol degradation in the SS7 links. Then, by using more detailed monitoring capabilities, the carrier can isolate the problem and take corrective action.

Recognized as a leading test equipment manufacturer, Tekelec's product line encompasses testing of data protocols (ISDN, X.25), transmission services and equipment, signaling (SS7), and emerging data networks. Its products are successfully marketed worldwide with subsidiaries in Japan and the United Kingdom.

CONTACT: Tekelec, Calabasas, Jean Sylwanowicz, (818) 880-7969.

#90017b0628 01/17/1990 ~Business Wire

PORTLAND, OR (JAN. 17) BUSINESS WIRE - Industrial Funding Corp. (NASDAQ:IFDCA) Wednesday announced record results for the fiscal year ended Nov. 30, 1989.

The company posted earnings of $5.0 million, or $.89 per share, for the year, up over 14 percent compared to $4.4 million, or $.78 per share, in fiscal 1988. Total revenue in fiscal 1989 was $38.2 million, up 46 percent from revenue of $26.1 million in the prior year.

New lease volume topped $160 million in fiscal 1989, up 84 percent from new lease volume of $87 million in fiscal 1988. Under the company's accounting policies, most of the revenue from the new lease volume added in fiscal 1989 will be recognized over the next three to four years.

In the fourth quarter Industrial Funding's earnings increased

approximately 16 percent to $1.5 million, or $.26 per share, compared to $1.3 million, or $.23 per share, in the fourth quarter a year ago. Revenues increased 48 percent to $11.3 million compared to $7.6 million last year.

During fiscal 1989, Industrial Funding recorded several significant advances in establishing itself as a leading source of lease financing of capital equipment for smaller businesses. The company arranged fixed-rate financing facilities with a number of major insurance companies, began issuing commercial paper rated A1 and P1 by Moody's and Standard & Poor's, and entered into financing relationships with over 100 equipment manufactures and distributors to provide lease financing for their customers' capital equipment needs on a continuing basis.

In April, the operations of its two leasing subsidiaries were consolidated to clarify the company's focus on smaller businesses and to improve operations. During the year the sales force doubled to 60 people and, in addition, the number of cities served increased from 6 to 28 at year end.

On Dec. 8, 1989, Industrial Funding successfully completed an initial public offering of 1,875,000 shares of Class A common stock, raising approximately $23 million through the sale of 25 percent of the company. The offering was underwritten by a syndicate led by Alex Brown & Sons and Piper Jaffray & Hopwood.

''1988 has been the most important year in the company's 32-year history '' said Joseph Costello, president and chief executive officer. ''We've clarified our focus, built a national sales organization, and particularly through our December public offering, assured ourselves of access to the capital necessary to finance our aggressive growth plans. With these resources we'll be increasingly effective serving the capital equipment leasing needs of smaller businesses.''

Industrial Funding is traded on the NASDAQ National Market System and operates through its Portland, Oregon-based subsidiary Industrial Leasing Corp.

SEATTLE (JAN. 17) BUSINESS WIRE - Lindal Cedar Homes Inc. (NASDAQ:LNDL) announced Wednesday that it is closing its hardwood flooring unit in Renfrew, Ontario, and is conducting preliminary discussions with possible buyers.

Robert W. Lindal, president, said that as a result of the closure, the company will lay off approximately 40 people. Lindal does not plan to sell the Renfrew building, which it purchased in 1972, and will maintain operations of its Eastern Canadian home distribution center there. Lindal will continue to lease out the majority of the Renfrew manufacturing facility to its 13 existing tenants.

Hardwood flooring production was started up in December 1986. The flooring unit reported a net loss of approximately $205,000, or $.09 per share, for the third quarter and a net loss approximating $377,000, or $.16 per share for the first nine months of 1989.

Lindal also announced that it is redirecting its WindowVisions unit and will convert the window manufacturer into a dedicated division of the company with limited regional distribution of its products. The company will lay off approximately 20 of the 50 employees at the WindowVisions plant in Kirkland, Wash.

WindowVisions will continue to manufacture windows for Lindal and Justus custom homes and for selected Pacific Northwest builders and building material firms. Lindal Cedar Homes acquired WindowVisions Inc. from Timberland Industries in December 1986. WindowVisions reported a net loss of approximately $282,000, or $.12 per share, for the third quarter and a net loss approximating $1,135,000, or $.47 per share, for the first nine

months of 1989.

Lindal Cedar Homes reported total net earnings of $844,003, or $.35 per share, for the nine-month period ended Sept. 30, 1989, on record total revenues of $39.4 million.

''We will, once again, be focusing all our efforts on Lindal's custom houses and sunrooms which are internationally recognized for their quality and have been performing extremely well in recent years,'' Lindal said. ''We deeply regret having to lay off employees, but it is time to refocus our energies on our principal business.''

Lindal Cedar Homes is the world's largest manufacturer of top-of-the-line, year-round cedar homes which are sold under the trademarks of Lindal Cedar Homes, Justus Log Homes and Lindal Sunrooms by over 300 distributors in the United States, Canada, Japan and other countries.

HONOLULU (JAN. 17) BUSINESS WIRE - Wayne E. Jack, chairman of the board and chief executive officer of FirstFed America Inc. (ASE: FFA), the holding company for First Federal Savings and Loan Association of America, Wednesday announced fiscal 1990 first quarter financial results.

Net income for the first quarter ended Dec. 31, 1989, was $2,131,000, or 56 cents primary earnings per share, compared to $3,079,000, or 81 cents primary earnings per share, for the quarter ended Dec. 31, 1988.

The decrease in net income for the first three months of fiscal 1990 is primarily due to an after-tax gain of approximately $855,000, which was realized during the first quarter of fiscal 1989 in connection with the sale of Federal Home Loan Mortgage Corp. participating preferred stock.

In addition, expenses relating to the proposed merger with Bancorp Hawaii Inc., totaling approximately $198,000, also contributed to net income for the first quarter of fiscal 1990 being less than the first quarter of fiscal 1989.

Net interest income for the first quarter of fiscal 1990 showed an increase of $182,000, or 2.4 percent, over the comparable period of fiscal 1989.

Additionally, stockholders' equity grew to $98.8 million, or $27 per share at Dec. 31, 1989, compared to $91.7 million, or $24.63 per share, at Dec.

31, 1988. Stockholders' equity represented 11.1 percent of total assets at Dec. 31, 1989.

First Federal Savings and Loan Association of America operates 26 full service offices located throughout the six major islands of Hawaii. Additional offices are operated by its other wholly owned subsidiaries, First Savings and Loan Association of America with three offices in Guam and one in Saipan, and FirstFed America Bank, a federal savings bank, in Logan, Utah, with two offices in northern Utah.

HILLSBORO, OR (JAN. 17) BUSINESS WIRE - Lattice Semiconductor Corporation (NASDAQ: LSCC) today announced record financial results for the third quarter of fiscal 1990 that ended December 30, 1989. The quarter's results mark the ninth consecutive quarter of record net income for the company.

Third quarter revenues of $10,203,000 were up by 90 percent over the $5,365,000 posted for the same period last year, and increased 21 percent over the second quarter, ended September 30, 1989. Net income for the quarter was a record $1,896,000 ($0.21 per share), a 250 percent increase over the $542,000 ($0.07 per share) earned in the same period last year, and up 44 percent from the second quarter.

Revenues for the nine-month period were a record $25,745,000 compared to the $15,354,000 reported for the same period last year. Net income for the first three quarters was $4,124,000 ($0.50 per share), up from the $1,505,000 ($0.21 per share) earned in the same period last year.

Cyrus Y. Tsui, President and Chief Executive Officer, stated, "We experienced excellent growth in both revenues and earnings during the third quarter. We are also enjoying continued improvement in profit margins as our scale of operations expands. Our pretax profit margin has increased every quarter during the last year from 10.1 percent a year ago, to 19.7 percent in the quarter just ended. We are very pleased with this performance."

"Our industry leading E2CMOS PLDs continue to experience increasing customer acceptance," Tsui continued. "The accelerated growth in demand and revenues is a result of increasing our product penetration into new and existing customer bases. These excellent financial results combined with our strong financial condition reinforce our leadership position in the fast-growing CMOS PLD marketplace."

Lattice Semiconductor Corporation, based in Hillsboro, Oregon, designs, develops and markets high-speed E2CMOS programmable logic devices (PLDs). The company's proprietary PLDs, known as Generic Array Logic (GAL) devices, provide electronic systems companies with the ability to program or reconfigure a single device to meet a variety of different needs.

GAL devices shorten product design cycles and reduce development costs by allowing customers to quickly and efficiently incorporate different logic functions on a single device.

E2CMOS and GAL are registered trademarks of Lattice Semiconductor Corp.
Generic Array Logic is a trademark of Lattice Semiconductor Corp.

BILLERICA, MA (JAN. 17) BUSINESS WIRE - Cognition Corp., a developer of CAD/CAM/CAE software, announced Wednesday it has finalized a $2.1 million equity investment from ABS Ventures, State Farm Insurance, Memorial Drive Trust, and Automatix Inc.

Cognition President John Hurd said the company's plan is to expand sales and development resources. The infusion of new capital will be used for working capital, new product development and product acquisition. Michael Cronin, CEO of Cognition Corp., said the investment puts the newly formed company on a firm financial footing as it becomes independent of Automatix.

Cognition Corp. was formed in July 1989 by combining the Automatix CAD/CAM division with the assets of Cognition Inc. John Hurd, Cognition president, said sales and employment have grown steadily since the two companies combined. Cognition currently has 30 employees in the United States, and markets in Europe through its affiliate, Cognition Europe BV, and in Japan through Tokyo Electron Ltd.

The funding was a combination of newly raised capital from all parties and conversion of interim loans from Automatix into equity. Cognition is integrating existing CAD/CAM/CAE products for mechanical engineering, and offering its products on industry standard UNIX based workstations. Cognition's primary products are:

- The Mechanical Advantage - a performance modeler used for performance simulation, design optimization, design synthesis, tolerance analysis and sensitivity analysis,

- The Cost & Manufacturability Guide - an expert Design For Manufacturability (DFM) system, and
- The Advantage CAD/CAM Family - a full featured series of 3D design/2D drafting CAD products incorporating Model/Draw associativity.

Arthur Reidel of ABS Ventures stated that management was a key element in his company's decision to invest in Cognition. According to Reidel, Cognition's management has positioned the company as a platform independent supplier of integrated CAD/CAM/CAE solutions. "Cognition has always had powerful MCAE products. Mike Cronin has brought these leading edge MCAE products together with established CAD products in a way that builds on the strengths of each."

Cognition customers were also pleaded with the recent funding. "Our experience with Cognition software has repeatedly demonstrated that it is one of the most productive software tools available to our engineers," said Roger J. Briggs, senior engineer with Eaton Corp.'s Corporate Research & Development Center in Milwaukee.

GOLDEN, CO (JAN. 17) BUSINESS WIRE - Horizon Gold Shares Inc. (NASDAQ: HRIZ) Wednesday announced the election of Charles E. Stott Jr. as president and chief executive officer of this Golden-based precious metals company. Stott was formerly president and chief executive officer of Amax Gold Inc. (NYSE: AU).

Under Stott's leadership, Amax Gold developed the Sleeper Mine, a successful open pit, mill/heap leach mine producing 250,000 ounces of gold annually. The Sleeper Mine, located in Humboldt County, Nev., is ranked as one of the lowest cost gold producers in North America.

Prior to the formation of Amax Gold, Stott held numerous senior level executive positions with AMAX Inc. over a period of 18 years. Stott holds degrees in mining engineering and law.

Horizon, a Golden-based precious metals production company, is currently operating two gold mines in northern Nevada from which it expects to produce a total 32,000 equivalent gold ounces for the fiscal year ending March 31, 1990.

On Jan. 2, the company announced the acquisition of the Dixie-Comstock gold deposit, located in Churchill County, Nev., from Santa Fe Pacific Mining of Albuquerque, N.M.

Stott, who has been acting as a consultant for Horizon since November 1989 was also elected to the company's board of directors. John E. Watson, formerly president and CEO, remains full-time with Horizon as chairman of the board.

#90017b0646 01/17/1990 ~Business Wire

SCOTTS VALLEY, CA (JAN. 17) BUSINESS WIRE - Borland International (NASDAQ: BORL) Wednesday announced that IBM Corp. has begun packaging version 2.0 of Borland's SideKick for Presentation Manager with IBM's OS/2 Standard Edition version 1.2 and Extended Edition version 1.1.

Version 2.0 of SideKick for Presentation Manager is based on Borland's recently announced Paradox Engine, which provides a common data format for all Borland products and custom C programs. SideKick for PM version 2.0 generates Paradox compatible files that can be shared in a multitasking, multiuser environment.

"IBM's decision to ship SideKick for PM 2.0 with all versions of OS/2 reflects our belief that SideKick is a set of standard, graphical tools that every OS/2 user should have," said Spencer Leyton, Borland's vice president of Business Development. "And allowing multiple users concurrent access to information, a great advantage of OS/2, lets everyone work with the most current information."

SideKick for PM 2.0 provides a graphical user interface for a set of four essential applications: Time Planner, Phonebook, Notepad and Calculator. Time Planner allows daily, weekly and monthly appointment scheduling. Notes and alarms may be attached to appointments, including alarms to launch any OS/2 program.

Phonebook makes names, addresses and phone numbers accessible at a keystroke. Modem users can take advantage of the Phonebook's autodial feature and dial voice and data phone numbers directly from SideKick.

Notepad is a word processor. Several Notepad windows can be open concurrently, and data may be moved between them by cut, copy and paste functions. Calculator offers a wide range of mathematical functions, permits comments and edits, and can display and save calculator tapes.

The Paradox Engine gives SideKick for PM 2.0 multiuser access to Paradox files, for so-called "workgroup computing." There are also enhanced querying capabilities in the Phonebook; editing within the table and card views; password protection in the Time Planner, Phonebook, and Notepad;

customized views; font support and resizable windows.

SideKick for PM version 2.0 has a suggested retail price of $199.95. Registered users of SideKick for PM version 1.0 who want to upgrade to version 2.0 may do so for $59 by calling 800/331-0877.

Borland International Inc., Scotts Valley, is a leading developer of high-performance software products. Borland offers in its Professional Business Series some of the world's most widely used business applications such as Paradox, QUATTRO PRO, QUATTRO, SideKick Plus, Reflex and SideKick for Presentation Manager - the first application for IBM's OS/2 Presentation Manager.

TACOMA, WA (JAN. 17) BUSINESS WIRE - Puget Sound Bancorp (NASDAQ: PSNB) Wednesday reported earnings of $27.9 million, or $1.70 per share, for 1989 down 30.9 percent from $40.4 million, or $2.50 per share in 1988.

Net income for the fourth quarter of 1989 was $11.3 million, or 69 cents per share, up 7.3 percent from $10.5 million, or 65 cents per share, in 1988.

"Our fourth quarter results were strong," commented W.W. Philip, chairman and chief executive officer, "but not sufficient to fully compensate for the third quarter loss." In the third quarter of 1989, Puget Sound Bancorp made a $20.5 million ($14.6 million after tax) provision for possible loan and real estate losses, resulting in a net loss of $4.6 million for the quarter.

Total assets at the end of the year were $4.3 billion, an 8.8 percent increase from $3.9 billion on Dec. 31, 1988. Total deposits were $3.2 billion compared to $2.8 billion a year earlier, a 14.8 percent increase.

Total loans over the same period advanced to $3.3 billion from $3.0 billion, a 7.8 percent increase. The allowance for loan losses at Dec. 31 was $42.5 million or 1.30 percent of loans, up from $32.5 million or 1.07 percent of loans at year-end 1988.

"We expect continued progress in the first year of our second century," concluded Philip. "A staff of enthusiastic and skilled bankers is eager to build on our solid foundation of local customer service."

SEATTLE (JAN. 17) BUSINESS WIRE - Washington Energy Co. (OTC: WECO) has begun a public offering of 1,750,000 shares of common stock at $20.125 per share, Chairman and Chief Executive Officer James A. Thorpe announced Wednesday.

Net proceeds from the transaction will be used to reduce short-term debt incurred primarily for utility construction and oil and gas exploration and development.

Shearson Lehman Hutton Inc. and Dean Witter Reynolds Inc. are managing underwriters for the offering.

Washington Energy's principal asset is its 100 percent ownership of Washington Natural Gas Co., which distributes and sells natural gas to more than 340,000 residential, commercial and industrial customers in the Puget Sound area of Washington state.

Washington Energy also owns four other subsidiaries. Thermal Exploration Inc. is active in oil and gas exploration and development. Thermal Energy Inc. holds leases and other rights to mine low sulphur coal in eastern Montana. ThermRail Inc. holds a partnership interest in the Tongue River Railroad, which is certificated to build a rail line connecting southeastern Montana coal fields with existing rail lines. Thermal Efficiency Inc. has a controlling interest in Universal Synergetics Inc. (Unisyn), which has developed innovative technology to address the problem of pollution from organic waste.

TACOMA, WA (JAN. 17) BUSINESS WIRE - Puget Sound Bancorp's board of directors has approved several promotions for the corporation's top management.

Don G. Vandenheuvel has been promoted to senior executive vice president and chief financial officer. Lazarus S. Politakis has been named senior executive vice president and chief credit officer.

Three promotions to executive vice president were announced: Dale E. Clark

has been named executive vice president and manager, Community Banking Group; Leonard R. Williamson was promoted to executive vice president and manager, Commercial Banking Group; and Gary N. Gardner was named executive vice president, Loan Administration Group.

Three promotions to senior vice president were also approved: James V. Bisceglia, senior vice president and assistant manager, Commercial Banking Group; Jonathan Fine, senior vice president and treasurer; and James L. Maxwell, senior vice president and general counsel.

''These promotions more accurately reflect the level of leadership provided by each individual,'' commented W.W. Philip, chairman and chief executive officer.

BREMERTON, WA (JAN. 17) BUSINESS WIRE - GNW Financial Corp. (NASDAQ: GNWF) Wednesday reported significantly higher net income and increased revenues for the year ended Dec. 31, 1989.

The corporation also announced that it will pay a 5 cents per share cash dividend in February. GNW Financial Corp. is the holding company for Great Northwest Federal Savings and Loan Association.

Net income for the fourth quarter of $957,000, or 47 cents per share, was slightly lower than $983,000 in the fourth quarter of 1988. For the year, income was $3.6 million, or $1.80 per share, an increase of 57 percent compared to income of $2.3 million in 1988, or $1.19 per share. Results for 1988 do not reflect earnings from the proceeds of the Association's conversion from mutual to stock ownership and the corporation's initial public offering which was completed in December 1988.

''We're pleased with the results of operations for 1989, our first full year as a publicly owned company,'' stated Raymond L. Soule, chairman, president and chief executive officer. ''Deposits have increased significantly, net interest income is up and loan production remains strong.

''We see continuing improvement in our net interest margin,'' continued Soule, ''our operating expenses are under control, and our asset quality is steadily improving. As a result, our growth has been steady and reliable.''

The corporation's board of directors has declared a cash dividend of 5

cents per share for the quarter. The dividend will be payable on Feb. 15, 1990, to shareholders of record on Jan. 29, 1990.

SANTA BARBARA, CA (JAN. 17) BUSINESS WIRE - Addressing users' need for local area network (LAN) connections that support true bridging and routing simultaneously, Advanced Computer Communications (ACC) Wednesday announced it will begin shipping its new internetworking bridge/router software this month.

The ACS 4100 hardware links remote Ethernet LANs and Transmission Control Protocol/Internet Protocol (TCP/IP) networks over high-speed point-to-point and X.25 ports. For LAN connections that require both bridging and routing, the new software combines these funtions simultaneously over the same physical link.

Unlike hybrid routers, the ACS 4100 bridge/router performs true bridging and routing services and therefore isn't restricted to proprietary protocols. The ACS 4100 supports the full features of MAC Layer bridging and IP routing on a single platform using industry standards, like 802.1 Spanning Tree Protocol, and Simple Network Management Protocol (SNMP).

"Buyers need to be sure what they're purchasing today won't grow obsolete as standards become established," warns Gary Krall, ACC director of marketing. "The key to ACC's Series 4000 products is to offer bridge and router software flexibility through configuration and upgrades.

Based on an advanced hardware platform, the ACS 4100 changes functionality simply by invoking the appropriate bridge, router or combined bridge/router software. As standards emerge, new software programs will accommodate the evolving technology. Simultaneous Bridging and Routing

The ACS 4100 bridge/router software enhancement routes TCP/IP data by checking all available network links and plotting the shortest path. Non-TCP/IP packets are bridged. Routing tables are built and maintained using dynamic routing protocols.

"The ACS 4100 gives users the performance of an Ethernet bridge for time-sensitive protocols such as DECnet and LAT, while at the same time routing TCP/IP packets across the most optimal path," according to Krall.

For those packets that are bridged, address tables are learned automatically. Users can also customize touting tables manually. By

combining techniques, network managers can optimize all resources and obtain both the ease of dynamic routing and automatic address learning, while at the same time, have the overriding control to provide preferred routes.

#90017b0656 01/17/1990 ~Business Wire

INDIANAPOLIS (JAN. 17) BUSINESS WIRE - Anacomp Inc. Wednesday announced record revenues and operating income from continuing operations for the fourth quarter and for fiscal 1989.

Revenues were $172,251,000 and $648,883,000 for the quarter and the year respectively, while operating income from continuing operations was $27,499,000 and $103,767,000, compared to revenues in the fourth quarter and for the year in fiscal 1988 of $116,987,000 and $417,948,000, respectively, and operating income from continuing operations of $21,037,000 and $74,722,000.

Anacomp further announced that the non-cash charge associated with its previously announced departure from the flexible disk manufacturing business will be larger than previously reported as a result of a decision to write off a substantial portion of the carrying value related to Anacomp's 1988 acquisition of Xidex.

The non-cash write-off of the carrying value will result in a loss available to common shares of $170,806,000, or $4.47 per share for the year ($178,105,000 and $4.64 for the quarter). That compares to net income available to common shares for fiscal 1988 of $41,420,000 or 72 cents per share before extaordinary credit ($8,300,000 and 13 cents for the quarter).

The reported loss puts Anacomp in violation of certain maintenance covenants in its outstanding bank loan and subordinated debt agreements. The company is in the process of negotiating with its bank lenders to obtain waivers of these violations and the banks have expressed a willingness to work with the company to resolve this matter promptly. Furthermore, the company will seek to repay, refinance, or obtain waivers relating to the subordinated debt.

The company expects its fiscal 1990 results to reflect continuing improvements in the consistent profitability of its ongoing micrographics business. Those results will include a significant contribution from the portions of the micrographics and magnetic media operations which Anacomp acquired from Xidex and retained following the decision to leave the floppy disk business. Anacomp does not anticipate any further write-offs

relating to that acquisition.

Anacomp is an information management company with leading market positions in micrographics services, systems and supplies, and magnetic media. Anacomp's customers include banks and other financial institutions, large government and industrial users, and a variety of other businesses around the world. Anacomp common stock is listed on the New York Stock Exchange.

#90017b0661 01/17/1990 ~Business Wire

SANTA BARBARA, CA (JAN. 17) BUSINESS WIRE - County Bank (NASDAQ: CNBA) Wednesday announced it is transferring approximately $10.9 million to its loss reserves, according to Roy G. Green, president and chief executive officer.

Green said: "In addition, an accounting adjustment of $7.3 million related to prior loan sales was also made. As a result of these provisions and certain other adjustments, the bank expects to report a loss of approximately $10.7 million, or $1.29 per share, for the year ending Dec. 31, 1989. Had these actions not been taken, the bank would have shown a profit for the year."

Green added: "With the addition to reserves, County Bank's total reserves are over $18.7 million. The bank is in full compliance with the federal government's new tangible capital requirement and expects to comply with all capital requirements.

"County Bank's reserve policy, its capital position, $1.4 billion in assets and its strong market area of Santa Monica, Ventura and San Luis Obispo counties, build a strong foundation for a very positive earnings outlook for 1990 and thereafter."

#90017b0662 01/17/1990 ~Business Wire

IRVINE, CA (JAN. 17) BUSINESS WIRE - The largest independent distributor of building materials in the United States was formed Tuesday when the merger of Sequoia Supply (Irvine) and the Grip-Rite Group (White Plains, N.Y.) was consummated.

The new company, PrimeSource Inc., includes Miller Supply, Metropolitan Wholesale Supply, Guardian Purchasing, Pan American Building Materials, and

Mid-American Distributing, as well as Sequoia Supply.

In a joint statement, Marvin E. Miller, chairman of Grip-Rite and Paul W. Hylbert, president of Sequoia Supply, indicated that the new company will have sales of over $450 million and 1,000 employees in 46 distribution centers strategically located throughout the country.

Miller and Hylbert, who will be chairman/chief executive officer and president/chief executive officer, respectively, of PrimeSource further stated that the key management of the predecessor companies will form the nucleus of the management team of the new company.

"We are extremely excited about putting these companies together," Miller said. "Combining the strengths of Grip-Rite nails and fasteners with the wood products expertise and geographic coverage of Sequoia will significantly enhance our position in the market, Hylbert added.

Financing for this $125 million transaction was syndicated under the leadership of Bank of New York and included Ameritrust Bank, Exchange National Bank, C.I.T. Financial and Home Federal Savings. The financial structure includes the equity investment of members of management, plus a $25 million employee stock ownership plan. Bear Stearns and Mast Resources acted as financial advisers to the transaction.

PrimeSource has distribution centers from coast-to-coast including major markets in Chicago, San Francisco, St. Louis, Dallas/Ft. Worth, Houston, Atlanta, Nashville, Detroit and Seattle.

#90017b0664 01/17/1990 ~Business Wire

LOUISVILLE, KY (JAN. 17) BUSINESS WIRE - Steel Technologies Inc. (NASDAQ/NMS: STTX) Wednesday reported results for the first quarter of fiscal 1990.

For the three months ended Dec. 31, 1989, sales increased to a record first quarter level of $30,278,000, compared with $29,774,000 in the first quarter of fiscal 1989. Net income for the period was $1,382,000, or 17 cents per share, compared with $1,574,000, or 20 cents per share, a year ago.

Earnings for the most recent period included $250,000, or three cents per share, related to an accounting change to adopt the provisions of FASB Statement No. 96, "Accounting for Income Taxes."

Merwin J. Ray, chairman and chief executive officer, remarked: "Steel

Technologies achieved record first quarter sales during a difficult period in the automotive market. We have continued to increase our participation with customers in the automotive sector despite weak production levels within their industry.

"We are also pleased to note that although the gross profit margin for the first quarter was below the level in the first quarter a year ago, it showed significant improvement over the preceding quarter."

As an intermediate steel processor, Steel Technologies processes flat rolled steel to specified thickness, width, temper and finish requirements for automotive, appliance, communications, electrical, machinery and office equipment industries, among others.

#90017b0669 01/17/1990 ~Business Wire

FORT WAYNE, IN (JAN. 17) BUSINESS WIRE - Tokheim Corp. (NYSE: TOK) Wednesday reported sales and earnings for the fourth quarter and fiscal year ended Nov. 30, 1989.

Sales for the fiscal 1989 fourth quarter were a record $67.5 million, an increase of approximately 16 percent from sales of $58 million recorded in the comparable period of 1988. This increase is attributable primarily to strong shipments of petroleum dispensing equipment in domestic markets continuing the positive trend which began to develop late in the fiscal third quarter.

Net earnings for the fourth quarter were $4.6 million, or 64 cents per share on a primary basis, vs. the year-ago quarter net earnings of $1.8 million, or 29 cents per share.

These results included a $0.6 million, or ten cents per share, gain from the sale of a plant in Canada which was partially offset by a $0.3 million or four cents per share, provision for the consolidation of electronic manufacturing facilities, which represents costs associated with closing the company's Albion, Ind., electronic assembly facility and consolidating those operations into the Washington, Ind., electronic final assembly plant.

For the year as a whole, sales increased 12 percent to a record $228.4 million over last year's result of $203.1 million. Net earnings for the period were $8.1 million, or $1.15 per share on a primary basis, vs. the $8.6 million, or $1.36 per share, before an accounting change, reported in the year-ago period.

The accounting change, the implementation of Financial Accounting Standards Board Statement No. 96, "Accounting for Income Taxes," had the effect of increasing fiscal 1988 net earnings to $11 million, or $1.73 per share.

John E. Overmyer, chairman of the board and president, said that the domestic retail petroleum market is showing tangible signs of recognizing the need to upgrade gasoline stations to protect and gain market share. In addition, the industry is digesting the Environmental Protection Agency's September 1988 rulings on underground storage tanks, and the effort required to comply with the new standards is beginning to gain momemtum.

Overmyer stated, "Tokheim's opportunities for continued growth in sales and improved profitability in fiscal 1990 are very good. We anticipate growth, both domestically and in foreign markets, as customers recognize the advantages of Tokheim's solutions to fully integrating gasoline dispensing, retail point-of-sales and control, and environmental monitoring and compliance."

#90017b0670 01/17/1990 ~Business Wire

CINCINNATI (JAN. 17) BUSINESS WIRE) - Cincinnati Bell Inc. (NYSE: CSN) Wednesday reported it earned $94.4 million in net income in 1989, a gain of 11.9 percent from 1988's $84.3 million.

Earnings per common share increased to $1.50, a 14.5 percent increase over 1988's $1.31. Earnings per common share have been restated to reflect the 2-for-1 stock split that occurred in May 1989. Revenues increased to $900 million, a gain of 21.9 percent from $738.4 million a year ago.

Fourth quarter earnings of $22.7 million, or 36 cents per common share, showed a 31.4 percent increase. Earnings per common share increased 38.5 percent. Revenues for the fourth quarter increased 16.2 percent to $226.8 million compared with $195.2 a year ago.

"In 1989, Cincinnati Bell Information Systems (CBIS) and our other "new" businesses were the engine of growth for Cincinnati Bell Inc. (CBI)," said D.H. Hibbard, chairman and CEO. "We planned it that way." Cincinnati Bell Information Systems (CBIS) generated most of this growth in revenues and operating income.

In the fourth quarter, CBIS Federal Inc., formerly Vanguard Technologies, won contracts totalling $23.2 million. The largest is with Rockwell

International for supporting the design, development and maintenance of information systems for the Department of Energy. CBIS Federal Inc. supplies information systems technology and services to the federal government and federal contractors.

CBIS retained its position as the leading supplier of management and support systems to North American cellular mobile telephone companies. Cincinnati Bell Telephone revenues increased largely as a result of the continued healthy expansion of the metropolitan Cincinnati economy. But CBT's operating income declined from its all-time record in 1988.

Number of access lines in service stood at 781,064 at year's end, a gain of 17,625 for the year. During the fourth quarter CBT expanded its telephone paging network in both Ohio and Kentucky.

In October CBT entered into an agreement with Ohio Bell allowing each company's customers to use their paging units in the other's operating area. In addition, Metro-Page of Kentucky, a tone voice and display paging operation, was acquired in November. All other businesses were profitable in 1989.

#90017b0677 01/17/1990 ~Business Wire

DENVER (JAN. 17) BUSINESS WIRE - Kimco Energy Corp. (NASDAQ: KIMC) and Broken Arrow Petroleum Co., Scottsdale, Ariz., (OTC) Wednesday announced that they have executed definitive documentation to combine the two companies.

When combined the book value of shareholders' equity will be on the order of $6 million with total assets of approximately $7 million. The transaction is expected to be closed on or before April 1, 1990. During the interim, the entities will operate effectively as one company, subject to a joint management agreement effective Jan. 1, 1990.

Gary M. Cook, president of Kimco said, "The directors, management jnd shareholders of Kimco Energy Corp. are extremely pleased to welcome the outstanding management resources as well as proprietary technology which Broken Arrow brings to the transaction.

"This transaction recognizes both the significant low-risk undeveloped natural gas reserves which Broken Arrow has identified and acquired in the Arkoma Basin, as well as the values which Kimco has established over the last several years."

Cook and Larry W. Smith, president of Broken Arrow, who will become chairman of the finance committee of the combined companies, jointly indicated that the goal was to combine Broken Arrow's ability to provide a growing stream of lower-risk gas development projects with Kimco's ability to find, acquire and manage reserves.

The intent is to quickly become a leading low-cost developer of natural gas with the reserves necessary to support a market capitalization in the $100 million range.

The transaction is not contingent upon any further evaluation or subjective negotiations between the parties. The exchange is subject to certain conditions, certain regulatory approvals, an adequate market valuation of Kimco's shares, and shareholder approval.

Broken Arrow shareholders will exchange their shares for Kimco stock on the basis of one share of the common stock of Kimco for ten shares of the common stock of Broken Arrow or its equivalent in Broken Arrow's Series "A" preferred stock. It is projected that at closing Kimco will have approximately 6,900,249 fully diluted common shares outstanding.

#90017b0680 01/17/1990 ~Business Wire

NASHVILLE, TN (JAN. 17) BUSINESS WIRE - Fidelity Bancshares Inc. (NASDAQ/NMS: FFTN) Wednesday announced results for its third quarter and nine months ended Dec. 31, 1989.

Fidelity Bancshares Inc. is the new holding company of Fidelity Federal Savings and Loan Association of Tennessee. The reorganization of Fidelity Federal into a holding company structure was effective Dec. 1, 1989.

For the three months ended Dec. 31, 1989, net income was $1,805,000, or 51 cents per share, compared with net income of $2,050,000, or 58 cents per share, earned in the third quarter a year ago.

The results for the quarter ended Dec. 31, 1988, included a gain of approximately $4.1 million on the sale of Federal Home Loan Mortgage Corp. preferred stock and an increase of approximately $2.7 million in the provision for loan losses. Without those two items, the net income a year ago would have been approximately $1,650,000, or 47 cents per share.

Net interest income for the quarter ended Dec. 31, 1989, increased to $6,967,000 from $6,677,000 for the like quarter a year ago. The association's net yield on interest-earning assets increased to 2.88

percent for the 1989 quarter compared with 2.78 percent for the like quarter a year ago.

For the nine months ended Dec. 31, 1989, net income was $4,836,000, or $1.37 per share, compared with net income of $4,848,000, or $1.37 per share, for the similar nine-month period last year.

During the nine months ended Dec. 31, 1989, Fidelity Federal originated over $113 million in new loans, the majority of which were for single-family home mortgages.

Commenting on the results, Stanley D. Overton, president, chairman, and chief executive officer, said: "We are very pleased with the operating results achieved for the first nine months of our fiscal year. Our net interest margins have improved significantly over the past few months, and the recent drop in the prime lending rate certainly continues the decline in key interest rates that started in 1988. Lower interest rates not only help improve our margins but also help bolster demand for mortgage loans.

"With the problems faced by many financial institutions due to the softening in the real estate market," Overton continued, "we are pleased that our asset quality remains high. Our philosophy of being primarily a single-family housing lender has allowed us to avoid the severe problems being faced by many other institutions."

#90017b0681 01/17/1990 ~Business Wire

PARIS (JAN. 17) BUSINESS WIRE - LVMH Moet Hennessy Louis Vuitton (NASDAQ: LVMHY) Wednesday announced 1989 preliminary consolidated net sales of FF 19.7 billion (US$ 3.4 billion (a)), an increase of 19.6 percent over the 1988 level.

On a constant exchange rate basis, net sales would have increased by 17.2 percent, in line with forecasts. Based on preliminary indications, net income for 1989 is expected to show an increase of more than 45 percent.

In the champagne & wines segment, the increase in sales on a comparable structural basis would have been 8.6 percent, reflecting a 1 percent increase in champagne sales volume and a significant rise in selling prices.

In the cognac & spirits segment, the 24.1 percent increase in sales results from an 8 percent growth in sales volume combined with a strong increase in sales of older qualities.

In the luggage, leather goods & accessories segment, Louis Vuitton Malletier recorded a 32.7 percent growth in sales in 1989, reflecting a 28 percent increase in volume; same-store sales grew by 20 percent.

Finally, in the perfumes & beauty products segment, total sales rose by 19.9 percent, with growth evenly spread among the three companies of the segment, Parfums Christian Dior, Parfums Givenchy and Roc. The year was marked by the launch of Dior's Fahrenheit men's cologne in Asia and North America and the introduction by Givenchy of a makeup and a skincare line.

LVMH Moet Hennessy Louis Vuitton is one of the world's largest companies specializing in luxury products. Its prestige brands include Dom Prignon, Moet & Chandon, and Veuve Clicquot champagnes; Hennessy and Hine cognacs; Louis Vuitton luggage, leather goods and accessories; Givenchy Couture; and Christian Dior, Givenchy and Roc perfumes and cosmetics.

BELLINGHAM, WA. (JAN. 16) BUSINESS WIRE - Horizon Bank (NASDAQ:HRZB) Wednesday reported higher earnings for the third quarter and nine months ended Dec. 31, 1989, compared to the previous third fiscal quarter and nineDmonths ended Dec. 31, 1988.

George W. Gust, president, announced that earnings for the quarter were $1,075,555, up from $997,081 in the corresponding period a year ago. Earnings per share were 30 cents, up from 28 cents. Per share amounts have been adjusted to reflect the 4-for-3 stock split declared July 25, 1989.

Total revenues for the three months ended Dec. 31 were $7.6 million compared with $6.6 million, including interest income of $7.1 million vs. $6.3 million.

For the nine months, Horizon earned $3.3 million, or 92 cents per share, up from $2.9 million and 83 cents per share in the comparable period a year ago.

''Stable interest rates and a strong local economy were major factors in the bank's performance,'' Gust said.

The bank's net worth increased to $44 million or 14.95 percent of total assets, he added, and deposits, assets and loans receivable showed strong growth during the period.

Horizon is a state-chartered, FDIC-insured savings bank serving Whatcom, Skagit and Snohomish counties.

#90017b0686 01/17/1990 ~Business Wire

NASHVILLE, TE. (JAN. 16) BUSINESS WIRE - Kenneth L. Roberts, chairman of the board of First American Corp. (NASDAQ/NMS:FATN), said Wednesday that ''although 1989 was not a good year, we are optimistic about the earning ability of the corporation in 1990.

''We have established our allowance for possible loan losses at a level which we believe offers us a significant measure of protection as we begin the new year. While our earnings for 1989 were low, we are confident that we have improved the financial position of the corporation for 1990 and future years,'' Roberts said.

First American announced on Jan. 5 that a provision of $55 million was added to the allowance for possible loan losses in the fourth quarter of 1989. This resulted in a loss of $17.4 million, or 76 cents per share, for the fourth quarter, compared with a loss of $3.4 million, or 15 cents per share, for the fourth quarter of 1988.

After the fourth quarter provision, earnings for the corporation for 1989 were $4.2 million, or 18 cents per share, compared with $30.4 million, or $1.32 per share, for 1988.

''We made a firm commitment in July of last year that we would concentrate our efforts to identify our loan problems and deal with them decisively in 1989, and we have done this,'' Roberts said.

''Consequently, we enter 1990 with renewed confidence based on the corporation's strong market position in Tennessee, its capital, liquidity and reserve coverage.

''We have completed our statewide conversion into one bank. This action, along with continued emphasis on sales and customer service and tight control on non-interest expenses, will help the corporation return to a more normal level of profitability in 1990,'' he added.

Non-performing assets, which include non-accrual loans, restructured loans and foreclosed properties, were $115.1 million at Dec. 31, 1989, compared with $72.9 million a year earlier. The allowance for possible loan losses at year end 1989 was $116.7 million, compared with $74.9 million on the like date the previous year.

The reserve coverage for non-performing assets is more than 100 percent. Net charge offs for 1989 were $68 million, compared with $60 million for 1988.

At Dec. 31, 1989, total assets were $7.1 billion; deposits, $5.8 billion; and loans, net of unearned discounts, $4.6 billion.

First American Corp. is based in Nashville, and operates 148 banking offices. In Tennessee, banking offices are located in 29 counties, including the cities of Bristol, Chattanooga, Clarksville, Cleveland, Clinton, Cookeville, Crossville, Dayton, Dover, Franklin, Gallatin, Greenback, Harriman, Jackson, Jefferson City, Johnson City, Kingsport, Kingston, Knoxville, Lebanon, Maryville, McMinnville, Memphis, Milan, Murfreesboro, Nashville, Oak Ridge, Paris, Rockwood, Smyrna, Spring City, Shelbyville, Union City, Waverly and Woodbury.

The corporation also owns a bank in Ashland, Ky., and operates First American Trust Co. and First Amtenn Life Insurance Co.

#90017b0688 01/17/1990 ~Business Wire

MILWAUKEE (JAN. 17) BUSINESS WIRE - Johnson Controls Inc. (NYSE:JCI) Wednesday announced that for its first quarter of fiscal 1990 sales increased 24 percent principally due to the inclusion of sales from Pan Am World Services and from additional volume at its new automotive seating plants.

As forecast by the company last October, operating income only approximated the amount in the quarter one year ago and net income declined.

James H. Keyes, president and chief executive officer, said the factors that caused the gain in sales did not add income to the company's consolidated results for the 1990 quarter. He explained that income from World Services was offset by purchase accounting expenses associated with its acquisition in May 1989 while Johnson Controls' automotive plants typically produce little profit during start-up periods.

For the three months ended Dec. 31, 1989, Johnson Controls had sales of $1.1 billion, up 24 percent from $860 million. Operating income totalled $56.4 million vs. $56.8 million in the first quarter of fiscal 1989. Net income declined 8 percent to $28.3 million from $30.8 million, primarily due to gains on sales of foreign assets in the 1989 first quarter.

Primary earnings per share were 67 cents, down from 84 cents, while fully diluted earnings per share declined to 63 cents from 80 cents a year ago.

Controls sales and operating income during the 1990 quarter were sharply higher. While the gain in sales primarily reflects the inclusion of World Services sales to the government market, Johnson Controls said that sales of both installed systems and services to the non-residential building market were substantially higher.

The company also said that the increase in operating income stemmed from improvements in its systems and services business. Orders from the nonresidential market were up in the 1990 quarter over the same three months of fiscal 1989.

The company's automotive business posted a strong sales gain, but lower income in the 1990 quarter. The company explained that the additional sales were from new plants in Europe and the United States which have yet to achieve normal operating profits. In addition, lower U.S. vehicle production reduced sales from the company's established, more profitable automotive plants.

Battery sales, unit shipments and operating income were about level with the comparable prior year results. The company said that regional frigid temperatures in late December caused high demand for automotive replacement batteries at the retail sales level, however, the impact on Johnson Controls' shipments is expected in January 1990.

Sales and operating income from the company's plastics business were also on a par with 1989 results. Lower prices, reflecting lower resin costs, minimized the effect of slightly increased shipments of plastic soft drink containers.

#90017b0689 01/17/1990 ~Business Wire

HOUSTON (JAN. 17) BUSINESS WIRE - Kent Electronics Corp. (ASE:KEC) announced that its subsidiary, Kent Electronics Corporation-West Wednesday completed the asset purchase of Pyramid Electronics Supply Inc. of Santa Clara, Calif.

At the same time, Kent announced that third quarter sales and earnings increased for the fifteenth consecutive comparative quarter since the company's initial public offering in June 1986.

The Pyramid asset purchase was made in exchange for 166,667 shares of Kent

Electronics' common stock and the assumption of certain Pyramid liabilities. The value of the transaction is approximately $7 million. Pyramid's revenues were $16.4 million for the fiscal year ended March 31, 1989.

L.P. David Orosz, president of Pyramid, and his management team will continue to direct operations.

The initial purchase agreement that was signed in May 1989 included provision for a cooperative working arrangement between the two companies prior to Kent completing the purchase. This agreement has facilitated the orderly transition and efficient integration of the Kent and Pyramid organizations and operations during the past seven months.

As a combined entity, Kent and Pyramid have industrial electronics distribution operations in Houston, Dallas, Austin, Los Angeles, Santa Clara, San Diego, Seattle and Chicago. Custom contract manufacturing plants are strategically located near original equipment manufacturers in Houston, Dallas, Los Angeles and Santa Clara.

Kent Electronics reported record sales and earnings for the third quarter ended Dec. 30, 1989. Sales for the period this year were $11,582,000 which resulted in net earnings of $726,000 or 19 cents per share. This compares favorably to sales of $9,616,000 and net earnings of $616,000 or 17 cents per share for the third quarter last year.

For the nine months ended Dec. 30, 1989, sales were $33,275,000 which resulted in net earnings of $2,099,000. These results reflect increases of 27 percent in sales and 39 percent in net earnings over sales of $26,183,000 and net earnings of $1,510,000 the previous year.

Earnings per share of 56 cents for the nine months this year compared to 50 cents the previous year do not reflect as large a percentage increase as net earnings because of additional shares outstanding as the result of a public offering of common stock that was completed in September 1988.

#90017b0707 01/17/1990 ~Business Wire

HUNTSVILLE, AL (JAN. 17) BUSINESS WIRE - First AmFed Corp. (NASDAQ:FAMF) Wednesday reported operating results for the first quarter ended Dec. 31, 1989.

The company's net interest income increased $354,000, or 14 percent amounting to $2,900,000 and $2,546,000 for the three months ended Dec. 31, 1989, and 1988, respectively. Total interest income increased 8 percent, or $873,000 for the three months ended Dec. 31, 1989, vs. the prior year quarter, amounting to $11,409,000 and $10,536,000, respectively.

Total interest expense was $8,509,000 and $7,990,000 for the like comparable periods, respectively.

Net income for the quarter ended Dec. 31, 1989, was $597,000 vs. $773,000 for the like quarter last year. Net income for the current quarter was negatively impacted due to the expenses associated with the merger, on Oct. 27, 1989, of Fayetteville First Federal Savings and Loan Association in Fayetteville, Tenn., (''Fayetteville'') and the deferred costs that had to be recognized this quarter as a result of the Office of Thrift Supervision's denial of the acquisition of First Federal Savings Bank in Decatur, Ala. (''Decatur''),

Total expenses from the merger and denied acquisition were $519,000, or $343,000 after tax. Of the $519,000, $448,000 was associated with the Fayetteville merger and $71,000 with Decatur. Earnings per share for the three months ended Dec. 31, 1989 was 33 cents. As a result of the merger earnings per share data is not presented for the prior period as it is not considered meaningful.

Total income for the company increased $865,000 amounting to $11,882,000 for the first quarter ended Dec. 31, 1989, as compared to $11,017,000 for the previous quarter a year ago. Included in total income for the first quarters ended Dec. 31, 1989, and 1988, was $243,000 and $268,000, respectively, from gain on sale of investments.

Morris Anderson, chairman of the board and chief executive officer, commented: ''We are pleased with the completed merger of Fayetteville this quarter and, at the same time, disappointed over the OTS denial of

the proposed Decatur acquisition. The Fayetteville merger has provided the company with access to new market areas and two additional branch offices located in Fayetteville, Tenn.''

KING OF PRUSSIA, PA (JAN. 17) BUSINESS WIRE - Envirosafe Services Inc. (NASDAQ: ENVI) announced Wednesday that it has been advised by EnviroSource Inc. (formerly NEOAX, INC.) that EnviroSource intends to seek to increase its holdings of Envirosafe (''ESI'') common stock to between 80 percent and 100 percent.

EnviroSource currently owns 62.5 percent of ESI's common stock.

EnviroSource stated that in the near future it intends to initiate negotiations with ESI's board of directors to structure a tax-free transaction in which holders of ESI's common stock would receive shares of EnviroSource common stock.

The proposed transaction, which EnviroSource said it would like to complete by the end of the second quarter, will be dependent upon market conditions and satisfaction of certain other conditions, including approval by ESI's board of directors.

C. Edward Ashby Jr., ESI's president and chief executive officer, said, ''EnviroSource has told us that it believes the transaction it is contemplating will be beneficial to both companies and to their respective stockholders. At this time, however, no proposal has been made to ESI and we are therefore not in a position to evaluate the merits of any tranaction.

''Once EnvirSource actually proposes a transaction, ESI's board of directors will determine the best course of action in light of its duties to all of ESI's stockholders.''

Envirosafe provides both off-site disposal and on site remediation services. The company owns major hazardous waste disposal sites in Oregon Ohio and near Grand View, Idaho -- two of the 23 such sites authorized under federal law.

NEW ORLEANS (JAN. 17) BUSINESS WIRE - Freeport-McMoRan Energy Partners, Ltd. (NYSE: FMP), an affiliate of Freeport-McMoRan Inc. (NYSE: FTX), announced Wednesday that, as operator, it has discovered natural gas offshore Louisiana in the Gulf of Mexico at its 22,411-acre Mississippi Canyon Block 321 unit, which comprises Mississippi Canyon Blocks 320, 321, 322, 323, and 365, located approximately 90 miles southeast of New Orleans.

The OCS-G 5841 No. 1 well was drilled to a measured depth of 10,268 feet on Mississippi Canyon Block 365 and encountered 128 feet of net gas pay in two sands. Seven additional expendable wells were drilled to define the reservoirs in anticipation of development activity.

An innovative four-leg, skirt pile platform with eight slots, designed for a water depth of 625 feet, is scheduled to be installed during the third quarter of 1991. Platform and development costs for this project are estimated to be $63 million. Natural gas production is anticipated to begin in the second quarter of 1992.

Working interest in the Mississippi Canyon Block 321 unit is owned by FMP through its operating affiliate, FMP Operating Company, a Limited Partnership, 66.7 percent; Continental Land & Fur Co., Inc. 20.0 percent; and others, 13.3 percent.

#90017b0710 01/17/1990 ~Business Wire
RICHARDSON, TX (JAN. 17) BUSINESS WIRE - Ericsson has introduced a new family of systems for computerized management and operations support of public telecommunications networks.

Called TMOS (for Telecommunications Management and Operations Support), it will provide Telecom Administrations with single, integrated solutions for all management operations in fixed and mobile networks.

To date there are five application systems in TMOS, each aimed at a specific area of the telecommunications infrastructure. They cover the switching network; the transport network, including digital cross-connect (DCC) systems; Intelligent Network Services; business such as virtual private networks and cellular mobile telephone networks.

The systems have been designed to conform to the emerging ANSI/CCITT Telecommunication Management Network (TMN) standards for operations support systems to enable them to be used to control equipment in multi-vendor networks as well as to cooperate with non-Ericsson support systems.

They also conform to the X/Open Common Applications Environment (CAE), which sets down standards for software portability across different computer systems.

This will allow customers to source the hardware on which to run TMOS applications from a wide variety of manufacturers, and to dimension systems according to their needs. The systems are run on a UNIX environment, assuring access to development support.

"TMOS is destined to be one of Ericsson's core products for public telecommunications in the 1990s," said Karl Alsmar, vice president, Ericsson product development.

"We foresee that operations support systems will become more and more important, as networks become more complex and carry more services. These systems will be used to create revenue-generating opportunities, as well as cost-savings.

"TMOS will enable network operators to maintain high availability and quality of service in their networks and respond quickly to the demand for new services from the business community. As a result, operators will be able to maintain competitive advantages in a deregulated environment."

Although the first orders were received from Finland and Italy, Ericsson emphasizes the importance of the order from Illinois Bell, a unit of Ameritech, the Chicago-based parent of the telephone companies serving Illinois, Indiana, Michigan, Ohio, and Wisconsin.

#90017b0711 01/17/1990 ~Business Wire

MIAMI (JAN. 17) BUSINESS WIRE - FDP Corp. Wednesday announced financial results for its fiscal year ended Nov. 30, 1989.

Total revenue for the year was $14,651,497 compared to $14,012,385 for fiscal 1988. The company reported a net loss for fiscal 1989 of $100,201 or three cents per share, vs. net income of $831,315, or 23 cents per share, in fiscal 1988.

The 1988 results reflected a one-time tax credit of $324,191, or nine

cents per share, resulting from a change in accounting for income taxes.

For the three months ended Nov. 30, 1989 total revenue was $3,688,693, compared to $4,059,453 in the comparable 1988 period. The three months resulted in a net loss of $53,835, or two cents per share, vs. a profit of $260,950, or seven cents per share in the 1988 quarter.

The financial condition remains exceedingly strong with a current ratio of more than 8.0:1, cash and marketable securities of $13,114,823, no debt and stockholder's equity of $16,667,717.

Michael C. Goldberg, chairman and chief executive officer, noted that 1990 prospects look strong. Several contracts have recently been signed with major insurance companies in the FDP/MAAS, FDP/CLAS and Advanced Underwriting departments which provide visibility as to increasing software revenue in fiscal 1990.

With a reduced number of outstanding shares, no capitalized software development costs and the personnel already in place to support added clientele, FDP expects to begin seeing the positive earnings leverage from increased revenue in 1990.

Software related revenue in 1989 was $8,085,600, an increase of 487,900 from 1988. Timeshare revenue was $4,582,000 in 1989, vs. $5,106,600 in 1988. Sales and Equipment were $1,983,900 an increase of $675,700 from 1988.

Goldberg also noted that as a result of a continued share repurchase program, shares outstanding at the end of the year dropped to 3,310,390, a decrease from the 3,448,942 outstanding at the end of 1988. This was accomplished while cash and marketable securities remained over $13 million at fiscal year end 1989.

Miami-based FDP Corp. develops and markets applications software systems and services for the marketing and administration of life insurance and pension products.

#90017b0713 01/17/1990 ~Business Wire

BURLINGTON, VT (JAN. 17) BUSINESS WIRE - John A. Cobb, president of Eastern Bancorp (NASDAQ:VFBK), has announced earnings for the company's first fiscal quarter of 1990.

Net income for the quarter ending Dec. 31, 1989, was $1,022,000, or 40

cents per share, as compared to $1,010,000, or 38 cents per share, for the same quarter last year.

Cobb stated, ''What is impressive about this quarter's results is that it is all core earnings, whereas, last year's results included $188,000 in gains from the sale of debt and $216,000 in investment sale gains.'' Net interest income for the quarter was $4.9 million as compared to $3.6 million for the same quarter last year.

The company's non-performing assets at Dec. 31, 1989, were $11.3 million, relatively unchanged since Sept. 30, 1989. The company provided $115,000 for its loan loss reserve which totaled $2.7 million at Dec. 31, 1989. Assets of the company at Dec. 31, 1989, were $617.3 million.

Eastern Bancorp's directors declared a cash dividend to shareholders of 12 cents to owners of record on Jan. 24, 1990, to be paid on Feb. 7, 1990. This is the 10th consecutive quarterly dividend paid by the company and represents a 1 cent increase over the last quarterly dividend.

#90017b0720 01/17/1990 ~Business Wire

ADA, OK. (JAN. 16) BUSINESS WIRE - Pre-Paid Legal Services Inc. (ASE:PPD) an Oklahoma corporation which merchandises, in 34 states, a contract enabling individuals to prepay the cost of certain legal services, reported the successful completion during the 1989 fourth quarter of the restructuring of $6.1 million in short-term debt.

The restructuring included the conversion of a $4 million note payable to a subsidiary of ICH Corp., originally due on Dec. 31, 1989 into an amortized five year payout at a rate of 14 percent with the final maturity extended to Dec. 31, 1994.

The company also reduced $2.1 million in 10-1/2 percent subordinated debentures due Nov. 15, 1989 by 25 percent and renewed the balance at a floating rate of 3.5 percent over national prime for terms of up to two years, of which approximately $1 million is due May 15, 1990.

The company issued warrants to purchase 808,500 shares of common stock at an average exercise price of 56 cents per share expiring in 1993 and 1995 in connection with these restructures.

In addition to the short term debt restructure, the company's board of directors has approved a proposal to reacquire contracts associated with certain outstanding financing transactions orginiated in 1984, 1985 and

1986. This includes the proposed repurchase of the contracts for approximately $3.2 million of which $2.7 million will be repaid over five years. Consummation of this proposed reacquisition is subject to the approval of the individual holders of these financing transactions.

The net effect of all of these transactions is that the company's debt is expected to be more manageable based upon the future predicted cash flow. The company continues to pursue the possibility of additional debt or equity to fund growth.

The company anticipates that these actions, along with other actions expected in connection with the company's year-end financial review, will result in significant non-operating, non-cash losses for financial reporting purposes for the accounting period ending Dec. 31, 1989 and will significantly increase the company's anticipated net loss for the year.

''In doing this, we have cleared the way for more predictable and profitable financial management in 1990 and beyond,'' according to Harland C. Stonecipher, chief executive officer.

Stonecipher, further emphasized: ''The company has been plagued with questions concerning our capability to deal with the short term debt for several years. It is gratifying to know that we have nearly accomplished both our primary objectives regarding internal reorganization and financial reorganization. In meeting these challenges, we have set the stage for the return of growth and profit.''

For more information, contact Melanie Lawson at the Corporate offices, 1-800-654-7757, or write P.O. Box 145, Ada, Okla. 74820.

#90017b0721 01/17/1990 ~Business Wire

PONCE, PUERTO RICO (JAN. 16) BUSINESS WIRE - Ponce Federal Bank, F.S.B. (NASDAQ: PFBS) Wednesday reported a net profit for the fourth quarter period ended Dec. 31, 1989.

The net profit in the quarter however, together with the net profit earned in the 1989 third quarter period, were insufficient to offset the net losses reported in the first half of the year when loan loss reserves of $10.5 million were established.

The loan loss reserve accrual in the second half of the year was $2.1 million of which approximately $1.3 was reserved in the fourth quarter.

The reduced level of loan loss reserve accrual in the second half is largely the result of a reduction in the level of loan delinquencies from $104 million at March 31, to $94 million at June 30 and $71 million at year end.

Of the $71 million year end figure, fully $24 million represented either loans 90 percent guaranteed by the Farmer's Home Administration ($19 million) or fully guaranteed by FHA (HUD) or with cash collateral ($5.3 million combined).

Before loan loss reserves, securities transactions and other charges, the bank earned an operating profit in each of the four quarters of 1989.

For the fiscal 1989 fourth quarter, the bank reported net income of $1,112,004 or 22 cents per share, vs. a restated net loss of $1,338,313 or 26 cents per share reported in the comparable period in the prior year.

For the year ended Dec. 31, 1989, Ponce Federal reported a net loss of $4,482,017 or 87 cents per share, compared to net income of $1,641,158 or 32 cents per share in 1988.

Per share results are based on 5,160,184 and 5,159,135 weighted average shares outstanding in the 1989 and 1988 fourth quarter periods, respectively and 5,160,184 and 5,200,434 weighted average shares outstanding in the respective fiscal 1989 and 1988 periods.

These figures, as well as per share results, have been adjusted to reflect the effect of a 5 percent stock dividend declared Dec. 11, 1989.

The bank announced that its capital position at Dec. 31, 1989 is well within the requirements issued by the Treasury Department's Office of Thrift Supervision (OTS). The new OTS standards, which went into effect Dec. 7, established minimum requirements for tangible, core and risk-based capital at savings and loan institutions.

Based on the bank's capital position at Dec. 31, tangible capital and core capital ratios were 4.90 percent and the bank's risk-based ratio was 8.33 percent all well within the guidelines.

Ponce Federal Bank, F.S.B., the third largest thrift insitution in the Commonwealth of Puerto Rico, is a federally chartered, full-service financial institution headquartered in the Southern coastal City of Ponce, Puerto Rico.

The bank maintains an island-wide network of 25 branches and executive offices in Ponce as well as Hato Rey, the financial center of metropolitan San Juan.

LISLE, IL (JAN. 17) BUSINESS WIRE - Molex Inc., (OTC: MOLX), a 51 year old international electronic connector company, Wednesday reported sales of $146.4 million for its fiscal second quarter ending Dec. 31, 1989, compared to last year's $144.0 million.

Net earnings of $14.2 million also were recorded for the quarter, compared to $8.4 million for the previous year. The previous year's figure gives full effect to Molex's one-time patent suit settlement amounting to $10 million announced in October, 1988, and to another one-time charge of $1 million in connection with the company's Japanese expansion program. These expenditures reduced net earnings by $6.5 million, or 26 cents per share, or the second quarter and first six months last year.

Molex's six month sales for the current fiscal year were $289.5 million compared to $282.3 million for the same period last year. Net earnings for the first half of fiscal year '90 were $28.9 million, up from $24.1 million last year.

Earnings per share for the second quarter were 57 cents, compared to 33 cents for the same period last year. For the first six months, earnings were $1.15 cents compared to 95 cents per share last year.

Currency fluctuations accounted for a negative impact of $6.2 million in sales and $870,000 in earnings for the second quarter, and $8.5 million in sales and $1 million in earnings for the first six months this year.

Last year the company recorded a favorable impact in sales of $3.3 million for the quarter and $8 million for the six months period. Earnings were favorably affected by $537,000 for the quarter and $1.4 million for the six months.

Molex's backlog was $103.2 million as of Dec. 31, compared to $107 million for the same period last year. "A very flat market and broad currency fluctuations were factors in our second quarter results," says Molex chairman John H. Krehbiel Sr.

"Within the next two quarters we look for a modest increase in sales and profits in spite of the flat markets. We are going forward with a capital equipment expenditure of approximately $80 million and an R&D program of

approximately $30 million," Krehbiel said.

Molex designs and manufactures electronic connectors, flat cable, switches and associated application tooling. Based in Lisle, Ill. Molex employs 6,400 people at 46 plants in 20 countries.

#90017b0729 01/17/1990 ~Business Wire

EDISON, NJ (JAN. 17) BUSINESS WIRE - Krauszer's Food Stores has appointed Renee A. Barnstone as vice president and chief financial officer. The announcement was made Wednesday at the convenience store chain's Edison headquarters.

As CFO, Barnstone will be responsible for negotiating vendor contracts and overseeing the daily financial operations of the company. She will also play a major role in maintaining relations with the managers of Krauszer's 165 stores. Prior to joining Krauszer's, Barnstone was corporate finance officer of Consolidated Insurance Group at their London headquarters.

Barnstone commented that her first priority was to implement improved control systems in Krauszer's back office to provide the firm's management with more accurate projections and forecasts and to help better evaluate the performnaces of the individual stores and of the company as a whole.

Since Andy Kerstein joined Krauszer's as president, "there's been a renewed emphasis on recognizing and rewarding excellence at all levels of the organization," she said, "part of my mission is to ensure he has accurate tools to help him do that."

She also emphasized that she brings a customer service focus to her job. "But it's a little different from what people expect," she explained. "I see (finance's) customers as the store managers. They're the ones out there every day. Our job is to help them every way we can." She went on to describe her commitment to an open door policy toward all of Krauszer's managers.

"And that goes for our vendors too," she continued, "I intend very much to be a hands on CFO. I want to establish regular and frequent contact with our vendors. That way they'll know what works and what doesn't for us in terms of products and programs. And that open communication will mean greater success for all of us - Krauszer's, our managers, and our vendors."

HAWTHORNE, NY (JAN. 17) BUSINESS WIRE - The board of directors of Peoples Westchester Savings Bank (NASDAQ:PWSB) Tuesday declared a regular quarterly cash dividend of 12 cents per common share, payable on Feb. 15, 1990 to shareholders of record on Feb. 1.

''The bank has paid a regular quarterly cash dividend for six consecutive quarters,'' stated Bank Chairman, President, and Chief Executive Officer William F. Olson, ''an indication of the strong capital position enjoyed by the bank.''

Olson added that 1989 earnings per share are expected to be within the $1.75 to $2 range estimated by industry analyts, and that the bank's ratio of nonperforming assets to total assets is not expected to exceed the 1.15 percent level reported at Sept. 30, 1989. The bank plans to release year-end and fourth quarter earnings on or about January 29.

Peoples Westchester is a $1.7 billion FDIC-insured, New York State-chartered community bank with 27 offices serving those who live and work in Westchester County.

NASHVILLE, TN (JAN. 17) BUSINESS WIRE - REN Corporation - USA (NASDAQ/NMS:RENL), a Nashville-based provider of kidney dialysis services, Wednesday announced that it has acquired a dialysis clinic in Oklahoma City.

The center is expected to generate annual revenues of over $1 million. The first REN-owned facility in Oklahoma, this acquisition brings to 16 the number of centers owned or managed throughout the Southeast and Southwest.

Dr. Jerome S. Tannenbaum, president and chief executive officer, made the announcement today. He stated: ''This new facility was purchased from Dr. L.O. Laughlin, a highly respected nephrologist. We are pleased to establish a working relationship with Dr. Laughlin and to now own a center in Oklahoma City.''

Dr. Laughlin will serve as medical director of Ren Center - Oklahoma City. Dr. Laughlin, in commenting on the acquisition, said: ''I am very

impressed with the level of patient care provided by REN Corporation. Our mutual goals for treating patients with kidney disease will be greatly enhanced by this collaborative effort.''

In a separate announcement, REN and the Duke University Medical Center stated that they have received approval of a Certificate of Need from the state of North Carolina to open a dialysis facility in Durham, N.C. The proposed 8-station facility will ease the over-burdened dialysis services at Duke University Medical Center. REN presently operates a center outside Durham in Henderson, N.C., in conjunction with Duke University Medical Center.

REN Corporation - USA was founded in 1986 in Nashville. The company's common stock began trading on the NASDAQ National Market System on Nov. 28, 1989, under the Symbol RENL.

NATCHEZ, MS (JAN. 17) BUSINESS WIRE - Callon Consolidated Partners, L.P. (NASDAQ/NMS:CCLPZ) announced Wednesday that a quarterly cash distribution of 15 cents per unit will be paid Feb. 28, 1990, to unitholders of record on Feb. 7, 1990.

The distribution declared today is reduced from the 20 cents per unit paid in each of the five preceding quarters. The reduction results from declines in the partnership's production rates, which outweigh recent oil and gas price increases.

The partnership produces oil and natural gas from domestic onshore properties located primarily in the Gulf Coast region. The partnership's 5.9 million depositary receipts for units of limited partnership interest trade on the NASDAQ National Market System.

AUBURN, MN (JAN. 17) BUSINESS WIRE - Mid Maine Savings Bank announced Wednesday that the board of directos declared a 10 cent dividend to be paid on Feb. 15, 1990 to stockholders of record as of Jan. 31, 1990.

This announcement represents a dividend equal to the amount paid to

stockholders in the fourth quarter of 1989. Ralph L. Hodgkins Jr., president, stated: ''We are very pleased to report that the current dividend represents a 43 percent increase over the dividend paid one year ago. While 1989 proved to be a difficult year for many New England banks, Mid Maine increased its quarterly dividend twice during the year demonstrating both our strength and our commitment to enhanced shareholder value.''

Mid Maine has 1,380,000 shares of common stock outstanding. Its stock is traded on the NASDAQ National Market System under the symbol ''MMSB.''

#90017b0751 01/17/1990 ~Business Wire

SHELTON, CT (JAN. 17) BUSINESS WIRE - Frank J. Kugler Jr., chairman of Northeast Bancorp Inc. and Union Trust Co., announced that the deterioration of loan quality in the fourth quarter of 1989, affected by the widespread decline in the New England economy, prompted the company to increase the provision for possible loan losses by $58 million.

Further reflecting the effects of this sagging New England economy fourth quarter charge-offs grew to $39 million. These adjustments resulted in a doubling of the reserve for possible loan losses to $50 million at yearend 1989 as compared to $25 million year 1988.

As a result of these fourth quarter adjustments, earnings for the year just ended were $632,000, or 8 cents per share as compared to $34,635,000, or $4.39 per share for 1988.

In commenting on these results, Kugler indicated that the conservative lending posture of the bank since 1987, especially in the area of real estate, enabled the bank for the first three quarters of 1989 to avoid the real estate loan problems which have plagued many of the banks in the region since 1988.

Unfortunately the effects of two years of declining real estate values finally impacted businesses tied both directly and indirectly to real estate.

The company's fourth quarter charge-offs reflect this broad based economic decline.

In light of the predictions of a continuation of the current economic conditions in New England through 1990, Kugler expects the company to follow a conservative straight-forward approach to dealing with existing

loan problems in addition to a continued cautious approach to lending during 1990. This special provision will boost reserves to over 2 percent which is intended to act as a cushion during 1990.

Northeast Bancorp Inc. is the parent company of Union Trust Co., NBI Mortgage Investment Corp., UT Finance Ltd. and Fairfield Properties Inc. Union Trust Co. is Connecticut's third largest commercial bank with over 70 offices throughout Connecticut.

NEW YORK (JAN. 17) BUSINESS WIRE - Lotus Development Corp. Wednesday announced Lotus 1-2-3 for Sun, a family of products based on Lotus 1-2-3 Release 3 and optimized for Sun's three computing platforms: the SPARC-based workstations; the Motorola-based Sun-3 line; and the Intel-based Sun386i.

The announcement is the result of a joint development and marketing agreement announced by Lotus and Sun Microsystems Inc. last summer.

Lotus 1-2-3 for Sun is designed for users who want the spreadsheet capabilities of 1-2-3, combined with the power of the Sun workstation. The product integrates 1-2-3's rich user environment with high-performance Sun workstation capabilities, such as distributed network services, multiple window support, multi-tasking, and support for large memory.

With Lotus 1-2-3 for Sun, Lotus and Sun are providing users with a powerful computing platform and the business application software used by millions of professionals today.

''The introduction of Lotus 1-2-3 for Sun is a milestone for both companies and the industry,'' said Jim Manzi, Lotus president and chief executive officer. ''Users who have made the move to Sun workstations and UNIX will have the spreadsheet of choice running on this powerful platform. For Lotus, 1-2-3 for Sun represents a major step in achieving our goal to provide applications software that operates across a wide variety of hardware and operating systems.''

According to Scott McNealy, president and chief executive officer of Sun, important applications like Lotus 1-2-3 designed specifically for Sun workstations signals a major trend for 1990. ''We're entering an era of workgroup computing in which professionals will share information via powerful, low-cost desktop systems like the SPARCstation 1,'' said McNealy. ''The increasing availability of shrink-wrapped UNIX

applications like Lotus 1-2-3 for Sun will spur the rise of networked workstations as a company's principle information source.''

Advanced Spreadsheet Technologies Optimized for Workstation Users

The new Lotus 1-2-3 for Sun includes the advanced spreadsheet capabilities introduced in 1-2-3 Release 3, including data analysis improvements, three-dimensional modeling capabilities, relational database functionality improved graphics and file reservation features. Like 1-2-3 Release 3, Lotus 1-2-3 for Sun will make use of external data access capabilities provided through Lotus' DataLens technology.

''Lotus 1-2-3 and Sun workstations are natural partners for business,'' said Frank Moss, vice president of the Lotus Networked Applications and Systems Division. ''Workstations provide tight integration of computation graphics and networking that perfectly complements 1-2-3's superb analysis, presentation and integration capabilities. Furthermore, 1-2-3 for Sun is a comprehensive application solution that allows networked users to work together efficiently and productively.''

Lotus 1-2-3 for Sun is optimized for the Sun computing platforms, providing users with powerful capabilities available via SunOS, Sun's UNIX operating system, running under the SunView windowing environment. This enables support for distributed network services, multiple window operation, multi-tasking, support for large memory and other workstation features.

Users will be able to view up to 26 spreadsheets at a time, using Lotus 1-2-3 for Sun's three-dimensional perspective mode operating in a SunView window. Lotus 1-2-3 graphs and multiple spreadsheet files can be viewed through separate windows, which can be dynamically re-sized or transformed into icons for easy access.

Users of Lotus 1-2-3 for Sun will be able to scroll through a spreadsheet, while simultaneously performing any mixture of the following: recalculations in the background, executing a macro, displaying a graph and receiving another worksheet file across a network. Users can, thus, become more productive and manage a large flow of applications and data using Lotus 1-2-3 for Sun's multi-tasking environment.

Lotus 1-2-3 for Sun also supports the Sun networked environment, with network security, password protection and locking capabilities at the file level. Users will find the same familiar user interface as 1-2-3 Release 3 running under DOS and OS/2, and full keystroke compatibility. Files and macros are also fully compatible with 1-2-3 Release 3, and users can utilize Sun's industry-standard Network File System (NFS) and PC-NFS to access any file on a network created by previous versions of 1-2-3 such as 1-2-3 Release 2.01, 1-2-3 Release 2.2 and 1-2-3 Release 3.

This compatibility provides users with the ability to share 1-2-3 data, files and macros in a heterogeneous or mixed computing environment, while protecting their investments in applications development and training.

Lotus to Provide DataLens Toolkit for Lotus 1-2-3 for Sun

Lotus also announced that it will produce a DataLens Developer Toolkit for Lotus 1-2-3 for Sun. This product will allow third-party database vendors and corporate programmers to create drivers that enable application users to access a wide variety of external data sources from directly within 1-2-3. Drivers under development for Lotus 1-2-3 for Sun include Sybase, Ingres, Oracle and Unify. The DataLens Developer Toolkit is currently in beta testing and will be available in the second quarter of 1990. Pricing, Availability and Support

Lotus 1-2-3 for Sun is currently in beta testing and will ship in the second quarter of 1990.

Lotus 1-2-3 for Sun is priced at $695 for a Standard Edition, $995 for a Server Edition and $495 for a Node Edition. The Server Edition is designed for installation on a network server, providing an efficient way for users to share software. This edition contains complete Standard Editions, plus network documentation and administration software, which allows the administrator to determine the number of licenses available on the network.

A single Server Edition supports users on all three Sun architectures. The Node Edition provides networked users with an additional license and documentation.

Lotus 1-2-3 for Sun will be available through selected Lotus Authorized Resellers. These currently include Corsoft, Ingram Micro D, MicroAge, Softmart, Softsel Worldwide and Univar. Lotus 1-2-3 for Sun will also be available through Electro Rep, a leading UNIX reseller.

Lotus will supply traditional Lotus hotline support for Lotus 1-2-3 for Sun, including free support for 90 days. Additional enhanced support programs tailored to the needs of workstation users will be announced at first customer shipment.

The Standard Edition of Lotus 1-2-3 for Sun requires a Sun-3, Sun-4 (including the SPARCstation) or a Sun386i workstation running SunOS 4.0 or higher, 4 megabytes of RAM and 5 megabytes of available hard disk space.

Lotus 1-2-3 for Sun is part of the Lotus Spreadsheet Family, and is a central component in Lotus' long-term cross-platform strategy to provide users with common applications and services in heterogeneous computing

environments.

Headquartered in Cambridge, Mass., Lotus Development Corp. is the leading developer of applications software for personal computers and information services delivered on CD-ROM.

Sun Microsystems Inc., headquartered in Mountain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating systems and productivity software.

#90017b0760 01/17/1990 ~Business Wire

JOHNSON CITY, TN (JAN. 17) BUSINESS WIRE - Home Financial Corp. (NASDAQ/NMS:HFET) the holding company for Home Federal Savings and Loan Association of Upper East Tennessee, Wednesday announced operating results for 1989.

Vance W. Cheek, chairman and chief executive officer, noted that the past year was highlighted by steady growth in Home Federal's deposit base and equity position, together with a general improvement in loan originations, particularly in the latter part of the year.

However, higher interest rates in the first quarter of 1989 reduced net interest margins during much of the remainder of the year and resulted in slightly lower earnings for the period. The association's net interest margin at Dec. 31, 1989, had recovered significantly compared with mid-year operations.

Interest income for 1989 rose 11 percent to $70,094,000, compared with $63,283,000 the year before.

Interest expense, however, increased 18 percent to $48,290,000 from $40,770,000 last year and the association added approximately $75,000 more to its general reserves for loan losses in 1989 than it did in 1988. As a result, net interest income for the year declined 4 percent to $21,280,000 from $22,065,000 in 1988.

Net income for the year also was down slightly from 1988, totaling $8,838,000 or $1.98 per share, compared with $9,207,000 or $2.07 per share last year.

For the fourth quarter, net interest income declined approximately 7 percent, largely because of the association's decision to set aside additional general loss reserves, and because of higher costs on deposits compared with the year-earlier period.

Net income for the fourth quarter totaled $1,968,000, or 44 cents per share, or 21 percent below earnings of $2,480,000 or 56 cent per share in the year-earlier period.

During 1989, Home Financial sold 6,780 shares of Federal Home Loan Mortgage Corporation (FHLMC) common stock and 6,044 shares of FHLMC preferred stock, resulting in a pre-tax gain of $934,000. This gain was included in other income for the period; there were no similar gains realized in 1988.

Commenting on the year's operations, Cheek noted that loan originations totaled $106,300,000 in 1989, increasing in each of the three final quarters of the year compared with the previous year. In 1988, total loan originations were $104,700,000.

''Although 1989 began with higher interest rates and an uncertain rate outlook, which dampened the market for new loans and reduced our net interest margins, the latter part of the year saw improved conditions and a commensurate increase in loan originations,'' said Cheek. ''Considering the further declines in interest rates that have occurred recently and the economic strength of our market area, I believe the outlook for loan originations remains strong.''

Cheek also noted that Home Federal increased its total assets during 1989 to $752,053,000 versus $725,942,000 at Dec. 31, 1988. Accompanying the increase in assets were higher savings deposits, which increased steadily throughout the year and stood at $643,791,000 at year's end, and an increase in stockholders' equity to $98,564,000.

Home Federal's core capital at Dec. 31, 1989, was 13.1 percent of total assets while its tangible capital totaled 12.7 percent, both of which far exceeded current and future regulatory requirements under the Financial Institutions Reform, Recovery and Enforcement Act of 1989.

Home Financial Corp. is the holding company for Home Federal Savings and Loan Association of Upper East Tennessee, which is the leading financial institution headquartered in the region. Federally chartered in 1934, the association offers a broad line of lending and financial services through 19 offices strategically located across the Upper East Tennessee area.

PORTSMOUTH, N.H. (JAN. 17) BUSINESS WIRE - Portsmouth Bank Shares Inc., Portsmouth, N.H. (NASDAQ:POBS), the parent holding company for Portsmouth Savings Bank, reported net income for 1989 to be $6,439,000, or $1.62 per share, up 77 percent from $3,648,000, for 1988.

Pre-tax income for 1989 amounted to $9,664,000, of which $5,725,000, resulted from operations and $3,939,000, from security gains. For 1988, pre-tax income equalled $4,996,000, comprised of operating earnings totaling $4,618,000, and security gains of $378,000.

Commenting on the above results of Portsmouth Bank Shares Inc., Robert W. Simpson, chairman, president and chief executive officer noted that ''our income improved dramatically as evidenced by the increase of $1,107,00, or 24 percent in operating earnings for 1989 while maintaining a high-level of asset quality.''

#90017b0768 01/17/1990 ~Business Wire
BIRMINGHAM, AL (JAN. 17) BUSINESS WIRE - Bruno's Inc. (NASDAQ/NMS:BRNO) Wednesday announced record revenues and net income for the second quarter and first half of fiscal 1990.

For the 14 weeks ended Dec. 30, 1989, revenues increased 13 percent to $642,920,000 from revenues of $569,814,000 for the second quarter ended Dec. 31, 1988. Income before an extraordinary item was a record $16,200,000, or 20 cents per share, for the second quarter of fiscal 1990, up 26 percent over income of $12,881,000, or 16 cents per share, for the similar period last year.

The net income comparison after the extraordinary item was $15,232,000, or 19 cents per share, vs. $11,932,000, or 15 cents per share.

The extraordinary item is a write-off of deferred debt acquisition costs and the premium paid on bond redemption. The charge was $949,000, or 1 cents per share for the three- and six-month periods of fiscal 1989 and a charge of $969,000, or 1 cent per share, for the similar periods in fiscal 1990. In addition, net earnings for the first half last year include $3,577,000, or 4 cents per share, related to a change in accounting for income taxes.

For the 26 weeks ended Dec. 30, 1989, revenues increased 13 percent to $1,174,094,000 from revenues of $1,037,176,000 in the first half of fiscal 1989. Income before an extraordinary item and the effect of an accounting change increased 25 percent to $29,006,000, or 36 cents per share, compared with $23,279,000, or 29 cents per share. The net income comparison, including the extraordinary item and the accounting change, was $28,038,000, or 35 cents per share, vs. $25,907,000, or 32 cents per share.

Commenting on the results, Mr. Angelo Bruno, chairman and chief executive officer, said: ''Results for the second quarter and first half reflect consistent growth from all of our major store concepts. Same store sales for the latest three-month period increased 8 percent. During the first half, we opened 11 new stores, five of which were replacements.

''Two stores were closed, giving us a net increase of four stores for the period. An additional 10 to 12 stores are scheduled to open in the last half of this fiscal year,'' Mr. Bruno concluded.

The company also announced a regular quarterly cash dividend of 3-1/2 cents per share, payable Feb. 15, 1990, to shareholders of record as of the close of business on Feb. 1, 1990.

Bruno's Inc. is a leading regional food retailer, operating a total of 225 supermarkets and combination food and drug stores in Alabama, Georgia, Mississippi, Florida and Tennessee. The company's shares trade on the National Market System under the NASDAQ Symbol BRNO.

MIAMI LAKES, FL (JAN. 17) BUSINESS WIRE - Preferred Homecare of America Inc. (NASDAQ: PFRD), has finalized the acquisition of the home infusion therapy division of Professional Home Health Services Inc. (PHHS) of Deerfield Beach, Fla., a physician owned home care company. The purchase price at closing was $1,314,000 consisting of cash, stock, and notes. The letter of intent was signed in August, 1989.

Carlos M. Herrera, president and chief executive officer of Preferred Homecare of America, said "Physicians are the 'driving force' of the home infusion industry. The completion of this acquisition represents Preferred Homecare of America's commitment to our strategy of expansion through the acquisition of physician owned home infusion therapy companies."

Preferred Homecare of America is a hi-tech home infusion company and

provider of pharmaceuticals to subacute care facilities. Preferred Homecare of America currently has offices servicing patients in Miami/Fort Lauderdale, Pasco County, Fort Myers, Fla., the New York/New Jersey metropolitan area and the Washington DC/Maryland/Virginia region.

SALISBURY, NC (JAN. 17) BUSINESS WIRE - Omni Capital Group Inc. (NASDAQ: OCGI) Wednesday announced that its board of directors has declared a cash dividend of 6 cents per share, payable Feb. 9, 1990 to shareholders of record at the close of business on Jan. 26, 1990.

Commenting on the announcement, David B. Jordan, president and chief executive officer of Omni, said: ''This dividend reflects Omni's strong record of growth and expresses our confidence in Omni's prospects for continued prosperity in the future.''

Jordan added: ''The payment of a dividend also demonstrates the strong belief of our board and management that Omni's shareholders should participate directly in the earnings of the company.''

Omni Capital Group Inc. is a multi-thrift holding company headquartered in Salisbury, N.C. with three wholly owned subsidiaries: Home Federal Savings Bank of Salisbury, Citizens Savings, FSB of Concord, and Home Federal Savings Bank of Kings Mountain, N.C.

Home Federal/Salisbury serves Salisbury and the surrounding area through its home office and two full service branch locations, Citizens serves the Kannapolis, Concord and Harrisburg markets through its main office and four full service branches, and Home Federal/Kings Mountain serves Kings Mountain, Bessemer City, and Gastonia through its home office and two full service branch locations.

#90017b0784 01/17/1990 ~Business Wire

NEW YORK (JAN. 16) BUSINESS WIRE - Republic New York Corp., holding company of Republic National Bank of New York and The Williamsburgh Savings Bank, announced Wednesday that the quarterly dividend rate on the corporation's common stock has been increased from 32 cents per share to 33 cents per share commencing with the dividend to be paid on April 1,

1990, to stockholders of record as of March 15, 1990.

The corporation reported that net income was $93.8 million in the fourth quarter of 1989 comapred to $50 million in the same period in 1988. Included in the fourth quarter of 1989 was the previously reported pre-tax gain on the sale of an option to purchase real estate of $51.2 million.

Included in the fourth quarter of 1988 was a gain of $15.1 million related to the sale of new common stock by Safra Republic Holdings S.A., a European bank holding company, in which the corporation holds a 48.6 percent interest and recognition of $20.9 million of cash payments on outstanding Brazilian debt.

For the year ended Dec. 31, 1989 net income was $24 million which inlcuded a provision of $200 million for loan losses in the third quarter related to developing countries debt obligations and the above mentioned gain on the sale of an otion to purchase real estate of $51.2 million. Net income was $169.7 million for the year ended Dec. 31, 1988.

Net income was $2.92 per common share in the fourth quarter of 1989 compared to $1.49 per share last year. For the year ended Dec. 31, 1989 net income was 4 cents per common share compared to $5.01 per share in 1988.

For 1989, the corporation's results include its 48.6 percent investment in Safra Republic Holdings S.A. on an equity accounting basis. In 1988, the results of these subsidiaries were included on a fully consolidated basis prior to the closing of an international offering of shares in October 1988.

Net interest income was $91.4 million and $356.9 million for the fourth quarter and full year 1989, respectively, compared to $123.7 million and $428.2 million in 1988. The fourth quarter decline when compared to the same period in 1988 is primarily due to the effect of recognizing $20.9 million of interest income from Brazilian obligors, whose debt was brought current last year.

On Dec. 18, 1989 the corporation announced that the board of Trustees of The Manhattan Savings Bank had signed an agreement to merge with and into The Williamsburgh Savings Bank, the corporation's savings bank subsidiary.

The merger, which is expected to close in the second quarter of 1990, is subject to the approval of the depositors of Manhattan and certain regulatory authorities.

At Dec. 31, 1989 the corporation's principal subsidiary, Republic National Bank of New York, had deposits of $14.3 billion and capital of $1.5 billion, and the Williamsburgh Savings Bank had deposits of $2.6 billion

and capital of $336 million.

#90017b0788 01/17/1990 ~Business Wire

AUSTIN, TX (JAN. 17) BUSINESS WIRE - The board of directors of Westmark Systems Inc., has approved including Tracor Components among assets of Tracor being considered for sale as part of the overall financial restructuring of Tracor Inc.

Components is a vertically integrated, highly automated manufacturer of fuses and other circuit protection and control devices for the automotive, electrical, and electronics industries. It is composed of Littelfuse Inc., a firm with more than 60 years of experience in the field, acquired by Tracor in 1968. Subsequent acquisitions expanded operations to Europe; Components also operates manufacturing facilities in Singapore and Mexico.

Tracor Components, through Littelfuse, produces more than 5,000 electrical and electromechanical components serving more than 9,000 customers worldwide. Nearly 2 million pieces are produced each day, and the company has achieved a reputation for high reliability and quality.

Components is a leading supplier of automotive fuses in the United States through the sale of its patented autofuse products. Components also recently introduced its patented MaxiFuse products, designed to protect high-current, automotive wiring. Other core businesses are general electronics, including subminiature fuses, and industrial fuses.

Westmark previously announced that it had engaged Merrill Lynch Capital Markets to represent it in the sale of certain Tracor businesses. The Westmark Board has expanded Merrill Lynch's engagement to include Tracor Components. Proceeds from such sales will be used to reduce debt incurred subsequent to Westmark's 1987 acquisition of Tracor.

According to Elvis Mason, Westmark's Interim Chairman, ''The possible sale of Components provides substantial flexibility to Tracor in terms of alternative means by which to achieve an advantageous restructuring of the company.''

Tracor is an international technological products and services company with headquarters in Austin. The company is a leader in the development and production of countermeasures systems and other advanced defense electronics; a significant research and engineering services contractor in sonar, communications, and aviation; a major commercial and government aircraft modification contractor; and a major manufacturer of analytical

instruments and electrical components.

FORT MYERS, FL (JAN. 17) BUSINESS WIRE - First Federal Savings and Loan Association of Fort Myers announced Wednesday that the board of directors declared a quarterly cash dividend of 15 cents per share.

The dividend will be payable Feb. 12 to stockholders of record on Feb. 2.

In a news release dated Jan. 16, First Federal reported net earnings of $2,448,831 or 78 cents per share compared to earnings for the quarter ended Dec. 31, 1988 of $1,344,534 or 43 cents per share. Earnings increased primarily due to a gain on the exchange of a mortgage-backed bond which more than offset a decrease in net interest income.

First Federal's equity as a percentage of total assets at Dec. 31, 1989 was 8.90 percent and the book value per common share was $24.98.

At Dec. 31, 1989 First Federal's assets were $876,086,799. The shares of common stock of the association are traded in the over-the-counter market and quoted through the NASDAQ National Market System under the symbol ''FFMY.''

#90017b0800 01/17/1990 ~Business Wire

ROCHESTER, N.Y. (JAN. 17) BUSINESS WIRE - Vari-Care Inc. (NASDAQ:VCRE) Wednesday announced the ground breaking for the 44-skilled nursing bed addition to its Boulevard Manor Nursing Center, now a 110 bed facility, in Boynton Beach, Fla. The new wing, scheduled to open in the fall of 1990, will bring the total capacity of the facility to 154 beds.

''Boulevard Manor has enjoyed a high occupancy rate and an above average private pay census,'' according to Robert H. Hurlbut, Vari-Care's president, ''which is one of the reasons why we decided to proceed with the new wing. Moreover, Boulevard Manor is located in close proximity to Bethesda Memorial Hospital, easing patient transfer from acute care.''

The construction of the new addition is concurrent with the refurbishment and redecoration of the Boulevard Manor's public areas and resident rooms.

The new wing at Boulevard Manor is part of Vari-Care's expansion program underway in Florida where ''The Renaissance,'' a new 120 bed facility now under construction in Naples, is likewise scheduled to open in the fall of this year. Over time, we believe that new patient revenues combined with economies of scale should more than offset the initial start-up costs and negative near-term impact on the earnings of Vari-Care's overall Florida operations.

Vari-Care Inc. provides a full range of recuperative and healthcare services including skilled nursing, intermediate and personal care, retirement apartments, meals-on-wheels and home health care. The Company operates 24 long-term healthcare facilities in Alabama, Arizona, Florida and Texas with a capacity of 2,585 residents and employs approximately 2,000 full and part-time personnel. In addition, the company operates a 68-unit retirement apartment complex in Texas.

#90017b0807 01/17/1990 ~Business Wire

FORT MYERS, FL (JAN. 17) BUSINESS WIRE - The Board of Directors of First Federal Savings and Loan Association of Fort Myers Wednesday approved a special cash dividend of 25 cents to stockholders payable on Monday, Feb. 26 to stockholders of record on Friday, Feb. 16.

W. Thomas Howard, chairman of the board and president, stated that the quarterly earnings for the first quarter of fiscal year 1990 included a non-recurring gain in the amount of $1,480,000 as the result of an exchange of a mortgage-backed bond.

After reviewing the financial position of the Association, its anticipated earnings for fiscal year 1990 and its capital position, the Board declared the special cash dividend of 25 cents to stockholders.

This dividend is in addition to the regular 15 cents per share cash dividend previously announced by the Board for the quarter ended Dec. 31, 1989. The regular quarterly dividend will be payable on Monday, Feb. 12 to stockholders of record on Feb. 2.

First Federal, serving Southwest Florida through its 24 offices, reported assets at Dec. 31, 1989 of $876.1 million. The shares of common stock of

the Association are traded in the over-the-counter market and quoted through the NASDAQ National Market System under the symbol ''FFMY.''

#90017b0808 01/17/1990 ~Business Wire

CHICAGO (JAN. 17) BUSINESS WIRE - Ameritech Wednesday reported results for its sixth consecutive year of growth.

Net income for the year ended Dec. 31 was $1,238.2 million, compared with $1,237.4 million in 1988. Earnings per share for the year were $4.59, an increase of .9 percent over the $4.55 in 1988, on 269.7 million average common shares outstanding. When adjusted for the net gain on the sale of operations divested in 1988, net income and earnings per share increased 2.9 percent and 3.8 percent, respectively.

Revenues for the year were $10,211.3 million, compared with $9,903.3 million in 1988, a 3.1 percent increase. The revenue growth reflects an increase of 430,000 Ameritech Bell company customer lines, up 2.8 percent over the prior year, to 15,899,000 lines -- the company's largest annual increase ever.

''This past year saw increased calling volumes in our regulated business and continued healthy growth in our unregulated businesses,'' said Ameritech Chairman and Chief Executive Officer William L. Weiss.

Revenues from the Ameritech Enterprise Group rose 19 percent in 1989, due largely to record growth of cellular lines and increased revenues from directory publishing. Ameritech Mobile Communications' cellular lines increased by 65 percent, to nearly 242,000 lines.

Expenses for the year rose 3.7 percent, due largely to business growth and one-time, pre-tax charges of approximately $40 million related to signing bonuses in conjunction with union contract settlements reached during the year.

Return to equity for 1989 was 15.8 percent and return on capital was 11.9 percent, compared with 15.8 percent and 12.0 percent, respectively, for 1988.

Net income for the fourth quarter ended Dec. 31 increased 7.1 percent, to $331.7 million, compared with $309.7 million for the same period a year ago.

Earnings per share rose 6.1 percent to $1.22 for the quarter, compared

with $1.15 for the fourth quarter of 1988. Revenues were $2,603.4 million compared with $2,504.4 million, an increase of 4.0 percent.

Ameritech is the Chicago-based parent of the Bell companies serving Illinois, Indiana, Michigan, Ohio and Wisconsin, and other information-related companies providing cellular communications, directories, lease financing, voice messaging and audiotex services.

BROOKLYN, NY (JAN. 17) BUSINESS WIRE - Poseidon Pools of America Inc. (NASDAQ:POOL) Wednesday announced that it has named Joeseph A. Cioni as president and chief operating officer.

Presently, Cioni is senior vice president and general manager of Pollio Dairy Products Corp., a subsidiary of Kraft General Foods, a position he has held since 1987. From 1981 to 1987, he was senior vice president of finance and planning at Pollio. Prior to 1981, Cioni held key financial management positions with several companies manufacturing industrual products.

In this position, Cioni will report to George Tassone, chairman of the board and chief executive officer, and will be responsible for all operations of Poseidon and its subsidiaries. He is expected to assume his official position in early February.

Poseidon also Wednesday announced that the transaction pursuant to which it was to acquire a controlling interest in Cascade Industries Inc., was not consummated, since the relevant agreement, by their own terms had expired.

BROOKLYN, NY (JAN. 17) BUSINESS WIRE - In a decision announced last week, the Department of Energy has authorized 18 Northeastern local distribution companies, including Brooklyn Union (NYSE:BU), to import 397.1 MMcf per day of Canadian natural gas which would be transported through the proposed Iroquois Gas Transmission System.

The gas volumes would be sold to the distribution companies through Alberta Northeast Gas Ltd. (ANE), a Canadian corporation formed by utilities in the Northeast to purchase gas from producers in Alberta, Canada.

The DOE decision said that the ''import arrangements will provide long-term, reliable supplies of needed natural gas on market-responsive terms.'' The decision also said that increased natural gas imports ''will enhance the energy mix and diversify the sources of energy supplies available in the Northeast, thereby stimulating yearly competition and promoting energy security.''

Robert B. Catell, president and chief operating officer of Brooklyn Union Gas, hailed the DOE decision as ''another step forward in our goal to build the Iroquois pipeline which would help meet the growing demand for natural gas to meet environmental needs. Gas from Canada will play a crucial role in helping the Northeast meet Federal clean-air standards.''

The 370-mile Iroquois pipeline, which has received preliminary clearance from the Federal Energy Regulatory Commission, is awaiting final approval from that agency. A decision is expected this spring.

Through its subsidiary, North East Transmission Co. Inc., Brooklyn Union has the largest distribution company ownership in the Iroquois project, from which it will receive 70 MMcf of gas, approximately 18 percent of the gas to be transported through the Iroquois pipeline for distribution companies.

LOS ANGELES (JAN. 17) BUSINESS WIRE - The International Movie Group Inc. (NASDAQ: IMGRF) Wednesday announced it's wholly owned subsidiary, The Movie Group, has finalized an agreement comprising 10 feature films with London-based Entertainment Film Distributors (''EFD''), one of the largest independent film distributors in the United Kingdom.

The rights to distribute this 10 picture package is valued in excess of $5 million to Movie Group. These 10 films committed under this agreement have an aggregate value of approximately $35 million. Movie Group Executive Vice President, Mr. Daniel Marquet, said ''He credits the completed agreement with EFD's successful release of ''KICKBOXER'' our latest box office hit in the U.K.

''This agreement is only one in a growing number of output arrangements in which a single distributor represents the Movie Group's product in a given territory.''

Marquet points out that foreign buyers are eager to sign output deals with companies that are able to supply them with a steady flow of quality products. The Movie Group boasts such relationships with distributors in Germany and Scandinavia.

The Movie Group, a wholly owned subsidiary of International Movie Group, which is in the business of foreign distribution of English-language films. The Movie Group distributes independently produced North American and English language films to a total of 52 countries in Europe, Asia and Australia.

PORTLAND, ME (JAN. 17) BUSINESS WIRE - Peoples Heritage Financial Group, Inc. (NASDAQ: PHBK) Wednesday announced record annual earnings of $22,795,000, or $2.70 per share, for the year ended Dec. 31, 1989.

This is a 6.3 percent increase over 1988 earnings of $21,435,000, or $2.54 per share. Net income for the fourth quarter of 1989 was $5,156,000, or 62 cents per share, compared to $5,164,000, or 61 cents per share, for the same period in 1988. The company also repurchased 475,000 shares of its common stock during the fourth quarter of 1989. Commenting on the year-end figures, Weston L. Bonney, chairman and chief executive officer of Peoples Heritage Financial Group, Inc., said, ''The company experienced a healthy, balanced growth throughout the year in all areas. The continued diversification of both our lending and funding portfolios has proven beneficial during the current economic environment.''

Total loans grew $425.8 million of which approximately $172 million was

the result of the acquisition of First Coastal Banks, Inc. last July and seven Casco Northern Bank branches last September. Deposits also increased by $506.4 million of which approximately $287 million was the result of the two acquisitions mentioned above.

Peoples Heritage Financial Group increased loan loss reserves to $19,258,000, or .92 percent, of its total loan portfolio at Dec. 31, 1989. The figure is up substantially from the $11 million, or .66 percent allowance for loan loss reserves reported for the same period last year. Non-performing loans as of Dec. 31, 1989, represented 2.34 percent of outstanding loans. That compares to 1.90 percent in non-performing loans as of Sept. 30, 1989.

During the fourth quarter, the company also wrote down its investment of 293,000 shares in The One Bancorp, headquartered in Portland, Maine, to year-end market value, resulting in a charge against earnings of $3.8 million. In addition, the company wrote down its holding in the convertible, subordinated debentures of The One Bancorp by $1 million.

Total assets at year-end were $2,866,033,000, up 28.3 percent, over the same period in 1988.

Peoples Heritage Financial Group, Inc., Maine's largest locally-based bank holding company, is the parent company for Peoples Heritage Bank which operates 46 banking offices located throughout Maine; Northeast Leasing and Heritage Investment Planning Group, Inc.; Oxford Bank and Trust Co. with five banking offices in western Maine; and First Coastal Banks, Inc., a New Hampshire-based bank holding company with two subsidiaries, First National Bank of Portsmouth and Merchants National Bank, Dover. The two latter banks operate eleven banking offices in the greater Portsmouth/Dover area. All of the subsidiary banks are insured by the FDIC's Bank Insurance Fund.

ATLANTA (JAN. 17) BUSINESS WIRE - Georgia Power Co. announced Wednesday that it plans to redeem on March 9, 1990, an additional $2,500,000 principal amount of its 13-1/8 percent First Mortgage Bonds due 2012.

This redemption will fully satisfy the Annual Improvement Fund requirement as a result of the issuance of a new series of $250,000,000 of variable rate remarketed First Mortgage Bonds in December, 1989.

For the partial redemption of the 13-1/8 percent First Mortgage Bonds,

Chemical Bank, as bond trustee, will select on a random basis the bonds to be redeemed and notify each registered holder on or before Feb. 8, 1990, by first-class mail.

The date of record for the purpose of selected bonds for redemption will be the close of business on Jan. 29, 1990. The books will be closed to transfer through the close of business on Feb. 1, 1990.

Redemption of this bond issue, for Improvement Fund purposes, will be at the special redemption price equal to the principal amount thereof and accrued interest to the date of redemption, without premium.

CHESTNUT HILL, MA (JAN. 17) BUSINESS WIRE - The Neiman Marcus Group Inc. (NYSE:NMG) Wednesday said that earnings in the current quarter ending Feb. 3, 1990 will be better than the company had been anticipating and should be well ahead of a year ago when The Neiman Marcus Group reported net earnings before preferred dividends of $13.8 million, with earnings applicable to common shareholders of 24 cents per share.

Richard A. Smith, chairman and chief executive officer, said, ''Each of our three operating units -- Neiman Marcus, Bergdorf Goodman and Contempo Casuals -- had strong Christmas revenues with good gross margin results, prompting us to raise our expectations for the quarter.

''However, we remain cautious about full year results. In the second half of our previous two fiscal years, after preferred dividends, we have had fairly significant losses applicable to common shareholders. This year, in addition to the seasonal factors, we will have higher interest expense in the second half compared to a year ago as we continue to fund our capital expenditure programs.

''Full year earnings applicable to common shareholders, therefore, will be reduced by second half losses. However, based on the good December results, we now expect our fiscal 1990 net earnings before preferred dividends to show some modest growth from $25.3 million in 1989.

''Earnings applicable to common shareholders were 3 cents per share in 1989.''

The Neiman Marcus Group is a leading specialty retailer. Its three divisions are Neiman Marcus, Bergdorf Goodman, and Contempo Casuals.

#90017b0860 01/17/1990 ~Business Wire
MONTGOMERY, AL (JAN. 17) BUSINESS WIRE - First Alabama Bancshares (NASDAQ/NMS:FABC) Chairman and Chief Executive Officer, W.L. Hurley, announced Wednesday the election of J. Stanley Mackin to president and chief operating officer of that company, effective immediately.

Hurley also announced his retirement from First Alabama effective Aug. 1, 1990, and the board's selection of Mackin to succeed him as chairman and chief executive officer of the company on that date.

''I am tremendously pleased,'' Hurley said, ''to have a man of Stan

Mackin's experience and talent succeed me. His ability to lead First Alabama into the future is apparent to his associates.''

Mackin, chairman of the board and CEO of First Alabama Bank in Birmingham, Ala., since 1986, is a Birmingham native. An Auburn University graduate, he also graduated from the Stonier Graduate School of Banking at Rutgers University and the Commercial Lending School at the University of Oklahoma.

He joined First Alabama in 1966 after eight years as a builder/realtor in Birmingham and Huntsville, Ala. Mackin served as head of the bank's commercial loan function from 1971 to 1983, when he was elected president and CEO of the Birmingham bank.

Mackin is active on the boards of numerous civic organizations. He serves as chairman of the St. Vincent's Hospital board of directors planning committee and as vice-chairman of St. Vincent's Hospital local development corporation.

He is also a board member of the Auburn University Business Advisory Council and a board member and past chairman of the Birmingham Better Business Bureau.

Among other affiliations, he also sits on the boards of Design Alabama Inc., The Greater Birmingham Chamber of Commerce, Operation New Birmingham the All American Bowl, the Executive Council of the Boy Scouts of America and the United Way. Mackin is also incoming president of The Club in Birmingham.

Hurley, who has served as chairman and CEO of First Alabama Bancshares since 1984, retires after 32 years with the company. He began his career with First Alabama as a part-time employee in the bank's Montgomery Trust Department during college.

After a seven-year stint with the U.S. Treasury Department as a national bank examiner, he was hired by First Alabama's Birmingham bank in 1958 to establish its Trust Department. He was named president of the Birmingham bank in 1973.

During his tenure as chairman of First Alabama Bancshares Inc., the company has grown from $3.2 billion in assets at year-end 1983 to $5.5 billion at year-end 1989. First Alabama has consolidated its operations during that time from a 32-bank organization to one, statewide bank.

In 1987, those operations were expanded to the panhandle of Florida where the seven offices of Sunshine Bank operate under the First Alabama umbrella.

Hurley will remain on First Alabama's board of directors following his

retirement as chairman until April 1991.

LONG BEACH, CA (JAN. 17) BUSINESS WIRE - American Airlines Wednesday announced that it has exercised 10 options for the McDonnell Douglas (NYSE:MD) MD-82 twin-jet aircraft.

The 10 newly converted firm orders are all scheduled for delivery in 1992. Once delivered, these new firm orders will bring the number of MD-80s that American operates to 260.

American operates the most MD-80s worldwide, its fleet currently numbering 180. The airline also has 90 options in addition to its 260 firm orders for the popular twin-jet.

The MD-82 has a range of 2,360 statute miles (3,798 km) and is powered by Pratt & Whitney JT8D-217 engines.

To date, 1597 orders and other commitments had been received for the McDonnell Douglas MD-80 family of twin-jets, of which 686 have been delivered.

NEW ORLEANS (JAN. 17) BUSINESS WIRE - Hibernia Corp. (NYSE:HIB) Wednesday announced that net income increased to $61.6 million for 1989, a 16.3 percent increase from net income of $53 million a year earlier.

Earnings per share for the period rose 10.6 percent to $2.30 compared to $2.08 for 1988.

For the three months ended Dec. 31, 1989, net income totalled $13.9 million, a 14.5 percent increase over the $12.1 million earned in the fourth quarter of 1988.

These results represent the 64th consecutive quarter, or 16 years, of increased earnings for Hibernia, where each quarter's profits were higher than the prior comparable quarter. Per share earnings for the fourth quarter were 51 cents, up 10.9 percent from the 46 cents per share earned

in the like period in 1988.

The 10-year and 5-year compound growth rates in earnings per share for Hibernia are 14 percent and 15.1 percent, respectively.

Total assets of the corporation rose to $6.7 billion at year-end 1989, a 14.8 percent increase over assets of $5.8 billion at the end of 1988.

CHARLOTTE, NC (JAN. 17) BUSINESS WIRE - Consolidated sales of $353 million in the first quarter of fiscal 1990 were 13 percent higher than the $312 million reported in the comparable period last year.

Operating profit of $13.5 million increased 28 percent over last year and net income of $5.7 million increased 46 percent. Fully diluted per share earnings were 52 cents (57 cents primary) vs. 37 cents (40 cents primary) last year.

American & Efird sales of $47.9 million in the first quarter of this year increased 12 percent, while operating profit of $4.3 million increased 37 percent. Although the apparel industry normally curtails manufacturing during the holidays, ongoing demand from A&E's strong customer base during this traditionally slow period resulted in sales exceeding expectations.

Harris Teeter sales of $291 million in the first quarter increased 14 percent, while operating profit of $8 million improved 32 percent over the $6.1 million reported last year. Sales in the holiday periods of Thanksgiving and Christmas were particularly strong and resulted in identical store sales increases of 8.8 percent for the quarter.

Jordan Graphics sales increased 3 percent over the comparable period last year, while operating profit in the like period improved 7 percent. Operating profit improvement was attributable to lower paper prices and lower administrative expenses when compared to the like period last year.

Ruddick Investment realized a gain on the disposition of some real estate holdings during the quarter. However, these profits were offset by current operating costs and a provision for possible future losses on investments.

WINDSOR, CT. (JAN. 17) BUSINESS WIRE - ADVO-System Inc. (NASDAQ:ADVO) reported record net income for the first quarter of its fiscal year 1990 (ending Dec. 30, 1989) of $3.7 million of 22 cents per share on revenues of $163.5 million.

For the comparable quarter of fiscal 1989, the company sustained a net loss of $1.6 million or 15 cents per share on revenues of $153.0 million. Revenues for the first quarter of fiscal 1990 represent an increase of $10.5 million, 6.9 percent greater than those reported a year earlier. The first quarter fiscal 1989 loss was affected by several one-time charges including changes in senior management.

Robert ''Kam'' Kamerschen, ADVO's chairman and chief executive officer, said, ''We are very encouraged by our first quarter results which represent a continuation of positive trends as well as a substantiation of our on-going commitment to improve our 'competitive fitness' throughout the organization.

''Key elements of this include our continued control of fixed costs, progress in reducing our under-utilized postage expense, continued

unit/volume growth in pieces per package, and increased productivity in our company's 20 plants. Our favorable results in the first quarter are in accordance with our expectations for this, the second year of our turnaround, and consequently are very gratifying.''

The company also stated that the average number of Shared Mail pieces per package mailed during the first quarter of 6.94 represented a 3.7 percent increase over the prior year. Averaged Shared Mail revenue per thousand packages was $244.08 for the quarter, 4.0 percent above that reported for the first quarter of fiscal 1989.

In addition, during the first quarter 634.6 million packages were mailed, up 2.5 percent over the first quarter fiscal 1989.

ADVO is the nation's largest company specializing in direct mail and direct mail marketing services. The company's brands of Shared Mail, Marriage Mail and Mailbox Values are distributed nationally to over 49 million households weekly. ADVO also processes Solo mailings and offers limited printing and transportation services. It has 20 production facilities and 69 sales offices nationwide. ADVO's corporate headquarters are located at One Univac Lane, Windsor, Conn. 06095.

#90017b0892 01/17/1990 ~Business Wire

WHITE PLAINS, N.Y. (JAN. 17) BUSINESS WIRE - Drew Industries Inc. (NASDAQ: DREW) Wednesday reported results for its first quarter ended Nov. 30, 1989.

Revenues were $28,880,000 vs. $26,481,000 for the comparable period last year. Net loss was $40,000, or 1 cent per share vs. net income of $208,000 or 4 cents per share last year.

Results of the company's ladder division for the past two years were adveresly affected by the high cost of aluminum, the division's primary raw material. Although aluminum prices have declined over the past several months, the current year's first quarter results of operations were charged with the previously purchased higher cost aluminum. Partially offsetting this was the positive effect which the recent decline in aluminum prices had on the company's other operations.

The company's earnings are subject to seasonal fluctuations and operating profits are expected to be more favorable in the second half of the year.

Drew is engaged in the manufacture of a wide variety of home improvement

building products for the contract and do-it-yourself home construction and remodeling industry, consisting of ornamental iron railings and security products, ladders, residential and commerical ventilation products, skylights and rakes and the manufacture of aluminum windows for the manufactured housing industry, and aluminum windows and doors for recreational vehicles.

AUSTIN, TX (JAN. 17) BUSINESS WIRE - HealthVest (ASE:HVT) Wednesday announced that it has received the payment of approximately $3 million due from Healthcare International as a result of the consummation of the sale of the Southern Pines Facility in Charleston, S.C., to Charter Medical Corp.

As previously announced, upon receipt of the non-contingent payment due form Healthcare International in mid-January 1990 under the terms of the Standstill Agreement, HealthVest anticipates paying its lenders the balance of the debt service payments which were due in late December or early January.

HealthVest is a self-administered Real Estate Investment Trust (REIT) that invests in income-producing health care-related properties including psychiatric, general health and rehabilitation hospitals, skilled nursing facilities, retirement centers, medical office buildings, medically oriented fitness centers, and facilities offering other related health care products and services.

SAN JOSE, CA. (JAN. 17) BUSINESS WIRE - Laserscope Wednesday announced revenues of $20.04 million for the year ended Dec. 31, 1989, an increase of 83 percent over revenues of $10.98 million in 1988.

Net income for the year was $1.99 million, or 40 cents per share, compared to $112,000, or 2 cents per share for 1988.

For the fourth quarter, net revenues were $6.26 million, an increase of 92 percent over $3.26 million in the corresponding quarter in 1988. Net income for the fourth quarter was $661,000, or 12 cents per share, compared to $278,000, or 6 cents per share in 1988. For the fourth quarter, gross margin was 56 percent and operating profit margin was 10.2 percent.

The company completed its initial public offering in early December 1989.

Announcing the results for 1989, Herbert Taus, Laserscope president and CEO said, ''We are pleased to report the completion of our sixth successive quarter of increasing profits and our third year of successive increases in quarterly revenues.

''Our profit performance has been made possible by continued market acceptance for our KTP/532 and KTP/YAG surgical laser systems.'' Taus added, ''The growth of our accessory, disposable and service businesses has also been an important factor. These sources of recurring revenues accounted for approximately 18 percent of net revenues in the fourth quarter compared to just 7 percent in the same quarter last year.''

Taus said, ''We are very pleased with the growth in all aspects of our business and in the market in general. The surgical lsaser market is expanding as lasers are accepted for a growing array of applications, including endoscopic procedures. Our unique KTP and KTP/YAG laser systems are very well suited for the shift to outpatient surgery and the emerging endoscopic applications.'' Laserscope's surgical laser systems are the only systems available that provide dual wavelength capability and both fiberoptic and microscopic capabilities.

All of the company's revenue in 1989 was in North America. Taus stated ''To date we have not yet tapped the potential of the overseas markets and we expect to see international revenues begin to develop in 1990.''

Laserscope designs, manufactures and markets an advanced line of KTP/532 and KTP/YAG surgical laser systems and related accessories and disposables. These systems employ the company's proprietary laser technology based on KTP crystalline material and enable the surgeon to cut coagulate and vaporize tissue in a wide variety of applications and procedures.

#90017c0052 01/17/1990 ~Comtex

WASHINGTON (JAN. 17) COMTEX - Avino Mines & Resources Ltd. filed a Form 6-K with the NASD stating on Jan. 10, 1990, its wholly owned subsidiary, Avino Mines & Resources Inc., withdrew from its joint venture agreement with Belmont Resources. The joint venture was on the Wonder silver and gold mine project in Nevada.

Formed in Dec. 1988, the joint venture gave Avino a 50% interest in the Wonder mine, located approximately 110 miles east of Reno.

Avino states that certain contractual requirements arising from underlying agreements were established during a period of considerably higher silver prices and, as a result, were impossible to fulfill. Avino says repeated attempts to reach a compromise with the property owner were unsuccessful. As a result, Avino has returned its entire interest in the project back to Belmont.

WASHINGTON (JAN. 17) COMTEX - Mallon Resources Corp. filed a Form 8-K with the NASD stating effective Dec. 28, 1989, it exchanged 1,100,918 shares of newly issued authorized Series A preferred stock with Bank of America National Trust & Savings Assn. ("BOA") for certain foreign debt held by BOA. Mallon subsequently sold the foreign debt for $6 million.

The Series A preferred stock is convertible into Mallon common stock any

time on a share for share basis at $5.45 per share. If converted, the BOA shares would represent 19.1% of the then outstanding Mallon common stock.

As one of the conditions of the transaction described above, Mr. James H. Frey, a BOA vice president, was elected to the Mallon board of directors.

WASHINGTON (JAN. 17) COMTEX - The 8-K report filed at the SEC shows in Dec., 1989, Hart Industries Inc. dismissed the services of Shelton Kerr & Townsend as its independent public accountant and engaged as a replacement the services of O'Neal & White for the year ended 1989. The change was not made because of disagreements over accounting practices, financial statement disclosures or auditing procedures.

This change was the result of a substantial difference in accounting fee estimates between the two firms: $17,800 to $20,500 for the fiscal 1989 report from Shelton Kerr & Townsend versus $9,000 for the same audit from O'Neal & White.

WASHINGTON (JAN. 17) COMTEX - The 8-K report filed at the SEC shows on Dec. 29, 1989, Ronald E. Scherer and R. David Thomas and other entities controlled by them acquired 8.7 million common shares (86.5% of voting power) of United Magazine Co. In exchange, United Magazine received all 2,900 issued and outstanding shares of Imperial News Co. United Magazine was then obligated, in compliance with the acquisition, to pledge all 2,900 shares of Imperial to Maryland National Corporation to secure indebtedness that these shares formerly secured.

At a shareholders' meeting on Nov. 20, 1989, the shareholders of United Magazine Co. amended United's articles of incorporation to accomodate these activities.

United Magazine's executive office is located at 5131 Post Road, Dublin,

OH 43017 and its telephone number is (614) 792-0777.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 8

ANNOUNCEMENT:

On Jan. 10, 1990, HCS and Colorocs (TICKER: CLRX) entered into a letter agreement amending the stock purchase agreement.

The exercise period for the option will now commence upon the earlier of the date of delivery of the seller's notice to be delivered, if at all, after March 15, 1990 and before Feb. 15, 1991.

The agreement also amends the stock purchase agreement to change from June 30, 1990, to Aug. 15, 1990, the date upon which an all cash offer, without board approval, can be made and the restriction expiration date has been changed from June 30, 1991, to Aug. 15, 1991.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: NONE

NATIONAL BANK OF CANADA OWNS 18,948,444 SHARES (37.70%) OF CAMPEAU CORP (TICKER: CMPA) OF TORONTO, ONTARIO.

ANNOUNCEMENT:

On Jan. 4, the bank became the registered holder of 13.03 million shares, 7-1/2 percent convertible subordinated debentures, and convertible preference shares through the default of a $222 million Cdn. loan to finance the purchase of the debentures and preference shares.

On Jan. 8, two nominees of the bank were elected to Campeau's board.

PURPOSE:

To protect secured loan.

London (JAN. 17) - The British beverages and hotel group Grand Metropolitan Plc confirmed here Wednesday that it has bought into the French cognac company Remy Martin.

GrandMet said its International Distillers + Vintners Ltd. subsidiary had obtained the 49 percent share of Remy Martin held by the Max Cointreau family for some 100 million pounds sterling.

At the same time, the British company obtained a 19 percent share in Max Cointreau, which produces an orange liqueur.

Remy Martin was the last remaining major French cognac producer to remain in family ownership. Together with Martell, it shared second ranking behind Hennessey with sales of some 15 million litres.

#90017d0330 01/17/1990 ~French/German News Agency
WARSAW (JAN. 17) - Prices of fish doubled overnight in Poland and those of some medical supplies rose by up to 900 percent as the government continued to impose realistic prices as part of moves towards a market economy.

Poles looking for new furniture now have to pay up to 15 times the old price, according to the official announcement of the new price levels.

Shelves which used to sell at 200,000 zlotys (21 dollars) were priced Wednesday at three million zlotys (316 dollars) - more than five times the average monthly wage.

Fresh and smoked fish prices doubled, and medicines made from imported materials are to cost between 200 and 900 percent more.

Wednesday's increases followed price rises for alcohol, which went up by an average of 80 percent from Monday.

Stiff price increases for basic foods, coal and fuel came into force on January 1 as the government announced thousands of redundancies in overmanned industries including mining.

The price of domestic coal on which most Poles rely for heating, went up by 700 per cent and those of fuel oil and petrol were doubled. Food prices rose at similar rates.

The government concedes that some 400,000 workers will lose their jobs in the first stage of the switch-over to a liberal economy. Unofficial reports say the number of unemployed will culminate at between two and three million.

On Tuesday, strikes erupted in Poland's southwestern mining region as workers occupied mines to demand higher wages to cope with the crippling price increases, union sources there said.

The strikes were being led by the OPZZ union, close to the communist party. Mineworkers want the equivalent of 21 to 28 dollars in wage hikes per month, or a more than 30 percent increase on their average 60 dollar per month salaries.

Sources said three mines in Lower Silesia were occupied while a fourth in Upper Silesia was completely paralysed.

Workers at a fifth mine went back on the job after Prime Minister Tadeusz Mazowiecki telephoned them personally.

The Polish news agency PAP described the situation in Upper Silesia as tense, as workers at five more mines threatened to join the movement.

#90017d0400 01/17/1990 ~French/German News Agency

LONDON (JAN. 17) - The International Monetary Fund (IMF) has urged tighter monetary and fiscal policy in Britain to combat the inflationary effects of high wage rises, the Daily Telegraph newspaper said Tuesday.

The call came in a confidential IMF document discussed at a high level government strategy meeting at the weekend, the newspaper said.

The IMF call was likely to increase pressure on Chancellor of the Exchequer John Major to deliver a tough budget in March, and could open the way for further rises in interest rates, already at an eight-year high.

The report's principal and most worrying conclusion was that on present trends there was no real prospect of a downturn in inflation, the Telegraph said.

But the IMF expects a rapid improvement in Britain's current account trade position after last year's record 20 billion pound (33 billion dollar) gap.

The IMF report focusses on the preliminary findings of a team of IMF economists which visited Britain for 10 days in December for routine consultations, the Telegraph said.

A more detailed report is due to be presented to the IMF board in March.

NEW DELHI (JAN. 17) - India's trade deficit narrowed by more than a billion dollars in the first six months of fiscal 1989, which began on April 1, because of an export boom, Commerce Minister Arun Nehru said here Wednesday.

The deficit in April-September 1989 was 2.7 billion dollars, down almost 30 per cent from the 3.8 billion dollars notched up in the first six months of the previous year, Mr. Nehru said.

The minister told a meeting of his ministry's senior officials that an export boom coupled with only a marginal rise in imports was responsible for the narrower deficit.

Exports jumped to 10.2 billion dollars in the six month period, up about 18 per cent from 8.7 billion in the same period last year. Imports grew by a modest three percent, from 12.5 to 12.9 billion dollars.

TOKYO (JAN. 17) - Japan's crude steel production reached 107.91 million metric tons in 1989, up 2.1 percent from the previous year, the Japan Iron and Steel Federation reported Wednesday.

A federation official said 1989 production was the highest in nine years

and the fifth highest on record.

It was also the second consecutive year that crude steel production had exceeded 100 million tons.

The official attributed the increase to booming domestic demand.

PRETORIA (JAN. 17) - South Africa's trade surplus for 1989 showed a 31 percent increase on that for 1988, according to preliminary figures released Wednesday by the Commissioner of Customs and Excise.

The surplus for 1989 was 13.4 billion rands (5.3 billion dollars) compared with 10.24 billion rands (4.01 billion dollars) for 1988, including gold exports and oil imports.

South Africa in 1989 imported goods valued at 44.52 billion rands (17.45 billion dollars) and exported goods worth 57.92 billion rands (22.71 billion dollars).

The country's biggest income earners for the year were base metals, which brought in just over nine billion rands (3.52 billion dollars), followed by mineral products, which accounted for 6.5 billion rands (2.5 billion dollars).

ABU DHABI (JAN. 17) - The Gulf emirate of Abu Dhabi plans to develop its onshore oilfields because of strong international demand, the head of the United Arab Emirates' largest oil company said.

Terry Adams, general manager of the Abu Dhabi company for onshore oil operations ADCO, said the period of instability and lack of confidence in the oil market during the 1980s had passed, Al-Bayan newspaper reported Wednesday.

"As we enter the 1990s we see a strong demand for our crude (called Murban) and will witness more stability and success in the coming years," Mr. Adams was quoted as saying.

"There are plans to expand our terminal at Jebel Dhanna and Bab field," he told a company meeting. "The next years will also see large investments to develop all our oilfields."

Mr. Adams said that ADCO, with a concession area of more than 21,000 square kilometres (8,400 sq. miles), was among the Gulf's largest oil companies and could produce up to one million barrels per day.

ADCO is 60 percent owned by the Abu Dhabi National Oil Company (ADNOC), while BP, Shell and Total-CFP each hold stakes of 9.5 percent. Mobil and Exxon each own 4.75 percent of ADCO, and Partex has two percent.

#90017d2600 01/17/1990 ~French/German News Agency

STRASBOURG, FRANCE (JAN. 17) - The European Economic Community's executive on Thursday said it wants to speed up the elimination of chlorofluorocarbon gasses that are suspected of eroding the Earth's ozone layer.

Ministers will be asked to outlaw CFCs, used in refrigeration, foam plastics and electronics, by 1997 -- three years ahead of schedule -- and phase out two lesser-used substances, halon gas and carbon tetrachloride, by the turn of the century.

The European Commission's proposals, which are expected to be endorsed without difficulty, mark the Community's third step against CFCs.

The first agreed to a 50 per cent reduction in the production and consumption of CFCs by 1998, under a agreement reached in Montreal, Canada by 40 countries in 1988.

But in March last year, EEC environment ministers said they wanted a reduction of at least 85 per cent "as soon as posible" and complete elimination by the turn of the century.

This was followed a month later by a voluntary agreement with the European aerosol industry for the elimination of CFC propellants in aerosol cans by

the end of 1990.

The Community produces around 450,000 tons of CFCs every year, out of total world production of 1.1 million tons, according to the Commission.

It contended that European industries would have "sufficient time" to turn to CFC substitutes that are currently under development.

The Commission also proposed a 40-per-cent reduction in the output of methyl chloroform, used in metal cleaning, by the year 2000, pending further studies about a possible elimination after that date.

CFCs, according to scientific opinion, are destroying the ozone layer in the upper atmosphere, triggering an increase in cancer-causing ultraviolet radiation and contributing to the so-called "greenhouse effect" or global warming.

In a statement, the Commission said the proposals underscored Europe's belief in "the strongest possible revision" of the Montreal Protocol, which is scheduled to be reviewed in June.

DAR ES SALAAM (JAN. 17) - The Zanzibar government has approved the formation of a privately-owned airline in an attempt to boost its tourism industry and to solve the perennial transport problem, radio Zanzibar heard here reported Wednesday.

According to the radio, quoting Zanzibar's Investments Facilitating Committee chairman Mohamed Ali Mohamed, the new airline was expected to take off later this year with an initial fleet of three medium-bodied aircraft.

The airline, to be jointly owned by United States-based Jet International and two local businessmen with a capital investment of 4.7 million dollars, will concentrate for the first three years on East African flights before embarking on long-distance routes to the Gulf and Europe, the radio said.

Its initial fleet will consist of three American-manufactured 50-seater EBM planes. Three years later, the company will purchase two DC-9 aircraft for international routes before acquiring two Boeing 707s, six years from now.

Other projects approved by Mr Mohamed's committee included a private air charter firm, Charter Air Sasa limited - a subsidiary of Sasa Enterprises now engaged in the construction of beach resorts in Zanzibar.

#90017d2790 01/17/1990 ~French/German News Agency
TURIN, Italy (JAN. 17) - Italy's leading auto parts maker Gilardini, part of the Fiat group, said Wednesday it had acquired a 50 per cent stake in Spain's leading exhaust producer Situbsa.

Gilardini did not give the value of the deal, but said Situbsa, based in Barcelona, produces 8,000 exhausts and components a day.

It has an annual turnover of some 55 billion lire (44 million dollars).

The acquisition was part of Gilardini's strategy to internationalise its production, it said.

Gilardini acquired Spanish rear view mirror maker Taisa in August.

#90017d2960 01/17/1990 ~French/German News Agency
PARIS (JAN. 17) - The Air France board has approved a plan to take a controlling stake in international airline UTA, while the French national airline's workers committee said Wednesday that it too had approved the plan.

The takeover, which will also give Air France a majority stake in the domestic airline Air Inter, "will give France the means to compete on equal terms with the major European and world airline companies," chairman Bernard Attali said in a statement issued here.

Mr. Attali said he would seek to bring the two airlines together "while respecting the character of the companies concerned".

The companies "will complement and enrich each other," and form "one of the world's leading airlines".

The deal could cost Air France some 4.98 billion francs (889 million dollars) if minority shareholders who hold 17 per cent of UTA's capital agree to sell their shares in addition to the 54.58 per cent promised by UTA parent company Chargeurs SA for 3.8 billion francs, management said earlier.

The UTA deal, announced last Friday, will give Air France near total control of French international regular air services, and most domestic services through Air Inter, in which Air France and UTA between them hold a 70 per cent stake.

No details were available as to how the purchase would be financed, but management said that there would be no moves to seek public financing or to sell Air France shares to the public.

Air France is 99.3 percent state-owned.

The European Commission has said it will investigate the deal to determine if it contravenes European Economic Community regulations on monopolies.

Meanwhile the workers' committee of Air France approved the takeover plan by 17 votes to three, union sources said. Three representatives of the communist-led Confederation Generale de Travail (CGT) union voted against it on the grounds that the plan cost too much.

-30- 2118

#90017d3040 01/17/1990 ~French/German News Agency

PARIS (JAN. 17) - French national airline Air France plans to open an office in the Cambodian capital, which is not currently served by any Western airline, an informed source said here Wednesday.

Discussions have been under way for several months and an Air France delegation is currently in Phnom Penh, the source said.

The airline hopes to open an office in the Cambodian capital, but has no immediate plans to start flights to Phnom Penh, he said.

French international airline UTA had been holding talks since the middle of last year on the possibility of starting flights to Phnom Penh, another informed source said.

But Friday's announcement that Air France was to take a controlling stake in UTA had created a new situation.

Air France has offices in Ho Chi Minh City and Hanoi in Vietnam and in Vientiane in Laos, and has two flights a week to Ho Chi Minh City.

#90017d3070 01/17/1990 ~French/German News Agency

ADDIS ABABA (JAN. 17) - The escalating civil war in northern Ethiopia has displaced more than 1,000 orphans from Tigre province south into Wollo, a state-owned newspaper reported here Wednesday.

The national Daily Addis Zemen said 1,072 orphans aged 7-14 were now being cared for in temporary shelters in Bati, a town 50 kilometres (30 miles) northeast of the Wollo provincial capital of Dessie.

They fled fighting in Tigre province, base of the rebel Tigre People's Liberation Front (TPLF), from orphanages run by the Ethiopian Orthodox Church in the provincial capital of Makale and Wikro, 40 kilometres (25 miles) to the north, the newspaper said.

It did not indicate when the exodus began but it seemed likely this happened after government troops evacuated the Tigrean towns early last year.

The newspaper quoted a coordinator for the orthodox church, formerly based in Makale, Fisseha Getaneh, as saying that out of more than 15,000 children being cared for in Tigre, only 1,072 had arrived safely in Wollo. The fate of the rest was unknown, he said.

According to the account, the orphans had first fled to other church-run orphanages, first in Korem in North Wollo and then to Woldia to the south, but that they had been evacuated a third time to Bati as the RPLF steadily gained ground.

The government has acknowledged the TPLF's lightning push southward and westward in a new offensive since August 31, and blamed the rebels for wanton destruction of infrastructures, plunder and killing.

Unconfirmed reports suggest that fighting is intense in the Dessie area.

#90017d3360 01/17/1990 ~French/German News Agency

KATHMANDU (JAN. 17) - Prime Minister Marich Man Singh Shrestha defended Nepal's partyless political system Wednesday, a day before the outlawed Nepali Congress was to open a conference here to push demands for greater democracy.

"Everyone has the equal right to work in the Panchayat system but the character should be agreeable to the system," Mr. Shrestha said. "Jockeying for posts should also be done in a wholesome manner."

Mr. Shrestha was speaking at the opening of a three-day meeting of district Panchayat leaders, apparently organized to show down a national convention to be held by the Nepali Congress starting Thursday.

Nepal, the world's only Hindu kingdom, is governed through the partyless Panchayat system of directly elected local and national councils while King Birendra wields significant political and executive power.

The Nepali Congress supports a constitutional monarchy and was banned by King Mahendra, father of the present monarch, after he dismissed the country's first parliamentary government in December 1960.

"The people of Nepal have seen the rate of progress made since 1961 and there is absolutely no doubt how this has been achieved," Mr. Shrestha added.

"Democracy will not be helped by those who mislead the people through cheap talk, or misinform them," he said without elaborating.

The Nepali Congress conference will discuss a planned nationwide political movement organised to demand the restoration of "complete democracy" in the Himalayan kingdom including a multi-party system and "full-fledged human rights."

Nepali Congress sources said over 2,000 delegates from districts across Nepal had started arriving in the capital to attend the three-day party convention.

They added that several members of India's ruling National Front alliance arrived late Wednesday.

#90017d3380 01/17/1990 ~French/German News Agency

NICOSIA (JAN. 17) - The Soviet Union has just delivered a shipment of long-range fighter-bombers to Syria and shows no sign of appreciably scaling down its military support for Damascus, regional analysts have said.

The reported departure of a number of Soviet military advisors from Syria does not appear furthermore to signal a deterioration in long-standing relations between the parties, who are linked by a friendship treaty.

Syrian Information Minister Mohammad Salman on Tuesday denied reports in the Kuwaiti newspaper Al-Rai Al-Aam that some 500 Soviet advisors left Syria last month.

"Everything that has been written on that subject is without foundation," he declared.

The number of advisors in Syria, according to one Western military expert, "varies regularly according to the type of weapons in service and the level of training of the forces assigned to use them.

"The departure of some advisors could mean that their job is finished and the Syrian Army is therefore able to operate a certain type of armament."

There are no firm figures on the number of Soviet advisors. The International Institute of Strategic Studies in London put the total at 2,500 in July 1985, which it said rose to 4,000 over the next few years before dropping back to 3,000 in July 1989.

Most instructors and technicians are assigned to the air force, which operates the Soviet-made SS-21 surface-to-surface missile -- the most sophisticated piece of Soviet equipment currently possessed by Syria.

#90017d3630 01/17/1990 ~French/German News Agency

LUSAKA (JAN. 17) - Freed African National Congress leader Walter Sisulu urged South African President Frederik de Klerk Wednesday to move rapidly to create a climate for negotiations over the country's future.

Mr. de Klerk should release jailed ANC leader Nelson Mandela "not next week, not next month, but now", Mr. Sisulu said at a ceremony at the American Centre here to mark the birthday of assassinated U.S. civil

rights leader Martin Luther King.

Mr. Sisulu called on the international community to maintain pressure on the South African government and said it was "a great error and encouragement of apartheid that some have now begun to enter into a manner of intercourse with the Pretoria regime".

He warned that when a future non-racial, democratic South Africa began to establish a network of international relations "we will have to take into account who were the friends and collaborators of apartheid now".

"It is our firm determination that momentum achieved towards ending the apartheid system should be maintained and indeed accelerated", Mr. Sisulu said.

"We say this not out of reckless disregard of the concerns of our adversaries, but precisely because any evil once identified should not be allowed to survive even one day".

As well as releasing Mr. Mandela and all other political prisoners, Mr. de Klerk should unban the ANC, lift the state of emergency and fulfil the other conditions for talks which the guerilla-backed movement set out in its "Harare declaration" blueprint for negotiations, Mr. Sisulu said.

The former secretary-general of the ANC and seven other senior members of the organisation, most of whom were released three months ago after spending more than a quarter of a century in South African jails, arrived in Lusaka on Monday for talks with the ANC's leadership in exile.

They are due to begin a three-day meeting with the national executive committee Thursday at which the issue of negotiations is expected to be high on the agenda.

Earlier Wednesday, the former prisoners met the general membership of the ANC in exile. Mr. Sisulu told them in a brief opening address that South Africa had reached a turning point and that "this decade will not end without freedom".

WINDHOEK (JAN. 17) - Forty-six of the 64 former whites-only schools in Namibia which opened their doors to all races for the first time this term have received applications from non-white children, an official said here Wednesday.

Paul Zah, an acting secretary for the South African caretaker administration, said 248 non-white children had applied for admission to

primary schools, and 265 for entry to high schools.

In each category 77 and 68 pupils had already been accepted, he said, adding that the other candidates would have to meet selection requirements at the schools concerned before the school year started in earnest on January 27.

Mr. Zah said no incidents had been reported at any of the schools where non-white children had already been admitted.

TOKYO, Jan 17 (AFP) - Japan's largest rubber tyre maker, Bridgestone Corp., said it began manufacturing flexible polyurethane foam products in Malaysia Wednesday.

A factory was built in the Shah Alam industrial district in suburban Kuala Lumpur jointly with Singapore-based Armstrong Industries Singapore Pte. Ltd., a Bridgestone spokesman said.

The plant of the joint venture firm, Bridgestone Armstrong Sdn. Bhd., has a production capacity of some 300 tons a month, the company official added.

HONG KONG (JAN. 17) - China's move to buy into local communications concern Hong Kong Telecommunications Ltd. will be finalised in the next two days, banking sources said here Wednesday.

China International Trust and Investment Corp (CITIC), China's overseas investment arm, is to pay 10 billion Hong Kong dollars (1.28 billion U.S.) for a 20 percent stake in Hong Kong Telecom, the biggest listed company on the Hong Kong bourse, the sources said.

Some 70 percent of funding for the deal will be arranged through syndicated loans and all payments are to be made before February, according to one source.

The deal first came into the spotlight last month when Hong Kong Telecom's British parent Cable and Wireless plc revealed negotiations "regarding the possible purchase by CITIC of a significant minority interest" in Hong Kong Telecom.

CITIC's latest move was in line with its earlier decision to upgrade its investment role in this British colony, which reverts to Chinese rule in 1997.

The Beijing-controlled investment vehicle holds a 12.5 percent interest in the territory's flagship carrier, Cathay Pacific Airways Ltd.

TOKYO (JAN. 17) - Japan's biggest bearing maker Nippon Seiko K.K. said Wednesday it would buy all the shares of British counterpart United Precision Industries for 145 million pounds (240 million dollars) by the end of February.

A Japanese company spokesman said the company would get six seats on the board of the British manufacturer, but would not replace the management or the 3,800 workforce.

He also said the Japanese company would use the move to gain a foothold in the European market ahead of its integration in 1992.

The Nottingham-based British manufacturer, the country's largest bearing maker, specializes in special bearings used for aircraft and has a 2.7 percent market share in the European Economic Community (EEC).

It also has a subsidiary in West Germany and one in Switzerland, the Japanese spokesman said.

#90017f1621 01/17/1990 ~United Press International

CHICAGO (JAN. 17) UPI - The grain market made session highs about midday

Wednesday, then drifted from the highs and closed at mixed levels on the Chicago Board of Trade.

The activity was choppy and trading ranges were narrow on the lack of any significant fundamental news. Light selling pressure was attributed to profit-taking, although a slight increase in export business kept a floor under the market.

The Agriculture Department accepted bids for 525,000 tons of wheat to the Soviet Union and nearly 185,000 tons to Mexico under the export bonus program. Mexico and Egypt were in the market for about 350,000 tons of corn.

Wheat turned higher just before the final bell on short-covering and ideas the market was oversold. Prices throughout the soybean complex were virtually unchanged. Corn was lower across the board in lackluster trading.

At the close, corn was off one to 1 1/2, soybeans down 1/4 to two, wheat up 1/2 to 3 1/4 and oats off 2 1/4 to four.

OREM, UT (JAN. 17) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT), announced today record revenues and profits for its third fiscal quarter and nine months ended Dec. 31, 1989.

Robert W. Mendenhall, president and CEO, announced that revenues for the quarter were up 21 percent to $12.2 million with net income of $.7 million or 3 cents per share. For the nine months, net income was $2.1 million or 10 cents per share compared to a loss of $.9 million or 4 cents per share a year ago. Revenues for the nine months were $34.9 million compared to $31.7 million last year.

Mendenhall also noted that the company's cash position improved $1.6 million in the third quarter, resulting in a nine-month increase of nearly $3.5 million. "We are encouraged by our increasing sales volume," he noted. "Our backlog is currently up 44 percent from a year ago."

During the past three months, Wicat has received new orders from Korean Air, the London Underground, McDonnell Douglas, the U.S. Air Force, Chicago Public Schools, New York City Schools and Indian River School District in Florida.

Wicat Systems is a world leader in technology-based training and education solutions, providing products and services to help clients achieve 30 percent to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded in the NASDAQ market under the symbol WCAT.

BUFFALO, NY (JAN. 17) PR NEWSWIRE - Higher fiscal 1990 third quarter sales and dramatically increased earnings were announced today by Jack E. Wagner, Chairman, President and Chief Executive Officer of Comptek Research, Inc. (AMEX: CTK).

Sales of $13,669,000 for the quarter ended December 29, 1989, were up 14 percent from the $12,034,000 level experienced in the prior year. Net earnings in the fiscal 1990 third quarter were $349,000, or $.16 per share in comparison with a net loss of $182,000, or a loss of $.08 per share, reported last year when financial results were adversely affected by an $800,000 pre-tax writedown on certain programs.

"The increase in sales is a positive indication that, during this time of belt-tightening in defense industry, Comptek is able to attract and retain business," said Mr. Wagner.

For the first nine months of the fiscal year, Comptek posted net earnings of $996,000, or $.46 per share, on sales of $35,396,000. Through the third quarter of last year, Comptek achieved sales of $36,271,000, and net earnings of $325,000, or $.15 per share.

Mr. Wagner also announced that contract backlog of $35.7 million is up 10 percent from the $32.4 million level at the start of fiscal year 1990 and up 9 percent from a year ago.

Comptek Research, Inc., with offices in eleven cities in the U.S., develops Command, Control, Communications and Intelligence systems and Electronic Warfare systems primarily for the Department of Defense.

DENVER (JAN. 17) PR NEWSWIRE - Western Gas Resources Inc. (NYSE: WGR), general partner of Western Gas Processors Ltd. (NYSE: WGP), has reached agreement in principle with Atlantic Richfield Co. to acquire ARCO's interest in the Gillette Gas Plant and related gathering system located near Gillette, Wyo.

Western Gas Processors will acquire Arco's interest in the plant.

The transfer is scheduled for March 1, 1990 and upon completion of the transaction, Western will own approximately 90 percent of the facility.

Additionally, Western has learned that El Paso Natural Gas Co. has announced settlement, subject to certain conditions, of a lawsuit with TransAmerica Natural Gas Corp. TransAmerica had perfected a lien on the Midkiff facility and other assets owned by El Paso Natural Gas to secure a judgement against El Paso. While Western is awaiting FERC abandonment approval for its puchase of the Midkiff facility, the settlement of the lawsuit will eliminate the major contingency which could have complicated Western's acquisition of the Midkiff facility.

MALVERN, PA (JAN. 17) PR NEWSWIRE - Systems & Computer Technology Corp. (SCT) (NASDAQ: SCTC), a computer services and applications software company, today announced its unaudited financial results for the first quarter of fiscal 1990, which ended Dec. 31, 1989.

Revenue for the quarter was $11 583,000, essentialy the same as $11,543,000 in the first quarter of fiscal 1989. Excluding a net gain of $1,858,000 from a 1989 litigation settlement, fiscal 1990 first quarter revenues increased 20 percent over 1989 revenues of $9,685,000 and net income more than doubled to $719,000, compared to the prior-year quarter. Income before taxes and extraordinary item (excluding settlements) rose by 144 percent from $319,000 in 1988 to $779,000 in 1989.

Earnings per share in the first quarter, before utilization of net operating loss carryforwards, were $.04 and net income per share was $.06. Net income per share in the 1989 first quarter, excluding the settlement, was $.02.

During the quarter SCT signed $6.2 million in new business and contract renewals. The company's backlog of business under contract declined to $94.3 million at Dec. 31, from $99.2 million at Sept. 30. Included in the quarter's new business was an OnSite services contract with Orangeburg County, S.C., to manage and staff the county's data processing operations. Twenty eight new licenses for SCT's Banner Series of administrative software products were also signed in the first quarter.

"SCT's financial results in the first quarter are in line with our expectations," said Michael J. Emmi, chairman and chief executive officer. "Revenue increased for both our OnSite and software businesses, continuing the growth trend we have been experiencing. We are also pleased that the record of profitability we established in 1989 was maintained into the new fiscal year."

SCT is a leading provider of on-site professional services and applications software for educational institutions and government jurisdictions nationwide. The company is headquartered at 4 Country View Road, Malvern.

CONCORD, CA (JAN. 17) PR NEWSWIRE - Fibreboard Corp. (AMEX: FBD) today announced that the purchase of the Red Bluff, Calif., millwork operations from Louisiana-Pacific Corp. (NYSE: LPX) for approximately $14 million has been completed.

The Red Bluff facilities, which are rated as some of the best in the Western United States, will enhance Fibreboard's rapidly expanding portfolio of value-added products. "We are very pleased to add the Red Bluff locations to Fibreboard's growing list of quality manufacturing plants," said Lawrence C. Hart, chairman and president. "As it is widely known in the industry, these millwork plants bring with them an outstanding reputation for production of a high quality product."

Fibreboard Corp., headquartered in Concord, manufactures lumber, hardwood plywood, moulding and millwork, agricultural containers, composite structural lumber, precision molded industrial insulation and fireproofing materials. Its Trimont Land company subsidiary owns Northstar-at-Tahoe, a ski resort and year-round vacation and conference center in California.

#90017p0039 01/17/1990 ~PR Newswire

PITTSBURGH (JAN. 17) PR NEWSWIRE - Integra Financial Corp. (NASDAQ-NMS: ITGR) today announced the results of its operations for 1989.

In line with an earlier announcement by the corporation, Integra posted a net loss of $17.3 million or $.68 per share for the fourth quarter of 1989 compared to net income of $18.4 million or $.73 per share for the fourth quarter of 1988. Net income for the full year was $35.6 million or $1.42 per share for 1989 and $66.4 million or $2.62 per share for 1988.

The net loss in the fourth quarter came about after the corporation made a significant contribution to its loan loss reserve in addition to recognizing certain non-recurring expenses related to consolidation and standardization activities. Remarked William F. Roemer, Integra's president and chief executive officer, "The decisive actions taken during our fourth quarter reflect our conservative management philosophy. We believe it was prudent to reduce the level of our non-performing assets and strengthen our loan loss reserve in order to establish a solid foundation for the future growth of Integra."

At the end of 1989, the corporation's reserve for possible loan losses was 1.74 percent of loans compared to 1.37 percent a year earlier. The loan loss reserve's coverage of non-performing assets rose to 119 percent from 114 percent one year ago. The provision for possible loan losses was $61.2 million and $25.8 million for each year, respectively.

Regarding the results of operations for the entire year, net interest income, which was not affected by the fourth quarter charges, increased to $257.5 million for 1989 from $255.9 million for 1988 chiefly due to an improvement in net interest margin. Net interest margin was 4.53 percent for 1989 and 4.48 percent for 1988.

Non-interest income of $79.3 million for 1989 included a one-time favorable settlement of $8.0 million resulting from a Pennsylvania shares tax refund. In addition, a $2.2 million increase in net securities gains and a 7 percent or $1.5 million increase in income from trust services contributed favorably to the level of non-interest income in 1989. In 1988 non-interest income of $75.0 million included an $11.1 million non-recurring gain on the sale of branch offices sold as a condition of the Integra merger.

Non-interest expense increased 9 percent to $240.8 million for 1989 largely as a result of non-recurring costs incurred during the year. Those

costs were primarily associated with the Integra merger and with a project initiated in 1989 to consolidate data processing facilities and to standardize products, services and support software. Added Roemer, "Our consolidation and standardization plans will facilitate the realignment of our branch network. We have dedicated the necessary financial and human resources to those plans now in order to recognize a cost savings in the future and to strengthen our presence in western Pennsylvania."

Integra's total assets were $6.8 billion at the end of 1989, slightly lower than the $6.9 billion a year earlier. Deposits were relatively unchanged at $5.8 billion at the end of both years. Loans stood at $4.0 billion at the end of 1989, down from $4.1 billion at the end of 1988. Trust assets under management by the corporation, at market value, grew 9 percent to $5.7 billion at the end of the year.

The corporation's capital position remains very strong relative to industry standards. At the close of 1989, Integra's primary capital ratio was 8.83 percent, considerably higher than the 5.5 percent required by bank regulators.

Also contributing to its financial strength is Integra's portfolio of marketable equity securities carried at $114.9 million with approximately $94 million of unrecognized appreciation at the end of the year.

The book value of Integra common stock was $21.40 per share at Dec. 31, 1989, compared to a market value of $24.88 per share. The stock traded in a price range of $21.38 to $30.75 per share during 1989. Intergra common stock is traded on the NASDAQ National Market under the symbol ITGR.

The corporation's affiliate banks, which include First National Bank of Washington, First Seneca Bank, Gallatin National Bank, Keystone National Bank, McDowell National Bank, Pennbank and Union National Bank, operate 212 offices throughout 21 counties of western Pennsylvania.

#90017p0046 01/17/1990 ~PR Newswire

NEW YORK (JAN. 17) PR NEWSWIRE - Isramco, Inc. (NASDAQ: ISRL) announced today that the budget for the drilling of the Yam 2 well had been increased by $4.3 million, from $13.1 million to $17.4 million. The budget increase, which had been reported to be $2.5 million earlier in January, was made greater because of slower than anticipated drilling progress. Isramco's portion of the expenses is 1 percent. Isramco also owns a 3.28 percent overriding royalty interest after payout in the exploration program.

The Yam 2, which is being drilled approximately 10 miles off the coast of Ashod in the Mediterranean Sea, is being prepared for casing to the depth of 10,600 feet. Total depth is targeted for 17,000 feet. Originally the completion of drilling had been expected at the end of January. Now drilling is expected to reach total depth by the end of March.

In a closely related matter, Dr. Joseph Elmaleh, chairman, said that Israel's Ministry of Defense had agreed to waive the penalty clause under which it could have fined the Negev Venture 2 $25,000 a day for exceeding the original deadline of Jan. 31 for drilling to be completed. The waiver lasts until March 31, 1990.

Dr. Elmaleh also said that sulfur permits for the exploration of 240,000 acres in the Negev Desert had been issued to Isramco and its joint venture partner, Israel Chemicals, Ltd., by the Ministry of Trade and Commerce. Isramco has begun the geophysical and geological phases of the exploration work, he said. Isramco and Israel Chemicals, Ltd. each own a 50 percent interest in the sulfur exploration program.

SAN FRANCISCO (JAN. 17) PR NEWSWIRE - The Charles Schwab Corp. (NYSE, PSE: SCH) today reported net income of $18.9 million or 68 cents per share

for the year ended Dec. 31, 1989, compared to net income of $7.4 million, or 27 cents per share, in 1988.

THE CHARLES SCHWAB CORP.
Financial Highlights
(In millions, except per share amounts)

	Three Months Ended		Year Ended	
	12/31/89	12/31/88	12/31/89	12/31/88
Revenues	$149.7	$102.2	$553.2	$392.2
Expenses	139.0	101.0	520.0	378.9
Income before taxes	10.7	1.2	33.2	13.3
Net income	6.1	.6	18.9	7.4
Net income per share	$.22	$.02	$.68	$.27

Revenues for 1989 were $553.2 million, up 41 percent from 1988. The increase in revenues is primarily due to higher commission revenue resulting from stronger market activity and increased interest revenue. Commission revenue totaled $253.9 million for 1989, 24 percent above 1988. Trading activity by customers increased to 11,900 average daily trades in 1989 from 10,000 in 1988.

Interest revenue net of interest expense was $65.6 million for 1989, 55 percent above 1988. Average margin loans were $793 million during 1989, up 7 percent from last year, while average short-term investments were $2.0 billion, up more than 60 percent from last year primarily due to growth in customer credit balances.

PONTIAC, MI (JAN. 17) PR NEWSWIRE - GMC Truck dealers set a sales record for the Jan. 1-10 period, Ray E. Rota, general sales manager for GMC Truck Division, reported.

Sales of 8,898 trucks were 6.3 percent higher than the former record set during the same period last year, when adjusted on a daily sales- rate basis. There were eight selling days in the period in 1990, and seven in the same period in 1989.

GMC Truck sales in early January included 8,616 light-duty trucks, a 9.8-percent gain over 6,868 deliveries last year.

Models showing strong sales included the Sierra full-size pickup, up 38.1 percent; the Suburban, with a 37.2-percent increase; the Safari mid-size van, up 24.5 percent; and the full-size Jimmy, up 14.8 percent from the same period in 1989.

PALO ALTO, CA (JAN. 17) PR NEWSWIRE - Collagen Corp. (NASDAQ: CGEN) today announced net income of $1,151,000 (13 cents per share) for the second quarter ended Dec. 31, 1989, a 33 percent increase over net income of $867,000 (11 cents per share) for the like period in 1988. The company reported total revenues of $12,679,000 for the quarter, an 18 percent increase over last year's $10,733,000.

For the six months ended Dec. 31, Collagen reported net income of $2,010,000 (23 cents per share) on record revenues of $26,448,000, compared to net income of $1,457,000 (18 cents per share) on revenues of $19,858,000 during the first six months of the previous year.

"We are extremely proud that the strong sales momentum from our marketing efforts in the first quarter has translated so solidly into first half year results," said Howard Palefsky, Collagen's president and chief executive officer. "In addition to tremendous growth in revenues and operating income, I am also pleased to announce that results from our ongoing clinical trials continue to be very promising."

Product sales for the quarter were up 23 percent to $11,851,000 compared with $9,614,000 for the like period in 1988. Product sales for the first six months increased 46 percent to $24,289,000 from last year's $16,654,000, representing a 35 percent increase in revenue contribution from Collagen Biomedical and a 119 percent increase from the company's Target Therapeutics subsidiary.

Collagen Corp. is a scientific and commercial leader in applying the science of cell biology to healing human tissue.

MEMPHIS, TN (JAN. 17) PR NEWSWIRE - Holiday Corporation (NYSE: HIA) announced today that it has increased the tender offer payment for the 8-3/8 percent Notes due 1996 of its Holiday Inns, Inc. subsidiary from $942.50 to $990 per $1,000 principal amount. No increase has been made to the consent payment for the 8-3/8 percent Notes, which remains at $10 per $1,000 principal amount. The increased tender offer payment will be paid to all tendering holders of 8-3/8 percent Notes, including to holders who have previously tendered their 8-3/8 percent Notes.

Holiday also announced that it had received requisite consents to the proposed indenture amendments from holders of the 10-1/2 percent Senior Notes due 1994 and the 11 percent Subordinated Debentures due 1999 of Holiday Inns. Earlier, Holiday announced that it had received requisite consents from holders of the 9-3/8 percent Notes due 1993 and 15 percent Notes due 1992 of Holiday Inns. As a result, Holiday has received requisite consents from holders of four of the five issues of public debt securities as to which it is soliciting consents.

Holiday extended to 5:00 p.m., New York City time, on Friday, January 19, 1990, the consent solicitation period for the 8-3/8 percent Notes. It also extended to Midnight, New York City time, on Tuesday, January 30, 1990, the tender offers for the 10-1/2 percent Senior Notes, the 11 percent Subordinated Debentures, the 15 percent Notes, the 9-3/8 percent Notes and the 8-3/8 percent Notes.

As of January 16, 1990, Holiday had received consents from holders representing approximately 32 percent for the 8-3/8 percent Notes. As of such date, it had also received tenders representing approximately 20 percent of the 8-3/8 percent Notes, 41 percent of the 10-1/2 percent Senior Notes, 29 percent of the 11 percent Subordinated Debentures, 49 percent of the 15 percent Notes and 83 percent of the 9-3/8 percent Notes.

LOS ANGELES (JAN. 17) PR NEWSWIRE - The board of directors of First

Interstate Bancorp (NYSE: I) announced today that company president Edward M. Carson will succeed Joseph J. Pinola as chairman and chief executive officer of the nation's tenth largest bank holding company on June 1, 1990 following Pinola's 65th birthday. At the same time the board said that William E. B. Siart has been elected a director of the company and will serve as president, succeeding Carson, in addition to continuing in his posts as chairman, president and chief executive officer of First Interstate Bank of California.

Carson, 60, made his reputation as a consumer banker with First Interstate Bank of Arizona. He joined the bank in 1951 after graduating from Arizona State University. Following various assignments, he was promoted to vice president in 1957 and went on to gain experience in operations and personnel, branch management and administration. He was promoted to executive vice president in 1969, chief administrative officer in 1972, vice chairman in 1975 and chairman in 1977. Promoted to president of the parent corporation in 1985, he brought with him a reputation for managing what one respected bank industry observer called "a model consumer bank" and a record that reflected "sound conservative management and careful control of pricing and expenses."

Siart, 43, began his banking career with Bank of America in 1969 in corporate finance after earning an economics degree in finance from the University of Santa Clara and an M.B.A. in finance from the University of California at Berkeley. In 1978 he joined First Interstate as vice president in the chairman's office. He was senior vice president and head of marketing for the company's banking and financial services subsidiary when he was promoted to lead First Interstate's Nevada bank in 1981. In January 1985 he was named president and chief executive officer of First Interstate's bank in California and elected chairman at the end of the year. In both Nevada and California, Siart established a reputation for stressing teamwork, profitability and making the customer his number one priority.

Pinola, a forceful and dynamic leader, has guided this $58 billion organization, which operates 28 banks in 14 states, since January 1978. An innovator in his industry, Pinola was a leader in introducing new computer-based technology to serve the banking customer. He introduced the concept of licensing First Interstate's name and services to banks not owned by the company, thereby extending the company's reach and scope of services to new markets. Today 38 banks in 11 states operate under franchise agreements with First Interstate. In 1981, he transformed Western Bancorporation into what is now First Interstate in one of the largest corporate name changes in U.S. banking history.

PASADENA, CA (JAN. 17) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) today announced record net income and earnings per share for the first quarter, as well as the seventh consecutive quarter of growth in net income and earnings per share.

Net income for the first quarter was $3,295,000, or $.60 per share, on revenues of $211,535,000. Net income for the corresponding quarter of the prior year was $2,055,000, or $.40 per share, on revenues of $165,344,000. Included in the current quarter was net income of $518,000, or $.09 per share, from the sale of marketable equity securities.

Separately, the company announced that it paid off the $9,000,000 balance on its term loan during the first quarter. The company said it considers cash being generated from operations, coupled with available short term credit facilities, to be more than adequate to fund its operating needs.

Noel G. Watson, Jacobs president, said: "We continue to be bullish on the company's business prospects. Our backlog stands at an all-time high of $989,500,000 which is up 18 percent from the year ago backlog of $840,218,000."

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural construction, construction management, contract maintenance and operations services to governments and industry worldwide.

BENTON HARBOR, MI (JAN. 17) PR NEWSWIRE - Whirlpool Corporation (NYSE: WHR) today announced that Jan Prising has been named president, chief executive officer and senior managing director of Whirlpool International B.V. (WIBV), succeeding Wilhelmus G. (Bill) Maeyer, who retires Feb. 1.

Prising, 51, was most recently president and chief executive officer of Dahl Invest AB, Sweden, the largest plumbing, cooling and heating wholesaler in Scandinavia. Dahl Invest is part of the Ratos Group, with Europe-wide operations. A Swedish national, Prising attained the position in 1987. Prior to that, Prising spent a significant period of his career with AB Electrolux, one of the world's largest major domestic appliance manufacturers.

Prising earned an M.B.A. from Stockholm School of Economics in 1963 and joined AB Electrolux in the same year. Following a steady succession of

increasing responsibilities in marketing and management positions, and eight years of international experience, he was named president of the Husqvarna sewing machine division of the company in 1977. He was also chairman of the U.S. subsidiary, Viking Sewing Machine, Inc. In 1980 Prising became president of the Electrolux floor care products division, a division that he established and that subsequently became the company's second largest division. In 1984 he moved from AB Electrolux to become chief executive officer of the SABA Group, a $4 billion grocery, hypermarket and department store operation.

Commenting on Prising's appointment, David R. Whitwam, chairman, president and chief executive officer of Whirlpool Corporation, said, "We're delighted to have Jan Prising join our company. His extensive business and marketing experience, combined with his excellent leadership skills and first-hand knowledge of the European appliance market, will further strengthen our senior management team, our operations and the ability of Whirlpool International B.V. to compete."

WIBV is the joint venture that was created when Whirlpool Corporation gained a 53 percent interest in N.V. Philips' major domestic appliance business. The joint venture agreement was signed in January 1989. Revenues for the joint venture are approximately $2 billion.

Whirlpool Corporation is the world's leading producer and marketer of major domestic appliances. Headquartered in Benton Harbor, the company manufactures major domestic appliances in ten countries and markets them under nine brand names in four countries.

ORLANDO, FL (JAN. 17) PR NEWSWIRE - American Pioneer Inc., (NASDAQ; APIO) the parent company of American Pioneer Savings Bank, Orlando, Fla., and Catalina Homes Acquisition Ltd., a Florida limited partnership, have agreed in principle for the purchase by Catalina Homes Acquisition Ltd. of certain assets and the operations of Catalina Homes Inc. and The Jonathan Group Inc., each a wholly owned subsidiary of American Pioneer, for $65.7 million, payable in cash, secured notes and the assumption of certain outstanding indebtedness. Catalina Homes Acquisition Ltd. is owned by a group of private investors, including William duPont III, Paul F. Bryan and Peter F. Fox.

"This transaction will add approximately $15 million in tangible capital to American Pioneer Savings Bank. Also, for American Pioneer to operate these home building operations until July 1, 1994, the last date of

divestiture under the new thrift regulations, could require approximately $85 million in additional capital for the savings bank. Of course, these capital requirements do not apply to the purchaser," stated Richard R. Swann, chairman of American Pioneer. "Due to the efforts of its fine management team, Catalina Homes and the Jonathan Group have developed into a valuable operation as evidenced by this transaction," remarked Swann.

"This proposed transaction, along with our previously announced actions, including the sale of 13 branches to Southeast Bank on Dec. 28, 1989, the suspension of preferred dividend payments, the elimination of all preferred stock at the Savings Bank level, and the proposed sale of American Pioneer Life Insurance Co., would have the effect of improving tangible capital by $100.9 million, including a goodwill reduction of $18.4 million. These results demonstrate the effort American Pioneer is making to fully comply with the new capital regulations applicable as a result of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989."

Paul F. Bryan, president and CEO of the holding partnership for Catalina Homes Acquisition Ltd., stated, "The Catalina Homes and Jonathan businesses provide an excellent complement to the commercial development operations of our other real estate entity, Pillar-Bryton Development. We believe the long-term synergy of the home bulding concerns and the commercial development eneterprises will provide us with an even great ability to achieve success in the Florida and Indianapolis real estate markets."

The transaction is subject to boards of directors review and approval as well as the execution of a definitive purchase agreement.

Catalina and the Jonathan Group are each engaged in home building operations, Catalina throughout Florida, and the Jonathan Group pincipally in the Indianapolis, Indiana, and surrounding areas.

ORLANDO, FL (JAN. 17) PR NEWSWIRE - Fidelity Investments, the nation's largest privately held mutual fund and discount brokerage company, announced today that it has signed an agreement with Security Pacific Discount Brokerage to acquire its non-California and non-Arizona brokerage accounts.

The acquisition, which is effective Jan. 26, represents accounts in 11 cities, including Dallas; Florham Park, N.J.; Garden City, N.Y.; Houston; Jacksonville, Fla.; Memphis, Tenn.; New Haven, Conn.; New Orleans; Orlando Fla.; Ormand Beach, Fla.; and Plantation, Fla.

"Fidelity is committed to growing its brokerage business in the '90s," said David Cariseo, president of Fidelity Brokerage Services. "We look forward to providing these new customers with the extensive range of financial products and excellent service that all Fidelity customers have come to enjoy."

Fidelity currently has 54 walk-in Investor Centers nationwide, including offices in eight of the cities represented in the Security Pacific acquisition. Through Fidelity, investors are able to trade stocks, bonds,

and options, as well as U.S. Government or municipal securities, at savings of up to 76 percent over a full-cost broker. Other investment options available through Fidelity include mutual funds, certificates of deposit (CDs), unit investment trusts (UITs), annuities and precious metals.

Fidelity, which has been in the brokerage business since 1978, has 1.6 million institutional and retail brokerage accounts.

#90017p0083 01/17/1990 ~PR Newswire

WILMINGTON, DE (JAN. 17) PR NEWSWIRE - Du Pont (NYSE: DD) today announced it has received the first U.S. patent for a new family of thallium-lead materials that are superconductive at temperatures among the highest known.

The compounds, including compositions that superconduct in the range of 120-125 Kelvin (minus 240 F) also may offer some advantages over other superconducting compounds in processing and flux pinning.

The Du Pont compositions contain the elements thallium/lead/strontium/calcium/copper/oxygen. They are differentiated from other thallium-containing superconducting compositions by the essential incorporation of lead and strontium and the absence of barium.

Du Pont said it believes the thallium-lead materials may offer advantages in overcoming "flux creep," a problem that causes some new high-temperature materials to lose their ability to superconduct in the presence of magnetic fields. However, company scientists said they still are working on these properties of the thallium-lead materials and that it is too early to be quantitative.

The best thallium-lead materials are at least as good as thallium- barium materials in terms of the temperature at which they superconduct, or lose electrical resistance, Du Pont said.

Superconducting compositions are of intense interest worldwide because they conduct electricity with no resistance below their critical temperature. Potential commercial applications are in electrical power generation and storage, transportation, electronics and communications.

The Du Pont work on thallium-lead superconducting materials was conducted by the company's Central Research and Development Department in the Wilmington area. The patent, based on the work by Dr. M.A. Subramanian, is the fourth U.S. patent issued to Du Pont in the area of high-temperature superconductivity.

Du Pont, whose involvement in superconductivity research dates back more than 25 years, last fall announced a superconductivity agreement with Hewlett-Packard Co. and Los Alamos National Laboratory in New Mexico to form one of the largest collaborative research and development projects ever concluded between a government laboratory and industry.

That three-year agreement is valued at $11 million and involves a total of 25 or more researchers. The first objective of the collaboration is to develop thin-film, high-temperature superconductors for electronic components.

Du Pont also has established separate cooperative superconductivity research agreements with the other two Department of Energy pilot centers, Argonne National Laboratory in Illinois and Oak Ridge National Laboratory in Tennessee.

#90017p0092 01/17/1990 ~PR Newswire

SEATTLE (JAN. 17) PR NEWSWIRE - Washington Mutual Savings Bank (NASDAQ: WAMU) today announced 1989 earnings of $19.8 million, down from 1988 earnings of $38.6 million, and fourth-quarter 1989 earnings of $199,000, down from $11.0 million for the same period a year ago.

Earnings per share attributable to common stock (net income less any preferred stock dividends) were $1.23 per share for 1989 and a negative 7 cents per share for the fourth quarter of 1989, compared to $2.56 per share for 1988 and 73 cents per share for the fourth quarter of 1988.

Previously announced increased reserves for and losses on investment securities reduced fourth-quarter 1989 pretax earnings by $11.9 million.

The bank's board of directors also today declared a dividend on common stock of 10 cents per share and a dividend on convertible preferred stock

of 93.75 cents per share, both payable Feb. 15 to shareholders of record on Jan. 31.

"Our retail banking business continued to show positive trends in the fourth quarter. We increased core operating earnings, increased loan originations and reduced problem assets. Increasing the reserve for investment securities was a prudent action which should help us in the long run," said Louis H. Pepper, Washington Mutual chairman and chief executive officer.

Pretax core operating earnings increased from $10.3 million to $11.7 million between the third and fourth quarters of 1989, and from $36.0 million in 1988 to $45.6 million in 1989. Net interest income improved from $32.7 million for third quarter 1989 to $33.9 million for fourth quarter 1989, and from $130.9 million in 1988 to $136.0 million in 1989.

The totals for lending activities demonstrate the strengths of Washington Mutual's consumer banking business, said Pepper. Mortgage loan originations rose from $347.9 million for third quarter 1989 to a record $469.9 million for fourth quarter 1989, and from $780.5 million in 1988 to a record $1.3 billion for 1989. Consumer lending increased from $62.8 million for third quarter 1989 to a record $79.6 million for fourth quarter 1989, and from $133.0 million in 1988 to a record $225.6 million in 1989.

Problem loans, real estate owned and loan workouts dropped from $183.7 million on Sept. 30, 1989, to $162.8 million on Dec. 31, 1989, and were down from $197.9 million at year-end 1988.

"We are encouraged by these trends as we enter 1990. We have a strong consumer banking business, excellent capital, a downward trend in problem assets and a healthy regional economy. We built on our strengths, such as residential lending, in 1989 and made excellent preparations for 1990," said Pepper.

With $6.6 billion in assets, Washington Mutual Savings Bank is the largest independent financial institution in Washington state.

#90017p0097 01/17/1990 ~PR Newswire

WILMINGTON, DE (JAN. 17) PR NEWSWIRE - Directors of The Columbia Gas System Inc. (NYSE: CG) today increased the corporation's quarterly common stock dividend 10 percent to 55 cents per share from the 50 cents per share previously paid, Chairman and Chief Executive Officer John H. Croom announced.

The action raises Columbia's indicated annual dividend rate to $2.20 per share, compared with the $2 per share paid in 1989.

Croom said the board of directors took the action following a year of notable achievements for Columbia. "We resolved a series of complex legal and regulatory proceedings, expanded into several new markets and successfully positioned all of our business segments to profit from the growing demand for natural gas as the clean energy source of the 1990s," he said. "Today's board action reflects these accomplishments and our confidence in Columbia's future. While some uncertainties remain, we have shown the resilience and resources needed to prosper in today's competitive environment."

The dividend action by Columbia's board of directors continues an unbroken string of quarterly common stock payments dating back 42 years. It is the first increase since Columbia's dividend was reduced in 1988, from 79.5 cents per share to 50 cents per share, in the face of low earnings and the uncertainty surrounding pending regulatory and legal proceedings. These proceedings were largely settled in a 1989 agreement with customers of the corporation's transmission units.

The common stock dividend declared today is payable Feb. 15, 1990, to stockholders of record Jan. 25.

Approximately 45.6 million shares of Columbia common stock are outstanding.

#90017p0098 01/17/1990 ~PR Newswire

CAMBRIDGE, MA (JAN. 17) PR NEWSWIRE - Genetics Institute, Inc. (NASDAQ: GENI) today reported a net loss of $28,737,000, or $2.11 per share, on revenues of $43,644,000 for the fiscal year ended Nov. 30, 1989. This is compared with a net loss of $11,240,000, or 81 cents per share, on revenues of $29,684,000 for 1988.

For the fourth quarter ended Nov. 30, 1989, the company reported a net loss of $16,378,000, or $1.22 per share, on revenues of $8.3 million. This is compared with a net loss of $2,887,000, or 21 cents per share, on revenues of $14,372,000 for the same period last year. Genetics Institute ended fiscal 1989 with $101,910,000 in cash and marketable securities and $193,122,000 in shareholders' equity.

As previously reported, the fiscal 1989 loss included a one-time earnings charge of $9.0 million as the result of a contractual dispute with Boehringer Mannheim, relating to the production of Erythropoietin ("EPO"). The dispute relates to the production process used by Genetics Institute to manufacture EPO in fiscal 1989 under a supply contract with Boehringer Mannheim and does not relate to the quality of the EPO produced. Genetics Institute's decision to take the charge against earnings in fiscal 1989 reflects its uncertainity that it will be able to collect the full amount of revenue recognized as the result of EPO produced for Boehringer in 1989.

In addition, the net loss for fiscal 1989 is somewhat larger than anticipated because a license agreement with Burroughs Wellcome Co. for novel plasminogen activator (NPA), which had been expected to be signed in fiscal 1989, was finalized in early fiscal 1990. Therefore, initial payments under such license agreement will be reflected in the results for the first quarter of 1990 rather than fiscal 1989.

Genetics Institute is a leading biotechnology firm engaged in the discovery and development of human pharmaceuticals through recombinant DNA and other technologies. The company has a diversified portfolio of licensed and proprietary pharmaceutical products.

MIAMI (JAN. 17) PR NEWSWIRE - Lennar Corporation (NYSE: LEN), one of the nation's leading home building and real estate companies, today reported revenues and earnings for its fourth quarter and fiscal year ended Nov. 30 1989.

Leonard Miller, chairman of the board and president, announced earnings for the 1989 fiscal year of $28,093,000 ($2.80 per share) on revenues of $440,316,000, compared with earnings of $27,620,000 ($2.78 per share) on revenues of $429,407,000 in fiscal 1988.

For the fourth quarter of its fiscal year Lennar's revenues were $140,153,000, compared with $130,289,000 in 1988. Fourth quarter earnings were $8,868,000 ($.88 per share), compared with earnings of $8,779,000 ($.88 per share), for the fourth quarter of fiscal 1988.

The company closed on 1,361 home sales during the fourth quarter of fiscal 1989, compared with 1,346 closings during the same period of 1988. Closings for fiscal 1989 totalled 4,259 homes, compared with 4,131 homes closed during 1988. At Nov. 30, 1989, Lennar had approximately $134 million in backlog of home sales for future delivery, as compared to $177 million one year ago. These dollar amounts represent a backlog of 1,423 home sales as of Nov. 30, 1989, compared to a backlog of 2,012 a year earlier.

Mr. Miller stated that Lennar's strong performance in 1989 was the result of the company's ability to maintain high level of both home deliveries and margins, while continuing to control overhead costs. He added that since Lennar is entering the new fiscal year with a lower sales backlog, managment will be carefully evaluating and reacting to the impact of new order rates on fiscal 1990 results.

CLEVELAND (JAN. 17) PR NEWSWIRE - George F. Varga has been named president and chief executive officer of GE-Tungsram, the lighting joint venture between General Electric and Tungsram.

"In this important assignment, George Varga will be responsible for growing the GE-Tungsram lighting business, with particular emphasis on the European market," said John D. Opie, senior vice president, GE Lighting. "He is an experienced international businessman who will provide vision and leadership for all GE- Tungsram business functions, including engineering, marketing, productin and sales."

Varga was born in Hungary and educated there through high school. He has economics degrees from Western Maryland University and Stanford University (M.A.). A graduate of GE's Financial Management Program and fluent in six languages, Varga has had GE assignments in San Jose (California), Madrid, Zurich, and Mexico City. He is currently director of GE Plastics' Speciality Products Operation in Bergen Op Zoom, The Netherlands.

His appointment is effective February 5, 1990. Varga will be located in Budapest, Hungary, headquarters city for the GE-Tungsram joint venture.

General Electric purchased 50 percent plus one share of Tungsram for $150 million. Tungsram is one of Hungary's largest industrial companies with 12 manufacturing plants and annual sales of approximately $300 million, 85 percent of which comes from exports.

#90017p0107 01/17/1990 ~PR Newswire

PRINCETON, NJ (JAN. 17) PR NEWSWIRE - Commodities Corporation and ORIX Corporation today announced the formation, in Tokyo, of ORIX Commodities Corporation, the first futures and options trading company in Japan.

According to Robert G. Easton, president and chief executive officer of Commodities Corporation, "ORIX Commodities Corporation will be at the forefront of Japan's expanding financial markets."

Recent developments, including the establishment of the Tokyo International Futures Exchange and proposed changes in the Japanese Commodities Exchange Act, provide expanded opportunities to investors in the growing international futures and options markets. The formation of ORIX Commodities Corporation represents a significant step for both ORIX and Commodities Corporation in participating in these markets.

"This venture will also expand Commodities Corporation's leadership position in the international futures markets," he added. "As we have seen in the U.S., we expect dramatic growth in Japan's futures and options markets."

Easton pointed out that the new company will trade in the major Japanese futures and options markets including those for agricultural products, bonds, stock indices, precious metals, and spot and forward foreign exchange.

Commodities Corporation, which was established in 1969, is the world's largest futures money manager. Through its subsidiary, Commodities

Corporation (U.S.A.), the privately held company is a leader in the trading of futures for its proprietary accounts as well as trading manager of public and private commodity funds. The company manages funds totaling approximately $1 billion, and trades worldwide in more than 60 commodities.

ORIX Corporation is a diversified global financial services organization headquartered in Tokyo. ORIX purchased a 31 percent equity interest in Commodities Corporation in July 1989. According to Yoshihiko Miyauchi, president and chief executive officer of ORIX, "This venture is an extension of ORIX's strategy to provide a comprehensive array of financial services including lease finance, consumer credit, housing loans, private placement of mortgage-backed securities, venture capital and securities brokerage."

ORIX Commodities Corporation will be incorporated in Japan in late January and will begin operations in April.

#90017p0108 01/17/1990 ~PR Newswire

EGG HARBOR CITY, NJ (JAN. 17) PR NEWSWIRE - Collective Bancorp Inc. (NASDAQ: COFD) recorded net income of $2,414,000 or $.28 per share for the quarter ended Dec. 31, 1989, it was announced today by Thomas H. Hamilton, president and chief executive officer.

Collective Bancorp earned $3,097,000 or $.36 per share during the comparable quarter one year ago.

For the six months ended Dec. 31, 1989, Collective Bancorp had net income of $4,547,000 or $.52 per share, compared with $6,130,000 or $.71 per share earned during the six months which ended Dec. 31, 1988.

"Earnings for the most recent quarter were marked by a continued improvement in net interest income," Hamilton said. For the quarter, net interest income totaled $10,353,000, up from $9,742,000 during the comparable period one year ago. "Net interest income was also 10 percent higher than the $9,387,000 earned during the first quarter of fiscal 1990, which ended Sept. 30, 1989," Hamilton added. The improvement in core earnings was also reflected in Collective Bancorp's net interest margin, which increased to 2.05 percent for the quarter.

Hamilton also emphasized that Collective's asset quality continued to improve during the quarter. "At December 31, 1989 classified assets were equal to 1.00 percent of total assets on a consolidated basis. As I have

stated previously, this is a reflection of the conservative nature of Collective's loan portfolio, less than 3 percent of which is invested in construction and commercial loans," Hamilton added.

Gains on the sale of loans and investments totaled $1,266,000 during the quarter, down from $2,038,000 one year ago. The comparison with the prior year period was also impacted by an increase in general and administrative expenses and the amortization of intangibles, resulting primarily from the acquisition of Glen Ridge Savings Bank.

As of Dec. 31, 1989, Collective Bancorp had total assets of $2.226 billion. Loans receivable, including mortgage-backed securities, totaled $1.992 billion at quarter end while savings deposits stood at $1.620 billion. Total stockholder's equity at Dec. 31, 1989, was $124,547,000 or $14.43 per share, which is equivalent to 5.6 percent of assets.

Collective Bancorp Inc. is a multiple savings and loan holding company headquartered in Egg Harbor City. The holding company's primary subsidiary, Collective Federal Savings Bank, operates 38 full-service banking offices in eight southern New Jersey counties. Collective Bancorp's other subsidiary, Glen Ridge Savings Bank, SLA, operates six full-service banking offices in three northern New Jersey counties.

HARTFORD, CT (JAN. 16) PR NEWSWIRE - Robert E. Summa has been appointed vice president for New Business Development for Invest Financial Corporation, it was announced today by D. Mark Olson, Invest executive vice president.

Summa, 32, is an addition to Invest's New Business Development division which adds banking institutions to Invest Financial's national network. He joins Invest from Society for Savings, Hartford, where he was vice president, Non-Traditional Banking Services.

"With a strong background in banking and in the securities business, Bob Summa is uniquely able to provide the insights bankers demand as they extend product offerings to include securities products," Olson said.

Summa, a Registered Securities Principal, has been a banking executive for the past seven years. He has directed the Invest program at Society for Savings since 1985.

"Invest is the acknowledged leader in the growing industry of providing securities products to banking customers," Summa said. "I look forward to assisting forward-thinking bankers in the delivery of a new array of investing products to customers." Summa, of New Hartford, Conn., is a graduate of the University of Connecticut.

Invest Financial Corporation, a subsidiary of Kemper Financial Companies, Inc., provides securities and insurance products to customers of banks and thrifts through over 1,400 Invest brokers operating from 560 Invest Centers in some 200 banking institutions nationwide.

PARSIPPANY, NJ (JAN. 17) PR NEWSWIRE - General Public Utilities Corp. (NYSE: GPU) announced that Michael P. Morrell, its vice president and treasurer, will become vice president and treasurer of the utility holding company's three operating subsidiaries.

In addition, Stephen H. Somich has been elected assistant treasurer of GPU's five utility-related subsidiaries.

Management of the GPU System's treasury functions is being consolidated as part of the company's efforts to streamline for greater efficiency.

Morrell became vice president and treasurer of GPU's Jersey Central Power & Light Co. unit (JCP&L), based in Morristown, N.J., on Jan. 1. Somich assumed his new posts Jan. 1 at JCP&L, GPU Nuclear and at GPU Service Corp., where he also will be director of treasury operations.

On Feb. 1, Morrell and Somich assume their new posts at GPU's Pennsylvania subsidiaries, Metropolitan Edison Co., based in Reading, Pa., and Pennsylvania Electric Co., based in Johnstown, Pa.

Morrell continues as vice president and treasurer of GPU Service and treasurer of GPU Nuclear and General Portfolios Corp., an investment subsidiary. He became treasurer of GPU Service and GPU Nuclear in 1986 and was elected treasurer of GPU in 1987.

Prior to being named to his new posts, Somich was financial planning and analysis director for GPU Service.

GPU is a registered electric utility holding company. GPU Service provides integrated system plans and services, and GPU Nuclear operates the subsidiaries' nuclear plants.

#90017p0112 01/17/1990 ~PR Newswire

DETROIT (JAN. 17) PR NEWSWIRE - The University of Michigan has signed a seven-year, $1.6 million contract with Michigan Bell for Ameritech ISDN (Integrated Services Digital Network) Centrex -- the first ISDN sale in the state.

The sophisticated system will integrate university telecommunications and computer systems by linking numerous remote locations with the university's central campus in Ann Arbor. The system is expected to be in place by early this year.

"Professors, researchers and other staff members will be able to access university data bases at any time from their homes," said Don Vangilder, Michigan Bell general manager of business markets. "In terms of efficiency and convenience, ISDN Centrex will bring substantial benefits to the university."

With Ameritech ISDN Centrex, the University of Michigan "off-campus" community for the first time will be able to simultaneously send and receive voice and data between telephones, computers and facsimile machines -- all through a single ISDN telephone line.

"The system eliminates the need for modems and special wiring and facilitates communication between formerly incompatible equipment," Vangilder said.

Ameritech ISDN Centrex uses special computer software and equipment located in Michigan Bell call-processing offices to transform one line into three communications channels.

Two channels are used to carry voice, video and data messages. These channels are fast enough to send four typed pages of information in one second.

The third channel may be used to transmit data in bundles to minimize transmission time and expense.

The university will use ISDN Centrex with special software called Internet/ISDN Gateway. Developed by Dory Leifer, a University of Michigan systems research programmer, the software will enable users to cost-effectively access campus data bases, as well as regional and national resources from distant locations, such as a home.

Michigan Bell and AT&T assisted Leifer and the university in developing Internet/ISDN Gateway. Michigan Bell provided a telecommunications lab, ISDN service and technical expertise regarding ISDN. AT&T funded Leifer's research and furnished equipment.

The university and Michigan Bell are continuing to work together to develop other applications of ISDN.

BURLINGTON, NC (JAN. 17) PR NEWSWIRE - Environmental Diagnostics, Inc. (NASDAQ: EDIT) announced today that it has submitted its recently-developed EZ-SCREEN: OPIATES test to the U.S. Food and Drug Administration for pre-market clearance.

The Company also announced that the new opiates test for detecting the presence of heroin and morphine in human urine samples has been launced in the European marketplace through its distribution partners in Europe. The Company is also introducing the opiates test, on a limited basis pending FDA clearance, to law enforcement agencies in the United States for forensic testing purposes through its internal and field sales forces.

James D. Skinner, EDI President and Chief Executive Officer, said "We are very pleased to announce that the new EZ-SCREEN: OPIATES test is available to the European drugs of abuse testing market and the United States forensic testing market. Heroin and its related drugs represent a serious substance abuse problem, particularly in Europe, where it is possibly a greater threat than is cocaine at the present time. Following clearance by the FDA, EDI intends to market the opiates test to the full range of customers presently using the EDI drugs of abuse tests."

He added that the EDI drugs of abuse product line, comprised of the new opiates test and the EZ-SCREEN: CANNABINOID/COCAINE test for detecting marijuana and cocaine, encompasses tests for those drugs representing about 99 percent of the substances found in samples that test positive. The new opiates test represents the Company's commitment to a broad product line in the growing market of substance abuse detection.

Environmental Diagnostics, Inc. develops and manufactures human clinical and agricultural diagnostics specifically designed for on-site testing by non-technical personnel. The Company's EZ-SCREEN products provide the accuracy of laboratory results in minutes.

TULSA, OK (JAN. 17) PR NEWSWIRE - Florafax International, Inc. (NASDAQ:

FIIF), and 800-FLOWERS, Inc., today jointly announced an agreement whereby Florafax's telemarketing center will handle a percentage of floral orders placed by customers of 800-FLOWERS during peak holiday periods. Florafax operators accept toll-free calls 24 hours a day, 365 days a year. Orders are placed for fulfillment with florist members of the Florafax wire service, either by voice or through the Florafax computer network, Floranet.

Florafax Chairman Floyd Cox Jr. stated, "We are delighted with this great opportunity to be associated with 800-FLOWERS, the leading telemarketing florist in the United States. Our member florists will now fulfill literally thousands of floral orders placed through us by 800-FLOWERS. Undoubtedly, the number of people sending flowers in this country is increasing, thanks to the easily remembered 800-FLOWERS number."

James F. McCann, president of 800-FLOWERS, said, "As 800-FLOWERS continues to experience growth, we have determined that using Florafax's efficient and highly automated system is one of the best ways to handle our increasing volume of orders. We are most pleased with the service and its huge capacity to efficiently accommodate our customers."

Florafax International, with headquarters in Tulsa, provides a nationwide wire service and related services to its member florists.

800-FLOWERS, Inc., headquartered in New York, is a 24-hour nationwide florist, advertising and promoting floral orders through television, radio print, promotional tie-ins, corporate accounts and other consumer direct media.

#90017p0122 01/17/1990 ~PR Newswire

NEW YORK (JAN. 17) PR NEWSWIRE - Goldman, Sachs & Co., as lead manager of the underwriting group, announce a public offering today of 3,500,000 Nikkei Stock Average (225) put warrants expiring Jan. 3, 1993 of the Kingdom of Denmark at a price of $5.375 per warrant, which was the last sale price on the Amex yesterday. Last Friday, the kingdom offered 6,000,000 Nikkei put warrants and this new issue has the same terms as and will trade interchangeably with the first issue. Because of the decline in the Nikkei average since Friday, the warrants would have had a settlement value of $.96 if exercised for settlement today. PaineWebber Incorporated and Dean Witter Reynolds Inc. are co-managers. The underwriters have been granted an option to purchase up to an additional 350,000 warrants to cover over-allotments. The American Stock Exchange has approved the listing of the warrants. The Amex symbol is: DXA.WS.

Each warrant will entitle the holder thereof to receive from the kingdom the cash settlement value, if any, of the right to sell to the kingdom one-fifth of the U.S. dollar equivalent of the Nikkei Average, which has been set at $51.63. Accordingly, upon exercise, the holder of the warrant would receive the difference, if positive, between $51.63 and one-fifth of the U.S. dollar equivalent of the then prevailing Nikkei Average. The U.S. dollar equivalent of the Nikkei Average shall be calculated using a fixed exchanged rate of Y145.325 equals $1.00, which was the Japanese yen/U.S. dollar spot rate at the closing of the Tokyo Stock Exchange on Jan. 12, 1990. As a result, the cash settlement value in U.S. dollars that a warrantholder may receive upon exercise, expiration of cancellation of its warrants will not be affected, as such, by fluctuations in the actual Japanese yen/U.S. dollar exchange rate.

The Nikkei Average is a price weighted stock index, sponsored by Nihon Keizai Shimbun, Inc., that measures the aggregate price performance of 225 selected Japanese common stocks trading on the Tokyo Stock Exchange, representing a broad cross-section of industries.

The kingdom will add the net proceeds from the proposed offering, after payment of the costs incurred by the kingdom in hedging its risk with respect to the warrants, to the official foreign exchange reserves of Denmark.

INDIANA, PA (JAN. 17) PR NEWSWIRE - Royal Oil & Gas Corp., a privately owned independent exploration and production company, plans to sell its largest wholly owned oil and gas subsidiary, Royal Producing Corp.-Texas, and has retained Morgan Stanley & Co. Inc. to act as its financial adviser

in connection with the sale, it was announced today.

The proved reserves of Royal Producing Corp.-Texas include all of the company's reserves in the state of Texas, but are concentrated onshore in southern Texas. At Dec. 31, 1989, the company had proved reserves of 6 MMBbl and 65 Bcf. The company operates almost all of its properties and holds major working interests in them.

Steven R. Patchin, president of Royal Oil & Gas Corp., said, "The sale of Royal Producing Corp.-Texas is consistent with the company's intentions to focus on the exploration side of our operations."

COLUMBUS, OH (JAN. 17) PR NEWSWIRE - Huntington Bancshares Incorporated (NASDAQ: HBAN) today reported record earnings of $108.0 million for the year ended Dec. 31, 1989, an increase of 10.1 percent from $98.1 million earned last year. On a per share basis, fully diluted earnings increased 10.5 percent to $2.11 in 1989 versus $1.91 earned one year ago.

Net income for the fourth quarter of 1989 was up 6.4 percent to $26.6 million compared with $25.0 million earned in 1988. Fully diluted earnings per share for the quarter were $.52, a 6.1 percent increase from $.49 earned last year.

The results for both years include the December 1989 acquisitions of First Macomb Bancorp, Inc. (Mt. Clemens, Michigan) and First Banc Securities, Inc. (Morgantown, West Virginia) which were accounted for as poolings-of-interests. Per share figures have been adjusted to reflect the 15 percent stock dividend which was distributed in July 1989.

Huntington ended the year with total assets of $11.7 billion as a result of the two acquisitions and strong asset growth. Average total assets increased 12.1 percent from 1988 to 1989. Growth in average total loans and leases for the same period was 8.8 percent, fueled primarily by growth in consumer and commercial loans.

The allowance for loan and lease losses was 1.17 percent of total loans and leases at year-end compared with 1.14 percent at the end of the third quarter and 1.15 percent one year ago. Non- performing assets were 1.20 percent of total loans and leases at year-end 1989 versus 1.07 percent last year. Net charge-offs were .44 percent of average total loans and leases during 1989, down from .85 percent charged off in 1988. All of Huntington's remaining exposure to less developed countries was sold or

charged off during 1988.

"We are pleased with our results for 1989. The acquisitions of First Macomb and First Banc Securities put us in a good position to begin the new year," commented Frank Wobst, chairman and chief executive officer. "They expand Huntington's geographic market as well as strengthen the company's capital and core deposit positions. We end 1989 with a larger and stronger balance sheet, and we look forward to the beginning of a new decade in banking."

Huntington Bancshares is an $11.7 billion regional bank holding company headquartered in Columbus, Ohio. The company's banking, mortgage, trust and investment banking subsidiaries operate 279 offices in Ohio, Indiana, Kentucky, Michigan, Pennsylvania, West Virginia, Delaware, Florida, Illinois, Maryland, Massachusetts, New Jersey, Rhode Island and Virginia.

Huntington's common stock is traded on the NASDAQ National Market System using the symbol "HBAN."

#90017p0127 01/17/1990 ~PR Newswire

CALHOUN, GA (JAN. 17) PR NEWSWIRE - Crown Crafts Inc. (AMEX: CRW) today announced financial results for the third quarter and first nine months of fiscal 1990.

Net sales and earnings per share established third quarter records, and net earnings established an all-time quarterly record.

Net sales in the fiscal 1990 third quarter were $27,023,000, up 17 percent from $23,014,000 in the third quarter a year ago. Net earnings for the three months ended Dec. 31, 1989 were $1,886,000, a quarterly record and a 19 percent increase from $1,586,000 in the fiscal 1989 third quarter. On a per-share basis, earnings were $0.27 in the fiscal 1990 third quarter and $0.23 in the fiscal 1989 third quarter. In the fiscal 1990 third quarter, loss reserves were established against all accounts receivable from Allied and Federated stores, reducing quarter and year-to-date net earnings by $0.01 per share. Per-share figures have been adjusted for a two-for-one stock split that became effective on Jan. 11, 1990.

For the nine months ended Dec. 31, 1989, net sales were $76,735,000, up from $66,448,000 in the first nine months of the prior fiscal year. Net earnings were $5,158,000, or $0.74 per share, in the fiscal 1990 nine-month period. For the fiscal 1989 nine months, net earnings were $4,655,000, or $0.69 per share ($0.68 per share fully diluted), adjusted for the two-for-one stock split.

Michael H. Bernstein, president and chief executive officer, stated: "Third quarter sales growth was driven by continued strong demand for the company's comforter products, and included the initial shipments of our Royal Sateen line of luxury sheets, comforters and curtains. Customer response to our entry into the co-ordinated sheet market is extremely encouraging. Margins improved over those of the preceding quarter as we increased our production capacity for comforters and related products, reducing our reliance on outside contract labor. Demand for comforters and accessories remains strong, and fiscal 1990 operating results should establish new records for the fourth consecutive year."

PARIS (JAN. 17) PR NEWSWIRE - The Scandinavia Company, Inc. (AMEX: SCF), today announced that it plans to schedule its annual meeting of shareholders in the early spring, when its fiscal year financial information will be available for distribution to the company's shareholders.

At the annual meeting, the company intends to propose, among other things, that the shareholders renew the company's authorization to make acquisitions of operating companies.

The Scandinavia Company also reported that at Jan. 12, 1990, the approximate book value per share of common stock was $10.01 (including $1.00 of unrealized foreign currency gain primarily related to the company's holdings of German Deutchemarks) and that the company is currently seeking acquisitions of operating businesses in Germany as well as other European countries.

MIDDLEBURY, CT (JAN. 17) PR NEWSWIRE - General Datacomm Industries, Inc. (NYSE: GDC) today announced that revenues for its first fiscal quarter ended Dec. 31, 1989 were $51.1 million, compared with revenues of $51.2 million for the year ago period and with $49.3 million in the prior quarter.

Operating income for the first quarter was $2.3 million compared to an operating loss of $333,000 for the same period last year. First quarter net income was $1 million or $.07 per share, compared to a net loss of $490,000 or $.03 per share for the first quarter of fiscal 1989.

"Our performance for this first period of fiscal 1990 is very encouraging and is the result of several factors," said Charles P. Johnson, chairman and chief executive officer. "Revenues continued to trend upward over the preceding quarter; shipments of newer products plus manufacturing efficiencies have improved gross margins; and measures taken to control costs continued to contain our operating expenses during the period.

"This ability to generate profits on revenues that remained level with a year ago is indicative that our restructuring efforts are proving successful," continued Johnson. "The teamwork and persistence of all our employees contributed directly to these positive results."

General Datacomm is a leading provider of systems, solutions, equipment and services for information networks worldwide. Based in Middlebury, GDC services a broad base of corporate customers and telephone operating companies throughout the Americas, Europe, Australia, the Far East and the Pacific Rim. In its fiscal year ended Sept. 30, 1989, the company reported revenues of $201.2 million.

ROCHESTER, NY (JAN. 17) PR NEWSWIRE - Rochester Telephone Corp. (NYSE: RTC) announced today that it has completed the acquisition of the Mt. Pulaski Telephone and Electric Co. based in Lincoln, III.

Mt. Pulaski, which was incorporated in 1901, serves about 1,800 access lines in a territory in central Illinois, located 60 miles west of Champaign, Ill. White it retained its name, it no longer has any electric customers.

Mt. Pulaski is Rochester Tel's fifth Illinois property. In December the Rochester-based telecommunications company completed the purchase of four jointly owned companies in that state -- Inland Telephone Co., Midland Telephone Co., Prairie Telephone Co., and Lakeside Telephone Co. Two of the four, the Inland and Prairie companies, are located near Mt. Pulaski's service territory.

Rochester Tel exchanged shares of its common stock for all the outstanding stock of Mt. Pulaski Telephone. The purchase price was not disclosed.

Rochester Telephone's principal operating territory is a six-county area in Western-Central New York. In addition to the Illinois properties, it operates four other telephone companies in New York State, five in Pennsylvania, three in Wisconsin, two in New York State, five in Pennsylvania, three in Wisconsin, two in Michigan and two in Indiana. In total, Rochester Tel companies, including the parent company, serve more than 620,000 access lines.

Rochester Tel also owns three unregulated subsidiaries: RCI Long Distance a regional long distance carrier; Rotelcom Network Systems, which provides competitive telecommunications equipment and services; and Rochester Tel Mobile Communications, which operates and manages its cellular properties.

GREAT NECK, NY (JAN. 17) PR NEWSWIRE - American List Corporation (AMEX: AMZ) announced that it has received payment of $2,399,085 from U.S. News and World Report as a result of its three-year-old suit against the newsweekly.

The suit involved a contract by which U.S. News and World Report had agreed to purchase lists of college students from American List Corporation over a ten-year period. U.S. News and World Report honored the contract for a one-year period and then under new management stopped further purchases. The case was tried in the Supreme Court of the State of New York and a decision was rendered in favor of American List. U.S. News and World Report appealed unsuccessfully to the Appellate Division, First Department, and the New York Court of Appeals.

American List's lawyers, Ira Greenberg and Justin D'Atri, partners in the firm of Summit Rovins & Feldesman, New York City, expressed satisfaction with the outcome.

American List Corporation is the nation's largest compiler of high school and college student lists. Martin Lerner, president, said that this was the first instance in more than 20 years of its existence that the company was forced to institute a legal action against any of its clients.

CAMBRIDGE, MA (JAN. 17) PR NEWSWIRE - Biogen, Inc. (NASDAQ: BGEN) today reported financial results for the year and quarter ended Dec. 31, 1989. Revenues rose to a new record and the company achieved the first profitable year since its founding in 1978.

For the year ending Dec. 31, 1989, Biogen reported net income of $3,214,000, or 1 cent per share after preferred dividends. This compares with a net loss of $1,174,000, or 5 cents per share, for 1988. Record revenues of $40,894,000 for 1989 are the highest the company has ever reported and represent an increase of 35 percent over the prior year revenues. Expenses for the year totaled $37,680,000, a 20 percent increase over 1988 expenses. Most of the increase, and over 75 percent of the company's expenses, results from investment in Biogen's drug development programs.

For the three months ending Dec. 31, 1989, the company reported net income of $1,590,000, or 1 cent per share, after preferred dividends, based on record quarterly revenues of $12,304,000 and net expenses of $10,714,000. For the same period last year, the company reported revenues of $6,385,000 and net expenses of $6,119,000, resulting in net income of $266,000, or 1

cent per share.

Jim Vincent, Biogen chairman and chief executive officer, commented, "Revenue generated by a diverse group of products sold by Biogen, its licensees and partners, grew to record levels in this profitable year. A significant increase in ongoing royalties from Schering Plough's Intron-A(R) alpha interferon and expansion of our hepatitis B licensing program contributed significantly to our results. Biogen's gamma interferon development program achieved major commercial milestones in 1989 as the product was launched in West Germany and received marketing approval in Japan.

"Our Receptin(tm) AIDS therapy program continued to show promise and we introduced new research on our cardiovascular program. Furthermore, the company's financial position was stregthened by a public offering of convertible exchangeable preferred stock which raised $69 million and an agreement with New York Life that is providing funding to expand our CD4 development program."

Vincent continued, "The result is that we begin this decade with over $110 million in cash, and no debt, rapidly rising revenues from our diversified product line, and an expanding research pipeline."

Biogen is a leading biotechnology company principally engaged in developing genetically engineered pharmaceuticals. As a result of its early research, Biogen now derives revenues from five products being sold by its licensees in various countries. Biogen currently directs its research and development into areas where the company has particular strength -- AIDS, inflammation and selected cancers.

HOLYOKE, MA (JAN. 17) PR NEWSWIRE - Affiliated Banc Corporation (NASDAQ-NMS: ABCV) today announced operating results for both the fourth quarter and fiscal year ended Dec. 31, 1989.

Net income for the fourth quarter was $859,000, or 23 cents per share, compared with $1,040,000, or 27 cents per share, for the same period a year earlier. Net income for the fiscal year totaled $2,142,000, or 57 cents per share, compared with total net income for fiscal 1988 of $4,750,000, or $1.21 per share.

Assets totaled $562,447,000 at Dec. 31, 1989, an increase of 9 percent compared with total assets of $515,979,000 a year earlier. Outstanding loans totaled $490,315,000, an increase of 5.3 percent from the year-earlier total of $465,803,000. Deposits increased 19.2 percent to $483,355,000, compared with deposits of $405,360,000 a year earlier.

Stockholders' equity at Dec. 31, 1989, was $44,898,000, a decrease of $717,000 from the $45,615,000 the previous year. This resulted from dividends paid by the corporation and the repurchase of $1,468,750 of the corporation's own stock in 1989.

Chairman and President Jeffrey A. Lalonde said, "The fourth quarter met management's expectations as we continue to pursue strategies to meet the challenges of current market conditions."

He continued, "We made significant additions to the allowance for loan losses and carefully managed our assets and liabilities to strengthen the corporation's capital ratio to 7.98 percent. All deposit growth and expense control goals were met during the year and diligent attention will

be given toward achieving the same success in those areas in 1990."

At its Jan. 9 meeting, the board of directors set April 16, 1990, as the date of the annual shareholders' meeting.

Affiliated Banc Corporation is the parent company of Vanguard Savings Bank a state-chartered savings bank insured by the FDIC. Headquartered in Holyoke, the bank is a full-service financial institution with eight banking offices.

#90017p0163 01/17/1990 ~PR Newswire

NEW YORK (JAN. 17) PR NEWSWIRE - Zenith Data Systems (ZDS) today introduced its first personal computer based on the Extended Industry Standard Architecture (EISA), an 80386-based desktop computer with an advanced new disk subsystem so fast that it can outperform more expensive i486-based fileservers. Shipments are expected to begin next week.

The company, a founding contributor to the 32-bit EISA specification, also announced i486 and EISA upgrade paths for its Z-1000 multiprocessing architecture, ''which will make it the fastest and most expandable microcomputer-based platform on the market,'' said John P. Frank, ZDS president and chief executive officer.

''ZDS is now positioned to provide the broadest range of PC-based multiuser solutions, from '386 EISA servers to true multiprocessor systems offering more than 100 MIPS (millions of instructions per second) of processing power,'' Frank said.

''The new EISA Mass-Storage Controller in our Z-386/33E is more than 15 times faster than standard disk controllers,'' Frank said. ''This is important because it's disk performance -- not processor speed -- that limits system throughput in LANs that require heavy disk access.''

''Previous 33-megahertz '386 systems in disk-intensive environments ran out of gas with 12 to 15 users,'' Frank said. ''Thanks to our new Mass-Storage Controller and EISA, the Z-386/33E extends the range to well over 30 users in file-server environment.

''Anyone on a budget considering a single-processor '486 server to run, for example, a database under UNIX or on a LAN would be wiser to invest in a cost-effective '386 with a higher-performance disk subsystem,'' Frank said.

ZDS has filed patent applications for the design of its EISA Mass- Storage Controller, which allows for most hard disk operations to occur in under 1 millisecond (ms) due to the controller's two on-board processors and 1 megabyte (MB) of cache memory (expandable to 4MB).

The EISA Mass-Storage Controller also features multitasking drive technology, which dramatically increases disk performance by allowing up to four hard disks to work in tandem. The controller accepts up to 4 ESDI and 7 SCSI devices in addition to two floppy disks drives.

Other standard features of the Z-386/33E include 4MB of cached system memory, four open 32-/16-/8-bit EISA slots, VGA video card, MS- DOS 3.3 Plus and MS-Windows/386. ZDS' MS-OS/2 Version 1.1 with Presentation Manager is a $339 option.

WILTON, CT (JAN. 17) PR NEWSWIRE - Preferred Health Care, Ltd. (AMEX: PY) today announced that it has entered into agreement with two additional clients - Episcopal Church Clergy and Employees' Benefit Trust and Maricopa County, Ariz. - for the delivery of Preferred Health Care's managed mental health and substance abuse service delivery system to employees and their families.

The programs are effective this month.

The Episcopal Church Clergy and Employees' Benefit Trust, headquartered in New York City, provides benefits to 11,200 members and their families throughout the United States. Preferred Health Care will provide the PsychCare program with an employee assistance program to the trust plan participants.

Maricopa County, Ariz., is the first municipality to offer the PsychCare program to their 8,000 employees and their families. Preferred Health Care will provide psychiatric and substance abuse claims processing services to Maricopa in conjunction with the PsychCare program.

"We are very pleased to have been chosen by Maricopa County and the Episcopal Church Clergy and Employees' Benefits Trust to provide our managed mental health and substance abuse services in support of their health benefit plans," said David J. McDonnell, D.S.W., Preferred's chief executive officer.

Preferred Health Care, located in Wilton, Conn., is the nation's leader in

managed mental health and substance abuse care. The clients served by Preferred Health Care represent many of the Fortune 500 companies and include more than 4.5 million lives.

PITTSBURGH (JAN. 17) PR NEWSWIRE - Consolidated Natural Gas Company (NYSE: CNG) said today that it is expecting earnings for the 1989 fourth quarter to improve significantly over the 1988 fourth period, primarily due to the cold weather in December. However, earnings for full-year 1989 are expected to show a moderate decline compared to 1988.

The company noted that earnings for the first nine months of 1989 were lower largely due to warm weather early in the year, including an unusually warm January in 1989, lower wellhead prices for gas through most of the year, and other factors.

Actual earnings for the 1989 fourth quarter will not be available until late February. At the 1989 nine months, CNG's net income was $92.5 million, or $1.12 a share, compared to $129.7 million, or $1.57 a share, in the like 1988 period. Fourth quarter 1988 net income was $63.2 million or 77 cents a share, while full-year net income in 1988 was $193 million, or $2.34 a share.

CNG is one of the country's largest producers, transporters and distributors of natural gas. Its primary marketing areas are in Ohio, Pennsylvania, West Virginia, New York and other states in the Northeast. CNG explores for and produces gas and oil throughout the United States and in Canada.

WASHINGTON (JAN. 17) PR NEWSWIRE - Electronic Data Systems Corp. (EDS) (NYSE: GME) has agreed to donate systems integration services to the Smithsonian Institution for a permanent national exhibition that will open here next spring.

The exhibition, titled "Information Age: People, Information and Technology," will run for at least 10 years and is expected to be seen by an estimated 60 million people.

Under the agreement, EDS will assist the staff of the Smithsonian's National Museum of American History in the design, implementation and management of an integrated network control system that will operate and monitor the exhibition's diverse technologies.

The exhibition will be one of the largest at the Smithsonian, occupying 14,000 square feet, and it will contain the largest collection of computer "interactives" in the Smithsonian's history. These computer stations will allow visitors to experience both past and present technology and to discover the impact it has had on society over the past 150 years.

David Allison, curator of the exhibition, said that EDS' participation is essential to making these interactive stations function reliably in the exhibition, which is scheduled to open in May 1990.

EDS' systems integration work will serve to bring together the diverse technologies donated to the exhibition by numerous sponsors. Through a multi-media network of touch-screen monitors, bar code readers, PC stations, databases and video disc players, visitors will learn about how information technologies from different eras have changed history.

JASPER, AL (JAN. 17) PR NEWSWIRE - First Commercial Bancshares Inc. (NASDAQ: FSCB), Jasper, Ala. today announced record earnings for the year

ended Dec. 31, 1989 of $6.81 million (unaudited), representing an increase of 9.0 percent over the 1988.

Earnings per share (including dilutive common equivalent shares) for the year were $1.79 or 7.2 percent greater than the comparable figure for 1988. The company's total assets on Dec. 31, 1989 were $697 million as compared to $565 million on Dec. 31, 1988, representing an increase of 23.5 percent. Total stockholders' equity at Dec. 31, 1989 totalled $58.6 million.

John T. Oliver Jr., chairman and chief executive officer, stated: "The record results of operations for 1989 reflect both strong growth in all areas of the company and continued emphasis on cost control. As our strategy of creating a family of true community banks unfolds, our continued success will require that we be cost efficient providers of high levels of service to our clients."

CHAMPAIGN, IL (JAN. 17) PR NEWSWIRE - AT&T (NYSE: T) has established a strategic partnership with the National Center for Supercomputing Applications (NCSA) to enhance use of the UNIX(R) operating system in supercomputing environments to allow supercomputers to operate in an open systems and distributed computing environment.

"This joint activity is aimed at extending the open system distributed computing architecture to serve the needs of the high speed networks of the future," said William T. O'Shea, vice president of product management and development for AT&T Computer Systems.

NCSA, located at the University of Illinois at Urbana-Champaign, was established in 1985 to provide access to state-of-the-art supercomputers for university researchers. In addition, the center has set a goal of enhancing America's competitive position by helping industry adopt

advanced computational and engineering methods. Funding for the center comes from the National Science Foundation, corporate partners, the State of Illinois and the university.

According to O'Shea, the company's strategic partnership with NCSA will enhance AT&T Computer Systems' networked computing strategy by incorporating supercomputers into the widespread use of open computer operating systems and universal data connectivity.

"Open operating systems, such as the UNIX operating system, are fast gaining acceptance in desktop and minicomputer environments, but are just beginning to establish themselves in the supercomputing arena," said O'Shea.

"More and more, computer users in government, industry and education are demanding open operating systems so they can mix hardware and software from multiple vendors," O'Shea said.

"And these same users will want to work with open systems as they increase their use of supercomputers. During our first year with NCSA, we'll be developing UNIX operating system applications for supercomputing environments," he added.

Future AT&T work at NCSA will look at ways that supercomputers could network with each other and other computing systems at rates of a billion bits-per-second or more.

As part of the three-year partnership, AT&T will, during the first year, contribute initial funding and provide three AT&T Bell Laboratories scientists to the facility. Funding and staffing levels for the subsequent two years are expected to grow and will be determined later.

SOUTH BEND, IN (JAN. 17) PR NEWSWIRE - Clark Equipment Co. (NYSE: CKL) and Drexel Industries, Inc. (OTC), Horsham, Pa., today jointly announced that they have signed a merger agreement providing for Clark to acquire all of the outstanding shares and other equity interests of Drexel for a cash price of $31.38 per share, or approximately $18.85 million in the aggregate. An amount equal to $29.71 per share will be payable upon completion of the merger and the remaining $1.67 per share will be deposited in escrow and may be increased or decreased based on the net worth of Drexel on the date of the merger.

Drexel, a North American lift truck manufacturer, markets a versatile line of narrow aisle products, including electric and gas Swingmast(R) lift trucks in both cushion and pneumatic tire configurations. The company also manufactures and markets a well respected line of lift trucks engineered for use in explosive environments, such as high-dust grain and chemical applications. Clark's material handling business unit, Clark Material Handling Co., will have responsibility for Drexel operations.

As a condition to Clark entering into the merger agreement, Masucci, who will terminate his relationship with Drexel at the time of the merger, has agreed to enter into a non-competition agreement for a three-year period. Under a separate agreement, Masucci has provided Clark the right to vote Masucci's shares in favor of the proposed merger and has granted Clark an option to purchase all of Masucci's shares and other equity interests for the same cash price payable under the merger agreement. Completion of the transaction is subject to the approval of Drexel's shareholders, termination of the Hart-Scott-Rodino Act waiting period and other conditions.

Clark Equipment Co.'s business is the design, manufacture and sale of equipment to move materials, systems to transfer power and products for industrial applications.

MEMPHIS, TN (JAN. 17) PR NEWSWIRE - Holiday Corporation (NYSE: HIA) stockholders, at a special meeting today, approved a proposal for Holiday's merger with a subsidiary of Bass PLC and certain other matters.

The proposal provides for a merger of a new U.S.-based subsidiary of Bass with Holiday. The newly created Bass subsidiary will own the Holiday Inn hotel system. Immediately prior to the consummation of the merger, The Promus Companies Incorporated, a newly created subsidiary of Holiday, will be spun-off to Holiday's stockholders. Promus will own Harrah's Casino/Hotels, and the Embassy Suites, Hampton Inn and Homewood Suites hotel brands. Following the spin-off, Promus intends to pay a special cash dividend of $30 per share to be financed through new borrowings by Promus.

"We are pleased that our stockholders have approved this transaction and we look forward to completing the Bass transaction," said Michael D. Rose, chairman, president and CEO of Holiday Corporation. "We believe this proposal not only creates maximum value for our stockholders, but also positions each of the hotel brands for growth by their respective owners."

Completion of the transaction is subject to certain conditions, including

Nevada and New Jersey gaming regulatory approvals, certain other third party approvals, and receipt of solvency opinions. Completion is also subject to resolution of a second attempt by the plaintiffs in an action unrelated to this transaction filed in 1985 in federal district court in New Jersey to enjoin the transaction. As disclosed in the proxy material for the transaction, the plaintiffs first motion for injunctive relief was denied by the court on October 11, 1989. Payment by Promus of the cash dividend is also conditioned upon obtaining acceptable financing and certain regulatory approvals.

The company said that it anticipates closing of the transaction at the end of January or shortly thereafter.

TULSA, OL (JAN. 17) PR NEWSWIRE - BancOklahoma Corp. (NASDAQ: BOKC) today reported net income of $2.2 million for the fourth quarter of 1989 and $3.8 million for the year. Accrued and imputed dividends on Bank of Oklahoma, N.A. Class A Preferred Stock reduced net income available to common shareholders to $672,000 for the quarter and to a loss of $1.8 million for year.

Leonard J. Eaton, chairman and chief executive officer, said BancOklahoma's earnings for the first nine months of 1989 resulted primarily from the company's restructuring agreement completed in the third quarter. Fourth quarter earnings represented ordinary net operating income.

BancOklahoma's nonperforming assets declined at year-end to $80.2 million, the lowest level since 1983.

As previously announced, BancOklahoma is studying ways of retiring the FDIC's investment and recapitalizing the company. George Kaiser, who has served on BancOklahoma's board of directors since 1980, has advised the company of his interest in developing a proposal to this end and has resigned from the board to "eliminate any concern about a potential conflict of interest."

"George Kaiser has served BancOklahoma conscientiously and well," Eaton said. "We appreciate his continued interest in our company and the confidence about our future his actions exhibit."

At Dec. 31, 1989, BancOklahoma Corp. had total assets of $1.97 billion. Bank of Oklahoma, N.A. had total assets of $1.96 billion, total loans of $1.1 billion and total deposits of $1.7 billion with $121.2 million in primary capital, or 6 percent of total assets.

PHILADELPHIA (JAN. 17) PR NEWSWIRE -- A spokesman for Cedar Group (NASDAQ: CDRG) announced today that the board of directors has amended the company's Class A warrant agreement enabling the company to effect a 4-for-3 split of the company's Class A common stock warrants to maintain a 1-for-1 ratio with the common stock after the previously announced 4-for-3 stock split takes effect.

Simultaneously with the splitting of the Class A Warrants, the warrant exercise price will be adjusted downward to $4.50 per share. The conversion price on the outstanding 12 percent Convertible Subordinated Debentures will also be adjusted downward to $4.50 per share. Fractional shares and fractional Class A Warrants will be paid in cash. The record date for the above will be Jan. 30, 1990, with the pay date being Feb. 6.

The spokesman went on to say that "approximately $2 million of the company's 12 percent Convertible Subordinated Debentures have been voluntarily converted over the last several weeks, leaving approximately $300,000 outstanding."

HARTFORD, CT (JAN. 17) PR NEWSWIRE - Society for Savings Bancorp Inc. (NASDAQ: SOCS) today reported earnings for the year ended Dec. 31, 1989, of $46 million, or $3.86 per share. Comparable amounts for 1988 were $33.3 million and $2.80 per share.

For the fourth quarter of 1989, net income was $5.3 million, or $.44 per share, compared to $9.6 million and $.81 per share for the fourth quarter of 1988.

Non-performing assets at Dec. 31, 1989, increased by $32.2 million to $90.7 million from Dec. 31, 1988, to 2.1 percent of total assets. Non-performing assets decreased by $8.7 million from Sept. 30, 1989, to Dec. 31, 1989.

The year's results were influenced by two non-recurring transactions in the second quarter. The first transaction was a gain on the sale of all credit card receivables and accounts; the second was a loss from the accelerated amortization of goodwill. The net effect of the two non-recurring transactions was a $14.5 million gain, or $1.22 per share.

Shareholders' equity increased to $271.7 million at Dec. 31, 1989 from $231.3 million at Dec. 31, 1988, compared to shareholders' equity at Sept. 30, 1989, of $270.5 million. The increase from the third quarter of 1989 is attributable to fourth quarter net income of $5.3 million offset by a fourth quarter decline of $2.3 million in the market value of the marketable equity securities portfolio together with a cash dividend payment of $1.8 million.

Total assets were $4.4 billion at Dec. 31, 1989 compared to $3.9 billion at Dec. 31, 1988. The estimated consolidated primary capital ratio was 6.82 percent.

#90017p0226 01/17/1990 ~PR Newswire

COLUMBUS, OH (JAN. 17) PR NEWSWIRE - Banc One Corporation (NYSE: ONE) reported record 1989 earnings of $362.9 million or $2.77 per share for the

full year 1989. Earnings per share grew 6.1 percent over 1988 earnings of $2.61. This represents a continuation of Banc One's record of increased earnings every year since the corporation was founded in 1968. Fourth quarter earnings of $92.6 million or $.70 a share grew 4.5 percent over 1988 fourth quarter earnings of $.67 a share. For the full year 1989, Banc One achieved a return on average assets of 1.42 percent and a return on average shareholders' equity of 16.8 percent.

During the fourth quarter, Banc One reduced its non-performing assets by $32 million. This decrease of 11.1 percent lowered the ratio of non-performing assets to loans to 1.44 percent at year end. "We are encouraged by this positive trend in light of economic conditions," said Banc One Chairman John B. McCoy. Net loan losses and total delinquencies also declined in the fourth quarter. Banc One has maintained the reserve for possible loan losses at 1.4 percent of loans.

The Corporation's Board of Directors also announced a 10 percent stock dividend payable on March 2, 1990, to shareholders of record as of February 16, 1990. This continues Banc One's policy of paying a 10 percent stock dividend in every even year beginning in 1970. The cash dividend of 26 cents per share will be paid March 31, 1990, to shareholders of record on March 15, 1990. This dividend, which will be paid on the new shares issued as a result of the stock dividend, represents an effective increase in the cash dividend of 10 percent. Over the last decade, Banc One's cash dividend has been increased on fourteen occasions and has grown at an annual compound rate in excess of 13 percent.

As announced Monday, January 15, Banc One and the Federal Deposit Insurance Corporation have determined that the completion of the assistance transaction involving Bank One, Texas, NA will be delayed from January 17 until the last week in January to permit completion of asset valuations.

Banc One Corporation had assets of $26.6 billion and common equity of $2.25 billion at year end 1989. Banc One Corporation now operates 51 affiliate banks and 563 branch offices in Indiana, Kentucky, Michigan, Ohio and Wisconsin.

#90017p0231 01/17/1990 ~PR Newswire

CHICAGO (JAN. 17) PR NEWSWIRE - United Airlines announced today it will offer attractive mileage bonuses to customers using United for trans-Pacific flights between the United States and Asia or the South Pacific.

Customers flying United during the eligibility period can earn 5,000 bonus miles for a one-way flight or 10,000 bonus miles for a round-trip flight in their Mileage Plus frequent flier accounts.

The promotions are called "Super Schedule, Super Bonus" for U.S.- Asian service and "Down Under Bonus" for United's U.S.-South Pacific service. The promotions draw attention to United's strong schedules and service including the new Boeing 747-400 aircraft.

"United Airlines is the only airline offering these bonuses for trans-Pacific flights to and from both Asia and the South Pacific," said Patricia A. Engels, vice president-market development. "United is committed to being fully competitive in all respects on its flights across the Pacific."

United's special Super Schedule, Super Bonus promotion is open to travelers taking trans-Pacific flights between the United States and Asia except flights to and from Hawaii. Travel must be between Jan. 15 and April 15, 1990. The offer is good for travel in first class, business class or economy.

Markets for which passengers flying United can qualify for the bonus miles are between the United States and Tokyo, Hong Kong, Bangkok, Singapore, Taipei, Osaka, Seoul, Manila, Beijing and Shanghai.

One round-trip flight on United between the United States (except Hawaii) and Asia during this time period plus the new Super Schedule Super Bonus will earn a customer enough miles for one free Saver award ticket for coach travel within the continental United States.

United's special Down Under promotion is open to travelers taking flights between the United States (including Hawaii) and Australia and New Zealand between Feb. 1 and May 31, 1990. The offer is good for any class of service.

Markets for which passengers flying United can qualify for the bonus miles are between the U.S. and Sydney, Melbourne and Auckland.

#90017p0234 01/17/1990 ~PR Newswire

ATLANTA (JAN. 17) PR NEWSWIRE - Atlanta-based CASE vendor KnowledgeWare (NASDAQ: KNOW) began shipping today its OS/2 Presentation Manager version of the Application Development Workbench(TM) (ADW)/Design Workstation and Application Development Workbench(TM)/Construction Workstation. The ADW is KnowledgeWare's strategic CASE offering for IBM's newly announced AD/Cycle strategy. The ADW contains all of the functions of KnowledgeWare's current DOS-based offering, the Information Engineering Workbench (IEW) and, additionally, uses the power of OS/2 to support enhanced CASE capabilities.

The ADW/Design and Construction Workstations are being used by Beta test sites in several manafacturing, insurance, utility, and financial institutions to generate complete COBOL or Cross System Product(a) applications from graphic requirements and design specifications.

Commercial availability of the two products is scheduled for the first quarter of 1990.

The Application Development Workbench (ADW) is a set of four integrated software products that automate the planning, analysis, design, and construction phases of the systems development life cycle.

The individual product names are:

-- Application Development Workbench/Planning Workstation (ADW/PWS)
-- Application Development Workbench/Analysis Workstation (ADW/AWS)
-- Application Development Workbench/Design Workstation (ADW/DWS)
-- Application Development Workbench/Construction Workstation

KnowledgeWare builds, markets, and supports Computer-Aided Software Engineering (CASE) tools for use by information systems development professionals.

NEW YORK (JAN. 17) PR NEWSWIRE - Primerica Corporation (NYSE: PA) today announced that net income for the quarter ended Dec. 31, 1989 was $95.9 million, or $.87 per share, versus $32.5 million, or $.75 per share, before a gain of $35 million or $.76 per share from the sale by Commercial Credit of American Credit Indemnity (ACI) in the prior year period.

Net income for the year ended Dec. 31, 1989 was $289.0 million, or $2.87 per share, versus $126.8 million, or $2.85 per share, for 1988, before the gain from the sale of ACI.

Revenues were $1.585 billion for the 1989 fourth quarter, and $5.695 billion for the year, versus $291.5 million and $1.004 billion for the 1988 fourth quarter and year.

All 1989 results reflect the combined operations of "old Primerica" and the former Commercial Credit Group, Inc., and thus are not directly comparable to the 1988 periods, which include results only from Commercial Credit operations. Earnings per share are based on 112.1 million and 102.3 million average common and equivalent shares in the 1989 fourth quarter and 12 months, versus 45.4 million and 45.8 million for the respective 1988 periods.

CONTACT: Mary McDermott, 212-891-8870, or Ken Koprowski, 212-891-8871, both of Primerica.

GULPH MILLS, PA (JAN. 17) PR NEWSWIRE - Henkel Corporation, headquartered here, announced that it has formed a long-term licensing relationship in the field of metal treatment chemicals with Nihon Parkerizing Company, Ltd., of Tokyo, Japan.

Since 1929, Nihon Parkerizing has had a licensing relationship with the Parker Chemical Company, which was acquired by Henkel in 1987. Parker was merged with Amchem Products Inc., acquired by Henkel in 1980, to form Henkel's Parker+Amchem Group.

Henkel Corporation is a wholly owned subsidiary of Henkel KGaA of West Germany, a major producer of consumer detergents and adhesives, and specialty industrial chemicals, with 1988 sales of $6.0 billion worldwide.

Nihon Parkerizing Company is a major producer and jobber of surface treatment chemicals, as well as related equipment, with 1988 sales of $800 million worldwide.

This affiliation of Nihon Parkerizing Company, with Henkel Corporation and Henkel KGaA in Europe, provides the worldwide metal finishing industry

with the latest pretreatment technology and services.

SAN JOSE, CA (JAN. 17) PR NEWSWIRE - Wyse Technology Inc. (NYSE: WYS) announced today an estimate for third fiscal quarter revenues and a number of developments with respect to the pending acquisition of Wyse by Channel International Corp., an investor group based in Taipei, Taiwan.

Wyse has been advised by the Channel International group that Outward Investment Approval has now been obtained from the Investment Commission of the Republic of China and that approval of the acquisition will not be required prior to the merger from the Hsin Chu Scientific Park District, where Wyse's principal manufacturing subsidiary is located. In addition, Wyse has been notified by the committee on Foreign Investment in the United States (CFIUS) that no action will be taken by CFIUS with respect to the pending acquisition.

Wyse also announced that it has filed a motion to dismiss the pending lawsuit which was filed in Delaware Chancery Court against the company and certain of its directors in December 1989 entitled "BTZ, Inc. v. Wyse Technology Inc., et al." Wyse is unable to predict when the motion will be heard. In a previous development, the plaintiff's motion for an order expediting discovery in the case was denied by the Court.

Wyse also reported that it presently estimates that revenue for the third fiscal quarter ended Dec. 31, 1989 will not exceed $112 million and that the company expects to report a loss for the quarter in excess of the $3.6 million loss for the prior quarter.

Wyse Technology is a leading independent supplier of microprocessor-based products, which include terminals, IBM PC-compatible computers, monitors and multiuser systems. The company sells its products through customers that add value, such as distributors, value-added resellers and original equipment manufacturers. Headquartered in San Jose, Wyse operates sales offices throughout the United States and in Canada, Australia, Hong Kong and Western Europe. Wyse employs about 3,000 people worldwide.

SHREVEPORT, LA (JAN. 17) PR NEWSWIRE - Arkla Exploration Company (NYSE: ARK) announced today the successful tests of two new field discoveries, an oil find in the Tuscaloosa Trend of southwest Mississippi and a natural gas discovery in the Arkoma Basin of north Arkansas.

The first of the wells, the No. 1-35 Robertson, is located just north of the Louisiana border in Amite County, Miss., three miles southeast of ARK's 1987 Thanksgiving Field discovery.

The Robertson well was drilled to a total depth of 12,500 feet, and was tested at a rate of 265 barrels of oil per day and 232,000 cubic feet of natural gas at a flowing tubing pressure of 1,751 pounds per square inch on a 12/64-inch choke. The well flowed from select perforations in the Tuscaloosa sand formation located between 12,148 and 12,158 feet in depth.

According to Alan M. Warren, president and chief operating officer of Arkla Exploration, the company plans to spud a confirmation well on the prospect in the first quarter of 1990.

Arkla Exploration holds a 50 percent working interest in the Robertson well, and the 2,700 acres of leasehold on the prospect. Harry H. Cullen of Houston and Pennco Energy, Inc., of Baton Rouge, La. each own a 25 percent interest.

Arkla Exploration also completed a Hale formation natural gas discovery in the far eastern end of the prolific Arkoma Basin.

The No. 1 Simpson well is located in Faulkner County, Ark., approximately 35 miles north of Little Rock, or about 12 miles east of the nearest Hale sand production in the Greenbriar Field.

The well was drilled to 6,500 feet in the Mississippian Fayetteville Shale and was plugged back and perforated in an interval between 4,492 and 4,504 feet in the Morrowan Hale sand.

This zone was tested at a daily rate of 1.987 million cubic feet of gas and 199 barrels of water at a flowing tubing pressure of 782 pounds per square inch through a 24/64-inch choke.

Arkla Exploration, which holds a 59 percent working interest in the well, was joined in the venture by Harry H. Cullen and Nehawka Energy, Ltd. of Phoenix, Ariz., each of which have a 19.7 percent working interest.

Arkla Exploration is the operator of both wells.

ELKINS PARK, PA (JAN. 17) PR NEWSWIRE - The trustees of Mortgage and Realty Trust (NYSE: MRT), a real estate investment trust, today declared a quarterly dividend of $.45 per share, payable Feb. 20, 1990, to shareholders of record on Jan. 29.

Operating results (unaudited) were reported as follows:

Quarter ended Dec. 31	1989	1988
Net income	$4,963,000	$5,277,000
Net income per share	$.45	$.49
Average shares outstanding	10,964,000	10,718,000

In recent years, since the trust began investing in real estate equities, dividend considerations have been based upon cash flow as well as earnings. The trustees have determined it would be prudent, in view of present real estate market conditions, to return to their previous policy of basing dividend distributions primarily on earnings.

Mortgage and Realty Trust is a self-administered real estate investment trust investing primarily in floating-rate real estate loans and real estate equities nationwide. The trust's common shares are traded on the New York Stock Exchange.

MINNEAPOLIS (JAN. 17) PR NEWSWIRE - First Bank System Inc. (NYSE: FBS) today reported net income of $2.4 million which, after preferred dividends resulted in a loss of 27 cents per share for the year ended Dec. 31, 1989.

These results compare with a net loss of $310.0 million, or a loss of $5.25 per share, for 1988, which included losses of $506.3 million resulting from the decision to sell a significant portion of its investment securities.

The 1989 results include a fourth-quarter provision for credit losses of $175.0 million, compared with $35.5 million in the third quarter of 1989. Total 1989 provisions for credit losses were $253.5 million, compared with $76.0 million in 1988. The increase in 1989 provision is related to an increase of $124.1 million in domestic net charge-offs and additional domestic loan loss reserves.

First Bank System acting chief executive officer and vice chairman, Darrell G. Knudson, said, "We conducted a rigorous review of our loan

portfolio in the fourth quarter, taking into account the deterioration of conditions in a number of economic sectors and also the fourth-quarter deterioration of specific credits. Based upon this review, we established our fourth-quarter levels of provision and charge-offs."

The company reported a net loss of $107.0 million for the fourth quarter of 1989 compared with a net loss of $427.4 million in the fourth quarter of 1988. The results for the current year's fourth quarter include an increase of $151.1 million in provision for credit losses compared to the same period a year ago. The loss in the fourth quarter of 1988 resulted from the company's decision to sell $4.7 billion of investment securities.

#90017p0259 01/17/1990 ~PR Newswire

CHARLOTTE, MI (JAN. 17) PR NEWSWIRE - Spartan Motors, Inc. (NASDAQ: SPAR) reports preliminary results indicate that revenues for its fourth quarter, ended Dec. 31, 1989, rose to a record of approximately $9.3 million, from $6.3 million for the fourth quarter ended Dec. 31, 1988.

This brought revenues for the year to a new record of approximately $36.2 million, from $33.5 million in 1988.

George W. Sztykiel, Spartan president, also reported that order backlog at the beginning of the new year 1990, stands at a record $22 million, compared to $9.7 million a year ago. Much of this backlog is for the company's newly introduced Eurospace line of fire trucks. However, Sztykiel also pointed out, the company also has a sizable backlog of motorhome chassis, equivalent to 50 percent of Spartan's 1989 motorhome chassis output. Motorhomes are Spartan's most recent major new market entry, and the company is greatly encouraged about its prospects in this market. As a result of its recent plant expansion, Spartan has been able to step up production and to shorten delivery times, in meeting its higher

sales volumes.

According to Sztykiel, these preliminary results and record backlog prove that the company's expansion and new production introduction strategy, which had resulted in short-term profitability sacrifices in 1989, is sound. Spartan is now confident that 1990 will be a year of continued, tremendous growth and opportunity.

Spartan Motors, Inc. is the leading manufacturer of custom-designed fire truck, motorhome and other special and emergency vehicle chassis.

PITTSBURGH (JAN. 17) PR NEWSWIRE - Alcoa (NYSE: AA) earned a record $944.9 million, or $10.67 a common share, for 1989, the company said today.

The previous record year was 1988 when the company earned $861.4 million, or $9.74 a common share.

For the fourth quarter of 1989, Alcoa earned $164.7 million, or $1.88 a common share, compared with fourth quarter 1988 earnings of $218.7 million or $2.47 a common share.

Paul H. O'Neill, chairman, noted that "Alcoa began its second century with record earnings in 1989, although fourth quarter earnings were down from last year's fourth quarter, reflecting the continuing trend of an economic slowdown that began in mid-year.

"Operations in Australia and Brazil accounted for 42 percent of Alcoa's 1989 earnings compared with 25 percent in the prior year, mainly due to strong prices for alumina and ingot for most of the year," said O'Neill. Alcoa of Australia, 51 percent owned by Alcoa and the world's largest producer of alumina, had record earnings in 1989.

Alcoa's fourth quarter 1989 earnings were lower than third quarter earnings due to a decline in shipments and revenues, lower prices for ingot and most fabricated products, a shift in product mix, and higher raw material costs.

Included in earnings for the full year 1989 were unfavorable translation and exchange adjustments of $8.9 million, or 10 cents a common share. For 1988, these unfavorable adjustments were $87.0 million, or 99 cents a common share.

For the fourth quarter of 1989, earnings included unfavorable translation and exchange adjustments of $14.5 million, or 16 cents a common share. Fourth quarter 1988 earnings included net negative adjustments of $49.1 million, or 56 cents a common share, which included a charge of $37.3 million, or 42 cents a common share, for translation and exchange adjustments.

Sales for 1989 were a record $10.91 billion, up 11 percent from $9.80 billion in 1988. Sales for the 1989 fourth quarter were $2.69 billion, up 2 percent from $2.65 billion in the comparable 1988 quarter.

Shipments for 1989 reached a record 2,579,000 metric tons (mt), up 3 percent from 2,503,000 mt in 1988. Fourth quarter 1989 shipments were 635,000 mt, down 6 percent from 676,000 mt in the comparable 1988 quarter.

Return on shareholders' equity for 1989 was 19.1 percent, compared with 20.2 percent for 1988.

Alcoa is the world's largest producer of aluminum products. The company has 147 operating and sales locations in 18 countries, employing 61,000 people.

CONCORD, N.C. (JAN. 17) PR NEWSWIRE - CK Federal Savings Bank (NASDAQ: CKSB) today reported net earnings of $686,986 or $.51 per share for the quarter ending December 31, 1989, the first quarter of fiscal 1990, compared to $675,387 or $.54 per share for the same period of the previous year. While overall earnings were up for the quarter, earnings per share were down slightly due to the issuance of 317,536 shares of common stock in connection with the acquisition of First State Savings and Loan Association in Gastonia on October 31, 1988. Additionally, while earnings for the current quarter reflected a modest increase of 1.7 percent over the corresponding quarter of the previous year, the previous first quarter included a $297,000 gain from the sale of FHLMC preferred stock. Excluding the effect of this one-time gain, and considering a full three months operations for all branches, earnings for the first quarter would be approximately 30 percent greater than the corresponding quarter of the previous year.

Gabe S. Stewart, Chairman of the Board and Chief Executive Officer, stated that he was quite pleased with the association's performance in light of the recent publicity regarding thrifts following the Financial Insitutions Reform, Recovery and Enforcement Act which was signed into law this past

summer. While many thrifts are experiencing a loss of customers in the wake of this publicity, CK Federal's deposits continue to grow and were up $9.3 million to $340.6 million, a 2.8 percent increase during the quarter. At the same time, the cost of those deposits decreased to 8.08 percent for the quarter form 8.11 per cent for the quarter ending September 30, 1989. As of December 31, 1989, total assets were $383.5 million, an increase of 2.5 percent during the quarter.

One of the more important provisions of FIRREA relates to three new capital standards imposed on all thrifts as of December 7, 1989. CK Federal's capital significantly exceeds the regulatory requirement in each area. Total stockholder's equity as of December 31, 1989 was $29.7 million or 7.73 percent of total assets.

CK Federal continues to operate 9 offices in central and western North Carolina.

#90017p0275 01/17/1990 ~PR Newswire

MELROSE PARK, IL (JAN. 17) PR NEWSWIRE - Alberto-Culver Co. (NYSE: ACV.A, ACV) today announced record sales and earnings for the first quarter of its fiscal year, the company's 21st consecutive quarter of record year-to-year results.

Net earnings for the quarter, which ended Dec. 31, 1989, rose 19.5 percent to $6.6 million or 50 cents per share, compared to the $5.5 million or 42 cents per share that was earned during the first three months of the preceding fiscal year. Sales of $176.3 million topped 1989's first-quarter total of $162.5 million by 8.5 percent.

Leonard H. Lavin, chairman and chief executive officer of Alberto- Culver, said that challenges overcome during the quarter make the financial results all the more satisfying.

"Frigid temperatures during December are estimated to have cost our wholly owned Sally Beauty Co. subsidiary more than $2 million in sales, while manufacturing problems, since resolved, caused our toiletries and professional divisions to miss an additional $1.5 million in sales," he said.

Lavin noted that the results also were accomplished without the benefit of a major acquisition (such as Sally Beauty Co.'s purchase of 175 Save Way stores in October 1988) or any major new product introductions. Additionally, foreign exchange rates were less favorable this year than in fiscal 1989, meaning that significant gains recorded by the company's

international group translated to less in U.S. dollar terms.

"Despite these circumstances, every single profit center exceeded last year's comparable quarter in sales by a comfortable margin," Lavin said. "Most important, they contributed profits that allowed us to exceed our budgeted goal of a 15-percent year-over-year gain in net earnings."

Lavin concluded that the sales and earnings figures add up to a "very satisfactory performance" by the company in a worldwide business environment that is anything but ideal.

"Clearly the economy is not as buoyant as it was, but barring the unforeseen, we project that Alberto-Culver will continue to do well in 1990."

Lavin also announced that the board of directors approved an 11.1 percent increase in the quarterly cash dividend on both its Class A (AVC.A) and Class B (ACV) common stock, plus a two-for-one stock split on both classes. These actions are outlined fully in a separate release also issued today.

MORRISTOWN, NJ (JAN. 17) PR NEWSWIRE - Heldor Industries, Inc. (AMEX:

HDR), announced today, Jan. 17, 1990, a pre-tax operating loss of $4,342,000 for its fiscal year ended Oct. 31, 1989, as compared to a pre-tax operating profit of $1,001,000 in 1988. The company reported a net loss in 1989 of $4,043,000 or $1.10 loss per primary share as compared to net income in 1988 of $656,000 or $.18 per primary share.

Revenues in 1989 were $91,226,000 as compared to $96,962,000 in fiscal 1988. Commenting on the company's performance, Robert A. Ellington, chairman and chief executive officer said, "A decrease in revenues of high margin pool kit sales was caused by unprecedented inclement weather conditions throughout the United States. Additionally, overall revenues were impacted by lower sales of distributed products, partially offset by higher manufactured chemical sales." Ellington further stated that, "The company carried higher inventories in 1989 primarily of manufactured products which resulted in higher interest carrying charges for 1989."

Ellington stated that, "The company's gross margins were 3.1 points lower than 1988 reflecting the change in volume, product mix and higher manufacturing costs associated with the depressed sales."

Additionally, Heldor's board of directors announced a management restructuring whereby its chairman of the board and chief executive and operating, Robert A. Ellington, would be replaced by a new chief executive and operating officer to be selected by a special committee of the board of directors. Ellington will continue as a director of the company. It is anticipated that the new executive would be selected on or before March 1, 1990.

Heldor Industries, Inc. is a leading manufacturer and distributor of swimming pool equipment, spas, jetted tubs, chemicals and supplies.

#90017p0281 01/17/1990 ~PR Newswire

ST. LOUIS (JAN. 17) PR NEWSWIRE - Anheuser-Busch, Inc. officials have announced that Busch Light beer will be available to consumers in Michigan beginning the first week of February.

The product has been available on a pilot market basis since May 1989 in a region that includes Louisiana, Missouri, New Jersey, Illinois, Iowa, parts of Kansas and Longview, Texas.

Like all Anheuser-Busch beer products, Busch Light is brewed with the finest natural ingredients, including hops, barley malt, cereal grains and water. Busch Light contains 110 calories per 12-ounce serving -- which is

comparable to other light beers.

Busch Beer has shown continual sales increases since being introduced in the midwest in 1955. It is now available in 41 states and the District of Columbia.

The new beer features a different brewing process than Busch Beer that produces a lighter, brisk and invigorating taste.

Busch Light utilizes cold filtering brewing technology which delivers a Busch-like smoothness in a light beer.

Busch Light will benefit from the brewing industry's most comprehensive quality control program, which includes the daily tasting of Busch Light by experts at the company's headquarters in St. Louis.

Packaging for Busch Light will feature distinctive blue and silver 12-ounce longneck glass bottles and cans.

The new product will be supported by a wide range of marketing support activities, including television, radio, print and outdoor advertising.

Busch Light utilizes a distinctive advertising campaign entitled "Make the Easy Choice." Advertising for the new brand contrasts humorous, hard situations with the "easy" drinking taste of Busch Light.

Busch Light is a product of Anheuser-Busch, Inc., the world's largest brewer. In addition to Busch Light, the company brews Budweiser, Bud Dry, Bud Light, Michelob, Michelob Light, Michelob Dry, Michelob Classic Dark, Busch and LA beers and King Cobra, a malt liquor.

NEW YORK (JAN. 17) PR NEWSWIRE - Dealers Digest, Inc. is launching a new publication which will deal exclusively with the use of voice and data communications technologies in the financial services industry. The inaugural issue of the new magazine, called Communications in Finance, is scheduled for March 1990. It will be published quarterly, appearing as a pull-out supplement in "Computers in Banking" and "Wall Street Computer Review," both leaders in the coverage of financial technology.

"Communications in Finance will appeal to telecommunications and operations executives working in banking and brokerage firms," noted Brian Hellauer, special projects editor in the computer publications division of

Dealers Digest. "While there are many magazines which cover the communications industry, ours will be the first to examine how the deluge of new products and services has affected the end user in financial services.

"Most of the studies we have seen place financial services at or near the top of the list in terms of spending on both voice and data communications " continues Hellauer. "The sheer size of this market and our expertise in covering it should make the magazine attractive to readers and advertisers alike."

Regular editorial departments in Communications in Finance will include: a feature-length article reporting on an aspect of communications that is changing the way financial services companies do business; coverage of the latest moves of the major service providers (AT&T, MCI, etc.); Behind the Lines, featuring opinion and commentary from industry leaders, a case-history section, with first-person articles detailing winning combinations of technology and applications; and a new products department.

The magazine will be published in March, May, September and December of 1990, with advertising closing dates approximately five weeks before the mailing date. Rates for a single black and white full page begin at $6,080, with a 10-percent discount for charter advertisers and 4x schedules.

Dealer's Digest Inc. is a New York-based publishing and information services company. The firm is a division of United Newspapers plc.

SPRINGFIELD, VA (JAN. 17) PR NEWSWIRE - Versar Inc. (AMEX: VSR) announced today that it is offering a service to the construction and materials industry. The service involves testing materials for their resistance to radon intrusion into homes. The construction and materials industry, building owners, and occupants should all benefit from the ability to rate materials for their ability to prevent or minimize the entry of radon into homes.

Versar has developed a pressurized radon chamber (patent pending) specifically for the purpose of testing a variety of construction materials for their resistance to radon intrusion into houses and other buildings. Some of the mateirals that have been tested so far include membranes, barriers, sealants, caulks, foams, and cementitious materials.

Radon is an odorless radioactive gas that occurs naturally. It is a

product of the natural decay of uranium in the ground. Radon seeps into houses and structures and eventually may cause lung cancer. It is estimated that radon is the second leading cause of lung cancer in the United States.

Radon levels have been measured in over two million houses. The concern over radon has caused the Environmental Protection Agency to establish action guidelines if certain levels are exceeded and some states now require radon tests to be performed before a structure changes ownership. In light of these and other developments, the focus is shifting to designing homes which are more radon resistant.

Dr. Michael Markels Jr., president and chief executive officer of Versar Inc., said, "Indoor air pollution affects all Americans who spend, on the average, 90 percent of their lives indoors. The Versar approach to characterizing the performance of construction materials, we believe, is the first step in eventually characterizing and labeling all products and materials used in homes and offices. Versar is pleased to be taking the lead in this developmental area of environmental protection."

Versar provides a wide range of scientific and technical services to solve environmental and health and safety problems caused by pollutants, hazardous materials, and toxic substances.

For more information on this material testing service, contact William F. McKelvey of Versar Inc., 2101 Cabot Boulevard West, Suite 4, Langhorne, Pa., 19047.

RESEARCH TRIANGLE PARK, NC (JAN. 17) PR NEWSWIRE - Northern Telecom (NYSE: NT) is installing a new manufacturing process to help completely eliminate the use of chloroflourocarbons (CFCs) in the Research Triangle Park, N.C., facility by the end of 1990.

Company officials believe Northern Telecom, recognized by the EPA as an industry leader in reducing CFCs consumption, will be the first large manufacturer in the U.S. to eliminate the use of CFCs. CFCs, when released into the atmosphere, contribute to the depletion of the ozone layer above the earth. A report released nationally Tuesday by the Natural Resources Defense Council lists Northern Telecom as the nation's 9th largest emitter of CFCs, and the largest CFCs emitter in North Carolina. A news conference will take place at 3:00 p.m. today unveiling the new process which is being implemented. For more information on Northern Telecom, contact Beth Schnackenberg at 919-992-0653 or John

Callahan at 919-992-4172. For information from the EPA, contact Stephen Anderson at 202-475-9403.

CONTACT: Beth Schnackenberg, 919-992-0653 or John Callahan, 919-992-4172, both of Northern Telecom; Stephen Anderson of the Environmental Protection Agency, 202-475-9403

DETROIT (JAN. 17) PR NEWSWIRE - Barden Communications, Inc. announced today that it has increased its stake in First Federal Bancorp, Inc. (AMEX: FFS) from 5.3 percent to approximately 9.8 percent of the total outstanding stock of First Federal. First Federal is the holding company for First Federal Savings Bank and Trust (Pontiac, Mich.) and Citizens Federal Savings Bank (Jacksonville, Fla.), and is the fifth-largest thrift institution headquartered in Michigan, with total assets of $1.5 billion as of Sept. 30, 1989. Barden is in the process of preparing the necessary SEC filings that will be submitted in the next few days.

Don Barden, chairman and president of Barden Communications, said, "I am confident that there will be a bright future for First Federal's shareholders; and in that regard, I intend to encourage First Federal to seek a business association with another financial institution." Barden also said that he would not rule out the possibility of a business combination between First Federal and Barden Communications.

With its increased stake in First Federal, Barden Communications is now believed to be the largest stockholder of the bank.

Barden Communications is a principal owner of Barden Cablevision, the firm currently completing the construction of the $140 million Detroit television system. Barden is also active in real estate development, including the recently commenced construction on the new $61 million Wayne County Detention Facility in Hamtramck. He is a major investor in a group that recently purchased the London Chop House Restaurant and he serves on the Board of Directors of First Independence Bank of Detroit and is very active in several civic organizations.

#90017p0298 01/17/1990 ~PR Newswire

HIGHLAND PARK, MI (JAN. 17) PR NEWSWIRE - Chrysler Corporation (NYSE: C) today reported it will notify owners of certain 1989 and 1990 model year vehicles equipped with naturally aspirated 2.2- or 2.5-liter engines to return their vehicles to dealers for replacement of the engine valve cover and gasket. About 625,000 vehicles are involved and the servicing of the vehicles will be done at Chrysler's expense.

The company said that the gasket may dislocate and cause an engine oil leak. Depending on the location and size of the oil leak, an engine compartment fire could result.

Chrysler said that the recall involves the following models manufactured between early-September 1988 and mid-September 1989: Chrysler LeBaron, LeBaron GTS; Dodge Dynasty, Daytona, Lancer, Shadow, Spirit, Aries, Omni, Caravan and Dakota; Plymouth Sundance, Acclaim, Reliant, Horizon and Voyager.

The company said it would mail notices to owners starting in early February. Owners of the earliest-built vehicles will receive their notices first. Then, as additional replacement parts become available, notices will be mailed to more owners until all have been notified. Chrysler expects to have all of the notices mailed by April. Owners should contact their dealer for a service appointment after receipt of the notice.

Chrysler said it has no reports of accidents or injuries due to this condition.

HOUSTON (JAN. 17) PR NEWSWIRE - American Capital Management & Research, Inc. (NYSE: ACA), today reported net income of $5.16 million, or $0.21 per share, for the fourth quarter of 1989, compared with $5.24 million, or $0.22 per share, for the same period a year ago. Fourth quarter revenues totaled $25.30 million, up from $23.95 million during the fourth quarter of 1988.

For the 12 months ended Dec. 31, 1989, net income was $19.80 million, or $0.81 per share, versus $23.32 million, or $0.96 per share, for the 1988 period. Revenues were $101.81 million, up from $99.20 million a year ago. The 1988 12-month results include ten months of revenues and expenses from the company's transfer agency, ACCESS, which was acquired Feb. 29, 1988.

For the fourth quarter and 12 months, revenues were up although commission income was down on disappointing levels of mutual fund sales. Increases in revenues have been offset by costs of investments made to enhance the company's service and marketing operations. Steady growth and very favorable increases in the profitability of the company's joint venture with the A. L. Williams Corporation in the operation of the family of funds under the Common Sense Trust have had a positive effect on the company's earnings. The A. L. Williams Corporation is a wholly owned subsidiary of Primerica Corporation.

The company's total assets under management as of Dec. 31, 1989, were $15.0 billion, up from $14.3 billion a year earlier, primarily because of positive investment performance and market conditions in 1989. Sales of fund shares at net asset value were $324.4 million in the fourth quarter, versus $284.1 million a year earlier. Such figures include sales of $156.9 million and $106.5 million, for the respective periods, of the Common Sense Trust.

For the 12 months ended Dec. 31, 1989, sales were $1.28 billion, including $556.4 million of sales for the Common Sense Trust, as compared to total sales of $1.31 billion for the prior year, which included $485.6 million for the Common Sense Trust.

American Capital Management & Research, Inc., is a Houston-based investment management and marketing organization which provides investment advisory services to 37 mutual funds and closed-end investment companies. Primerica Corporation (NYSE: PA) owns approximately 83 percent of the outstanding common shares of American Capital.

#90017p0304 01/17/1990 ~PR Newswire
BLOOMFIELD, CT (JAN. 17) PR NEWSWIRE - Kaman Aerospace Corp. has received a $12 million contract from GE Aircraft Engines to design and manufacture performance improvement components for the CF6-80C2 commercial jet engines. These parts are designed to be installed on the engines' fan reverser fixed structures which Kaman currently produces.

"This award expands our business in the commercial aerospace market," according to Walter R. Kozlow, president of Kaman Aerospace. "It is further evidence of GE's confidence in our total capability to provide engineering, as well as manufacturing services for their advanced engines."

Under the contract, Kaman will produce components which will improve engine performance and fuel efficiency. These components, made of bonded aluminum/honeycomb construction with acoustic treatment, will be manufactured in Kaman's Bloomfield and Moosup, Conn., facilities with final assembly at the Gilman, Conn., plant.

Kaman was awarded a $30 million add-on contract in October from GE to continue manufacturing fan reverser fixed structures for CF6-80C2 engines. The original contract, awarded in April 1987, was $80 million for production through 1990.

Kaman Aerospace, a subsidiary of Kaman Corp. (NASDAQ: KAMNA), is a defense and commercial aerospace manufacturer. The company is the prime contractor for the SH-2 helicopter series, and is a subcontractor on various space, fixed wing and rotary wing aircraft. Kaman Aerospace also is active in advanced technology ground and space defense systems.

DALLAS/FORT WORTH AIRPORT, TX (JAN. 17) PR NEWSWIR - AMR Corp. (NYSE: AMR) parent company of American Airlines Inc., today reported preliminary unaudited net earnings of $454.8 million for 1989 and $38.9 million for 1989's fourth quarter.

In 1988 AMR earned $476.8 million for the year and $116.7 million in the fourth quarter.

"As a result of the confluence of sharply higher fuel costs and only very slightly higher yields," said Robert L. Crandall, the company's chairman and president, "American's fourth quarter results were very disappointing.

"Despite record profitability during the first nine months of 1989, an extraordinarily rapid rise in fuel costs during the final quarter of the year badly penalized the full-year results," Crandall said.

As the quarter progressed, AMR's fuel prices rose steadily, reaching 96 cents a gallon in the final week of the year, a 65.5 percent increase over the 58 cents a gallon paid during the first week of the year. Although fuel prices rose, ticket prices did not; the fourth quarter's fuel cost per gallon was up 30.2 percent from last year while yield rose only 1.0 percent.

For the fourth quarter, AMR's earnings per share (both primary and fully diluted) were 57 cents compared to $1.93 primary and $1.87 fully diluted earnings per share a year ago. Revenues for the three-month period amounted to $2.59 billion, a 9.2 percent increase from the $2.37 billion in the fourth quarter a year ago.

AMR's primary earnings per share for the year 1989 were $7.16 (fully diluted was $7.15) compared to 1988's primary earnings per share of $7.92 (fully diluted of $7.66). Revenues increased 18.8 percent to $10.48 billion, up from $8.82 billion in the like period a year ago.

#90017p0310 01/17/1990 ~PR Newswire

NEW YORK (JAN. 17) PR NEWSWIRE - In a major global realignment designed to exploit the international potential of EMI's artists and repertoire, Jim Fifield, president and chief executive officer, EMI Music Worldwide, today announced the integration of EMI's International Marketing Division into EMI's various labels and marketing sectors.

Commenting from EMI's New York headquarters, Fifield stated, "We are trying to simplify the global process, strengthening focus in the launch of international acts in two major areas: focus on artists and repertoire, and focus on international markets. We are moving the responsibility for internatioanl artist development into the labels and responsibility for the actual marketing and promotion of international releases into the sectors responsible for performance in those markets. The reorganization will position each EMI company closer to the sources of repertoire, giving them a more direct line of communication and information."

EMI's Anglo-American repertoire sources will have their own international artist development staff. This represents no change in responsibilities for Enigma, where Laura Annick continues to manage the international marketing function, nor Chrysalis, where Mike Allen continues in the same role. Jeremy Hammond will move to Capitol Records in the role of vice

president, International Artist Development; Jean-Pierre Bommel will become vice president, International Artist Development for EMI-USA, replacing Gabi Zangerl who returns to EMI Electrola to take up a new role; John Briley will be director, International Artist Development for EMI Records (UK); Pam Garode will be responsible for International Artist Development for SBK.

Gilbert Ohayon is appointed marketing director, International Repertoire, Continental Europe, reporting to Alexis Rotelli, managing director, Continental Europe. David Stockley, managing director, international, EMI Music Worldwide, announces the mid-February appointment of Jean-Francois Cecillon as marketing director, International Repertoire for the sector that includes the Far East, Southeast Asia, Australasia, South Africa, Latin America.

Don Zimmermann, president, International Marketing Division, BMI Music Worldwide, will continue to report to Jim Fifield in a new capacity as senior adviser, working on the integration of the International Marketing Division and other worldwide projects.

HUNT VALLEY, MD (JAN. 17) PR NEWSWIRE - Integrated Health Services (IHS), a provider of specialized long-term care, rehabilitation, audiology services and senior housing communities, announced today that it has purchased Waterford Commons, a 101 bed facility including 26 assisted living units and 75 skilled nursing beds, for $4,250,000. Waterford Commons is located at 955 Garden Lake Parkway, Toledo, Ohio.

Robert Elkins, MD, chairman and chief executive officer of Integrated Health Services, stated that "Waterford Commons is southern Toledo's facility of choice. IHS and local medical professionals will be working together to develop a much needed ventilator dependent unit which will provide both short and long-term rehabilitative and restorative care to ventilator dependent patients. In addition, we don't see the need for any renovations. Built in 1987, Waterford Commons is a state-of-the-art facility. It has served its community with distinction and we are pleased to welcome Waterford Commons to the IHS family."

Waterford Commons' park-like setting covers over 5 acres and features an 80 foot long greenhouse and patio that adjoins the facility to a children's daycare center and medical professional building. Other advantages of the Waterford facility are its close proximity to three Toledo area hospitals, including the Medical College of Ohio, and a local senior citizens center.

Intergrated Health Services is a diversified and fully integrated health service provider for the elderly. As of Jan. 1, 1990, IHS owns and/or operates 3320 beds/units in 23 facilities in 12 states. Many of the company's private pay long-term care facilities feature 24-hour physician services, special Alzheimer's wings and other medical specialty service units. The company is developing assisted living facilities which provide cooking and cleaning services as well as assistance with daily chores and medical reminders, while allowing the elderly resident to remain largely independent in a comfortable home- like setting.

#90017p0316 01/17/1990 ~PR Newswire

KING OF PRUSSIA, PA (JAN. 17) PR NEWSWIRE - Universal Health Realty Income Trust (NYSE: UHT) announced today that net income for the year ended Dec. 31, 1989, was $8,457,000 or $1.20 per share, a 4 percent increase over 1988.

Included in the 1989 results is a $611,000 or $.09 per share non- cash expense related to the write-down of an investment in marketable securities. Cash available for reinvestment or distribution for the year ended Dec. 31, 1989, was $12,131,000 or $1.72 per share, an increase of 11 percent over 1988 results of $1.55 per share.

Net income for the quarter ended Dec. 31, 1989, was $2,200,000 or $.31 per share compared to $2,029,000 or $.28 per share in the same quarter of the prior year. Included in the 1989 results is a non-cash expense of $376,000 or $.05 per share to write down the carrying value of the investment in marketable securities. Cash available for reinvestment or distribution in the quarter ended Dec. 31, 1989, was $3,363,000 or $.48 per share, a 23 percent increase compared to the $2,756,000 or $.39 per share in the same period for 1988.

The strong increases over 1988 were produced by a $1,274,000 increase in mortgage interest income and a $957,000 increase in bonus rental income. Operating expenses as a percentage of revenue remained unchanged at 6.4 percent.

The trust signed an agreement yesterday with Lake Shore Hospital Inc. and its parent, Community Care Systems Inc., to forebear until June 30, 1990, collection of amounts due under the $13 million, a 13.5 percent mortgage loan extended by the trust to Lake Shore. This loan is in default because payments due Nov. 1, 1989, Dec. 1 1989, and Jan. 2, 1990, have not been

reimbursed to the escrow account which the trust has been drawing upon to fund missed interest payments. Community Care Systems is seeking to sell or refinance some or all of its major assets, including Lake Shore Hospital, prior to June 30, 1990. The trust cannot predict whether such a sale or refinancing will occur. The trust believes that its agreement with Lake Shore will not affect the trust's ability to pay its regular quarterly dividend. The trust also believes that the value of Lake Shore is well in excess of the $13 million mortgage account.

Universal Health Realty Income Trust, a real estate investment trust, commence operations on Dec. 24, 1986. It currently owns eight acute-care, three psychiatric hospitals, and a rehabilitation hospital, and provides mortgage financing for a 90-bed psychiatric hospital.

#90017p0326 01/17/1990 ~PR Newswire

SALT LAKE CITY (JAN. 17) PR NEWSWIRE - First Federal Savings Bank (NASDAQ: FFUT) reported today unaudited net income for its second quarter ended Dec. 31, 1989 of $161,000 or 14 cents per share.

This compares to $45,000 or 4 cents per share for the like quarter last year.

Gerald R. Christensen, president and chairman of the board, attributed the gain in earnings to an increase in net interest income.

Net interest income after provision for loan losses was $1,058,000, up from $934,000, an increase of $124,000 from the like quarter a year ago. Operating expenses continued to decline and for the quarter were $1,280,000 down from $1,355,000 for the comparable period last year.

Net income for the six month period was $269,000 or 23 cents per share compared to $113,500 or 10 cents per share for the comparable six month period a year ago.

Mortgage loan volume for the quarter totalled 132 loans for $13.8 million compared to 104 loans for $9.9 million for the like quarter last year. The bank ranked fourth out of over 100 mortgage lenders in Salt Lake County for the quarter.

On Nov. 28, 1989 the bank increased its borrowings by assuming approximately $27 million of the Federal Home Loan Bank advances of a savings bank in Tacoma, Wash. The acquired borrowings have an interest rate of approximately 7.80 percent. Approximately half of the funds have been invested and the remainder will be used to payoff other higher cost liabilities.

The bank's capital exceeds all regulatory requirements. Assets now stand at $291 million, and shareholder equity is $13.4 million or $11.65 per share.

ATLANTA (JAN. 17) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) today released affidavits of officials of Citibank, N.A. affirming Georgia-Pacific's earlier statements that it does not intend to sell assets in connection with the company's offer to acquire Great Northern Nekoosa Corp. (NYSE: GNN).

In the affidavits the Citibank officers who reviewed Georgia-Pacific's original request for financing in connection with the Great Northern acquisition stated categorically under oath that Georgia-Pacific insisted throughout its discussions with Citibank that it would not commit to any asset divestitures.

The affidavits of these officials make clear that Great Northern's portrayal of their statements was taken out of context and that their internal documents have been mischaracterized with regard to Georgia-Pacific's intentions.

In one of these affidavits, a Citibank officer noted that "Our discussions with Georgia-Pacific revealed that Georgia-Pacific did not plan to sell any Great Northern assets and was offended when Citibank told them that there should be an asset divestiture program."

Citibank internal documents concerning the financing review were widely disseminated by Great Northern as part of a supplemental memorandum, filed in Maine in support of its motion to enjoin Georgia-Pacific's offer. That motion purports, among other things, to demonstrate that Georgia-Pacific

intends to sell assets of Great Northern, an allegation the company has consistently and vehemently countered.

Georgia-Pacific said that it had initially contacted Citibank in mid-October, seeking a commitment from Citibank to act as lead bank in obtaining financing for the transaction. The company said that it had not selected Citibank to arrange the syndicate in part because of Citibank's insistence on asset sales. Bank of America National Trust and Savings Association was later selected to act as lead bank and Citibank agreed to participate in the $4.5 billion syndicate.

The affidavits will be filed as exhibits as part of Georgia-Pacific's comprehensive submission to Federal District Court in Maine, which is expected to be filed shortly. The company noted that it had elected to release the Citibank testimony today to help allay unwarranted concern generated by the Great Northern publicity campaign.

Commenting on the matter, T. Marshall Hahn Jr., chairman and chief executive officer of Georgia-Pacific, said: "This is just another example of Great Northern's distortion of the facts. Citibank and Georgia-Pacific failed to reach agreement on lead bank status, in part because of our insistence that the merger did not - and should not - require asset sales. The fact that we ultimately took our business to a bank that agreed with our position speaks for itself."

#90017p0332 01/17/1990 ~PR Newswire

KALAMAZOO, MI. (JAN. 17) PR NEWSWIRE - First of America Bank Corporation (NASDAQ: FABK) today reported that 1989 net income rose 15 percent to a record $122.9 million.

Fully diluted earnings per share rose 8 percent to $5.80 from $5.37 in 1988. Return on average assets was a record 1.00 percent, up from .96 percent last year. One-time charges related to the acquisition of Midwest Financial Group added $8.7 million net of tax, or 42 cents per share, to expenses for the year.

Daniel R. Smith, chairman and chief executive officer, commented, "We are pleased with the results. 1989 was a strong year for our banking business despite the one-time charges. We achieved a 4.92 percent net interest margin and a record return on assets. Our competitive position has been strengthened and we now rank as the second-largest bank holding company in Michigan and the largest community banking organization in Illinois, based on assets held in that state."

1989 vs. 1988 For the three months ended Dec. 31 1989, net interest income rose 6 percent to $131.3 million from $123.8 million for the comparable period in 1988. The provision for loan losses was $9.6 million compared with $5.9 million. Non-interest income rose .8 percent to $35.2 million from $34.9 million. Excluding the one-time charge for asset write downs at Midwest Financial of $3.2 million, non-interest income would have increased 10 percent. Non-interest expense increased 11 percent to $122.2 million from $110.0 million, including $8.1 million in charges related to the Midwest Financial acquisition. Net income declined 14 percent to $27.4 million from $31.7 million. Fully diluted earnings per share were $1.29 compared with $1.57 after a 6-percent increase in average shares outstanding due to acquisitions and stock options exercised.

The net interest margin for the fourth quarter of 1989 at 4.83 percent was below fourth quarter 1988's 4.99 percent, but level with third-quarter 1989's 4.84 percent, despite a decreasing interest rate environment. Annualized return on assets for fourth quarter 1989 was .87 percent, down from the 1.09 percent reported for the comparable 1988 quarter. Excluding the one-time charges from the Midwest Financial acquisition, return on assets for the fourth quarter of 1989 would have been 1.10 percent.

For the year, net interest income gained 14 percent, reaching a record $520.6 million, up from $457.3 million. The provision for loan losses was increased 10 percent to $30.5 million from $27.7 million to keep pace with the increase in total loans. Non-interest income was $133.7 million, a 4-percent gain over last year's $128.3 million. Non- interest expense rose to $458.5 million from $415.3 million. Net income was up 15 percent to $122.9 million compared with $106.9 million.

At year-end 1989, total assets were $12.8 billion compared with $12.1 billion at year-end 1988. Total loans rose 9 percent to $8.3 billion from $7.7 billion, while total deposits gained 7 percent to $11.4 billion from $10.7 billion. Total shareholders' equity at period- end was $947.9 million compared with $884.3 million. Return on average total equity reached 13.39 percent, up from 13.23 percent a year ago.

1989 in Review Commenting on the results, Smith said, "During the fourth quarter, interest rates remained relatively stable, although lower than levels early in 1989. As a result, we achieved a 4.92 percent net interest margin for the full year compared with 4.79 percent in 1988. That is a step toward our long-term goal of 5.00 percent. We expect further improvement as all of our banks continue to implement techniques to improve their margins.

"A slight overall softening of the Midwestern economy slowed growth in loans and deposits. Excluding the 1988 and 1989 acquisitions completed

prior to Midwest, loans and deposits grew 7 percent and 6 percent, respectively, during 1989. We look forward to moderate to strong growth for 1990 and beyond. Our progress will be especially aided by our strengthened competitive position in Illinois."

Smith continued, "The provision for loan losses was increased to keep pace with the higher level of total loans and to ensure that coverage of non-performing assets remained ample. At Dec. 31, 1989, coverage of non-performing assets was 129.80 percent. Notably, net charge-offs were only .52 percent of average loans, up from .43 percent. That amount includes the sale of the last of the foreign loans which were part of a 1981 acquisition. Domestic net charge-offs as a percent of average loans, at .30 percent, remained well below industry averages. At period end, the loan portfolio was widely diversified with 29 percent in consumer loans, 27 percent in commercial loans, 19 percent in commercial real estate loans and 25 percent in residential real estate loans."

Turning to non-interest income, Smith said, "Excluding securities transactions and the write down of Midwest assets, non-interest income rose 7 percent, including a 12-percent gain in service charges on deposit accounts. Trust fee income, excluding a one-time accounting adjustment in 1988, rose 13 percent.

Discussing non-interest expense, Smith said, "Without the one-time charges related to acquisitions, non-interest expense rose only 8 percent. The results of further restructuring and computer conversions, as well as bank level cost containment programs, were partially offset by start-up costs for these activities. Continuing efficiencies will be obtained from these initiatives in 1990 and beyond.

"The one-time charges fall into three categories affecting both non-interest income and non-interest expense. Approximately $5 million, or 21 cents per share, were expenses paid as fees to professionals assisting both companies with the merger and were anticipated at the time the acquisition was announced. Not anticipated were the $3.4 million, or 11 cents per share, for severance agreements with former Midwest Financial officers. Since those positions have been eliminated, annual salary expense in 1990 and beyond will be reduced $1.2-$1.5 million. Our decision to begin the assimilation process by merging their banks in Rockford, Kankakee and Peoria with ours meant writing down certain assets, such as equipment and property, acquired in the Midwest transaction. Those costs, which reduced non-interest income, were $3.2 million or 10 cents per share."

1990 Outlook Looking ahead to the opportunities and challenges facing First of America in 1990 and beyond, Smith commented, "The banks that had been a part of Midwest Financial Group reported a combined 18-percent earnings gain for 1989. During 1990,

they will be taking many steps to move toward the long-term return on assets goal set for all First of America banks and as a result their earnings should rise faster than their assets."

Smith continued, "Raising non-interest income and reducing expenses will be given continuing attention in 1990. First, we have opportunities to substantially increase fee income by distributing First of America's trust products and services to a widely expanded marketplace in Illinois. Additionally, on Dec. 1, 1989, we expanded our mortgage service and origination business with the acquisition of a mortgage origination firm headquartered in Peoria, Ill. As a result, those types of services are now available at several of our locations.

"In the area of expense reduction, we will be consolidating those banks in Illinois which share common markets, sharply reducing operation costs. As well, our operations center near Midway Airport in Chicago should be completed during the year. This new center will serve all of our Illinois banks. In Michigan, we will continue the consolidation efforts begun in 1988. In particular, we will focus on merging selected banks when opportunities exist to strengthen our competitive position and improve service levels."

Smith added, "As a result of the actions planned for 1990, we have established a goal of 1.05-1.10 percent return on assets and a return on equity in excess of 16 percent for the year. This will move us closer to our 1.20 percent and 18 percent long-term goals."

Smith concluded, "We have already announced several acquisitions which will be completed during 1990. Most notable perhaps is the $414 million in assets PrimeBank, which will expand our presence in the greater Grand Rapids, Mich., market to 22 locations from nine."

First of America Bank Corporation, with $12.8 billion in assets, provides financial services to over 225 communities in Michigan, Indiana and Illinois through 42 banks and over 410 offices.

NOTE: Unless otherwise indicated, all historic results for First of America Bank Corporation have been restated to reflect the Nov. 1, 1989, acquisition of Midwest Financial Group, Inc., which was accounted for as a pooling of interest.

KINSTON, NC (JAN. 17) PR NEWSWIRE - First Fincorp, Inc. (NASDAQ: FIFC) parent of First Financial Savings Bank, Inc., headquartered in Kinston, North Carolina, reported net income after extraordinary gain for the twelve months ended December 31, 1989 of $1,725,000, $.71 per share, as compared to net income after extraordinary gain of $2,507,000, $1.03 per share, for the twelve months ended December 31, 1988. Net income before extraordinary gain for the twelve months ended December 31, 1989 was $1,401,000, $.57 per share, as compared to $1,727,000, $.71 per share, for the twelve months ended December 31, 1988.

The extraordinary gain in 1989 was $324,000, net of income taxes, $.13 per share, as compared to $780,000, net of income taxes, $.32 per share, for 1988. These gains were the result of partial recoveries by First Financial of its Financial Institutions Assurance Corporation deposit of $3,329,000 which was written off in 1985.

First Fincorp's total assets at December 31, 1989 were $330,615,000, a 7.2 percent increase over total assets at December 31, 1988. Deposits at December 31, 1989 were $289,171,000, a 7.0 percent increase over total deposits at December 31, 1988. Stockholder's equity increased 9.3 percent during the year to $20,358,000 which equates to $8.34 book value per share.

BOISE, ID (JAN. 17) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) today announced receipt of a multimillion-dollar contract to act as system designer for a 20-mile long light rail transit system in Dallas.

The contract was awarded by the Dallas Area Rapid Transit Authority (DART) and covers a period of seven years. The work will be carried out in phases. MK's contract value for the first nine-month period is $3.5 million.

"This contract expands our participation in the Texas transportation industry and affirms our commitment to that market," said William M. Agee, MK's chairman and chief executive officer. "Our work with the light rail system in Dallas complements our efforts to link Dallas and Houston by high-speed rail."

Late last year, an MK-led international consortium announced intention to seek a franchise from the Texas High Speed Rail Authority to design, build own and operate a very high-speed rail system linking Dallas and Houston.

Design of the Dallas light rail system will be performed by

Morrison-Knudsen Engineers of San Francisco, assisted by LTK Engineering Services and T.K. Dyer Inc. The work will include preliminary design of the transit vehicles, traction electrification, train and signalling control systems, a train control center and yard control tower.

MK also will provide technical support and inspection services during final design and installation of the systems.

TAMPA, FL (JAN. 17) PR NEWSWIRE - The American Ship Building Company (NYSE: ABG) today announced its first quarterly net profit since 1986.

The net profit for the first quarter ended Dec. 31, 1989 was $302 thousand or 5 cents per share, an improvement of $2.7 million over the same quarter last year when the company had a net loss of $2.4 million or 40 cents per share. Operating income for the quarter was $207 thousand, which continues a trend of improving operating results over the past four quarters. For the comparable first quarter of fiscal 1989, the operating loss was $3.2 million. Revenues for the three months ended Dec. 31, 1989 totalled $18.9 million compared to revenues of $16.9 million in the same period of fiscal 1989.

The company attributes the favorable operating results to improved margins increased productivity, and effects of major cost reductions. This is the fourth consecutive quarter in which the operating earnings have increased since Mr. Steinbrenner reassumed the position as chief executive and chief operating officer in November 1988.

In November 1989, the company announced that its subsidiary, Tampa Shipyards, Incorporated, was awarded a contract by the Naval Sea Systems Command (NAVSEA) of the U.S. Navy. The contract calls for Tampa Shipyards to complete construction, outfitting and testing of two TAO-187 class fleet oilers for use by the U.S. Navy in fleet refueling operations. The first of the two ships arrived at the Tampa yard this week and work will begin shortly.

In response to inquiries regarding Mr. Steinbrenner's transfer of stock in the company, the company reported that in December 1989 Mr. Steinbrenner gifted 250,000 shares of his stock to his grandchildren.

During the first quarter of fiscal year 1990, the company's subsidiary, Nashville Bridge, was awarded contracts in excess of $9.0 million for the construction of barges. These contracts reflect increased demand in the industry for new barges.

The company also announced its Annual Meeting of Shareholders now will be held in Tampa, Fla. on March 8, 1990.

The American Ship Building Company is a major independent ship construction, conversion and repair firm. It has the largest ship repair and construction facilities in Florida and is one of the major barge builders on the inland waterways.

PITTSBURGH (JAN. 17) PR NEWSWIRE - Dravo Corp. (NYSE: DRV) today announced the completion of its previously announced sale of its construction aggregates operation in Houston, and the acquisition of a sand and gravel producer in the Montgomery, Ala., market area.

Dravo's Houston operation -- consisting of a 74-acre aggregates distribution facility and asphalt plant on the Houston Ship Channel, and an asphalt plant in northwest Houston -- was sold to two buyers. Phibro Refining Co. bought the property on the Ship Channel, while Redland Worth purchased the construction aggregates terminal and asphalt production facilities.

Dravo's acquisition in the Montgomery, Ala., market involved R&S Materials Inc., previously a member of the Alfred McAlpine Group of Companies. Operating five sand and gravel facilities in central Alabama, R&S Materials currently produces approximately 2 million tons of material.

Terms of the two transactions were not disclosed. Carl A. Torbert Jr., president and chief executive officer of Dravo, characterized both developments as part of the corporation's continuing effort to maximize returns on the assets committed to the basic materials segment of Dravo's business.

"The Houston sale acknowledges the competitive disadvantage we faced in that market as a result of our dependence on other producers for raw material, while the R&S Materials acquisition will enable us to compete more effectively in several important markets in central Alabama.

"The completion of these two transactions, combined with the successful start-up earlier this month of our Jacksonville limestone distribution terminal, represent important steps in our continuing effort to improve the profitability of our construction aggregates operations."

Headquartered in Pittsburgh, Dravo is a natural resources firm whose principal products include construction aggregates and lime.

RALEIGH, NC (JAN. 17) PR NEWSWIRE - A contact lens solution contaminated with harmful bacteria should not be used according to food and drug protection officials of the N.C. Department of Agriculture.

The product colled "Wet Cote" manufactured by Occumed, Inc., of Sarasota, Florida is a wetting solution for use with hard contact lenses. It is formulated to make insertion comfortable and help the contact lens adhere to the eye.

Lot number for the contaminated batch, W3028 and the expiration date 6/91, appears on the label. It was distributed in North Carolina, Texas, Florida, Wisconsin, Pennsylvania, Ohio, Maryland, Tennessee and Illinois.

According to state Agriculture Commissioner Jim Graham, the bacteria can cause serious eye infections which are hard to treat and could rarely cause loss of vision.

Consumers who have Wet Cote should check the label and avoid using the solution if the lot number matches the contaminated batch. Contaminated bottles should be returned to the place of purchase.

The contaminated Wet Cote has been recalled by the manufacturer. The NCDA Food and Drug Protection Division is working with the U.S. Food and Drug Administration to alert the public to the danger.

#90017p0346 01/17/1990 ~PR Newswire

DALLAS (JAN. 17) PR NEWSWIRE - Southmark Corp. (NASDAQ: QSM) announced that it has reached an agreement with federal thrift regulators with respect to certain central issues in Southmark's bankruptcy proceeding, and that it is filing its Plan of Reorganization.

The agreement, among Southmark, its wholly-owned San Jacinto Savings Association and the Office of Thrift Supervision, provides for a $100 million capital contribution by Southmark to San Jacinto, in settlement of certain claims which could have been made in the bankruptcy proceeding by San Jacinto or its regulators.

Arthur G. Weiss, chairman and president of Southmark, said today that the agreement and the Plan meet the goals he set for Southmark's bankruptcy when it filed last July, by avoiding lengthy and extensive litigation and by providing for prompt distributions from the estate. "Our Plan," said Mr. Weiss, "allows the senior creditors of Southmark to be paid as quickly as possible, while affording to all creditors and security holders the opportunity to realize potential value from San Jacinto."

Southmark's Plan will call for the liquidation of most of its assets, other than its ownership of San Jacinto. Senior creditors would receive preferred stock and 62 percent of the new common stock to be issued. The preferred stock would be redeemed for cash as asset sales occurred.

Subordinated creditors and shareholders would receive portions of the new common stock ranging from 16 percent to 5 percent.

All of Southmark's existing directors will resign upon confirmation of the Plan, to be replaced by a new board which will be nominated by the creditor's committee (subject to necessary regulatory approval).

The settlement reached with San Jacinto and the Office of Thrift Supervision provides for the conversion of a subordinated debenture of approximately $110 million which Southmark currently holds from San Jacinto into equity and for the contribution to San Jacinto's capital of cash and property in the amount of $100 million. The exact list of property to be contributed has not been finally determined. In exchange, Southmark will receive releases of claims, including any claim for additional capital contributions. In addition, the settlement provides for the issuance of warrants to San Jacinto which will allow the thrift to purchase up to 19 percent of the shares of the reorganized Southmark for $38 million in cash, within five years after confirmation of the Plan.

The agreement with San Jacinto and the Office of Thrift Supervision is embodied in Southmark's Plan of Reorganization, and will not become effective until the Plan is confirmed. Southmark said it intends to move forward as quickly as possible toward confirmation.

Mr. Weiss described the agreement and the Plan as "an important private sector approach to the recapitalization of a savings and loan. This Plan," he said, "gives the creditors of Southmark fair treatment, gives San Jacinto a fair chance to compete in its marketplace, and allows an early end to the bankruptcy proceeding with its attendant costs and disruptions."

Southmark said it will immediately begin discussions with its creditors and other interested parties to explain the benefits of the Plan and to enlist support for rapid completion of the bankruptcy process.

#90017p0349 01/17/1990 ~PR Newswire

BURLINGTON, MA (JAN. 17) PR NEWSWIRE - Home Owners Savings Bank F.S.B. (NYSE: HFS) today announced that it filed a business and recapitalization plan with the Office of Thrift Supervision (the "OTS") on Jan. 8, 1990, as required by the Financial Institutions Reform, Recovery and Enforcement Act ("FIRREA").

The plan is designed to bring Home Owners into compliance with the tangible, core and risk-based capital requirements mandated by FIRREA and the new capital regulations promulgated by the OTS in December 1989. The plan is predicated on substantial improvement in core earnings, a reduction in asset size, a sale of equity securities and conversion of Home Owners' preferred stock to an equity security which qualifies as core capital under FIRREA. To achieve the improvement in core earnings, the plan contemplates the adoption of business strategies which will substantially restructure Home Owners. The key strategies include: (i)

increased focus on core businesses of gathering retail deposits and making mortgage and consumer loans; (ii) reduction, where practical, of interest rate, credit and prepayment risk inherent in the current balance sheet; and (iii) improved cost efficiency through consolidation of operations and other operating improvements.

In accordance with the plan, retail banking and loan production facilities in New England are being combined to provide operating efficiencies and facilitate cross-selling opportunities. Substantially all of the loan production offices acquired in connection with the purchase of Knutson Mortgage Corporation and Meritor Mortgage Corporation are being closed and loan servicing functions are being consolidated in a single location. To improve net interest margin and reduce interest rate and credit risk "below investment grade" corporate debt securities and marketable equity securities will be sold as market conditions permit and in accordance with FIRREA requirements.

Home Owners noted that under applicable OTS regulations, if no additional information is requested, OTS will act upon Home Owners' application for approval of the business and recapitalization plan within 50 days. Under FIRREA, if a savings association's capital plan is not approved by OTS, or if there is a material failure by a savings association to comply with its capital plan, the savings association may be subject to OTS supervisory and enforcement action. Home Owners has certified to OTS, in accordance with OTS capital regulations, that during OTS consideration of its business and recapitalization plan, it will not, without OTS approval, (i) grow beyond net interest credited, (ii) make any capital distribution, or (iii) act inconsistently with any applicable operating restrictions and limitations.

Home Owners also announced that in connection with completion of its business and recapitalization plan, Mark N. Temkin, senior executive vice president-planning, had resigned from Home Owners. Temkin will continue to act as a consultant to Home Owners on planning and related matters.

Headquartered in Burlington, Home Owners is the largest thrift based in Massachusetts.

LAS VEGAS, NEV (JAN. 17) PR NEWSWIRE - William R. Lummis announced his retirement as chief executive officer of The Hughes Corporation and Summa Corporation, a position he has held since the death of Howard Hughes 14 years ago.

Lummis, 60, who informed the Hughes heirs of his intentions a year ago, announced his retirement, effective March 31, at an employees meeting held yesterday in Las Vegas. He will be succeeded as chief executive officer on April 1 by Summa president and chief operating officer, John L. Goolsby 47. Lummis will remain a member and chairman of the boards of directors of the corporations.

Lummis, a first cousin, bears a striking resemblance to Hughes and was the man called upon to unscramble and navigate the deceased billionaire's estate following Hughes' death in 1976.

TROY, MI (JAN. 17) PR NEWSWIRE - MLX Corp. (NASDAQ: MLXX) announced today that the Company's Refrigeration & Air Conditioning Group is continuing to negotiate with its senior lenders as to the terms of the restructuring of the Group's senior credit facilities.

In November, MLX announced that the Group had reached an agreement in principle with the lenders for a new senior facility. Under the agreement in principle, the required principle payments would have been reduced for three years in exchange for an adjustment of the interest rates paid on the loans, warrants to purchase approximately 12.5 percent of the common stock of MLX, and a junior security interest in the stock of the Company's Specialty Friction Materials Group. In light of the recent drop in the MLX common stock market price and continued turmoil in the bond and equity markets, the Company has now determined that an alternative restructuring of the Refrigeration & Air Conditioning Group's credit facilities is required.

In order to provide the Company and the lenders additional time to develop an alternative restructuring program, the terms of the Group's existing loan facilities have been extended through Feb. 15, 1990, including a continuation of the existing interest rates and a continued deferral of the Sept. 30 and Dec. 31, 1989, term loan installments.

MLX is the largest independent nationwide distributor of commercial refrigeration and air conditioning equipment, parts and supplies, and a leading manufacturer of high energy friction products and components used in aircraft brakes and in clutches, brakes and transmissions for heavy duty trucks and off-highway equipment.

WASHINGTON (JAN. 17) PR NEWSWIRE - Medicis Pharmaceutical Corp., a research-based pharmaceutical company announced today that it has filed a registration statement with the Securities and Exchange Commission for an initial public offering of 1.2 million units at $6 per unit.

The proceeds of the offering to Medicis Pharmaceutical will be used to establish a sales and marketing force, to fund research and development, to repay existing debt and for working capital. D.H. Blair & Co. of New

York is the underwriter.

Medicis Pharmaceutical was organized to develop and market products and technologies in the areas of dermatology and critical care medicine. The company is initially focusing its efforts on the marketing of five over-the-counter products known as "Theraplex(TM)" which consist of therapeutic moisturizers and shampoos used in the treatment of dryness of the skin and scalp.

The company has obtained the exclusive license in the U.S., Mexico and Japan for these products which are being sold in Europe and Canada under separate licensing agreements by two multinational pharmaceutical companies.

SKOKIE, IL (JAN. 17) PR NEWSWIRE - Brunswick Corp. (NYSE: BC) today announced that Intellitec International Inc., formerly Nuvatec, Inc., a 66 percent owned subsidiary, had sold certain of its assets to Kestrel Limited Partnership, a division of Kestrel, Inc. of Chicago. Terms of the transaction were not disclosed.

Kestrel's acquisition includes the patents and other assets relating to Intellitec's interactive systems business.

On Aug. 10, 1989, Intellitec International Inc. announced that it would exit the interactive systems business. According to William R. McManaman, Brunswick's vice president-finance, Intellitec International Inc. will continue to manufacture and distribute its proprietary products under its Intellitec and Impax brand names.

Kestrel Interactive said that Eric S. Peterson, former president of Nuvatec, is joining Kestrel as president, and that many of the key Nuvatec management, marketing and engineering staff would also be part of the new operation.

Theseus, Inc., a Chicago-based investment banking firm, handled the acquisition on behalf of Kestrel, Inc.

Headquartered in Skokie, Ill., Brunswick Corp. serves worldwide markets in the marine power, pleasure boating, recreation, defense/aerospace and industrial products areas. Its stock is traded on the New York, London, Tokyo, Midwest and Pacific Stock Exchanges.

CLEVELAND (JAN. 17) PR NEWSWIRE - The Standard Products Co. announced today that it will close its Lexington, South Carolina plant due to the slowdown in the automotive industry and significantly decreased demand from its principal customer, General Motors Corporation.

The 52,000-square-foot Lexington facility opened in September 1988 as a dedicated, satellite to the company's Winnsboro, South Carolina plant, which will remain in operation. One of 27 Standard Products plants worldwide, it employs 130 hourly and 22 salaried workers, and is dedicated to the manufacture of plastic moldings for doors and windows for General Motors.

Designed to produce as many as 840 units per day, product demand never exceeded 600 units daily, said Theodore K. Zampetis, Standard Products' Vice President-Manufacturing North American Automotive Operations. Orders have subsequently dropped significantly, and are now at the 345 unit level with further cuts possible.

Production at the plant is expected to be completed by the end of April 1990. Remaining production of parts will be transferred to Standard Products' Spartanburg, South Carolina plant, Zampetis said. He also noted that the company will offer job placement assistance to all workers at the Lexington, South Carolina facility.

The company's plan includes offering the Lexington employees first consideration for any openings at its Spartanburg plant. Additional services include assistance with resume writing and distribution, and arranging appointments with the South Carolina Security Commission.

"In the 11 years Standard Products has operated in the State of South Carolina, we have developed a sound reputation by acting responsibly with our customers, suppliers and employees," Zampetis said. "We intend to do everything in our power to make this transition, as unfortunate as it is, as easy as possible for our employees and the community."

Cleveland-based Standard Products manufactures rubber and plastic parts for the automotive original equipment industry, rubberized track for military vehicles, and plastic and magnetic door seals for home appliances. Its Oliver Rubber subsidiary is a major producer of tread rubber for truck tire retreading.

WASHINGTON, DC (JAN. 17) PR NEWSWIRE - Southmark Corp. (NYSE: QSM), owners of San Jacinto Savings Association, Bellaire, Texas, will increase the thrift's capital by $210 million under a settlement with the Office of Thrift Supervision (OTS) announced today.

The settlement results from a net worth maintenance agreement and related capital infusion claims against Southmark by OTS. It will become effective if Southmark's plan of reorganization is approved by the bankruptcy court hearing Southmark's case.

The $210 million capital addition is to consist of a direct contribution of $100 million in assets mutually acceptable to OTS and Southmark, of which $10 million will be cash or cash equivalents. The remainder will result from the conversion of approximately $110 million of San Jacinto subordinated debt held by Southmark to preferred stock as additional paid-in capital.

In addition, Southmark will issue a warrant to San Jacinto enabling the thrift to purchase 19 percent of Southmark's stock for $38 million following the parent company's reorganization. Southmark will also agree to voting and dividend restrictions similar to those contained in "pre-nuptial" agreements required by OTS for new acquirers of savings institutions.

#90017p0373 01/17/1990 ~PR Newswire
HOUSTON (JAN. 17) PR NEWSWIRE - GTE Mobile Communications Group, a leading provider of mobile telecommunications products and services, and The Hertz Corporation, the nation's largest car-rental company, have signed a multiyear agreement to provide cellular credit-card telephones in Hertz rental cars.

Terms of the agreement were not disclosed.

Hertz and GTE Mobile Communications, through GTE Cellular Communications Corp., expect to install some 50,000 in-car credit-card phones during the term of the contract. GTE Mobile Communications, through its nationwide cellular-service program, will provide the cellular network connection for all participating Hertz rental locations.

"This agreement emphasizes the importance Hertz places on providing communications service so vital to many of our business customers," said Brian J. Kennedy, Hertz executive vice president of marketing and sales.

"Today's business traveler has increasingly sophisticated needs, primary among them the constant need to stay in touch with his or her business. With in-car telephones, customers have immediate access to a communications network with the swipe of a credit card."

Hertz and GTE currently offer some 1,600 cellular credit-card phones in rental vehicles as part of a successful pilot-test program at the following airport rental locations: Atlanta, Dallas/Ft. Worth (DFW and Love), Detroit, Hartford, Houston (Intercontinental and Hobby), St. Louis and Oklahoma City. New markets for the phone have not been identified, although the cellular credit-card phones will eventually be available at most Hertz rental locations throughout the country.

Travelers Want to Stay in Touch "The pilot proved that business travelers want to stay in contact when they are on the road," said Tony Knight, president of GTE Cellular Communications Corp. "As we add thousands of cellular credit-card phones to the Hertz fleet, we believe customers will not only expect but demand the phones as a way to increase their travel productivity, accessibility and personal safety."

The cellular phones, which are permanently installed in vehicles, are available at no additional charge. The customer's credit card activates the phone, and is billed directly for only the calls made and received. The cellular phones may be requested by Hertz customers, but not reserved in advance.

Preprogrammed into the phone's speed-dial feature are phone numbers for Hertz, airline and hotel reservations, restaurants, emergency-road service and the 911 emergency-telephone number. There is no charge for the latter two numbers.

Hertz has more than 5,000 locations in more than 120 countries. GTE Cellular Communications is part of GTE Mobile Communications Group, one of GTE's six major business groups.

#90017p0374 01/17/1990 ~PR Newswire

MURRAY HILL, NJ (JAN. 17) PR NEWSWIRE - The BOC Group has been awarded a U.S. patent (No. 4888037) for its one-step, glass-to-metal sealing process for the use in the electronics industry. Airco, the BOC Group's U.S. industrial gases company, intends to make the process available through licensing agreements.

The patented technology, developed by the BOC Group Technical Center at

Murray Hill, N.J., greatly simplifies the procedures for producing matched glass-to-metal seals for hybrid circuit packages. The attractions for components manufacturers include increased productivity, lower costs, and enhanced seal quality, says Mark J. Kirschner, manager of Advanced Materials Technology for the Group Technical Center.

Typically, there are three steps involved in producing glass-to- metal seals (fusing borosilicate glass to Kovar alloy). The steps are decarburization, oxidation and sealing. Usually, that means passing materials through three separate furnaces with three different atmospheric mixtures. The BOC process -- which incorporates a special atmospheric mix of hydrogen, water and nitrogen -- reduces those three steps to just one.

Two U.S. companies have been using the process, says Sean M. Adams, Airco section manager-Advanced SMT Particle Technologies. He anticipates that potential licensees for the glass-to-metal sealing process will be companies looking for a combination of improved process control and higher quality.

DALLAS (JAN. 17) PR NEWSWIRE - Royal International Optical Corp. (NYSE: RIO) announced today that its board of directors determined to redeem all common share purchase rights outstanding under the Rights Agreement dated as of Dec. 17, 1987 between Royal and MTrust Corp as Rights Agent at a redemption price of 1 cent per right, without interest, in accordance with the Rights Agreement. The redemption price will be paid on Feb. 5, 1990 to rights holders of record on Jan. 26, 1990. Pursuant to the terms of the Rights Agreement, effective as of the time that Royal's board of directors resolved to redeem the rights, the rights ceased to represent any right except the right to receive the redemption price. No new rights will be issued after Jan. 17, 1990 unless and until Royal's board of

directors authorizes and declares a subsequent dividend of rights per share of common stock of Royal. Royal is redeeming its common share purchase rights in connection with its agreement with U.S. Vision Inc., a privately held optical retailer based in Glendora, New Jersey, to merge the two companies.

Royal operates 651 retail optical stores in 36 states, and manufactures, imports, and distributes optical frames.

PHILADELPHIA (JAN. 17) PR NEWSWIRE - Stephen A. Van Dyck, chairman and chief executive officer of Maritrans GP Inc., managing general partner of Maritrans Partners L.P. (NYSE: TUG), today announced the election of Craig N. Johnson as president and chief operating officer of Maritrans GP Inc., effective Feb. 1, 1990.

Johnson succeeds Van Dyck, who retains the offices of chairman and chief executive officer.

Johnson, who has served as a member of the board of directors of Maritrans GP Inc. since its formation, was, until recently, president and chief operating officer of Whitemarsh Investment Co., which has investments in terminalling and stevedoring businesses in Philadelphia and manages a fleet of vessels for the Military Sealift Command. These businesses have not competed with Maritrans. Johnson joined Lavino Shipping Co., a subsidiary of Whitemarsh, in 1979 as vice president- corporate development.

Prior to employment at Lavino Shipping Co., Johnson worked with two management consulting firms: Hay Associates and William E. Hill & Co., a New York-based company specializing in acquisitions. Johnson's consulting experience includes international, marketing, organizational and corporate development work.

Johnson is a 1963 graduate of the University of Pennsylvania. He also earned an MBA degree in marketing and finance from the university's Wharton Graduate School in 1969.

Van Dyck stated: "Craig Johnson's appointment to this additional position of responsibility within Maritrans is an important step toward positioning ourselves to take advantage of the potential business opportunities and to meet the challenges we see unfolding in the marine transportation business in the 1990s."

Maritrans Partners L.P. is a master limited partnership formed in 1987 to purchase and operate, through Maritrans Operating Partners L.P., a fleet of tugboats and oceangoing tank barges along the Gulf and Atlantic coasts. Maritrans is the largest independent U.S. flag marine transporter of petroleum products in the coastal trade. The Maritrans Partners L.P. limited partnership units are listed on the New York Stock Exchange.

SAN DIEGO (JAN. 17) PR NEWSWIRE - IRT Corp. (AMEX: IX) today announced revenues of $4,745,000 and earnings of $149,000 or 3 cents per share for the third quarter of its 1990 fiscal year ended Dec. 31, 1989. For the comparable period in the prior fiscal year, IRT reported $3,702,000 in revenues and a net operating loss of $1,881,000 or 39 cents per share.

For the first three quarters of its current fiscal year, the company reported revenues of $15,877,000 and income of $1,589,000 or 29 cents per share, compared with the comparable period of the previous fiscal year which had revenues of $12,930,000 and net operating loss of $870,000 or 18 cents per share. Income for the first three quarters, discounting the effects of other income in both fiscal years, has increased from a loss of $3,828,000 in the previous year to a profit of $745,000 in fiscal 1990.

The financial results for the previous fiscal year have been restated to reflect the disposal of discontinued operations.

IRT's contract backlog at the end of the third quarter was $4,476,000, up 44 percent, compared with $3,116,600 at the end of the third quarter of the previous fiscal year.

"I am pleased with our third-quarter results," said John W. Battin, president and chief operating officer of IRT. "In addition to our continued financial progress, we expanded our sales and marketing organizations in the United States and established a European marketing network during the quarter. The signing of Electronic Instruments to represent us in Europe is a key step toward making IRT a world-wide leader in its field."

Electronic Instruments, a manufacturer and distributor of electronic design, production, and test equipment, is based in Brussels, Belgium and Paris with subsidiaries across Europe.

IRT Corp. is a major supplier of industrial real-time X-ray systems, with more than 500 systems installed, and is the technology leader in automated X-ray inspection systems with computerized defect recognition capability.

The company develops and manufactures inspection and process monitoring systems, including integrated systems for electronics, automotive, aerospace, and defense applications. The company also operates a commercial radiation processing facility which provides high-energy electron-beam processing for a number of commercial applications.

ATLANTA (JAN. 17) PR NEWSWIRE - The Home Depot (NYSE: HD), the Atlanta-based national home center retail chain, announced today that it plans to open three more stores on Long Island during 1990.

The stores will be located in Commack, Freeport and Farmingdale. The Home Depot opened its first Long Island store - in East Meadow - on Nov. 30, 1989. The second store on long Island - in Patchogue - opened on Jan. 4.

"Customer response to our first two stores on the Island has been nothing short of phenomenal," said Bernard Marcus, Home Depot chairman. "It confirms what we have said about this market all along, which is that consumers will truly appreciate a home center retailer that can consistently provide superior product assortment and pricing coupled with an unprecedented level of customer service and guidance. We're happy to have finally open on Long Island and we're anxious to open more locations so that there will eventually be a Home Depot store within convenient driving distance for all Long Islanders. Within the next few years we plan to be operating a total of nine or 10 stores on Long Island."

The Home Depot currently operates 113 warehouse-style home centers in 26 markets in 12 states. The stores, ranging in size from 67,000-to 140,000 square feet, sell approximately 30,000 different kinds of building materials and home improvement products primarily to the do-it-yourself market. The company is widely regarded as the leader in the home center industry and its stock is traded on the New York Stock Exchange under the symbol "HD."

#90017p0387 01/17/1990 ~PR Newswire

CARMIEL, ISRAEL, (JAN. 17) PR NEWSWIRE - S.P.I. - Suspension and Parts Industries Ltd. (NASDAQ: SPILF) today announced the purchase from its parent company, Urdan Industries Ltd. ("Urdan"), of all of the shares of Urdan (T.G.L.) Ltd. ("Urdan/T.G.L."). The purchase price equalled the

book value of Urdan's investment in Urdan/T.G.L. at Dec. 31, 1989.

As previously announced, the closure of the rubberizing facility of T.G.L. Ltd., an unaffiliated company, which is Israel's major rubberizer and the rubberizer of the company's road wheels, had adversely affected the company's earnings in 1988. As a result, Urdan entered into a three-year agreement with T.G.L. Ltd., commencing January 1989, to operate its facility through Urdan's subsidiary, Urdan/T.G.L.

The company utilizes 90 percent of the rubberizing capacity at the facility and, accordingly, following the execution of the operating agreement, it was determined that the company should assume day-to-day operation and management of the plant effective in July 1989.

The company's purchase of the shares of Urdan/T.G.L. will permit it to have full control over the facility and increase its ability to manufacture complete major products such as wheels and track shoes.

Headquartered in Carmiel, S.P.I. designs, develops, manufactures and markets components for the suspension systems of a wide variety of military armored vehicles, including steel road wheels and support rollers sprocket wheels, track components and road wheel arms. The company believes it is currently one of the leading suppliers of steel road wheels used as spare parts by the United States Armed Forces and supplies substantially all the requirements of the Israel Defense Forces for steel road wheels, sprocket wheels, road wheel arms and certain track components.

#90017p0390 01/17/1990 ~PR Newswire

MILWAUKEE (JAN. 17) PR NEWSWIRE - A. O. Smith Corporation (AMEX: SMC) today announced a 1989 loss applicable to common stock of $13.2 million or $1.66 per fully diluted share on sales of $976.3 million.

The loss compared with 1988 earnings of $15.3 million or $1.84 per share. Sales in 1988 totaled $1.02 billion.

President and Chief Executive Officer Robert J. O'Toole indicated the loss is in line with the corporation's December public forecast.

"The recession in the automotive industry and several one-time events adversely affected earnings, including a judgment against a former subsidiary that resulted in an extraordinary charge of $4.6 million, after-tax, and the establishment of a $15.6 million (pre-tax) restructuring reserve," O'Toole said.

Fourth quarter sales were $216.0 million, 18 percent lower than the 1988 totals for the same period, primarily due to lower Automotive Products Company sales. The fourth quarter loss of $15.5 million or $1.96 per fully diluted share, included the restructuring provision. The loss compared with 1988 earnings of $5.5 million or $ .63 per fully diluted share.

A.O. Smith, with its subsidiaries and affiliates, is a diversified manufacturer headquartered in Milwaukee. Its product lines include auto and truck structural components, fractional horsepower and hermetic electric motors, residential and commercial water heating systems, fiberglass reinforced piping systems, inorganic protective industrial coatings, agricultural feed storage systems, industrial and municipal water and bulk storage systems and agricultural credit and financing programs.

#90017p0392 01/17/1990 ~PR Newswire

NEW YORK (JAN. 17) PR NEWSWIRE - Stone & Webster, Incorporated (NYSE: SW) today reported consolidated net income for the three months ended Dec. 31, 1989 of $1,579,000, or $.10 per share, compared with $11,411,000, or $.75 per share, for the corresponding period last year. The decrease in net income for the fourth quarter was due to decreased gross earnings and increased overhead costs from our engineering and construction services. Gross earnings decreased as a result of reduced chargeable hours on power projects. The increase in overhead costs result from the changing mix of our engineering and construction business which continues to expand into petrochemicals, environmental, infrastructure and pulp and paper while continuing to maintain the highly skilled staff to handle the demand for our services created by the expected upsurge in the worldwide electric power business. Gross earnings for the three months ended Dec. 31, 1989 were $65,442,000, compared with $81,645,000, for the corresponding period last year.

Consolidated net income for 1989, subject to audit, was $20,797,000, or $1.37 per share, of which $2,774,000, or $.18 per share, resulted from the sale of investment securities. This compares with consolidated net income for 1988 of $41,179,000, or $2.71 per share, of which $8,577,000, or $.57 per share, resulted from the sale of investment securities. Gross earnings for 1989 were $287,208,000, including $4,155,000 of profits on investment securities. This compares with gross earnings for 1988 of $324,127,000, including $12,585,000 of profits on investment securities.

The average number of shares outstanding for the three months ended Dec.

31, 1989 and Dec. 31, 1988 was 15,155,000 and 15,230,000, respectively; and for the years 1989 and 1988 was 15,161,000 and 15,220,000, respectively. Earnings per share and the average number of shares outstanding for 1988 have been restated to reflect the two-for- one stock split declared in June 1989.

MINNEAPOLIS (JAN. 17) PR NEWSWIRE - National City Bancorporation (NASDAQ-NMS: NCBM) reported net earnings of $7,629,000 for the year ended Dec. 31, 1989, equalling $1.85 per share compared with $5,032,000 and $1.19 per share for the year 1988.

Included in net earnings for the year was a first quarter after tax gain of $3,093,000 or 75 cents per share from the sale of a former subsidiary. Excluding this gain, net earnings were $4,536,000 or $1.10 per share. The loan loss provision for the year was $4,193,000 compared with $2,299,000 in 1988. Net charge-offs for the year were $4,301,000 compared with $1,600,000 for 1988. The reserve balance at Dec. 31, 1989,

was $6,723,000, 1.93 percent of loans outstanding, compared with $7,164,000 or 2.02 percent at Dec. 31, 1988. The net interest margin, net interest income on a fully taxable equivalent basis divided by average earning assets, was 4.68 percent in 1989 compared with 4.70 percent in 1988.

For the fourth quarter of 1989, the Bancorporation reported net earnings of $844,000, 21 cents per share, down 45 percent from $1,523,000 and 36 cents per share in the fourth quarter of 1988. The loan loss provision in the fourth quarter was $1,600,000 compared with $568,000 for the same period last year. Net charge-offs were $1,323,000 for the fourth quarter compared with $806,000, for the same period in 1988.

Nonperforming assets, including non-accrual and past due loans and other real estate owned, increased to $12,719,000 at Dec. 31, 1989, compared with $11,494,000 at Sept. 30, 1989, and $8,001,000 at Dec. 31, 1988.

National City Bancorporation is a bank holding company which owns National City Bank of Minneapolis, and National City Business Credit Inc. The company's stock is traded on the over-the-counter market in the NASDAQ national market system under the symbol NCBM.

HADDON TOWNSHIP, NJ (JAN. 17) PR NEWSWIRE - First Peoples Financial Corp. (NASDAQ: FPNJ), parent company of First Peoples Bank of New Jersey, today reported strong earnings for both the fourth quarter and the year ended Dec. 31, 1989.

For 1989, the corporation reported net income per share of $4.64, including an $.80 per share extraordinary item relating to the benefit of prior years' tax loss carryforwards.

The reported income per share before extraordinary items of $3.84 reflects a 33.8 percent improvement over the per-share result for the same period in 1988. Total reported net income for 1989 was $13.6 million and $11.3 million before the extraordinary item.

The income before extraordinary items represents a $1.9 million, or 20.2 percent, improvement over the comparable amount in 1988.

For the fourth quarter of 1989, earnings per share were $1, a 7.5 percent improvement over the 1988 fourth quarter earnings per share before extraordinary items of $.93. Total reported earnings were $2.8 million for the fourth quarter.

Jerome S. Goodman, chairman, president and chief executive officer, stated: "The corporation exceeded all of its financial goals in 1989. The most significant of these was the continued improvement in earnings per share generated from operations. This improvement reflects the continued profitable expansion of our core banking business."

The previously mentioned $1.9 million improvement in net income before extraordinary items for 1989 was primarily due to an increase in the corporation's net interest income of $2.8 million, or 7.7 percent, over the same period a year ago.

A $0.7 million reduction in the provision for income taxes and a $0.2 million improvement in noninterest income also contributed to the corporation's improved earnings.

These improvements were partially offset by a $1.3 million increase in operating expenses and a $0.5 million increase in the provision for loan losses. The increase in operating expenses was primarily attributable to the corporation's profitable growth and deposit gathering activities.

Total assets were $1 billion as of Dec. 31, an increase of $101.6 million, or 10.7 percent, over total assets of one year earlier. The primary reason for this improvement is continued quality loan growth. Gross loans, excluding term federal funds sold, were $632.8 million as of Dec. 31, an increase of $98.1 million, or 18.3 percent, over gross loans of $534.7 million as of Dec. 31, 1988. Non-accrual loans were $13 million, an increase of $5.9 million from non-accrual loans as of Dec. 31, 1988.

This increase was largely attributable to one commercial mortgage from which the bank does not anticipate any significant loss.

The allowance for loan losses at Dec. 31 was $5.4 million, or 1.11 percent of gross loans, excluding Small Business Administration loans fully guaranteed by the U.S. government. This compares to $6.5 million, or 1.44 percent, of gross non-guaranteed loans as of Dec. 31, 1988.

Goodman further commented: "Many banks have been reporting significant increases in their loan loss reserves due to large increases in non-performing loans. First Peoples Bank is not experiencing similar problems due to its continuing emphasis on high asset quality."

Total deposits were $898.1 million at Dec. 31, an increase of $83.5 million, or 10.3 percent, over the same period last year.

The corporation's capital base also continued to grow with shareholders' equity reaching $68.4 million, an increase of $2.2 million, or 3.3 percent over shareholders, equity at Dec. 31, 1988.

First Peoples Financial Corp. is the largest bank holding company headquartered in southern New Jersey. The bank has 30 offices serving Burlington, Camden, Cumberland and Gloucester counties.

#90017p0408 01/17/1990 ~PR Newswire

DETROIT (JAN. 17) PR NEWSWIRE - FirstFed Michigan Corporation (NASDAQ-NMS: FFOM), the holding company of First Federal of Michigan, today reported net earnings of $7.7 million for the quarter ended Dec. 31, 1989, or $.69 per share ($.65 on a fully diluted basis). Net earnings for the fourth quarter of 1988 were $2.4 million, or $.22 per share.

Net earnings for the full year 1989 totaled $22.5 million, or $2.03 per share ($1.95 fully diluted), compared with $36.6 million, or $3.31 per share ($3.10 fully diluted) for 1988.

"These results have increased our total equity to more than $437 million, or a book value of $39.54 per share," FirstFed Michigan Chairman James A. Aliber said. "Our capital level is more than sufficient to meet the new regulatory requirements that became effective last Dec. 7, under the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA)."

Net interest income was $16.5 million for the fourth quarter of 1989, vs. $16.6 million for the period in 1988. First Federal recognized $10.9 million in fees on standby mortgage-backed security commitments in the 1989 quarter, compared with $10.3 million a year earlier. Net gains from sales of loans and securities totaled $7.6 million for the fourth quarter of 1989, vs. $3.9 million in the comparable 1988 quarter. General and administrative expenses were $22.8 million for 1989's fourth quarter, compared with $23.8 million for the same period in 1988.

For the full year 1989, net interest income was $46.2 million, standby fees totaled $19.9 million, gains on sales were $35.8 million and general and administrative expenses totaled $90.8 million. Comparable figures in 1988 were $93.3 million in net interest income, $28.7 million in standby fees, $23.5 million in gains on sales, and $93.5 million in operating expenses.

Extraordinary net gains for the year of $12.0 million stemmed primarily from early retirement of Federal Home Loan Bank advances, less a charge of $934,000 from full redemption of First Federal's subordinated capital note issue. Retirement of debt also produced extraordinary gains totaling $972,000 in 1988.

Assets on Dec. 31, 1989, were $11.5 billion, vs. $11.9 billion at year-end 1988.

First Federal's portfolio of loans and mortgage-backed securities totaled $9.0 billion at the end of 1989, compared with $9.2 billion for the previous year. It was divided equally among adjustable rates, fixed rates with terms of 15 years or less, and fixed rates with terms of 20 to 30 years. First Federal originated mortgage loans totaling $670 million in 1989, vs. $876 million in 1988, a decrease that resulted primarily from decreased commercial real estate lending.

FirstFed Michigan Corporation will pay a fourth-quarter dividend of $.15 per share on Feb. 9 to stockholders of record on Jan. 9. The company has declared consecutive quarterly dividends since the first quarter of 1986.

FirstFed Michigan Corporation is the holding company of First Federal of Michigan, a Detroit-based savings and loan association. First Federal has 78 offices throughout the Lower Peninsula of Michigan. Its Bay Savings Bank subsidiary, based in Newport News, Va., operates 14 offices in Virginia and Louisiana, and its Omni Savings Bank subsidiary has five offices in Columbia, S.C.

MOUNTAIN VIEW, CA (JAN. 17) PR NEWSWIRE - Silicon Graphics Inc. (NASDAQ: SGIC) today reported revenues totaling $103 million for the quarter ended Dec. 31, 1989. This represents an increase of 56 percent over revenues of $65.9 million for the like quarter a year earlier. Net income for the quarter increased to $7.2 million, or 39 cents per share, compared with net income of $2.6 million or 16 cents per share in the like period for the prior fiscal year.

For the first six months of this fiscal year, the company reported net revenues of $189.4 million, an increase of 72 percent over the like period for the prior fiscal year. Income was $12.4 million for the six month period ended Dec. 21, 1989 or 66 cents per share, compared with income of $3.6 million or 21 cents per share in the like period for the prior fiscal

year.

Edward R. McCracken, Silicon Graphics' president and chief executive officer said, "We are pleased with our results this quarter. Exceeding $100 million in revenues and 10 percent operating profit for a quarter represents a significant milestone in the company's history. We experienced strong demand across our entire business that was geographically diverse, and covered a broad range of applications segments. This demonstrates an increasing appetite in the marketplace for 3D color workstations.

"Our continued focus on financial execution resulted in a 172 percent increase in net income for the quarter year to year. Margins improved both sequentially and over the year ago quarter, primarily as a result of manufacturing efficiencies and component cost reductions. Income from operations was 10.5 percent of revenues compared to 5.4 percent in the like quarter for the prior year. In addition, the company generated $2 million in cash, excluding our October repurchase of stock from Control Data Corp., representing the third consecutive quarter of positive cash flow.

"Finally, the significant growth in SG&A expenses for the quarter reflects the incremental sales costs related to the large increase in revenues and additional resources committed to marketing and field programs which we believe will have a positive influence in the future," McCracken concluded.

Silicon Graphics Inc., is a leading manufacturer of graphics workstations and servers. These computer systems are used by engineers, scientists and creative professionals in the design, manufacture and marketing of products and services. The company's stock currently trades on the NASDAQ National Market System under the symbol SGIC. Silicon Graphics has applied for listing on the New York Stock Exchange and is expected to begin trading of its common stock on the Big Board in early February.

#90017p0423 01/17/1990 ~PR Newswire

BALTIMORE (JAN. 17) PR NEWSWIRE - MNC Financial Inc. (NYSE: MNC) today reported record net income for the fourth quarter and the full year of 1989.

Alan P. Hoblitzell Jr., chairman and chief executive officer, said MNC's performance reflects continuing increases in net income in every major business segment, high asset quality and a significant gain in non-interest income. Returns on total equity and assets were 18.54 percent and 1.20 percent, respectively, for the fourth quarter ended Dec. 31, 1989.

MNC's net income increased 20 percent for the fourth 1989 quarter to $59.4 million, or $.95 per fully diluted share, compared with $49.3 million, or $.82 per share for the final quarter of 1988.

For the full year, MNC's net income rose 17 percent to $212.6 million, or $3.44 per fully diluted share, compared with $182.2 million, or $3.03 per share for 1988.

Full year returns on total equity and assets were 17.71 percent and 1.14 percent, respectively. (Earnings per share give effect to the 2-for-1 stock split in the form of a 100 percent stock dividend paid on Oct. 5, 1989).

"Our high underwriting standards and a fundamentally sound regional economy in MNC's core markets, and the further expansion of our regional and national consumer finance and credit card activities are major factors accounting for the sustained earnings quality," Hoblitzell said.

"MNC has continued to capitalize on its strong loan origination and securitization capabilities," Hoblitzell said. A 36 percent increase in non-interest revenue for 1989 resulted from MNC's emphasis on the growth and diversification of fee income, augmented by the sale of securities backed by credit card receivables and home equity loans.

"For 1990, MNC expects continued earnings growth as a result of a focus on expense control and credit quality," Hoblitzell said.

Hoblitzell said MNC's commercial real estate activities, particularly construction lending, are being managed conservatively for much slower growth in 1990.

"MNC's real estate lending is very selective geographically. We have spread the risk across a wide variety of loan types, and the major focus has been on building quality relationships with the Washington/Baltimore area's most prominent developers," Hoblitzell said.

Non-performing assets amounted to $250 million, or 1.75 percent of total loans compared with $197.4 million, or 1.53 percent of total loans at Dec. 31, 1988, and $233.2 million, or 1.72 percent at Sept. 30, 1989.

The reserve for possible credit losses at Dec. 31, 1989, was 2.10 percent of total loans and resulted in a coverage ratio of 1.34X total non-performing loans. Net credit losses amounted to 0.71 percent for 1989 compared with 0.83 percent for 1988.

During 1989 efforts were continued to reduce foreign debt, primarily through sales; Latin American debt, primarily outstanding to Brazil, was reduced to $72 million from $92 million at year-end 1988.

MNC Financial is a diversified financial services company which delivers a broad range of commercial and consumer banking products in the Baltimore/Washington common market and in the mid-Atlantic states.

In addition, MNC is the largest national marketer of endorsed affinity group credit cards, a pioneer in asset securitization and sales, and a

leader in national consumer finance products.

MNC manages one of the largest and most profitable trust entities in the region. Total market capitalization for MNC Financial at Dec. 31, 1989, was $1.4 billion.

#90017p0429 01/17/1990 ~PR Newswire

PROVIDENCE, RI (JAN. 17) PR NEWSWIRE - Fleet/Norstar Financial Group (NYSE: FNG) today reported 1989 earnings of $371.3 million, or $3.30 per fully diluted share, compared to $335.8 million, or $3.01 per share, earned in 1988. Fourth quarter net income was $92.4 million, or 83 cents per fully diluted share, versus $87.6 million, or 78 cents per share, earned in the fourth quarter of 1988.

Terrence Murray, chairman and president, said Fleet/Norstar's 1989 earnings, which increased 9.6 percent on a fully diluted share basis, "were especially gratifying because most business lines performed well, underscoring the soundness of Fleet/Norstar's long-held strategy of broad geographic and functional diversification."

Murray attributed Fleet/Norstar's positive performance last year to a combination of factors that included "strong earnings gains by our consumer finance and mortgage banking subsidiaries, well thought out consolidations that reduced overhead costs, and careful adherence to risk management principles that have served us well for nearly two decades."

Fleet/Norstar's 1989 return on average assets was 1.25 percent, compared to 1.24 percent for 1988, while return on average common stockholders' equity totaled 17.70 percent. The corporation's average equity-to-assets ratio for 1989 was 7.32 percent.

Murray said Fleet/Norstar's Financial Services Group compiled the largest earnings gain among the corporation's operating divisions in 1989, earning $110 million, an increase of 28 percent. Atlanta-based Fleet-Finance, the corporation's consumer finance subsidiary, earned $43 million in 1989, up 13 percent, while the mortgage banking affiliates rose 18 percent to $32 million. Fleet Credit and Fleet Factors, the corporation's asset-based lending subsidiaries, contributed $31 million, 24 percent above year-earlier results.

Making nearly identical earnings contributions were Fleet/Norstar's New York and New England Banking Groups, with the New York banks earning $161 million, and the New England banks earning $160 million.

Fleet/Norstar Financial Group is a diversified national financial services company listed on the New York Stock Exchange. Fleet/Norstar has approximately 1,000 offices in 40 states. Its lines of business include commercial and consumer banking, trust banking, mortgage banking, consumer finance, asset-based lending, student loan processing and investment banking.

DALLAS (JAN. 17) PR NEWSWIRE - Lone Star Gas Co., the gas utility division of ENSERCH Corp. (NYSE: ENS), today announced its intention to sell all or most of its distribution and transmission system in Oklahoma.

The company expects the process of selecting a qualified buyer to take several months, with final closing, after all regulatory approvals have been obtained, to occur near yearend.

"This action is in line with the company's commitment to achieve an improved return on all assets," said David Biegler, Lone Star chairman and president.

"Because of the peculiarities of our system, and the difficulties caused by having to allocate costs between two states, our returns from these properties have been inadequate. We feel it is in the best interest of all of our customers and shareholders for the Oklahoma properties to be owned by someone else," he added.

Lone Star supplies natural gas to approximately 1.25 million customers. The Oklahoma portion of the system serves about 38,000, or three percent, of this total. Lone Star will continue to serve these customers until the sale is finalized.

ENSERCH Corp. is a diversified energy, engineering and construction company.

CONTACT: (Analyst contact) Benjamin A. Brown, 214-670-2204; or (media contact) Crystal C. Bell, 214-670-2528, both of ENSERCH Corp.

LANSING, MI (JAN. 17) PR NEWSWIRE - The Advanced Materials Group of

HIMONT U.S.A. Inc. today announced a $.03 per pound increase in the market price of HiFax thermoplastic olefins and Astryn aesthetic polymers.

The increase is effective Feb. 15, 1990, and will apply to shipments made on and after that date.

Kenneth R. Dargis, director of marketing, HIMONT Advanced Materials- North America, in announcing the increase, said, "Higher labor, utility and raw material costs make this price increase necessary. We also intend to support the forecasted demand for these products in the new decade through plant expansions and to provide our customers with higher value products by reinvesting in new technology."

The affected product lines are olefin-based engineering polymers used primarily in the automotive, appliance, fluid management and consumer products markets. "HiFax and Astryn olefin based resins will continue to be cost effective alternatives to other engineering polymers," Dargis added.

HIMONT Advanced Materials Group produces and markets engineering plastics worldwide, including filled, reinforced elastomeric, flame retardant and polymer alloys.

HIMONT, an indirect wholly owned subsidiary of Montedison S.p.A. (NYSE: MNT), is the leading worldwide producer and marketer of polypropylene and a major producer of a broad range of polymer-based specialty composites and alloys.

#90017p0434 01/17/1990 ~PR Newswire

NEW YORK (JAN. 17) PR NEWSWIRE - Groupe Bull chairman and CEO Francis Lorentz announced today that Zenith Data Systems will be responsible for Bull's microcomputer operations worldwide as part of the company's blueprint for success in the 1990s.

With the addition of the personal computer and workstation offerings from Zenith Data Systems, Bull offers a full breadth of products and - services: notebook computers and portables, '286 and '386 desktop machines, a complete line of UNIX(A) processors, mid-rang and mainframe products and systems integration, software development and support capabilities.

Groupe Bull, a $6.7 billion computer company -- one of the world's largest -- completed its acquisition of Zenith Data Systems Dec. 28. Lorentz

announced that Roland Pampel, president and CEO of Bull HN Information Systems, Inc. has been named senior executive vice president of Groupe Bull and chairman of Zenith Data Systems. John P. Frank continues as president of Zenith Data Systems, with the additional responsibility of CEO.

Bull will continue to market mid-range and mainframe computers. Lorentz said there will be no loss of continuity between the current Bull and Zenith Data Systems products -- "Our customers' investments in both of our companies will be 'future-proofed'," he said.

Zenith Data Systems will focus on end-user computing, local area networking and development of future EISA (Extended Industry Standard Architecture) and MCA (MicroChannel Architecture) products.

Also announced today were PC-based product innovations for EISA from Zenith Data Systems, including the first 80386 desktop computer with an advanced new disk subsystem that is so fast, it can outperform the more expensive i486(A)-based file servers. Shipments are expected to begin next week.

#90017p0442 01/17/1990 ~PR Newswire

NEW CASTLE, PA (JAN. 17) PR NEWSWIRE - John W. Sant, chairman and chief executive officer of First Western Bancorp Inc. (NASDAQ: FWBI), today reported that net income for the year ended Dec. 31, 1989, was a record $5,316,000, or $2.73 per share, up 10.3 percent over last year's $4,818,000 or $2.48 per share.

For the fourth quarter of 1989, earnings were $1,369,000, or $0.70 per share compared to $1,215,000, or $0.62 per share in the same period last year, representing the fifth consecutive quarter of higher earnings. Per share results for 1988 have been restated to give effect for a 5 percent stock dividend paid in August 1989.

Total assets as of Dec. 31, 1989, were $568,984,000, an increase of 5.5 percent over Dec. 31, 1988, total assets of $539,357,000, with deposits up 5.0 percent to $505,294,000 and shareholders' equity increasing 9.4 percent to $40,885,000 from $37,373,000, or 7.2 percent as a percentage of total assets. Book value per share at Dec. 31, 1989, was $21.02.

Net interest income for 1989, before the provision for loan losses, increased by $3,090,000 or 16.3 percent from 1988. This increase is

attributable to growth in average earning assets and an increase in the net interest margin. Average earning assets increased to $512,032,000 at Dec. 31, 1989, from $454,962,000 at Dec. 31, 1988. This increase, primarily in the consumer and commercial loan portfolio, was funded by the acquisition of approximately $40,000,000 in deposits in late 1988 from two branches purchased in Butler County, Pa., and normal deposit growth of 5.0 percent. An increase in interest rates on the loan portfolio coupled with the overall portfolio growth contributed to an improvement in the net interest margin to 4.59 percent in 1989 from 4.53 percent in 1988.

First Western achieved a 12.4 percent increase in net loans in 1989 to $351,543,000 from $312,744,000 in 1988. To accommodate this loan growth, the provision for possible loan losses increased to $1,050,000 in 1989 from $915,000 in 1988. Net charge-offs in 1989 were $350,000 or .10 percent of average loans as compared to $228,000 or .08 percent in 1988, which remains well below peer group averages. As a result, the allowance for possible loan losses grew to 1.11 percent of total loans at Dec. 31, 1989, from 1.03 percent at Dec. 31, 1988.

Non-interst income was favorably impacted in 1989 by a 14.9 percent increase in service charges on deposit accounts, partly a result of the branch acquisitions, a 21.8 percent improvement in other operating income, and a decrease in securities losses from $513,000 in 1988 to $170,000 in 1989.

Other expenses increased during 1989 primarily as a result of increased personnel and occupancy costs and the amortization of approximately $600,000 in identified intangibles and goodwill as a result of the Butler branches acquisition. This increase was partially offset by a refund of $382,000 of the Pennsylvania bank shares tax. Also contributing to the rise in other expenses were anticipated staffing increases as a result of normal growth, merit pay increases, a significant rise in hospitalization insurance costs and certain lawsuit settlement costs.

The board of directors at its meeting on Jan. 16, 1990, declared a $0.25 per share cash dividend on 1,944,642 shares outstanding, payable Feb. 5, 1990, to shareholders of record Jan. 30, 1990. In addition, the corporation now has available for its shareholders a dividend reinvestment and additional common stock purchase program, coincidental with this January dividend, as described in a recent mailing to all shareholders.

As previously announced, on Nov. 13, 1989, a non-binding letter of intent was signed with First Federal of Western Pennsylvania whereby, through an exchange of common stock and cash, First Federal would become a wholly owned subsidiary of First Western. First Federal is a federally chartered thrift institution with approximately $360,000,000 in assets, headquartered in Sharon, Pa. First Federal has seven banking offices in Mercer, Venango and Butler counties, and three offices in northeastern

Ohio in Ashtabula County.

First Western Bancorp Inc., headquartered in New Castle, Pa., is the parent of First National Bank of Western Pennsylvania, and Beaver Trust Co., with 18 offices in Lawrence, Beaver, Butler and Allegheny counties.

WILMOT, WI (JAN. 17) PR NEWSWIRE - Gander Mountain, Inc. (NASDAQ-NMS: GNDR) today announced record earnings for the second quarter and six months ended Dec. 31, 1989.

Second-quarter net sales amounted to $40,120,000, comparable to the 1988 quarter. Net income was an all-time high $2,097,000, an increase of 24 percent from the same quarter a year ago. Earnings per share rose 24 percent to 76 cents vs. 61 cents in the prior year quarter. Weighted average number of shares outstanding was 2,760,000 in all periods.

For the six months, net sales rose to $72,770,000, up 5 percent from the comparable 1988 period. Net income rose 37 percent to $3,103,000 or $1.12 per share, compared to $2,271,000, or $.82 per share, for the same period in the prior year.

Compared to year earlier periods, net sales, excluding Western Ranchman Outfitters, rose 9 percent in the second quarter to $40,120,000 from $36,883,000. First half net sales, excluding Western Ranchman Outfitters, increased 11 percent to $71,139,000 from $64,164,000 for the year earlier period. Western Ranchman was divested Aug. 31, 1989.

"The continued controlled sales growth and improved operating efficiencies led to the strong profit performance," said Ralph L. Freitag, chairman and president. He further stated, "We are pursuing a number of program enhancements which should further increase our profitability."

Gander Mountain, Inc. is a customer-oriented specialty merchandiser primarily serving the outdoor recreation market through mail order catalogs and retail outlets. The company's stock is traded on NASDAQ/National Market System under the symbol GNDR.

NEW YORK (JAN. 17) PR NEWSWIRE - Rupert Murdoch, the chief executive of The News Corp. Ltd. (NYSE: NWS), yesterday announced a series of top-level promotions among executives of News Corp. and its U.S. subsidiary, News America Publishing Inc.

The changes include the creation of several senior-level positions with broad areas of responsibility at News Corp. which will report directly to Murdoch, as well as the naming of new executives in the News America Publishing Division.

Among executives who will be reporting directly to Murdoch at News Corp. are John B. Evans, formerly president of Murdoch Magazines, who has been named executive vice president-development; Lawrence Kessler, formerly a vice president and general counsel of News America, who has been named executive vice president and general counsel; Jeffrey Leist, formerly a vice president and treasurer, who has been named executive vice president-administration; and William O'Neill, the former managing director of News International Newspapers in the United Kingdom, who has been named executive vice president -- human resources.

In addition, David Devoe, who had been deputy finance director, was named deputy chief financial officer and will be assisting Richard Sarazen, News Corp.'s chief financial officer.

All the executives are veterans of the Murdoch organization. Evans has been with the company for 13 years, Kessler, for four, Leist, 16, O'Neill, 30, and Devoe, seven.

Also announced were five executive appointments at News America Publishing.

Leslie Hinton, the new president of Murdoch Magazines, was formerly its executive vice president and has been with the Murdoch organization for

more than 20 years. He is succeeded as executive vice president at the magazine unit by Richard Hawkes, who had been vice president and general manager at the Boston Herald and has been with News America for eight years.

The new president of the newspaper division is Patrick Purcell, the president and publisher of the Boston Herald who has been with News America for 10 years.

Kenneth Bortner, who joined the company last year when News Corp. acquired his Product Movers company, was named president of the FSI Division.

Gerard Fragetti has been named News America's executive vice president-finance. A 16-year veteran of the company, he was formerly vice president, finance at the FSI Division.

These five executives will report to Martin Singerman, president and chief executive officer of New America.

News Corp. publishes newspapers, magazines and books in the United States, Britain and Australia, and owns Fox Inc., the television and motion picture company.

COLORADO SPRINGS, CO (JAN. 17) PR NEWSWIRE - Cray Computer Corp., today reported a net loss of $42,673,000 or $2.61 per share for the 12 month period ended Dec. 31, 1989.

This compares with a net loss of $32,411,000 or $1.98 per share for the 12 month period ended Dec. 31, 1988.

The net loss for the fourth quarter of 1989 was $12,590,000 or 77 cents per share compared with a net loss of $9,945,000 or 61 cents per share for the like period a year ago.

Neil Davenport, chairman and chief executive officer, said that the loss for the year and for the fourth quarter was in line with the company's business plan.

"We made significant progress during 1989 especially in the ability to assemble and repair modules. We are presently assembling, testing and repairing modules at the rate of four per week with the goal of having a

two processor prototype built by mid-year."

He added, "Although there are considerable challenges yet to be met before the Cray-3 can be brought to market, they are typical of the challenges which major computer projects ordinarily face at this stage."

Cray Computer was spun-off from Cray Research Inc. as a separate company on Nov. 15, 1989, and is engaged in the design and development of the Cray-3 computer system.

MADISON, NJ (JAN. 17) PR NEWSWIRE - Charles M. Stroupe has been appointed president of Wesley-Jessen, Schering-Plough's (NYSE: SGP) vision care business, the company announced today.

Stroupe joined the company in 1988 and was most recently senior vice president - marketing and sales of Schering Laboratories, the company's U.S. prescription products arm. Previously, he was vice president - marketing for the Rorer U.S. division of Rorer Group Inc., and director - product management with the Revlon Health Care Division of Revlon Group Inc.

Commenting on his achievements, Donald R. Conklin, president - Schering-Plough Pharmaceuticals, said, "Stroupe has played a key role in the strong marketing and sales performance of Schering's prescription pharmaceuticals. In his new post, he will be responsible for setting the strategic direction of our vision care business as we enter the 1990s."

"He will continue to build upon Wesley-Jessen's rapidly expanding vision care lines, which include the 'Aquaflex' soft contact lens line and a lens solution line acquired in 1988 from The Cooper Companies, as well as the popular 'DuraSoft' 3 Colors line of soft contact lenses and 'DuraSoft' 2 OptiFit toric lenses," Conklin continued.

Stroupe holds a B.S. degree in biology and chemistry from Christian Brothers College, Memphis, Tenn., and an M.S. degree in physiology from Memphis State University.

Wesley-Jessen, with headquarters in Chicago, is the vision care division of Schering-Plough Corporation, a research-based company engaged primarily in the discovery, development, manufacturing and marketing of pharmaceutical and health care products worldwide.

PHOENIX, AZ (JAN. 17) PR NEWSWIRE - Coopers & Lybrand, the international accounting, tax and management consulting firm, today announced it has acquired Mountain West, a real estate advisory and research firm headquartered in Phoenix, and with offices in Las Vegas and San Diego.

Mountain West now becomes an integral part of Coopers & Lybrand's real estate consulting practice according to Stanley D. Friedman, partner in charge of C&L's west region real estate industry group which includes audit, tax and consulting services. The acquisition is effective today.

"With the added real estate research and consulting capabilities Mountain West brings us, Coopers & Lybrand will enhance its already strong presence in Arizona, Nevada and California while increasing its involvement throughout the Pacific Rim," says David L. Millstein, Coopers & Lybrand's national real estate industry practice leader.

In the new organization, Mountain West partners James A. Chalmers and Eric J. Anderson become partners in the Phoenix office of the west region consulting practice. Ronald J. Barbieri, a Mountain West partner in San Diego, becomes the director of the San Diego-based real estate practice.

"The combination of Coopers & Lybrand and Mountain West will create a unique set of capabilities to help our clients evaluate investment opportunities, analyze capital acquisition strategies, and maximize portfolio and asset values on a local, regional, national and international basis," Friedman says.

"Mountain West established itself as a highly respected real estate consulting firm with a solid reputation and presence in regional markets that we can tap and build upon," Friedman says. "Their work in the public sector, particularly in economic development holds a great deal of potential as well."

Founded by Chalmers in Phoenix in 1974, Mountain West has grown to become recognized as one of the leading real estate and economic consulting groups in the southwest United States. Among Mountain West's major clients are the Maricopa Association of Governments, the city of Oxnard, Calif., the Nevada Nuclear Waste Project Office and real estate developers Del Webb and Kaufman & Broad.

As the next step in its growth strategy, Mountain West had been seeking an affiliation with an international partner. "Any firm wanting to maximize

its potential or that of its clients in today's real estate industry must have a significant presence in institutional markets and access to international clientele," Chalmers says.

"Since international, corporate and institutional capital is largely what is driving the industry today, it is appropriate that Mountain West has linked its operations with Coopers & Lybrand -- an international accounting and consulting firm," Chalmers says.

One of the world's leading accounting, tax, management and benefits consulting firms, Coopers & Lybrand provides solutions for business in a wide range of industries. The firm offers its clients the expertise of more than 16,000 professionals in 98 U.S. cities and more than 61,000 people in 104 countries worldwide.

ATLANTA (JAN. 17) PR NEWSWIRE - Bennett A. Brown, chairman and chief executive officer of The Citizens and Southern Corp. (NYSE: CTZ), announced today that the C&S board of directors has approved the promotion of two senior officers to vice chairmanships.

They are: -- James D. Dixon, who joined C&S in 1968 and has been chief financial officer since 1986 becomes vice chairman and chief administrative officer. His new duties in administration include management of Operations and Corporate Systems. Dixon continues to be responsible for treasury activities, Capital Markets and the comptroller's area, as well as investor relations, legal and regulatory activities.

As treasurer and then chief financial officer, Dixon was a key member of the management team that led C&S' interstate expansion in the mid-1980s, Brown said. Dixon is also designated to be the chief financial officer of Avantor Financial Corp., the new holding company that will result from the pending merger with Sovran Financial Corp.

-- Robert V. Royall Jr., of Columbia, S.C., who joined C&S in 1960, also becomes a vice chairman. He was recently named head of the three-state C&S Community and Corporate Banking Group in Georgia, Florida and South Carolina. Royall is also chairman of The Citizens and Southern National Bank of South Carolina and chairman of the South Carolina State Ports Authority.

Before taking the position as head of the Banking Group, Royall produced consistently strong results as chief executive of C&S South Carolina Corp. Brown said. Royall was chief executive of C&S South Carolina from 1986

through 1989.

The Citizens and Southern Corp. has 506 banking offices throughout Georgia Florida and South Carolina. On Sept. 26, 1989, C&S and Sovran Financial Corp. announced an agreement to merge under a new holding company, to be named Avantor Financial Corp. Shareholders of C&S and Sovran will vote on the transaction Feb. 2.

CHARLESTON, WV (JAN. 17) PR NEWSWIRE - Eagle Bancorp, Inc. (NASDAQ-NMS: EBCI), the parent company of First Empire Federal Savings and Loan Association, announced that the Board of Directors declared a special dividend of .10 cents per share on January 16, 1990. The dividend will be paid February 9, 1990 to stockholders of record on January 26, 1990. This dividend is in addition to the regular quarterly dividend of .07 cents per share which was also declared and will be payable at the same time to eligible stockholders.

This is the first special dividend the Company has declared since going public in July 1988, and increased the dividends paid in 1989 to .38 cents per share. Although the final earnings for 1989 have not been announced, the Board of Directors feel that this special dividend is warranted due to the strong performance in 1989.

It is the Company's intention to continue to pay regular quarterly dividends and to determine the appropriateness of special dividends based upon the Company's relative performance in the future.

Mr. J. Christopher Thomas, President and Chief Operating Officer stated, "We are extremely pleased to announce the special dividend in addition to the regular dividend. The Baord of Directors and management feel strongly about improving value and return for our stockholders. After reviewing the past year's performance and our extremely storong capital position, the special dividend was deemed to be a reasonable reward for our loyal stockholders."

First Empire Federal Savings and Loan Association operates ten offices in southern West Virginia. Eagle Bancorp, Inc. is traded on the Nasdaq System (SYMBOL EBCI).

PHILADELPHIA (JAN. 17) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) today announced a financial restructuring that will include the repurchase through a Dutch auction tender offer of approximately $1 billion of its outstanding common stock, the establishment of an Employee Stock Ownership Plan (ESOP) of approximately $300 million for its non-union employees, and an approximately $300 million open market common stock purchase program in connection with the establishment of the ESOP.

Conrail stated that the tender offer will begin tomorrow for up to 21 million of the company's 67.1 million outstanding common shares, or approximately 30 percent, at a price not greater than $53 and not less than $43 per share.

At the same time, Conrail reported unaudited 1989 earnings of $148 million or $2.17 per share, vs. $306 million, or $4.44 per share in 1988. Earnings per share in 1989 would have been $4.33 in the absence of a special charge ($2.16 per share) related to workforce reductions, consolidation of certain operating and administration functions, and an increase in casualty reserves based on an actuarial valuation. This special charge was taken in the fourth quarter, which showed a loss of $81 million, or $1.20 per share, vs. earnings of $78 million, or $1.13 per share in the fourth quarter of 1988.

ST. LOUIS (JAN. 17) PR NEWSWIRE - Edward R. (Randy) Jayne has been named president of the McDonnell Douglas Missile Systems Co. here. He replaces John P. Capellupo, who recently was transferred to Douglas Aircraft Co. in Long Beach, Calif.

Formerly vice president and general manager of the company's F-15 fighter aircraft program at McDonnell Aircraft Co., Jayne joined the company in 1987 as vice president of strategic program development for what was then called the McDonnell Douglas Astronautics Co. Prior to that he was with General Dynamics for seven years, where he was involved in the planning and overseeing of a number of aerospace programs, including a variety of Navy, Air Force and Army missile systems.

The McDonnell Douglas Missile Systems Co. employs approximately 6,900 people at production facilities in St. Louis and Titusville, Fla. Missiles currently in production are the U.S. Navy's basic anti-ship

missile, Harpoon; SLAM, a stand-off attack Harpoon derivative for inland targets; and the Tomahawk cruise missile, produced by McDonnell Douglas and General Dynamics, which is designed to fly at ship subsonic speeds and low altitude, striking distant land or targets. The company also produces small battlefield weapons including the Shoulder-Launched Multipurpose Assault Weapon (SMAW) and Dragon, a portable, medium-range, anti-tank assault weapon.

#90017p0495 01/17/1990 ~PR Newswire

PITTSBURGH (JAN. 17) PR NEWSWIRE - PNC Financial Corp (NYSE: PNC) today

reported consolidated net income for 1989 of $377.4 million, or $3.91 per fully diluted share.

Fourth quarter earnings were $1.5 million, reflecting an additional provision for credit losses in the amount of $180 million. A majority of the additional provision relates to increased reserve coverage on loans to developing countries experiencing payment problems (LDC), with the balance being used to support domestic credit.

In announcing this action, Thomas H. O'Brien, chairman, president and chief executive officer, stated, "Although nonperforming asset levels have declined compared to the third quarter, we chose to take this step now and position PNC's reserve ratios at the top end of the industry. This action is consistent with our conservative loan reserve policy and will represent 126 percent coverage of nonperforming loans."

PNC also wrote off its remaining investment in a Brazilian subsidiary during the fourth quarter and recorded a one-time tax expense related to the potential repatriation of off shore income.

O'Brien further stated, "Excluding the additional provision and other foreign-related charges, PNC would have reported earnings of $505.3 million, or $5.24 per fully diluted share, for full year 1989. The after-tax impact of these actions reduced fourth quarter earnings by $127.9 million, or $1.34 per fully diluted share. Even with these actions, PNC will remain one of the top five or six most profitable banking institutions in the country in terms of net income."

Approximately $100 million of the additional provision was used to increase reserves generally allocated to medium- and long-term LDC debt and to provide coverage on certain trade related exposure, reflecting continued deterioration in value. After taking this action, PNC has reserved 100 percent against medium- and long-term LDC loans which totalled $191.2 million at Dec. 31, 1989, and 50 percent against certain trade related exposure which totalled $56.0 million at year end.

O'Brien continued, "This action gives us the flexibility to continue to reduce overall LDC exposure and eliminate LDC risk as an issue going forward.

"At the end of the second quarter, we reported an increase in nonperforming loans in the amount of $77.3 million, principally related to real estate construction projects which were substantially leased. At that time, we anticipated liquidating these projects prior to year end, and as a result, restoring PNC's coverage levels to our historic norms. It has taken us longer to acquire title to these properties than anticipated, and we now expect to complete liquidation during 1990. However, we elected to act now to bring coverage ratios at PNC to a level consistent with our

conservative reserve policy."

If the impact of this additional provision and other foreign-related charges were excluded, net income for the full year would have been 9.7 percent higher than 1988 and earnings per share on a fully diluted basis would have increased 7.8 percent.

PNC Financial Corp, headquartered in Pittsburgh, is the nation's 14th largest bank holding company with assets of $45.7 billion.

#90017p0504 01/17/1990 ~PR Newswire

MIAMI (JAN. 17) PR NEWSWIRE - CenTrust Bank (AMEX: DLP), a state savings bank based in Miami, announced today that it and Ensign Bank F.S.B. and its parent, Hamilton Holding Company (controlled by Ted Arison), have mutuallly agreed to terminate their previously announced, non-binding agreement in principle, which contemplated a combination of Ensign and CenTrust, the formation of a new holding company and a capital infusion from Hamilton Holding Company.

CenTrust said that the proposed capital infusion and related asset restructuring would have placed the combined bank close to, but still short of full compliance with, the capital requirements of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). Continued communications with the Office of Thrift Supervision (OTS) led the parties to conclude that OTS approval of the transaction was uncertain in these circumstances, so the parties agreed to terminate further negotiations toward a definitive agreement.

CenTrust and Ensign will each file separate capital plans in connection with FIRREA's capital requirements. CenTrust said that it expects its capital plan will include the sale of 63 of its 71 branches to Great Western Bank. An application for approval of that transaction continues pending with the OTS.

#90017p0509 01/17/1990 ~PR Newswire

NEW CASTLE, PA (JAN. 17) PR NEWSWIRE - John W. Sant, chairman and chief executive officer of First Western Bancorp Inc. (NASDAQ: FWBI), today reported that net income for the year ended Dec. 31, 1989, was a record $5,316,000, or $2.73 per share, up 10.3 percent over last year's

$4,818,000 or $2.48 per share.

For the fourth quarter of 1989, earnings were $1,369,000, or $0.70 per share compared to $1,215,000, or $0.62 per share in the same period last year, representing the fifth consecutive quarter of higher earnings. Per share results for 1988 have been restated to give effect for a 5 percent stock dividend paid in August 1989.

Total assets as of Dec. 31, 1989, were $568,984,000, an increase of 5.5 percent over Dec. 31, 1988, total assets of $539,357,000, with deposits up 5.0 percent to $505,294,000 and shareholders' equity increasing 9.4 percent to $40,885,000 from $37,373,000, or 7.2 percent as a percentage of total assets. Book value per share at Dec. 31, 1989, was $21.02.

Net interest income for 1989, before the provision for loan losses, increased by $3,090,000 or 16.3 percent from 1988. This increase is attributable to growth in average earning assets and an increase in the net interest margin.

Average earning assets increased to $512,032,000 at Dec. 31, 1989, from $454,962,000 at Dec. 31, 1988. This increase, primarily in the consumer and commercial loan portfolio, was funded by the acquisition of approximately $40,000,000 in deposits in late 1988 from two branches purchased in Butler County, Pa., and normal deposit growth of 5.0 percent.

An increase in interest rates on the loan portfolio coupled with the overall portfolio growth contributed to an improvement in the net interest margin to 4.59 percent in 1989 from 4.53 percent in 1988.

First Western achieved a 12.4 percent increase in net loans in 1989 to $351,543,000 from $312,744,000 in 1988. To accommodate this loan growth, the provision for possible loan losses increased to $1,050,000 in 1989 from $915,000 in 1988. Net charge-offs in 1989 were $350,000 or .10 percent of average loans as compared to $228,000 or .08 percent in 1988, which remains well below peer group averages.

First Western Bancorp Inc., headquartered in New Castle, Pa., is the parent of First National Bank of Western Pennsylvania, and Beaver Trust Co., with 18 offices in Lawrence, Beaver, Butler and Allegheny counties.

CONTACT: Robert H. Young, v-p-finance, secretary & treasurer of First Western Bancorp, 412-652-8550.

#90017p0516 01/17/1990 ~PR Newswire

TOPEKA, KS (JAN. 17) PR NEWSWIRE - Southwestern Bell Telephone has been awarded a five-year contract to provide telephone service to the speech

and/or hearing-impaired in Kansas.

Southwestern Bell Telephone is believed to be the first Bell Operating Company to win such a contract. The first year's revenues are estimated at $1.8 million.

Kansas Relay Service Inc. (KRSI) awarded the Dual Party Relay Service contract. KRSI is a nonprofit organization. Its board of directors includes representatives of the Kansas Corporation Commission, the Kansas Commission for the Deaf and Hearing Impaired and the state's telecommunications industry.

The service will begin May 1, 1990, and operate 24 hours a day, seven days a week.

The service may be used to complete calls originating and billed in Kansas including outgoing interstate calls. Out-of-state callers will not be able to access the service to call Kansas telephone customers. However, interstate calls that are treated as local such as those originating in Kansas City, Mo., and terminating in Kansas City, Kan., will be completed.

Here's how the service will work: Speech and/or hearing-impaired customers in Kansas will access the relay center via a toll-free number using a telecommunications device for the deaf, a teletypewriter or a compatible personal computer, collectively known as TDDs. Customers type their call request, which is received on a terminal at a Southwestern Bell Telephone attendant's station in the relay center. The attendant then places an outgoing call to the called party and acts as a relay between the two parties in communicating their conversation by voice and TDD.

The service also will work in reverse. A hearing customer can call an impaired customer via the service.

Speech- and/or hearing-impaired customers must have their own TDDs to communicate.

Southwestern Bell Telephone is a wholly owned subsidiary of Southwestern Bell Corporation and provides network exchange service for more than 9 million customers in its five-state region, including Kansas, Arkansas, Missouri, Oklahoma and Texas.

#90017p0517 01/17/1990 ~PR Newswire

MCLEAN, VA (JAN. 17) PR NEWSWIRE - Vie de France Corporation (NASDAQ-NMS: VDEF) released today the results for its second quarter which ended Dec.

9, 1989, and announced some significant organizational and financial developments.

For the quarter, the company's sales increased 9 percent to $24,100,000 from $22,155,000 in the second quarter of the previous year. Net loss for the quarter is $191,000 (-2 cents per share), which is an improvement upon the loss of $304,000 (-3 cents per share) in the prior year's second quarter. Operating income of $104,000 compares favorably to an operating loss of $247,000 for the same period last year.

For the year to date (six months), the company's sales increased also 9 percent, to $46,406,000 from $42,638,000. Net loss for the six month period is $477,000 (-5 cents per share), a significant improvement upon the loss of $969,000 (-9 cents per share) for the prior year to date. Income from operations for the year to date remains positive at $135,000 as compared to a loss of $1,340,000 for the first two quarters of the prior year.

Jean-Louis Vilgrain, chairman, reported that the loss for the quarter is primarily in the Restaurant Corporation subsidiary and to a lesser degree in costs for the start-up company, Vie de France Culinary Corporation. The Bakery Corporation continues to report improving results as it has for several quarters.

At a meeting of the board this date, several important decisions were made which will begin the return to profit for the Vie de France Corporation. Vilgrain stated that the company is being reorganized to allow for more integration of the products of the various subsidiaries, to reduce costs, to allow for flexible operations, and most importantly, to provide focus and a consistent image for Vie de France. The three separate subsidiary companies will become operating divisions of Vie de France Corporation. Each division will separately maintain operations control of sales, manufacturing and distribution for the bakery, pastry, retail restaurant and sous-vide products. Several functions currently duplicated in the three subsidiaries will be folded into a corporate services group. Quality assurance, purchasing and personnel will form the corporate services group along with finance, which is already centralized. Also, within this corporate services group, a specific function will be established to coordinate new product development in marketing and research and development for all the divisions. According to Vilgrain, the concentration of these services will not only save costs, but assist in the integration of products and services from one division to another. He further stated that Vie de France will now be better able to focus its image as a company providing the highest quality French/European-style breads, croissants, pastries and dinner entrees to the foodservice industry, retail stores and to its own restaurant network. Also, the company will continue to import high quality products and be in a position to export its products, trademark and technology to other countries.

Vilgrain emphasized that the company's primary objective is to regain its historic levels of profitability. Consistent with this objective and the one-company philosophy, Richard M. Tolbert, currently vice president, finance, and chief financial officer and a company director, has been appointed president and chief operating officer of Vie de France Corporation and will report directly to Vilgrain, the chairman and chief executive officer. Tolbert has been chief financial officer for three years and has many years of senior level experience in finance and operations which included profit responsibilities. Prior to Vie de France Tolbert held top level positions in operations and finance for Sunshine Biscuits and Continental Baking Company. For most of the past year, Tolbert had already assumed the administrative duties normally assigned to the president. Vilgrain went on to say that the company is fortunate to have someone of his caliber to take over the day to day operations and bring all company forces to bear to increase the profit. Within this new organization, Martin Van Ingen, currently president of the Bakery Division and Stanislas Vilgrain, president of Culinary Division, will report to Tolbert. Tolbert will manage the corporate support functions and will be president of the Restaurant Division, replacing Robert N. Blessing Jr., who is leaving the company.

Tolbert stated that Vie de France is a strong brand name and is a great company with outstanding products and hard working dedicated employees, which will greatly assist in returning Vie de France to profitability. For the immediate future, he stated, the plan will be to move wholesale sales aggressively, continue the wholesale bakery modernization and consolidation program, and make the restaurant business profitable. To that end, restaurant expansion of company-owned stores is on hold. The company will be examining all locations, and will pursue selling existing restaurants in areas outside the core Washington, Chicago and Los Angeles areas as franchises. Also within the integrated company, management will bring new bakery and sous-vide items to its restaurants.

Tolbert further stated that they are pleased to announce that the Culinary Division, under Stanislas Vilgrain, has a limited sous-vide product line ready for marketing, and shipments will now begin on a limited basis. Full plant production will start in early March. Management said it has great expectations for these high-tech, vacuum-cooked gourmet meals because of the excellent quality and the reception in market tests.

Also, under the direction of Van Ingen, the Bakery Division has announced that production will begin soon in a modern 35,000 square foot bakery located in the Philadelphia area, which replaces two inefficient bakeries in Englewood, N.J. and Philadelphia.

Tolbert also commented that in an attempt to further cut costs, the company will be looking for less expensive and more efficient office space

for its corporate headquarters.

Tolbert also has announced that as part of the restructuring, two other executives were promoted. Thomas Rowe, currently assistant vice president finance, assumes the position of vice president, finance and chief financial officer, and Paul Hoftyzer is promoted to vice president, Restaurant Operations and Administration. Hoftyzer has many years of restaurant operations management experience. He currently serves as director of purchasing.

In a separate development, the board approved the issuance of up to 1 million new shares in connection with discussions being pursued with a potential outside investor.

Finally, in order to maintain control of Vie de France, Jean-Louis Vilgrain confirmed that he and his group have completed the purchase from the Bouygues Group of the Vie de France shares previously controlled by Grands Moulins de Paris (GMP). Vie de France is now 56 percent owned through Food Research Corporation (FRC) (a Jean-Louis Vilgrain Group Company). FRC has recently loaned $2 million to Vie de France in the form of subordinated debt.

Jean-Louis Vilgrain's group also maintains interests in Europe, Africa and Asia, primarily in engineering, sugar plants, flour milling, bakeries, restaurants, sous-vide, and commodity brokering. Jean-Louis Vilgrain and Guy Tuleu, vice chairman and secretary/treasurer, expect to spend more time in the United States to work on strategic direction with Tolbert, his staff and Division Presidents Van Ingen and Stanislas Vilgrain.

HOUSTON (JAN. 17) PR NEWSWIRE - Exxon (NYSE: XON) said it just received a government request for $20.4 million in additional funding for studies related to assesing natural resource damage from the Alaskan oil spill and had not had sufficient time to consider it.

The company noted that the resource Trustees--U.S. Departments of Interior Commerce, and Agriculture, and the Alaska Department of Fish and Game--did not provide definitive information as to how the additional money would be spent. "The funds apparently are to be allocated to the Trustees' ongoing assessment studies which have been roundly criticized and are part of a plan which is still in the review process and may be subject to change."

The company added, "The unanimous opinion of these studies, based on public comment, is that they are poorly designed and fail to address restoration of the environment as they should."

Further, Exxon said, the Trustees have not provided an accounting of the $15 million that Exxon contributed last year as advanced funding for the resource studies.

BALTIMORE (JAN. 17) PR NEWSWIRE - Baltimore Bancorp (NYSE: BBB), the parent company of The Bank of Baltimore and Municipal Savings Bank, F.S.B. today reported net income for the year 1989 of $17,630,000, or $1.36 per share, compared to net income of $2,305,000, or $.18 per share, in the previous year 1988.

Harry L. Robinson, chairman of the board, said the improvement in income was attributed to strong gains in non-interest revenues and to better earnings in Securities portfolios.

Net income for the fourth quarter of 1989 was $1,910,000, or $.15 per share, compared to $5,035,000, or $.39 per share in the previous year. Robinson said this decrease in income is attributable to a one- time change in accounting procedures related to consumer loan losses and a generally higher level of loan losses for the quarter.

Baltimore Bancorp, which operates 51 banking offices in Maryland, closed the year with total assets of $3,461,722,000 and a primary capital position of 8.74 percent.

#90017p0523 01/17/1990 ~PR Newswire

MINNEAPOLIS (JAN. 17) PR NEWSWIRE - TCF Financial Corp. (TCF) (NYSE: TCB) today reported 1989 net income of $19.1 million, down 11 percent from a record $21.5 million for 1988. Earnings per share for 1989 were $2.63, compared with $2.99 for 1988.

For the 1989 fourth quarter, TCF earned $3 million, compared with $4.5 million for the same period in 1988. Earnings per share were 41 cents, versus 62 cents for the 1988 quarter.

Although TCF's 1989 results fell short of its record 1988 earnings, Chairman and Chief Executive Officer William A. Cooper was pleased with the company's performance, given market conditions.

"1989 was a tough year for the thrift industry," said Cooper. "We were negatively impacted by significantly higher short-term interest rates and the publicity surrounding the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). TCF, however, benefited from continued fee income growth, tight expense control, and the restructuring of its balance sheet."

Cooper added that TCF Bank Savings fsb ("TCF Bank"), TCF's wholly owned thrift subsidiary, exceeds the new core and tangible capital levels mandated by FIRREA and expects to meet the risk- based capital requirement in 1990 through the retention of earnings, amortization of goodwill, securitization of loans, issuance of subordinated capital notes and other means.

TCF posted net interest income of $92.2 million for 1989, down 15 percent from a record $108.8 million for 1988. Net interest income for the 1989 fourth quarter was $22.8 million, down from $25.2 million for the 1988 fourth quarter but up from $21.4 million for the 1989 third quarter. TCF's net interest margin was 2 percent for the year ended Dec. 31, 1989, and 2.13 percent for the 1989 fourth quarter, compared with 2.10 percent for 1988 and 2.08 percent for the 1988 fourth quarter. The decline for the year was largely due to the higher cost of funds in 1989.

Non-interest income (excluding gain on sales of loans and investments, gain on sale of loan servicing and gain from pension settlement) totaled $63.1 million for 1989, up 15 percent from $54.9 million for 1988. For the fourth quarter, non-interest income (excluding the 1988 gains on sales of loans and investments) totaled $16.5 million, up 24 percent from $13.4 million a year ago. The improvement in 1989 was primarily due to increased fee and service charge revenues, title abstract and data processing revenues, fees on annuity sales, and secondary marketing activities.

Non-interest expense (excluding the benefit or cost on the cancellation or write-down to market of interest rate swaps, and provision for real estate losses) totaled $133.3 million for 1989, up 4 percent from $127.6 million for 1988. For the fourth quarter, non-interest expense (excluding the items noted above) totaled $33.9 million, compared with $32.4 million a year ago.

In 1989, TCF realized gains of $4.4 million on sales of loans and investments, compared with $24.1 million in 1988. No gains were realized during the 1989 fourth quarter. TCF sold fixed-rate assets in 1989 to reduce interest rate risk and to improve capital ratios in anticipation of the increased capital standards imposed by FIRREA. In addition, TCF

realized gains of $6.1 million on the sale of loan servicing rights and the settlement of a portion of its pension plan obligations. TCF's operating results remain susceptible to changes in short-term interest rates.

Concurrent with the 1989 sales of fixed-rate mortgage-backed securities, TCF reduced short-term borrowings and canceled or wrote down to market $264.3 million in notional amounts of interest rate swaps at a gain of $1.2 million. TCF had no remaining interest rate swaps at Dec. 31, 1989.

Gains on sales of loans and investments in 1988 were $24.1 million, with $6.9 million of the total realized in the fourth quarter. Concurrent with the 1988 sales of fixed-rate assets, TCF reduced short-term borrowings and canceled or wrote down to market $304.3 million in notional amounts of interest rate swaps at a cost of $16.8 million.

TCF recognized an $8 million extraordinary credit in 1989 from the utilization of net operating loss carryovers, with $1.3 million of the total recognized in the fourth quarter. In 1988, TCF recognized a $9 million extraordinary credit for the year and $2.3 million for the fourth quarter, also from the utilization of net operating loss carryovers.

TCF provided $10 million for loan losses and $2.5 million for real estate losses in 1989, compared with $16.5 million and $3.2 million, respectively in 1988. For the fourth quarter, TCF provided $1.1 million for loan losses and $980,000 for real estate losses, compared with $6.7 million for loan losses in the same 1988 period. No provision for real estate losses was recorded in the 1988 fourth quarter. Net loan charge-offs were $17.4 million in 1989 and $2.8 million in the fourth quarter, compared with $16.2 million and $4.9 million, respectively, in the corresponding 1988 periods. At year-end 1989, the allowances for loan and real estate losses totaled $22.9 million, down from $29.3 million at the end of 1988.

Non-performing assets (principally non-accrual loans and real estate acquired through foreclosure) were $96.8 million at Dec. 31, 1989, down from $98.1 million at year-end 1988, but up from $91.8 million at Sept. 30 1989.

Total net loans were $3.9 billion at the end of 1989, down $556.3 million from $4.4 billion at year-end 1988. The decrease was mainly due to sales of $440.7 million of fixed-rate mortgage- backed securities and $98.3 million of education loans. Home equity loans increased $83.8 million during 1989, and totaled $512 million at Dec. 31, 1989.

Deposits totaled $3.4 billion at Dec. 31, 1989, down $82.3 million from the end of 1988. Lower-cost checking accounts totaled $424.2 million or 12.6 percent of deposits at year-end 1989, compared with $399.5 million or 11.6 percent at year-end 1988. TCF added eight Minnesota branches to its

network in 1989, including seven Cub Foods in-store branches, plus four Illinois Cub Foods in-store branches.

At Dec. 31, 1989, TCF had total assets of $4.7 billion, down from $5.3 billion at year-end 1988. Stockholders' equity was $176.1 million or 3.8 percent of total assets. Tangible net worth totaled $86.5 million or 1.9 percent of total assets. Book value per share was $24.52, based on 7,182,278 shares outstanding.

TCF is the holding company for TCF Bank, the third largest banking institution in Minnesota. TCF Bank operates 55 branches in Minnesota and 17 branches in northern Illinois. Deposits at TCF Bank are insured to $100,000 by the Federal Deposit Insurance Corp.

SURREY, British Columbia (JAN. 17) PR NEWSWIRE - Kerkhoff Industries Inc. (AMEX: KIX) announced today that revenues for the second quarter ended Nov. 30, 1989 were Cdn. $4.248 million as compared with Cdn. $3.103 million for the comparable quarter in 1988, an increase of 36 percent. Not withstanding the increased revenues, which are almost wholly derived from the Manufacturing Division, the company incurred a loss of Cdn. $320,000 (Cdn $0.10 per share for the quarter) and Cdn. $278,000 ($.09 per share for the year to date) as compared to a loss of Cdn. $46,000 ($.02 per share) and a profit of $877,000 ($.18 per share) for the comparable periods last year.

Bill Kerkhoff, president and chief executive officer, said that the loss was attributed to overhead costs of the Development Division which have not been capitalized to current projects and to the start up costs of Kerkhoff Doors Inc.'s new wood window plant.

Kerkhoff said that the Manufacturing Division's aluminum window plant, Cascade Windows Ltd., is reaching new records of sales and profitability, which auger well for the future given the buoyant state of the economy in British Columbia.

Kerkhoff Industries is engaged in real estate development and building products manufacturing.

ST. LOUIS (JAN. 17) PR NEWSWIRE - Anheuser-Busch Inc. (NYSE: BUD)

officials have announced that Busch Light beer will be available to consumers in Ohio beginning the first week of February.

The product has been available on a pilot market basis since May, 1989 in a region that includes Louisiana, Missouri, New Jersey, Illinois, Iowa, parts of Kansas and Longview, Texas.

Like all Anheuser-Busch beer products, Busch Light is brewed with the finest natural ingredients, including hops, barley malt, cereal grains and water. Busch Light contains 110 calories per 12-ounce serving -- which is comparable to other light beers.

Busch Beer has shown continual sales increases since being introduced in the Midwest in 1955. It is now available in 41 states and the District of Columbia.

The new beer features a different brewing process than Busch Beer that produces a lighter, brisk and invigorating taste.

Busch Light utilizes cold filtering brewing technology which delivers a Busch-like smoothness in a light beer.

Busch Light will benefit from the brewing industry's most comprehensive quality control program, which includes the daily tasting of Busch Light by experts at the company's headquarters in St. Louis.

Packaging for Busch Light will feature distinctive blue and silver 12-ounce longneck glass bottles and cans.

The new product will be supported by a wide range of marketing support activities, including television, radio, print and outdoor advertising.

Busch Light utilizes a distinctive advertising campaign entitled "Make the Easy Choice." Advertising for the new brand contrasts humorous, hard situations with the "easy" drinking taste of Busch Light.

Busch Light is a product of Anheuser-Busch Inc., the world's largest brewer. In addition to Busch Light, the company brews Budweiser, Bud Dry, Bud Light, Michelob, Michelob Light, Michelob Dry, Michelob Classic Dark, Busch and LA beers and King Cobra, a malt liquor.

#90017u0159 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - First lady Barbara Bush says she would support women in combat if they are physically up to the task because they are ''mentally and emotionally more than able to compete with a man.''

Mrs. Bush took the qualified stand on the issue, which has burgeoned since last month's U.S. invasion of Panama, in an interview Tuesday with wire service reporters.

While avoiding other controversial issues, the first lady responded to a question about the role of women in combat by saying she supported the idea ''if I thought a woman could physically pick up someone who was wounded and carry them to safety.''

''If they could throw a hand grenade as far as a man, then I would say 'fine' because I think certainly they are, mentally and emotionally, more than able to compete with a man.

''The only problem I have,'' she added, ''is if it risks someone's life.''

The issue of women in combat arose when it was revealed that female U.S. soldiers were involved in incidents where U.S. troops exchanged gunfire with Panamanian Defense Forces.

It was unusual for Mrs. Bush to take a position on a controversial issue since in the past she has taken great care to keep her opinions on sensitive topics to herself.

The only time she showed any irritation during Tuesday's interview was when asked for her views on abortion and gun control, dismissing them with ''nice try, nice try. Let's get on'' with another question.

When the questions centered on Panama, Mrs. Bush said the president told her of plans to invade the Central American country before the troops moved in. ''I thought it had to be done,'' she said, but added that ''I thought it was tragic we lost the lives,'' referring to 23 Americans killed during the invasion.

Calling herself her husband's ''biggest fan,'' Mrs. Bush nevertheless said that during the invasion ''I couldn't get over how level he was, how steady he was, how right I thought he was. I always think he is, but I was doubly impressed by the enormous burdens (and) that he managed to keep everything in focus.''

Ten days after the invasion, she said the president came racing into her office in the family quarters to excitedly announce ''we got him,'' referring to the surrender in Panama City of fugitive Gen. Manuel Noriega, who was later flown to the United States to stand trial on drug-trafficking charges.

Mrs. Bush, who wore a suit with a black and white checked skirt and a red jacket, looked fit and granted the interview on the occasion of the

anniversary Saturday of her first year in the White House.

Still suffering from bloodshot eyes and double vision stemming from Graves' disease, a thyroid ailment, Mrs. Bush said she is ''cautiously optimistic'' that the 10 radiation treatments she underwent will eliminate the problem, although she won't know for two to four months. She is still taking prednisone, a steroid, which causes side effects such as coarse skin and weight fluctuations.

When asked whether she was concerned about her husband going to the Andean drug summit in violence-wracked Colombia next month, Mrs. Bush said, ''I'm a little testy about all the letters I've been getting about it,'' which have expressed fear for the president's safety.

''I can't change his mind and make those decisions,'' she said. ''I don't like it when he leaves the country.''

Looking even further ahead, Mrs. Bush refused to say whether she would like her husband to run for a second term, saying ''I want him to do what he wants to do.''

Reflecting on her first year as first lady, Mrs. Bush said the most surprising thing about living in the White House was that she liked it. ''I never thought I would.

''People in the White House spend all their time making life happy for me '' she explained. ''I'm a spoiled human being.''

''I never dreamed that I would love it,'' she went on. ''Imagine the things we've done this year. Besides, the world has done such exciting things,'' she said, referring to the pro-democratic revolution in Eastern Europe.

Told that her popularity polls were even higher than the president's, whose approval rating in a USA Today sampling stood at 63 percent, Mrs. Bush explained she did not have to make tough decisions. ''I don't have to do anything ... just be there. I don't threaten anyone. I'm just a nice fat grandmother.''

(JAN. 17) UPI - NASA officials report the astronauts aboard the shuttle Columbia are in good health and high spirits as they enter their ninth day in orbit Wednesday. On Tuesday, the astronauts spent the day photographing the Earth and studying the effects of weightlessness on the human body. They also beamed home spectacular television pictures of a man-made snowstorm in space, caused by the dumping of excess water from the shuttle's waste tanks.

Shortly after the crew was awakened late Tuesday, skipper Daniel Brandenstein... who turns 47 Wednesday... was radioed birthday greetings

from basketball star Larry Bird. Said the Boston Celtics forward in a pre-recorded message- ''Happy birthday and have a safe landing.'' Later, when asked by mission control how old he was, Brandenstein replied- ''Didn't you know this was a classified mission?''

Bomb squads in Colombia Tuesday defused a car bomb apparently meant for the nation's security police chief. Authorities say the car, packed with 12-hundred pounds of dynamite, was found in a Bogota suburb and came with instruction on how to set it off when the police chief passed by. The official has escaped several attempts by cocaine traffickers to kill him.

U-S authorities confirm the death of an American citizen found shot to death Sunday morning near Tijuana, Mexico. The dead man is identified as 24-year-old Jeffery Anderson of El Cajon, California. Officials describe Anderson as a private investigator and say he may've been working on a case at the time of his death. Mexican police have made NO arrests in the case.

#90017u0229 01/17/1990 ~United Press International

(JAN. 17) UPI - Rescue teams in Costa Rica Tuesday recovered the bodies of the 23 people killed in Monday's crash of a plane that went down in the rugged mountains south of the capital, San Jose. There were NO survivors. Investigators are trying to determine what caused the country's worst air disaster in 10 years.

Police in Vermont are searching for a plane with three people aboard that disappeared Tuesday night over Lake Champlain as it prepared to land in Burlington. Officials say so far, they've found NO evidence the plane crashed on the frozen lake.

Congressman John Rowland says he's co-sponsoring a bill to allow cable t-v stations to continue broadcasting programs that otherwise would be blacked out. The legislation being introduced by the Connecticut Republican will address the F-C-C's new syndicated exclusivity rule, which went into effect January 1st. That rule... which Rowland calls ''bad policy''... allows commercial t-v stations to demand the black-out of any cable program that also is televised by a competing over-the-air channel.

#90017u0323 01/17/1990 ~United Press International
(JAN. 17) UPI - The Milwaukee Bucks may not miss their five-time All-Star guard Sidney Moncrief after two players at that position combined for 68 points Tuesday night.

The Bucks retired Moncrief's No. 4 jersey before their game with Golden State. Moncrief, who retired at the end of last season, led Milwaukee to 10 consecutive playoff appearances in the 10 seasons he was with the club (1979-1989).

But guard Alvin Robertson scored a season-high 37 points and guard Ricky Pierce added 31 to lead the Bucks to a 134-126 victory over the Warriors. Robertson also had 16 rebounds, 8 assists and 4 steals. He was compared to Moncrief after the game.

''You couldn't ask to be compared to a better guy,'' Robertson said. ''I said when I got drafted, that if I could touch half as many people as

Sidney Moncrief, then I would have a good career.''

Moncrief averaged 16.7 points per game and was the second-leading playoff scorer in team history, behind Kareem Abdul-Jabbar.

''I wanted our team to play well for Sidney,'' said Golden State Coach Don Nelson, a former Bucks head coach who was going after his 600th NBA victory. ''If we could have won in front of Sidney, it would have been special.

''We thought we could handle Alvin better. He killed us.''

The Warriors have not won in Milwaukee since Nov. 27, 1981.

''He's (Robertson) a man's man when it comes to playing the game of basketball,'' Bucks Coach Del Harris said. ''He comes to play defense, he gets the rebounds, he is indomitable, he has a tremendous drive to win.''

Robertson scored a career-high 41 points against Denver in 1986 as a member of the San Antonio Spurs.

Chris Mullin led Golden State with a season-high 39 points.

Clippers 106, Hornets 98

At Los Angeles, Ron Harper scored 33 points and Charles Smith added 14 of his 24 points in the final quarter to help the Clippers keep Charlotte winless on the road. The Hornets have lost 17 in a row away from home over two seasons.

Kings 108, Hawks 91

At Sacramento, Calif., Wayman Tisdale and Harold Pressley each scored 21 points to lead seven Kings in double figures. Sacramento defeated Atlanta at home for the first time since Dec. 5, 1984. Dominique Wilkins led the Hawks with 28 points.

Blazers 120 Nuggets 115

At Portland, Ore., Buck Williams scored a season-high 24 points and Clyde Drexler and Terry Porter each added 21 to lead Portland. Fat Lever led Denver with 22 points. The Blazers held the Nuggets scoreless for nearly the final two minutes.

#90017u0346 01/17/1990 ~United Press International

PANAMA CITY, PANAMA (JAN. 17) UPI - The U.S.-installed Panamanian

government gave a Peruvian diplomat three days to leave the country, and Peru countered by saying the diplomat will take with him a dozen Panamanians who have been granted asylum in its embassy.

Deputy Foreign Minister Juan Manuel Castulovich said the decision Tuesday to expel Peruvian Luis Sandiga, the commercial attache at the embassy, was taken in response to declarations made by ''Peruvian authorities that make normalization of relations between our two countries difficult.'' He did not elaborate.

Peru has been one of the most vocal critics of the U.S. invasion of Panama Dec. 20 that toppled Panamanian strongman Manuel Antonio Noriega and installed Guillermo Endara as president.

Although Endara was widely believed to have won presidential elections held in Panama May 7 that were later invalidated, he has said Panama would not hold new elections as Peruvian President Alan Garcia has proposed.

Garcia has branded the U.S. invasion ''brutal, excessive, exaggerated, abusive and arrogant'' and has refused to recognize Endara's government.

Also Tuesday, members of a political party that had backed Noriega, saying they are now the opposition to Endara's government, criticized the U.S. invasion.

In Lima, the Peruvian goverment said it would respond in kind to the expulsion but did not say how many Panamanian diplomats it would expel or when.

Peruvian Foreign Minister Guillermo Larco Cox said in Lima that the 12 Panamanians at the Peruvian Embassy in Panama City, including five top officials of Noriega's Panamanian Defense Forces and seven members of their families, ''may be in a precarious position.''

He said Peru would ask for the intervention of the Vatican's chief diplomat in Panama if the Endara government tries to prevent the 12 from leaving the country with Sandiga.

The papal nuncio, Juan Sebastian Laboa, gave refuge to Noriega for 10 days after he sought asylum at the Vatican Nunciature in Panama City on Christmas Eve. Noriega eventually surrendered to U.S. forces and was sent to Miami where he faces trial on drug trafficking charges.

Larco Cox said the Panamanian refugees must be allowed to leave the country under the terms of an agreement called the Caracas Convention, which states that people who have sought asylum in an embassy can leave with an expelled diplomat.

In an apparent reference to former Peruvian Ambassador Mario Castro Arenas who resigned in a dispute over Peru's policy toward Panama, Larco Cox said the Panamanian decision ''was instigated by someone who has moved to Panama, betraying his country.''

Castulovich said Sandiga had been asked to leave the country by Friday, but he said the Peruvian Embassy was operating and would not be closed.

The Panamanian government also has ordered its first secretary in its embassy in Peru to return to Panama, he said.

Peru recalled its ambassador to the United States, Cesar Atala, in the days following the U.S. invasion, and he has not yet returned to Washington, a spokesman at the Peruvian Embassy said Tuesday.

Castulovich also said the Panamanian government soon would decide the status of future relations with Cuba and Nicaragua, two foes of the United States.

The Cubans have been housing Noriega's wife, Felicidad, at their compound, as well as Noriega's three daughters, a son-in-law and a grandson.

A week after the invasion U.S. troops stormed into the home of Nicaragua's ambassador in Panama City, searching cupboards and closets before leaving with an apology. Nicaraguan President Daniel Ortega responded by ordering 20 top U.S. diplomats out of Managua.

In Washington, State Department spokesowman Margaret Tutwiler said the U.S. military forces in Panama were still checking cars going in and out of the Cuban mission in Panama, and the Cuban ambassador's car had been checked.

"The Cuban ambassador's car has very dark tinted windows which required those guarding the mission to open the doors to identify the passengers," she said.

Leaders of the Democratic Revolutionary Party, Panama's leading political party that backed Noriega, said it is now the civic opposition to the Endara government.

At party headquarters damaged in the military action, coordinator Ruben Dario Murgas criticized the U.S. invasion and urged U.S. troops to leave.

#90017u0354 01/17/1990 ~United Press International

(JAN. 17) UPI - New Washington Capitals Coach Terry Murray was not pleased with his team's performance Tuesday night, but he accepted the outcome.

''That's certainly not the way I want my team to play,'' said Murray of his first NHL victory, a 9-6 shootout triumph over the New Jersey Devils. ''We won't be doing that every night.''

The victory over the division-leading Devils ended the Capitals' eight-game winless streak and the nine goals were a season high for a team not noted for firepower.

''During the anthem, I just wanted to get it started,'' said Murray, who took over Monday after his brother Bryan was fired. ''Coming off the ice, I wanted to turn a couple of somersaults.''

But Murray was cringing early in the game when New Jersey took a 3-0 lead in the first 9:15 of the game when Ken Daneyko scored two goals and Janne Ojanen added one against goalie Don Beaupre, who was jeered by the hometown fans.

''I wasn't having much fun out there,'' Beaupre admitted. ''It's my job to keep us in it, and I wasn't doing it. I can't blame the fans, but Terry (Murray) never made any sign of pulling me.''

''I hesitated to make a lot of changes tonight, especially with Beaupre,'' Murray said. ''I have to show confidence in the players, but we made some mistakes, and we have to correct these things. This is a good starting point.''

Dino Ciccarelli broke the ice for Washington at 13:12 of the first, but John MacLean made it 4-1. Geoff Courtnall and John Tucker scored to close the gap to 4-3.

Steve Leach tied it for Washington at 1:47 of the second, then Michal Pivonka scored two second-period goals to put Washington ahead 6-4. After Kevin Hatcher made it 7-4, the teams traded goals, with Rob Browne and David Maley scoring for New Jersey and Bob Rouse and Courtnall for the Capitals.

Islanders 3, Canucks 0

At Uniondale, N.Y., Glenn Healy stopped 51 Vancouver shots to lead the Islanders to their seventh victory in a row. The Canucks have lost five straight games. The resurgent Islanders moved ahead of the idle New York Rangers into second place in the Patrick Division, two points behind New Jersey.

Penguins 4, Flyers 3

At Pittsburgh, Rob Brown scored two goals, Mario Lemieux extended his

scoring streak to 34 games and Paul Coffey became the 37th player in NHL history to record 900 or more career points. The Penguins have won 5 of 6 and Philadelphiafell to 0-4-3 in its last seven games and 2-9-3 in its last 14.

Flames 5, Blues 2

At St. Louis, Doug Gilmour snapped a tie with his 14th goal of the season, then added two assists and Calgary scored three goals in a span of 2:38 early in the second period to break open a close game.

Nordiques 8, Jets 6

At Winnipeg, Manitoba, Claude Loiselle had a goal and three assists, including an assist that set up the game-winning goal by Darin Kimble at 15:00 of the third period. Quebec snapped a ten-game road winless streak (0-9-1). Guy Lafleur scored his 12th goal of the season and added an assist for Quebec.

Red Wings 6, Oilers 4

At Edmonton, Alberta, Steve Yzerman's 31st and 32nd goals of the season paced Detroit to a come-from-behind victory. The Red Wings sharpshooter scored the winning goal at 39 seconds of the third period on an unassisted play after the Oilers turned the puck over behind their own net.

Sabres 4, Kings 2

At Inglewood, Calif., Phil Housley struck for a goal and two assists to spark Buffalo's three-goal outburst in the second period. Los Angeles is winless in seven games since New Year's Day, going 0-6-1 in that span.

-30- 3821

#90017u0356 01/17/1990 ~United Press International

LOS ANGELES (JAN. 17) UPI - Juan Ramon Matta Ballesteros contends he is a cattle rancher, tobacco farmer and philanthropist in Honduras who was abducted illegally by U.S. authorities and tortured for crimes he did not commit.

American prosecutors label him in court documents a drug billionaire who helped shift the flood of Colombian cocaine from Florida to Southern California and is perhaps the ''most significant narcotics trafficker in custody in the world to date.''

Matta was sentenced Tuesday to life in prison without chance of parole for operating an ongoing drug syndicate. U.S. District Judge Pamela Rymer, utilizing a federal law permitting life without parole for operators of a

continuing criminal enterprise, said she could not ''imagine what the (life prison term) was for, if not for this'' case.

Matta, convicted Sept. 6, also was sentenced to another 75 years on six other charges that included conspiracy and possession and distribution of narcotics involving almost 600 pounds of cocaine with a street value of more than $73 million.

If the charge of operating a continuing criminal enterprise is overturned on appeal, the 45-year-old Honduran businessman still will face the 75-year term on the other charges.

The drug ring run by Matta from outside the country was shattered in September 1981 when federal agents raided an apartment in suburban Van Nuys and seized 114 pounds of cocaine, $1.9 million in drug money and narcotics ledgers.

''The bottom line, it seems to me, is that this was the biggest cache of cocaine seized on the West Coast'' at the time, Rymer said.

Matta, described by his attorney as a religious man, sat quietly during the sentencing, occasionally casting an expressionless glance at his wife, who sat with relatives, including two of their five children.

He maintained his innocence to the judge and, in a statement read by his attorney, claimed, ''there is no direct evidence against me.'' He also repeated allegations that U.S. drug officials tortured him after his arrest.

''I myself realize the more serious crime is the one U.S. law enforcement agents have committed against my person in abducting me from my country and torturing me like an animal,'' Matta said.

Through his control of a drug empire worth up to $2 billion, Matta helped open new routes for narcotics through Honduras and Mexico, prosecutors said.

''He is a billionaire by virtue of almost two decades of narcotics trafficking,'' Assistant U.S. Attorney Manuel Medrano said in court documents.

The government says Matta was instrumental in persuading Colombian cocaine traffickers to shift many of their operations to Los Angeles in the early 1980s after stepped up law enforcement in southern Florida.

Matta's arrest at his home in Tegucigalpa, Honduras in April 1988 sparked anti-American riots by Hondurans who consider him a folk hero. Five people were killed and the U.S. Embassy was attacked.

Medrano said Matta is one of the world's top 10 cocaine traffickers.

''Colombian drug lords like defendant Matta have proceeded through narco-terrorism to pose a direct threat to the national security of Colombia and other governments,'' Medrano said in court document urging the life sentence.

But defense attorney Martin Stolar said Matta was made a ''scapegoat'' in the midst of the drug war hysteria.

During Matta's five-week trial, Stolar contended Matta made his living as a cattle rancher and tobacco farmer. Matta was also portrayed as a philanthropist and the single largest employer in Honduras.

Stolar argued that the case against Matta - who had never set foot in California prior to his arrest - hinged on one unreliable witness, an admitted former trafficker Stolar said lied to protect his standing in a federal witness protection program.

The witness, Hector Barona Becerra, testified he met Matta in Cali, Colombia, and agreed to fly several loads of cocaine for him to Miami via the Bahamas.

#90017u0358 01/17/1990 ~United Press International

(JAN. 17) UPI - A federal judge in Los Angeles Tuesday sentenced a man described as one of the world's top-10 drug lords to life in prison without the possibility of parole. Prosecutors recommended the stiff sentence for Juan Ramon Matta Ballesteros to illustrate the U-S resolve to win the war on drugs. Matta's arrest in Honduras in April 1988 sparked anti-American riots that left five people dead.

A bond hearing for a Panamanian military officer accused of taking part in Manuel Noriega's alleged cocaine trafficking operation will resume Wednesday in federal court in Miami. On Tuesday, the wife of Luis del Cid testified her husband should be freed on bail because he is- in her words- ''an enemy of violence.''

A-T-and-T says it was a logic error in its computer software that jammed long-distance phone service for nine hours Monday. But chairman Robert Allen says it remains to be seen whether the failure was caused by human or electronic error. Late in the day Tuesday, the company announced service was back to normal... but that the problem lingered and was expected to take several days to correct.

Police in Los Angeles say NO charges will be filed against the grandson of

an elderly woman severely mauled Tuesday by the man's two pitbulls. They say the man has asked that the animals be destroyed. Officials at County-U-S-C Medical Center say 70-year-old Lilly Marjee was in extremely grave condition after surgery... during which doctors amputated her left arm. Authorities don't know what triggered the attack, since the woman had previously gotten along with the dogs.

-30- 1771

#90017u0364 01/17/1990 ~United Press International

(JAN. 17) UPI - The doctor treating a five-year-old boy who spent 40 minutes submerged in an icy drainage reservoir has a poor chance of surviving without neurological damage. George Sader was listed in critical condition and comatose at a hospital in Fairfax, Virginia, Tuesday... one day after he fell through the ice and into the pond. Officials say the boy's family is keeping a vigil at his bedside.

First lady Barbara Bush says she supports women in combat if they are physically up to the task. In a wide-ranging interview Tuesday, the president's wife talked about her health, her life in the White House and the strains on her family. She also discussed a fashion newspaper's opinion that her English spaniel ''Millie'' was ''out'' this year. Apparently, Bush says, Millie is undisturbed by the bad publicity. In her words- ''I don't think she gives a darn.''

#90017u0374 01/17/1990 ~United Press International

HONOLULU (JAN. 17) UPI - U.S. Customs officers arrested a Japanese actor at Honolulu International Airport and charged him with possession of marijuana and cocaine, authorities said.

Toshio Okamura, 56, a popular samurai movie actor whose stage name is Shintaro Katsu, arrived at 7 a.m. (12 noon EST) on China Airlines flight 18, said Edward W. Logan, Special Agent in Charge of the U.S. Customs enforcement office in Hawaii.

Okamura - familiar to Japanese moviegoers as ''Zatoichi, the blind swordsman'' - was undergoing a routine customs process when an inspector decided to inspect him more closely, Logan said.

During a body pat-down, the inspector discovered the actor was carrying 9.75 grams of marijuana and 1.75 grams of cocaine in his underwear, Logan said.

Customs agents took Okamura into custody and advised him of his rights in Japanese.

At an afternoon hearing before U.S. Magistrate Daral Conklin at which his lawyer was present, Okamura was charged with felony counts of possession and importation of marijuana, Logan said.

''He elected to plead guilty to misdemeanor possession and was fined $1,000 and $350 in court costs, and turned over to the (U.S.) Immigration (and Naturalization) Service,'' Logan said.

Immigration officials were reportedly trying to decide whether Okamura should be deported.

#90017u0377 01/17/1990 ~United Press International

BOSTON (JAN. 17) UPI - The mayor and the media questioned each other about why the fatal stabbing of a white college student in a black neighborhood on Martin Luther King Jr.'s birthday took until Wednesday to make front-page headlines.

Full accounts of the slaying were not published in Boston newspapers until Wednesday morning because police - already under fire for their handling of the racially charged Carol Stuart murder investigation - did not provide any details about the victim's identity until early Tuesday.

Northeastern University sophomore Mark Belmore, 19, was returning from his girlfriend's dormitory around 12:25 a.m. Monday when he was attacked and stabbed 22 times barely a block from the campus, which borders the racially tense Roxbury neighborhood.

Investigators were searching Wednesday for four black teenagers who witnesses said fled the scene. The witnesses saw the victim attempting to flee and screaming for help during the apparent robbery and called police.

Mayor Raymond Flynn, who has been criticized by black community leaders enraged by his administration's response to the Oct. 23 murder of Stuart in Roxbury's Mission Hill neighborhood, said Tuesday, ''This terrible, reckless tragedy took place over 36 hours ago, and now it's finally being reported.''

''In one case you had almost seconds' response to the (Stuart) situation, and now you have nearly 30 somewhat hours later and the press is finally coming around to understand that a very senseless, reckless killing took place,'' Flynn said.

But reporters for several news organizations said police officials provided only sketchy details about the brutal stabbing until 1 a.m. Tuesday, hours after Flynn had paid a condolence visit to the victim's family home in Walpole.

The Boston Herald published a short article with basic information about the victim and attack on an inside page of Tuesday's final edition. The Boston Globe did not report the attack in detail until Wednesday, when both newspapers ran two front-page articles on the slaying.

A Globe assistant metropolitan editor said he was not told of the murder when he made routine calls to the police Monday.

The victim's father, John Belmore, identified the body at 9:30 p.m. Monday and a police spokesman said Belmore's name would not have been released before 11:30 p.m. Monday, when detectives filed their report.

Several news organizations, including United Press International, were provided the victim's identity and the suspects' race around 1 a.m. Tuesday.

Police said investigators had not established whether race was a motive in the deadly attack, but reportedly had called in the Community Disorders Unit to assist in the homicide investigation.

The mayor, however, said he was confident investigators would determine the assailants had robbed Belmore to get money for drugs. ''We'll probably find out the motive of this was drugs ... somebody needing the money to sustain a reckless drug habit,'' he said.

Karen Rigg, Northeastern's dean of students, said there was no indication the attack was racially motivated.

''We see it as a random attack,'' she said.

She said Belmore, a sophmore in the university's College of Criminal Justice, was not carrying any identification when he was attacked about a block from the campus police office.

The stabbing came as Boston's blacks seethed over the treatment of the Stuart slaying. The pregnant woman, a white lawyer from suburban Reading, was shot and killed and her husband wounded last Oct. 23. Her husband, Charles, told police they were abducted by a black gunman as they left a birthing class at a Boston hospital.

Police now believe, however, that Charles Stuart, who committed suicide Jan. 4, killed his wife and then shot himself as part of an elaborate ruse.

The startling revelation that the husband was the likely culprit stunned the city and outraged black community leaders, who claimed investigators and the media were blinded by racial prejudice. They also blasted police for controversial searches of the minority Mission Hill neighborhood where

the Stuart shootings occurred, about 1 mile from the Northeastern campus.

Several black activists also called for a weeklong boycott of the Globe and Herald starting on the King holiday because of the newspapers' initial focus on a black suspect in the Stuart case.

#90017u0405 01/17/1990 ~United Press International
BANGKOK, Thailand (JAN. 17) UPI - The Soviet Union has cut its naval and air force units stationed at the former U.S. military base at Cam Ranh Bay in Vietnam, intelligence sources said Wednesday.

''We have had credible reports that one squadron of MiG fighters and some submarines have been moved from Cam Ranh,'' said a military intelligence official who asked not to be identified. ''We are not sure, however, whether this trend will continue or whether the forces will be moved back later.''

The official declined to describe the exact changes, but the Nation newspaper Wednesday reported that 14 MiG jet fighters have been removed from Cam Ranh Bay, a base built by the United States during the Vietnam War. It said that some TU-16 bombers were expected to leave as well.

The International Herald Tribune this week reported that large Soviet warships were no longer based at Cam Ranh Bay, but that six TU-95 Bear long-range reconnaissance planes remained.

The intelligence official said the reduction in forces appeared tied to adjustments within the Soviet armed forces rather to than differences with Vietnam.

Vietnamese Foreign Minister Nguyen Co Thach last month told United Press International in an interview that the Soviet Union was reducing its presence at Cam Ranh Bay as part of a worldwide reduction in military forces intended to save money.

He said Vietnam had no objections to the Soviet withdrawal and insisted that Cam Ranh had never been a Soviet base - only a Vietnamese base where the Soviets were given facilities.

The move is expected to help improve relations between the Soviet Union and China, which has long been suspicious of the Soviet military presence in Vietnam.

A Thai government source said a Soviet envoy informed Thailand of the force movements last month, explaining they were meant to ease tensions in the region, not to pressure the United States to give up its bases in the Philippines.

Soviet President Mikhail Gorbachev once proposed that Soviet forces would leave Cam Ranh Bay if U.S. forces would abandon its two major bases in the

Philippines, Clark Air base and Subic Bay Naval Station.

U.S. officials declined the deal, saying the U.S. facilities were far superior and that a U.S. presence was required for stability in the region.

#90017u0407 01/17/1990 ~United Press International

(JAN. 17) UPI - Moist, warm air drifted into the Midwest Wednesday, keeping temperatures unseasonably high and generating more fog, while rain pelted the Pacific Coast and thunderstorms threatened the South, the National Weather Service said.

Thunderstorms from the Great Lakes moved all the way into the southern Plains, dropping up to 1 inch of rain, and snow fell in Minnesota, where temperatures dropped to the chilly teens.

More than 10,000 airline travelers in Chicago were delayed by fog that accompanied Tuesday's warm weather pattern in Illinois. A clerk at O'Hare International Airport's traffic control tower said more delays could be expected Wednesday.

''There's going to have to be a big push today to make up for yesterday,'' she said.

Weather forecasters said the fog, formed by a blast of warm air from the south drifting over frozen ground, would also be abundant on Wednesday.

Temperatures ranged from the 20s near the Great Lakes to the 30s in Wisconsin and the 50s in Kentucky and Missouri.

In a turnaround, the northwestern United States and the Rockies were expecting pleasant but cold weather, while more rain kept southern California, Nevada and Arizona wet.

A storm moved into southern California Tuesday, spreading rain into Orange and San Bernardino counties on the heels of a southward moving cold front. The NWS issued a snow advisory Wednesday in the Owens Valley, northern deserts and Southern California mountains, following a slight snowfall in the Los Angeles area. The snow level in the southern Sierra Nevada mountains was 2,000 to 3,000 feet.

Much of the South was enjoying almost spring-like weather because of a high-pressure system over the Carolinas, but clouds moved into the region, bringing some showers to Alabama and Mississippi. Early morning temperatures ranged from 41 at Knoxville, Tenn., to 58 in Atlanta and 73 in Miami.

Patches of dense fog formed over portions of Vermont and New Hampshire, reducing visibility and making travel difficult, the NWS said.

Patchy fog also drifted into eastern Pennsylvania, Delaware, south New Jersey and much of Maryland overnight where temperatures ranged in the mid 30s and 40s.

-30- 2397

#90017u0412 01/17/1990 ~United Press International

HONG KONG (JAN. 17) UPI - A Chinese-dominated panel drafting a future constitution for Hong Kong said Wednesday that top officials would be prevented from holding the right of abode in other nations after control of the territory reverts to Beijing in 1997, Radio Hong Kong reported.

Members of the Basic Law Drafting Committee, meeting in the southern Chinese city of Canton, said Hong Kong's post-1997 chief executive, principal officials and executive councilors would be required to hold right of abode soley in the territory, the radio report said.

The move, announced on the first day of meetings of a political subgroup of the drafting committee, stiffened a policy that required top officials in the post-1997 government to be Chinese nationals but did not prevent them from holding the right of abode in other countries.

Beijing earlier said it would consider all of Hong Kong's 5.7 million ethnic Chinese residents mainland nationals after 1997, even those who held foreign passports.

Hong Kong drafter Raymond Wu told reporters in Canton that Beijing imposed the new restrictions in response to a British plan that would grant up to 225,000 of the colony's residents full United Kingdom passports before 1997, the radio said.

London announced its nationality package in a bid to stem a confidence crisis in the colony that has seen tens of thousands of Hong Kong residents - mainly middle-class professionals - emigrating ahead of the transition.

Beijing charged the plan was subversive and accused Britain of violating the 1984 Sino-British Joint Declaration on Hong Kong by allowing much of the colony's top talent to leave.

China has steadily increased its hard-line approach to Hong Kong following mass support in the colony for the pro-democacy movement on the mainland, which was brutally crushed by Beijing in June.

China labeled as subversives the Hong Kong groups that led demonstrations

in support of democracy advocates, and Beijing warned it would not tolarate such activity after 1997.

The committee's nationality announcement came one day after British Foreign Secretary Douglas Hurd ended a four-day visit to Hong Kong, during which he called current Sino-British relations ''difficult'' and pledged support for democratic reform in the colony.

Hurd told reporters Tuesday many of the Hong Kong people he met during his visit said they were anxious about the colony's future under communist rule.

China has pledged Hong Kong could keep its free-wheeling capitalist system for 50 years after 1997, when Britain's 99-year lease on the colony expires.

-30- 2808

#90017u0427 01/17/1990 ~United Press International

GENEVA (JAN. 17) UPI - Democratic reforms sweeping Eastern Europe have revived Scouting in the region, the World Scout Bureau said Wednesday.

''For many years, the Scout movement has been banned in these countries because it was unacceptable to totalitarian regimes,'' the bureau said in its January newsletter.

Instead of Scouts, the World Scouting News said, there were single state-controlled organizations to which all children and youths had to belong.

''Now, however, attitudes are changing and Scouting is starting to re-emerge in Eastern Europe,'' it said.

The World Scout Bureau, which coordinates global scouting activities, said the revival is especially evident in Hungary.

''The Scout movement exists there legally once more,'' it said. ''About 100 Scout groups have already formed in the country.

''But after 40 years of legal prohibition, Hungarian Scouting has many obstacles to overcome, for example lack of publications, equipment and infrastructure.''

A World Scout Bureau spokesman said that since the newsletter went to press, the newly revived Hungarian Boy and Girl Scout Movement has formally asked for membership in the global association.

''Elsewhere in Eastern Europe, reports have been received confirming the

(revival) of Scouting in Poland, Czechoslovakia, Yugoslavia and even in some Soviet states,'' the newsletter said.

Last summer, it noted, members of the official Soviet ''pioneer'' youth organization attended Scout events in Nordic countries, one group went to Malta, and there was an exchange with British Scouts.

''Recently, a delegation from the United Kingdom Scout Association was invited to the Soviet Union for talks with the leaders of the Soviet youth organization,'' the report said.

''If other Eastern European countries follow the example of Hungary and grant the right of free association, then it may not be long before Scouting reaches a new population, young people to whom the Scout education has been inaccessible until now,'' it said.

''A meeting of European Scout associations, particularly those which have borders with Eastern European countries, is planned for next month to share information and to coordinate approaches and action.''

Promoting the revival of Scouting in the East will also be discussed in July at the 32nd World Scout Conference in Paris.

The Scout Movement was originally founded for boys in 1907 by Sir Robert Baden-Powell, a British general.

There are currently more than 16 million Scouts in 150 countries and territories, about 70 percent Boy Scouts and 30 percent Girl Scouts.

(JAN. 17) EDITORIAL SAMPLER:

THE SUN, BALTIMORE

Another turbulent weekend in the Soviet bloc found reformist communists retreating widely as popular unrest replaces early euphoria.

Mikhail Gorbachev hinted he will no longer insist on a Communist Party monopoly on power. Romania's government of national salvation, rattled by protests, first promised to outlaw the party, then announced it will put the question to referendum. East German's Hans Modrow, after holding firm for restructuring the hated secret police, did an about-face as demonstrators took to the streets.

Clearly, the great anti-communist revolution of 1989-to-19?? is entering a new phase.

... Trust and goodwill still exist in Poland and Hungary, where opposition groups had a decade to prepare for democratic takeover. In Czechoslovakia the sudden replacement of the Marxist regime with a democratic government permitted a remarkably polite upheaval.

But in Bulgaria reactionary nationalism is on the upsurge; in Romania the scent of blood hangs heavy, and in East Germany tenacious Communists are so obviously playing hardball that the population is rightly angry and suspicious.

The East German communists need special watching. Since the joyous opening of the Berlin Wall they have maneuvered to create a new security apparatus impeded disclosure of the criminality of the old Honecker regime ...

Control of the bureaucracy, the major agencies of government and the media has remained in communist hands.

... Thus mass demonstrations in Leipzig and East Berlin were needed to remind the communists of people power and to goad their democratic representatives to get tougher in roundtable talks.

USA TODAY

When it comes to teaching our children, we still have a lot to learn.

Secretary of Eduation Lauro Cavazos handed out a sorry report card for the public education system last week.

Despite seven years of education reform, students' dismal reading and writing skills have barely improved. Shockingly high numbers can't perform the least difficult writing tasks. Too many never read for pleasure.

We've raised teacher salaries and graduation requirements, but to no apparent effect. What went wrong?

Not as much as it might seem.

The gloom over woeful test results has overshadowed some hopeful glimmers.

Even though 9 and 17-year-olds read badly, they read better now than in 1971. And the gap in scores between black and white 17-year-olds narrowed from 51 to 20 points. Dropout rates have dropped, and basic skills are better.

That's where we've paid attention, and it's paid off. It's encouraging that we can succeed if we put our minds to it.

Not encouraging enough, though, to discourage some people from demanding that we give up on public schools. ...

But making all schools private would be undemocratic and undesirable. And it wouldn't work.

Equal access to education is crucial to a democracy. No marketplace could or would pay for it. That's what the ''public'' part gives us.

Now we need to work on the ''education'' part.

BANGOR (MAINE) DAILY NEWS

Many Americans still are blinking at the barrage of changes in Eastern Europe, wondering just how it snuck up on them. The nature of the surprise is pleasant, but the surprise is not. While the stirrings of democracy are good news, it should give this country pause that 40 years of history can take a U-turn that quickly. We never saw any signal.

The battle brewing in Azerbaijan presages nastier surprises. Vigilantes in that Soviet republic have made it their aim to wipe out the Armenian minority in a neighborhood called Nagorno-Karabakh. The 25 people killed last weekend are merely the latest victims in a feud that has simmered between the two peoples for decades. Religious, ethnic and national

differences provide unending fuel, and it will be all the Soviet Union can do to quell the trouble.

The eye easily passes over news from a place like Nagorno-Karabakh - the name is strange and the culture has few echoes here. That is why we will be surprised when a little flare-up in a place like Nagorno-Karabakh eventually ignites the entire region that stretches from India to Turkey.

Widespread ethnic war in central Asia is the dire prediction a few experts have been hurling into the wind for years now, and the events of 1989 alone are enough to give it credence. ...

The Soviets are becoming increasingly helpless to prevent these disturbances in their southern republics. And as Moslem Asians stand on the brink of becoming the U.S.S.R's largest population group, the ethnic Russians in power are becoming increasingly concerned that their greatest threat lies not in the West, but within their own borders.

(JAN. 17) UPI - EDITORIAL SAMPLER:

MILWAUKEE JOURNAL

What to do about the Social Security ''surplus'' is almost certain to be one of this year's livelier domestic issues, and it concerns just about everybody. The public should insist that the debate address questions of fairness as well as fiscal prudence.

President Bush reportedly will propose that the so-called surplus be applied to ''retirement of the national debt.'' Many members of Congress want to segregate the Social Security fund from the rest of the federal budget, so the fund can no longer be used to mask the budget deficit. And Sen. Daniel Moynihan (D-N.Y.) is pushing something entirely different: a cut in the Social Security payroll tax.

Before assessing the proposals, we would like to stress that the so-called surplus is not excess money. It's a reserve that is being built up by the Social Security fund to pay retirement benefits to the baby-boom generation 30 to 40 years hence. It can be likened to putting money in escrow.

This particular escrow, now totaling $168 billion, is invested in Treasury bills. (In effect, the government is borrowing it.) The reserve is expected to expand into trillions of dollars before the baby-boomers start drawing it down.

At the rate things are going, the Social Security fund may be large enough to offset the entire budget deficit a few years from now. That is the point at which Bush would like to start applying the annual Social Security surplus to the national debt.

In one sense, his plan is illusory: Although the government's external debt would be reduced, its indebtedness to the Social Security fund would be greatly increased. Still, that certainly would be better than increasing both forms of indebtedness, as the government is doing now. Having drawn down its external debt, the Treasury would be in better shape to finance - by new borrowing - the expected surge of retirement benefits in the 21st century.

CHICAGO SUN-TIMES

It's cross-your-fingers and hold-your-breath time again. For Mikhail Gorbachev. For Lithuania. For all of us. ...

Can Gorbachev really allow Lithuania to go its own way? Will he? Will his Kremlin colleagues (and critics and rivals) let him do such a thing?

An if Lithuania secedes, what about neighboring Latvia and Estonia, both also restive under the Soviet takeover hatched in a secret deal between Stalin and Hitler? What about Moldavia, Armenia, Azerbaijan, Georgia, and other Soviet republics already harboring similar sentiments?

For now, at least, Gorbachev has taken the unlikely stance of almost pleading with, imploring, the Lithuanians to remain a part of the Soviet Union.

He has also openly acknowledged that not only perestroika and his other reforms are at stake, but so is his personal future.

TULSA (OKLA.) WORLD

The changes in Eastern Europe are affecting other countries - such as Ethiopia.

Ethiopian strongman Mengistu Haile Mariam has been successfully fighting off rebel forces with the help of the Soviet Union, Cuba and East Germany. But as things change in Europe, Mengistu is being pressured by the Soviets to reform his country. The fact that rebel forces have made progress (one force seized a village only 70 miles north of the capital of Addis Ababa) also might hasten a decision by Mengistu and his communist benefactors.

The Ethiopian military has cost Moscow about $10 billion and wants more. The Soviets made a delivery of tanks and heavy artillery recently but did so with another strong plea to Mengistu to begin reforms in his

government. The Soviet Union has threatened to scrap its military agreement with Ethiopia when it expires in 1991. But can Mikhail Gorbachev wait even that long?

Cuba has pulled out the last of its military advisers and the new leadership in East Germany has canceled its ageement to provide weapons, training and security advice for the Ethiopian regime.

Mengistu still has a powerful and lethal weapon to use. Food. The 4 million people in rebel areas already are threatened by starvation. The latest uprising has made matters worse. The United Nations estimates it will take 700,000 tons of emergency food to avert a famine in the north. That food must go through Mengistu-controlled ports and over his roads. Starving a rebel army, and millions of others in the process, is not beneath Mengistu. He has done it before.

As great strides are being made toward democracy in parts of the world, there remain countries such as Ethiopia to remind us we still have a long way to go.

#90017u0484 01/17/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JAN. 17) UPI - A mob of blacks avenging a people's court decision to execute eight people raided a squalid township of Natal province, stabbing three people to death and setting fire to several houses, police and witnesses said Wednesday.

A police report issued in Pretoria said the deaths raised to nine the number of people killed in political unrest in the country in 24 hours.

The official report said ''a large mob'' attacked and stabbed to death three blacks in Willowfontein, an especially poor township outside the Natal city of Pietermaritzburg. It said ''serious damage'' was done to houses set ablaze.

Local residents contacted independently said Tuesday's killings followed the convening of a people's court Sunday that convicted eight blacks of murdering a youth the previous week.

The bodies of the eight put on trial were found Monday with stab wounds.

The attackers were not identified but residents blamed the incident and subsequent looting on troublemakers taking advantage of the continuing political conflict in the Natal midlands region that has left more than 1,600 dead in the past three years.

The bloody conflict stems in part from bitter divisions between supporters

of the two dominant black political forces in the area - the conservative Inkatha movement of Zulu leader Mangosuthu Buthelezi and the more radical United Democratic Front.

Residents described Willowfontein as a pro-UDF area.

Other deaths reported by police Wednesday included two black men and a youth shot and killed by unknown gunmen in the township of Kwamakutha, south of the Natal port city of Durban. Three other people were killed in separate incidents around the country within the past 24 hours.

No other details on the Kwamakutha killings were given in the police report - the only official source of information on political unrest since the government declared a state of emergency on June 12, 1986, to curb widespread anti-government rioting.

On Tuesday, Zambian President Kenneth Kaunda told former African National Congress Secretary-General Walter Sisulu and other ANC veterans recently released from prison in South Africa that leaders of the black-ruled states of southern Africa ''cannot hide our dismay'' over the Natal killings.

Efforts to mediate a settlement to the conflict have failed.

The outlawed ANC has led a struggle to topple the white-led minority government in South Africa.

#90017u0516 01/17/1990 ~United Press International

BANGKOK, THAILAND (JAN. 17) UPI - Favorable winds and Malaysia's policy of pushing refugees back out to sea are blamed for the rising tide of Vietnamese boat people reaching Thailand in the past two months, a senior Thai security official indicated Wednesday.

''More Vietnamese boat people entered Thailand at the end of last year because the monsoon season was over and perhaps because Malaysia forced them back to sea,'' said Sawasdi Daranon, a director of special affairs of the National Security Council.

Sawasdi declined to detail Malaysia's anti-refugee actions.

''We are neighboring countries, so we cannot talk too much,'' he said.

News reports, however, have said Malaysian officials routinely provide food and fuel to refugee boats and force them to leave shortly after they land.

The number of Vietnamese boat people reaching Thailand increased from 170 in October to 695 in November when the Malaysian push-off policy apparently started. Another 1,110 arrived in December, according to figures provided by the U.N. High Commissioner for Refugees.

The figures showed 5,198 Vietnamese boat people entered Thailand last year.

Sawasdi said despite the sharp increase, Thailand has no plans to follow Malaysia's example. He said, however, the boat people would not automatically be considered refugees because many are economic migrants fleeing Vietnam in search of a better standard of living.

He said Thailand would abide by agreements reached at a refugee conference in Geneva last June to screen all boat people to determine which are fleeing persecution and therefore deserve refugee status.

Sawasdi said the screening is proceeding under the observation of the UNHCR.

He said Thailand is optimistic that Vietnam would be willing to take back those people refused refugee status in accordance with the Geneva agreement.

That agreement, called the Comprehensive Plan of Action, was endorsed by more than 40 countries, including Vietnam.

''They (Vietnam) may be waiting to see what benefits they may receive from accepting repatriation - such as assistance for their economic reforms,'' said Sawasdi.

Sawasdi said thousands of Vietnamese boat people in Thailand are waiting for determination for refugee status.

''We (Thailand) will persuade those who are not qualified for asylum in the third countries to go back home,'' he said.

So far, however, only eight Vietnamese refugees have agreed to such voluntary repatriation.

Hong Kong recently stirred controversy by forcefully repatriating a group of Vietnamese it said were not political refugees.

#90017u0532 01/17/1990 ~United Press International

(JAN. 17) UPI - Around the World... Around the Clock... the latest news from UPI...

Police in Austin, Texas, say a Spanish-speaking man tried to hijack a jet to Cuba last night before being overwhelmed by authorities. The man claimed he was carrying a bomb. Police say he tied up a flight attendant on an America West 737 flying from Houston to Las Vegas. The plane landed in Austin... where the man was arrested.

Nicaraguan opposition leader Violeta Chamorro told one-thousand supporters in Managua to ignore rumors that her party is pulling out of the elections. Chamorro... returning from knee surgery in the United States... told U-S reporters that under NO circumstances would she support an invasion to remove Daniel Ortega from power.

First lady Barbara Bush has expressed an opinion on a controversial issue for a change. She told wire service reporters that she would support women in combat roles if they were physically up to the task. She says on emotional and mental levels... women are more than able to compete with men. But when asked about abortion, Mrs. Bush said ''nice try.''

Colombian police found and de-activated a car bomb apparently meant for a police chief. General Miguel Maza has escaped several attempts by cocaine traffickers to kill him with bombs. Colombian detectives found the half-ton of explosives in a home with instructions for using it on Maza.

Sheriff's police in McDowell County, West Virginia, say a picketing coal miner was killed during a small ''war'' at the site of a NON-union mine. The gunfire killed one picketer and wounded two others. But men operating the coal mine say that they were the ones fired upon.

#90017u0541 01/17/1990 ~United Press International

(JAN. 17) UPI - Police in Providence, Rhode Island, have arrested a 17-year-old Cambodian student for shooting two students at his high school. Police say the student was aiming at a white student who had's been harassing him. But he missed and hit the other two. Students and school officials say it's the latest clash between white and Asian students at the school.

American and Soviet military leaders are meeting in Vienna for UNprecedented closed-door talks with 35 nations. The Chairman of the U-S Joint Chiefs of Staff... Colin Powell... opened the informal talks by saying that ''the era of confrontation must end.'' Western and Eastern European countries are participating in the talks.

The University of Minnesota hospitals granted an 18-year-old Florida woman's wish to let her die so she could be with her sister. The twins suffered from a rare disease that also killed their older brother. Both twins received bone marrow transplants... but each of their bodies

rejected the transplants. Dawn Winfield died yesterday... two months after her sister.

Law students at the University of Panama are asking U-S troops to leave their campus... saying the troops violate the sovereignty of the campus. The Panamanian government has given a Peruvian diplomat three days to leave the country in response to Peru's refusal to recognize the new government.

A judge in Knoxville, Tennessee, has released an anti-abortion protester after a year spent in jail for for refusing to give his real name. The man identifies himself only as ''Baby John Doe One,'' which he says represents UNborn children killed in abortions. The judge fined the man 12-thousand dollars to cover his jail stay.

-30- 1877

#90017u0645 01/17/1990 ~United Press International

BUDAPEST, HUNGARY (JAN. 17) UPI - Japanese Prime Minister Toshiki Kaifu, calling Hungary the ''flagship of the reform process,'' said Wednesday Tokyo is prepared to offer aid above the $500 million loan package unveiled Tuesday.

Kaifu told a news conference he was convinced after his 11-day European visit that the economic and political reforms in the East Bloc are irreversible and the cold war has finally given way to a ''a new order in the world.''

''We are ready to offer assistance over and above the agreements we reached yesterday,'' Kaifu said, referring to the economic aid package unveiled Tuesday that includes $500 million in loans to help Hungary's transition to a market-based economy.

He announced that a delegation of Japanese businessmen would travel to Budapest in March to survey the state of the economy in Hungary, which he called ''the flagship of the reform process in Eastern Europe.

Kaifu, the first Japanese prime minister to visit Hungary, was scheduled to depart for Tokyo later in the day.

He arrived in Budapest late Monday after unveiling a massive aid package for Poland that eventually could total more than $1 billion.

Hungarian Prime Minister Miklos Nemeth hailed the visit by Kaifu as a ''milestone in the history of the two countries,'' and invited the Japanese to play a role in Hungary's economic reform program appropriate to Japan's stature in the world economy.

Nemeth told the news conference Hungary was not seeking handouts from Japan but rather ''support, advice and capital upon which we Hungarians can carry out the restructuring processes to revitalize the country's economy and to improve living standard.''

The $500 million in loans earmarked for Hungary will be provided through Japan's Export-Import Bank, Kaifu said Tuesday. Part of the money will be in the form of freely usable credits and some would be tied to credit allowances already extended to Hungary by the International Monetary Fund.

In addition, Tokyo has earmarked another $25 million over the next five years for training Hungarian and Polish managers, economists and environmentalists, he said.

''I have come to Hungary to make it clear to you that Japan, as well as a number of other countries, support your country's efforts and considers them to be heading in the right direction,'' Kaifu said in a speech after presenting the aid package to Hungarian leaders.

''We believe the Hungarian reform endeavors aimed at the creation of democracy and a market economy already have a firm basis,'' he said.

-30- 2784

#90017u0648 01/17/1990 ~United Press International

(JAN. 17) UPI - Soviet troops remain on patrol in Azerbaijan... all is NOT well in Eastern Europe... the space shuttle commander has a birthday in space...and Barbara Bush backs women in combat. Those stories and more, next from U-P-I.

A Soviet military commander in Azerbaijan says the ethnic fighting in the embattled republic ''can UNambiguously be called civil war.''

The Soviet parliament sent troops to quell the fighting that has left at least 56 people dead... but their efforts appear to be faltering.

Continued fighting has created thousands of refugees. The Soviet news agency Tass says about two-thousand Armenians fleeing attacks by Azerbaijani nationalists have been evacuated by ferry and plane since Sunday.

Radio Moscow says nationalists from the Azerbaijani Popular Front are blocking the airport and train station in the Azerbaijani capital of Baku to prevent Armenians from fleeing the city.

The new round of clashes between Azerbaijanis and Armenians is the worst ethnic strife since President Gorbachev assumed power in March 1985. The region is closed to Moscow-based foreign correspondents.

In Moscow, more than 300 Armenians stood in the snow in front of the Central Committee of Communist Party headquarters and screamed, ''Shame on Gorbachev.'' The protesters carried huge black banners saying, ''The slaughter of Armenians is on your conscience''... and, ''History will NOT forgive you Gorbachev.''

With two days to go before a scheduled landing in the Mojave desert... space shuttle Columbia astronauts have woken up to another day of picture-taking and experiments.

The crew transmitted television pictures back to Earth this morning featuring Lake Victoria... the Serengeti Plain and other landmarks of central Africa in a typically spectacular shuttle travelogue. The crew complained that Mount Kilimanjaro was covered with clouds. They also reported what they said appeared to be a big typhoon northwest of Australia.

Commander Daniel Brandenstein woke up to a rendition of ''Danny Boy'' in honor of his 47th birthday. Boston Celtics forward Larry Bird congratulated the crew on what he called their ''slam-dunk'' of the LDEF satellite last week.

Asked how old he was... Brandenstein said jokingly ''Didn't you know this was a classified mission?''

NASA forecasters expect good weather for Friday morning's scheduled landing. But the crew has enough food and supplies to stay up an extra few days if needed.

-30- 2675

#90017u0657 01/17/1990 ~United Press International

(JAN. 17) UPI - With the euophoria of their newly found freedoms abating... Eastern Europeans are waking up to the cold economic realities of democracy and capitalism.

In Poland, the Solidarity-led government is facing its biggest crisis since coming to power in June. More than 75-hundred coal miners are on strike... mostly over wages. However, officials say workers at some mines are pressing for the removal of corrupt managers and changes in working conditions.

In Romania, a fledgling free press criticized the interim government for giving in to the demands of a rowdy mob last week by issuing a quick decree outlawing the Communist Party. A newspaper condemned the capitulation... saying ''A government without justice is a great robbery.'' The Romanian government later said the decision would be put to

referendum.

The leader of Albania lashed out at neighboring Yugoslavia for spreading reports that Albanians are demonstrating against hard-line Communism. Albania is the last hard-line holdout in the reform-minded Eastern Europe.

And in Paris, organizers of a new European bank that's being established to help the struggling new East European governments says it will give priority to financing private sector projects. The bank will be funded by the United States, the Soviet Union and Western Europe.

First lady Barbara Bush says that if women can ''throw a hand grenade as far as a man''... then she's all for female troops in combat.

Mrs. Bush took the qualified stand on the issue in an interview yesterday with wire service reporters. She supported her position by saying women are ''mentally and emotionally more than able to compete with a man.''

The issue of women in combat came up after female U-S soldiers were involved where U-S troops exchanged gunfire with Panamanian Defense Forces.

Mrs. Bush took care to avoid other controversial issues. When asked for her views on abortion and gun control, she dismissed the questions by saying... ''Nice try, nice try. Let's get on.''

Reflecting on her first year as first lady, Mrs. Bush says she's surprised at how much she enjoys living in the White House. In her words... ''I NEVER dreamed that I would love it.''

Told that her popularity polls were even higher than her husband's... Mrs. Bush attributed it to NOT having to make tough decisions. She said ''I don't threaten anyone. I'm just a nice fat grandmother.''

-30- 2609

#90017u0674 01/17/1990 ~United Press International

(JAN. 17) UPI - The Chairman of the Senate Foreign Relations Committee... Claiborne Pell... told a Moscow audience today that countries should spend 15 percent of the money they save on the Cold War to protect the environment.

The Rhode Island Democrat spoke to the Global Forum, a gathering of more than 700 politicians, scientists and religious leaders.

He said that with East-West tensions easing and countries cutting their military budgets... money is being freed up to fight international environmental problems.

Pell said if the end of the Cold War cuts U-S defense spending 50 percent by the end of this century... as some predict... then setting aside 15 percent of the savings would quadruple U-S environmental funding to 22-BILLION dollars.

In prepared remarks... Pell said that arms control treaties should include environmental peace dividends.

A report says the number of murders in the nation's capital are already outpacing last year's rate.

A record 438 murders in Washington, D-C, last year earned that city the nickname of America's ''murder capital.'' The murders and investigations into charges that Mayor Marion Barry is a drug user have brought the nation's capital some of its worst publicity in years.

14 people have been killed since Friday. The report says the murder spree threatens to eclipse last year's January death toll of 52... the bloodiest month of 1989.

The rash of deaths since the weekend includes a high school athlete... three other teenagers and an automobile dealer. The most recent killing occurred Monday night... when a man was shot near an automatic bank teller.

25 people have been killed so far this year. Police say most of the homicides are drug-related. One over-worked homicide detective said police might as well ''surrender.''

-30- 1987

#90017u0682 01/17/1990 ~United Press International

STRINGTOWN, OK (JAN. 17) UPI - A prison inmate who took two hostages to protest his confinement released one of them Wednesday, an hour after talking with two state legislators, corrections officials said.

Otis Ray Vann, 39, who is serving a 15-year sentence for armed robbery, was believed armed with a razor blade when he took counselors Paul Williams and Nancy Boyd hostage Tuesday at the Mack Alford Correctional Center.

Vann released Williams, 48, at about 4 a.m. Wednesday, one hour after talks with Reps. Tommy Thomas and Gary Coffee. Boyd, 49, remained his prisoner.

Prison spokesman Derrel Altom said Vann expressed discontent with unspecified conditions of his confinement and told authorities he does not want to be turned over to the Texas prison system after completing his Oklahoma sentence.

Vann faces a life sentence in Texas for unauthorized use of a motor vehicle.

#90017u0693 01/17/1990 ~United Press International

BAGHDAD, Iraq (JAN. 17) UPI - A Red Cross chartered plane arrived Wednesday in Baghdad with 50 disabled and sick Iraqi prisoners of war released by Iran, the Gulf News Agency reported.

The agency, monitored in Kuwait, said the plane flew directly from Tehran to Baghdad and the prisoners were turned over to Iraqi authorities for medical check-ups by representatives of the International Red Cross.

Although Iran and Iraq, under the terms of a U.N.-brokered ceasefire, suspended fighting in the eight-year Gulf war in August 1988, 70,000 Iraqis and 30,000 Iranians are still in prisoner of war camps pending the signing of a comprehensive peace settlement.

An Iraqi Foreign Ministry official said Tuesday that Iraq would match the Iranian gesture and release 50 Iranian prisoners.

The Foreign Ministry official said the Iranian prisoners would probably be released Thursday andy would be handed over to the Red Cross for repatriation.

Iraqi President Saddam Hussein earlier this month proposed an immediate exchange of prisoners with Iran, particularly those who were disabled or wounded, as part of a peace initiative that also calls for direct talks between Iraqi and Iranian leaders in both Baghdad and Tehran.

Iran rejected the offer, saying talks could only be held after Iraq withdraws its troops from hundreds of square miles of Iranian border territory captured during the last stages of fighting in the Persian Gulf war.

#90017u0695 01/17/1990 ~United Press International

MELBOURNE, Australia (JAN. 17) UPI - John McEnroe, a crowd favorite among the 15,000 fans, registered his second successive rout Wednesday during the $3 million Australian Open and proclaimed himself ''tough to beat.''

The fourth-seeded American crushed Austrian Alex Antonitsch, 6-2, 6-1, 6-1 to gain the third round, and he now has lost a mere eight games in his first two matches. McEnroe, winner of seven Grand Slam championships, called this his best start ever in a Grand Slam event.

''It is a great start, I am playing well, my attitude is good and I am keeping my concentation,'' he said. ''I am going to be tough to beat.''

Defending champion Ivan Lendl also coasted, beating Thomas Carbonell of Spain, 6-4, 6-2, 6-3. Lendl next meets fellow Czechoslovakian Karel Novacek, who defeated Frenchman Eric Winogradsky, 6-4, 6-1, 4-6, 6-3.

The women's top seed, Steffi Graf, posted a 6-1, 6-2 victory over American teenager Erika De Lone in a second-round match. Graf has won seven of eight Grand Slam titles in the last two years.

In the two victories against Frenchman Thierry Tulasne and Antonitsch, McEnroe took the ball early and pushed both players onto the defensive throughout their brief center court appearances. At one stage, Antonitsch became so frustrated at McEnroe's guile that he resorted to serving under-arm.

McEnroe waved to the fans after his destruction of the 23-year-old Austrian and most of them stood and clapped him.

''It's a nice feeling and you feel it is worthwhile,'' said McEnroe, who has yet to win the Australian crown. ''I am at an age now where the next couple of years playing with a warm crowd behind you makes it really nice.''

The 30-year-old apologized for using the inevitable ''I'll take it one game at a time'' routine, explaining, ''I know it's a cliche but it's counter-productive to look past the next match. In the last two matches I keep telling myself I am better than these guys and this attitude can help me if I meet the top players.''

McEnroe has chosen not to play doubles in the Open this year.

''I believe at this stage it would be beneficial for me to play only in the singles,'' he said.

Austrian Thomas Muster, seeded 15th, earned a tough 0-6, 6-2, 3-6, 6-1, 6-3 victory over South African Christo van Rensburg in a second-round match that lasted 3 hours 45 minutes.

Muster said van Rensburg put him under early pressure with his backhand so he changed his tactics and attacked van Rensburg's forehand with high volleys.

''I rushed too much early, but I am in good shape physically and mentally. I knew I could last out a five-setter,'' said Muster, who faces Simon Youl of Australia in the third round.

Youl swept compatriot Brad Drewett out of big-time tennis Wednesday when he took a 6-4, 7-6 (7-3), 6-0 victory. Drewett, 31, never realized the potential he showed in his younger days and announced after the match he would not compete again in a major tournament.

Graf required 62 minutes to defeat De Lone, then spent some 13 minutes walking around the court to sign autographs and shake hands with her Australian fans.

''It was not as easy as the score suggested,'' Graf said. ''There were some good rallies, some good points, but I was disappointed I lost those two games in the second set.''

In other second-round action, American teenager Pete Sampras, who upset sixth-seeded Tim Mayotte in five sets Monday, struggled through another gruelling match before defeating Jordi Arrese of Spain, 0-6, 6-2, 3-6, 6-1 6-3. Sampras will meet Australian youngster Todd Woodbridge in the third round after Woodridge beat Italian Claudio Pistolesi, 6-3, 6-2, 6-2.

Sampras struggled to find his in a match played on an outside court in sunshine.

''I was asleep in the first set,'' the 18-year-old said. ''I am not an early morning person and I was somewhere else. My head wasn't in the match.''

Woodbridge defeated Sampras in the Wimbledon junior boys singles championships last year.

Leonardo Lavalle of Mexico had to forfeit his second-round match against West German Michael Stich when he wrenched his left ankle early in the third set with Stitch leading, 6-4, 6-4, 2-0. Trainer Rob Hannah said Lavalle had suffered a first-degree tear in the ankle.

WASHINGTON (JAN. 17) UPI - The nation's trade deficit widened to $10.5 billion in November, up from the $10.2 billion deficit the month before, the Commerce Department reported Wednesday.

Imports totaled $40.7 billion in November while exports reached $30.2 billion, the department said.

Analysts had expected the trade deficit for November to improve slightly to about $10 billion.

The value of imported goods purchased by Americans slipped $600 million in November to $40.7 million, down from a revised record-setting $41.3 billion in October.

Most of the change in imports reflected decreases in industrial supplies and materials, down $800 million; other merchandise, down $100 million and foods, feeds and beverages, which dropped by $100 million.

Imports of new foreign passenger cars and capital goods increased during the month and consumer goods imports remained unchanged, the department said.

Exports from the United States decreased by $800 million in November to $30.2 billion from $31 billion in October.

Exports of capital goods decreased in November by $1 billion, while industrial supply exports dropped by $200 million. Automobile and auto parts exports slipped by $100 million.

Export growth was noted in general merchandise, up $300 million; consumer goods, up $100 million and foods, feeds and beverages, up $100 million, the department said.

The trade deficit totaled $101 billion for the first 11 months of last year, an improvement from the $107 billion deficit during the same period last year. Department officials said the deficit is projected to reach $111 billion this year, compared with $118 billion last year.

The nation's trade deficit with Japan narrowed to $4.0 billion in November from October's record $4.9 billion. The deficit with Western Europe widened to $700 million, from October's $460 million.

The trade deficit with Canada, the United States' largest trading partner, widened to $1.2 billion, from $843 million in October.

Breaking out the trade report, exports of manufactured goods slipped $1.9 billion in November to $22.5 billion. Exports of airplanes, specialized industrial machinery, power generating manchinery and iron and steel mill produsts were among those that decreased during the month.

Among imported goods, decreases were noted in clothing and footwear, telecommunications equipment, toys, games and sporting goods. Imports increased for airplanes, new passenger cars and gem diamonds.

Imports of petroleum products remained stable at $4.4 billion in November, although the number of barrels of imported oil slipped to 253 million from 256 million the month before.

The average price of a barrel of imported oil increased by 24 cents in November to $17.33 from $17.09.

WASHINGTON (JAN. 17) UPI - Resolution of the strike against Boeing Co. helped push the nation's industrial production up 0.4 percent in December after a revised 0.3 percent gain in November, the Federal Reserve Board said Wednesday.

The Fed said the freezing weather throughout much of the nation last month caused a sharp rise in utility output. The cold weather also contributed to some production disruptions in the petroleum refining and construction supplies industries.

Aircraft production returned to normal levels following the settlement in late November of a strike against Boeing, one of the nation's major aircraft makers.

Overall, the index of total industrial output was 1.7 percent higher in December than the month before. The Fed said the fourth quarter, on average, saw little change in industrial production from the previous quarter.

Manufacturing output rose 0.2 percent in December and factory utilization edged downward to 83.1 percent, the Fed reported.

Production of consumer goods gained 0.6 percent during the month largely from a surge in electricity and gas output for residential use and an increase in the production of light trucks.

The Fed reported weakness in the production of home goods, mainly appliances.

Business equipment production rose sharply during December while manufacturing equipment production posted little change.

The production of construction supplies slipped 0.7 percent after making stong gains during the two previous months. The Fed attributed the decline in large part to the severe weather across much of the nation during December.

Materials production dropped 0.3 percent, which significant declines in the output of basic metals, coal mining, and parts for automobiles and other consumer durable goods.

TOKYO (JAN. 17) UPI - Japan's top automaker Toyota Motor Corp. said Wednesday it has signed a 10-year contract in Budapest to export 2,550 ambulances worth an estimated $53 million to Hungary.

It was Toyota's largest export deal with Hungary, executives said.

The Nagoya-based company said shipments would begin as soon as Hungary is ready to accept the vehicles, they said.

Toyota planned to export 200 to 300 units annually in the first five years and 250 units in the sixth year, the executives said.

Toyota exported only 55 passenger cars to Hungary in the January-November period of 1989 and 181 units in 1988.

#90017u0854 01/17/1990 ~United Press International
SAN ANTONIO (JAN. 17) UPI - A newly discovered human compound, similar to a toad poison long used by the Chinese to treat water retention, may help predict risk for salt-sensitive high blood pressure, researchers said Wednesday.

For centuries the dried skin of some toads has been used in the Orient to reduce excessive salt and water retention associated with dropsy. In the 1950s, scientists discovered the toad poison worked in much the same way as the plant compound found in digitalis, which is used to treat salt and water buildup in congestive heart failure.

University of Maryland researcher John Hamlyn last year identified a similar natural compound in humans, a substance he dubbed ''endogenous digitalis-like factor,'' or EDLF.

Finding EDLF in humans has opened up a wealth of possibilities regarding salt-sensitive hypertension, where blood pressure levels change in relation to salt intake, Hamlyn said.

About 30 percent of the estimated 60 million Americans with high blood pressure are thought to have the form of the disease aggravated by salt.

Hamlyn said EDLF may some day be used to predict who is likely to develop salt-sensitive hypertension because in animals, EDLF levels increase before blood pressure rises.

Hamylyn's team also found that while salt intake triggers salt-sensitive hypertension, it does not play a large role in maintaining higher blood pressures.

''The mechanism that keeps blood pressure up may be quite different from what started it,'' Hamlyn said. That may help explain why cutting salt from one's diet does not always bring down blood pressure.

Hamlyn said studies are also underway to learn how different levels of EDLF affect the body. For example, it is thought that hypertension may be a side effect of having too much EDLF in the circulation.

''There may be too little of this stuff in congestive heart failure and too much of the stuff in people with some form of salt-sensitive hypertension,'' Hamlyn told an American Heart Association seminar in San Antonio.

Learning how EDLF works could lead to new drugs that block the unwanted effects on the heart and blood pressure, while retaining the compound's benefits in regulating water and salt levels.

Hamlyn is working with the Upjohn Co., of Kalamazoo, Mich., to develop such drugs but he said it will probably be at least five years before such drugs could be tested in humans.

(JAN. 17) UPI - Police in Austin, Texas, say a hijacker was choking a flight attendent when they boarded the plane and subdued him last night. The man... believed to be Cuban... boarded the America West flight from Houston to Las Vegas... said he had a bomb... and demanded to be flown to Cuba. The pilot said he needed to stop for fuel in Austin. Police say the bomb turned out to be a pump-type toothpaste dispenser.

The American Telephone and Telegraph system failure that jammed long distance service Monday shed new light on the bare-knuckles fight for customers going on between A-T-and-T and its competition. A-T-and-T Chairman Robert Allen says before the size of the breakdown was determined... operators were instructed NOT to give out the access numbers for M-C-I, U-S-A Sprint or other long distance competitors.

Nicaraguan opposition leader Violeta Chamorro says reports of her death are greatly exaggerated. The leading opposition presidential candidate told one-thousand supporters in Managua that she's in the race to stay against President Daniel Ortega. Before leaving the United States where she was undergoing knee surgery... Chamorro told U-S reporters she would NOT support a U-S invasion to oust Ortega.

A Soviet General says there's civil war in the Republic of Azerbaijan. Two-thousand Christian Armenians have been evacuated from the territory to avoid violence by the Moslem majority. But Azerbaijanis have blocked the airport and train station in the capital of Baku to prevent any more Armenians from escaping.

Analysis By HELEN THOMAS

WASHINGTON (JAN. 17) UPI - President Bush is heading into his second year in office with all flags flying.

He sailed through the invasion of Panama with the bonus of a boost in the popularity polls, running 63 percent, according to USA Today.

And he has found a passivity in the public on many fronts that makes it possible for him to operate at his own pace with no pressure points.

The Democratic and Republican congressional leaders gave him almost unanimous backing for his Panamanian intervention. His new rapprochement to Soviet leader Mikhail Gorbachev also has cut the ground out from criticism of his go-slow, super-cautious attitude toward the dramatic changes in Eastern Europe.

After Panama, the president believes he has now quieted critics who called his policies timid.

On the other side of the coin, Latin American leaders are wondering whether he will continue a macho foreign policy, so they are biding their time and putting a little distance between their countries and the United States.

Oddly, he was given only a 25 percent approval rating in the same poll for his handling of the deficit problem.

There is no question where Bush's interests lie, much as he says he wants to be the ''education president,'' or the ''environmental president.''

His domestic focus is scattergun. Here today and gone tomorrow. There is no concentrated drumbeat that makes the priority issues all consuming.

His predecessor was in the same boat. He made the same speech on the domestic side of the ledger for eight years, blaming big federal government as the root of most of the evils, with the exception of national security.

But President Ronald Reagan could generate a lot of passion when he was talking up aid for the Nicaraguan rebels, called Contras. He even said in a White House speech, ''I am a Contra.''

Bush has put the spotlight on drugs and crime. But he has not used the bully pulpit as much as he perhaps could. It's not really his style. He is not a preacher, and he does not have the attention span to become positively identified with these issues.

He also is plumping for child care legislation and a cut in the capital gains tax, for which he is already beating the bushes with business groups. He has strayed from the non-confrontational fold a bit to brand those who oppose cuts in the capital gains tax as demagogues.

When he came into office his administration goals were described as ''status quo plus.'' Some new initiatives were taken in terms of the Clean Air Act and the anti-drug program.

But there were no major breakthroughs for the Bush agenda.

Despite the dynamic changes in Eastern and Central Europe, which inevitably will lead to more pressure to cut the defense budget, Bush is chiding those who ''naively'' want to reduce military spending at this time. He has said over and over again there will be ''no peace dividend.''

Presumably, any savings to come from Pentagon cuts will go toward reducing the deficit. Or will they?

The president has rejected any suggestion that some of the money might go to improving the nation's infrastructure, highways and bridges, sadly in need of repair, or for that matter, to tackling the social problems.

There is a plan afoot from the Transportation Department to let the states and localities carry the hod on raising revenue through user fees, or a tax by any other name.

The 1991 budget will run $1.2 trillion in federal spending. There will be moves to raise the gasoline tax. But in an election year that may be hard for the supporters to sell. The president also would probably veto such a move.

His ''read my lips'' no taxes message seems to be sticking. And the president is adamant on the subject.

Both the president and Congress will have to come to grips at some point on how to solve the social problems besetting the country. A ''thousand points of light'' will help but cannot put a dent in taking 3 million

homeless off the streets, providing low cost housing for the needy and care for the boarder babies.

#90017u0912 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - Simon and Garfunkel, the Who and the Kinks top this year's class of inductees to be officially added to the Rock 'n' Roll Hall of Fame Wednesday night.

Other acts being inducted are Hank Ballard and the Platters, the Four Tops Bobby Darin and the Four Seasons.

Named in the song-writing category were Gerry Goffin and Carole King, Brian Holland, Lamont Dozier, and Eddie Holland.

Being added to the Hall of Fame as ''early influences'' on rock were trumpeter Louis Armstrong, jazz guitarist Charlie Christian, and blues singer Ma Rainey.

The Hall of Fame has not yet been built in Cleveland and the induction ceremonies were scheduled at the Waldorf-Astoria Hotel in New York.

#90017u0922 01/17/1990 ~United Press International

ATHENS, GREECE (JAN. 17) UPI - Iranian spiritual leader Ayatollah Ali Khamenei said Wednesday Iran attaches ''great importance'' to the Islamic zeal of people in Soviet Azerbaijan, scores of whom swam an icy river to enter Iran recently.

The Islamic Republic News Agency, monitored in Athens, quoted Khamenei as saying of the Soviet Azerbaijanis: ''We attach great importance to their Islamic sentiments.''

Over the past two weeks IRNA and Tehran radio have reported that thousands of people assembled on the Soviet side of the Aras River to chant Islamic slogans. Scores swam across, some using inflated tires to reach the Iranian shore.

Khamenei, who is an ethnic Turk of Iranian Azerbaijani origin, said: ''It is a big mistake to think that ethnic and national motives are behind'' the moves by the Soviet Azerbaijanis to renew their links with Iran.

Azerbaijan was a province of the Persian Empire before it was divided in 1824 and the northern half annexed by Czarist Russia. Azerbaijanis on both sides of the border are Shiite Moslems.

Last year Iran and the Soviet Union signed an agreement to allow more freedom of cross-border trade and travel to people living in the frontier areas on both sides.

Between Dec. 31 and Jan. 2, Azerbaijanis on the Soviet side ran riot, tearing down 120 miles of barbed wire and smashing watch towers.

IRNA quoted the Iranian leader as saying that for the past 70 years the people of Azerbaijan had been ''forcefully kept away from Islam,'' and were ''once again showing their Islamic feelings.''

He ''urged the Soviet leaders not to make a wrong analysis of these sentiments, or take a ''harsh and improper attitude toward them.'' But he also praised Soviet leader Mikhail Gorbachev for revising the old policy.

IRNA said people continued to arrive on the Iranian shore of the Aras River Wednesday, using ''boats and other floating objects'' to get across. A group of 36 who arrived earlier returned home Tuesday, the news agency said.

The latest crossings, made despite a state of emergency in Soviet Azerbaijan, occurred at the Iranian town of Poldasht, some 450 miles northwest of Tehran.

Other crossings in the past two weeks have occurred at Jolfa, some 50 miles farther down the river.

IRNA said the latest arrivals at Poldasht were ''mainly put up at a stadium equipped with the necessary facilities.

A report on the Soviet state television in Baku said a high-ranking delegation of officials from the Soviet republic would visit Iran shortly for ''talks on mutual relations.''

The talks would center on finding ''ways of removing some unnecessary border regulations to facilitate exchange of tourists between the two countries,'' IRNA said.

#90017u0927 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - The Supreme Court ruled unanimously Wednesday that states can levy taxes on the sales of religious materials in a case involving the Jimmy Swaggart Ministries.

The court, in an opinion by Justice Sandra Day O'Connor, held that such taxes do not violate the First Amendment of the Constitution that guarantee freedom of religion.

O'Connor wrote that the ''collection and payment of the generally applicable tax in this case imposes no constitutionally significant burden on (Swaggart's) religious practices or beliefs.''

She added that the Constitution does not ''require the state to grant ... an exemption from its generally applicable sales and use tax.''

The case was closely watched by a variety of religious organizations who viewed such taxes as a threat to religious liberty. Groups such as the Watchtower Bible and Tract Society of New York, the International Society for Krishna Consciousness of California, the Evangelical Council for Financial Accountability and the Prison Fellowship filed legal papers in the case.

In the brief from the Evangelical Council, they warned that if the tax was upheld, ''the door will be wide open for over 7,000 taxing jurisdictions to impose a similar burden on national religious ministries throughout the country.''

The tax case was brought to the high court by Swaggart who was seeking review of rulings by California courts that upheld the taxes.

The case stems from a series of ''evangelistic crusades'' held in California during 1974 to 1981.

During those crusades, Jimmy Swaggart Ministries sold a variety of merchandise including religious books, records and tapes and such items as mugs, bowls, plates, pen and pencil sets, bud vases, communion cups, cadlesticks, a replica of a Roman coin, T-shirts and replicas of the Crown of Thorns and Ark of the Covenant.

In early 1980 the Board of Equalization of the State of California became aware of the sales and informed the Ministries there was no sales tax exemption for religious materials. The board eventually concluded the Ministries owed some $180,000 in sales taxes on nearly $2 million in sales made both in the state and through a mail order operation.

Swaggart Ministries paid the amount but brought suit seeking a refund charging the tax violated the free exercise clause of the First Amendment of the Constitution that there should be no laws prohibiting the free exercise of religion.

However, state courts upheld the tax.

Seeking high court review, Swaggart Ministries argued that ''religious liberty is indeed endangered if by having a religious crusade in California, the evangelists become subject to hundreds if not thousands of

taxing jurisdictions when it later distributes religious material by mail to California residents.''

They also assert, ''The evangelist's activity is not a commercial enterprise activity designed to make a profit, which inures to the benefit of any individual.''

Arguing against review, the state said the Swaggart appeal was ''full of misleading, inaccurate and incorrect statements.''

WASHINGTON (JAN. 17) UPI - More than 800 Chinese have been convicted and sentenced to prison in recent months for their involvement in last spring's student-led democracy movement, a published report said Wednesday.

The Washington Post reported that many of those imprisoned received 10-year sentences for divulging ''state secrets,'' disseminating ''counterrevolutionary propaganda'' or destroying state property.

Quoting ''well-placed Communist Party sources,'' the newspaper reported from Beijing the number of trials of alleged counterrevolutionaries is likely to exceed 1,000. An estimated 10,000 people were arrested following the pro-democracy uprisings, the Post reported.

Under Chinese law, counterrevolutionary crimes are so broadly defined that the state can imprison people for doing no more than criticizing the Communist Party or its leaders. Most trials appear to have been conducted in secret.

The sentencing disclosures are significant to the United States because the Bush administration is looking for signs that China is easing its crackdown on dissent. Beijing's lifting of martial law earlier this month is seen as a symbolic gesture, not a relaxation of its control of political activity.

In addition to those accused of counterrevolutionary crimes, an undetermined number of Chinese citizens remain detained without formal charges, the Post reported. Some detainees have been released, but new ones have been picked up.

A Western diplomat said while mass arrests such as occurred last summer are no longer conducted, Chinese sources report arrests of pro-democracy activists continue unannounced and unreported in the official press.

The government is anxious to minimize information about student detainees to avoid setting off a new wave of student protest. Some of those tried and sentenced recently were university students allegedly involved in last year's democracy demonstrations.

Throughout four decades of Communist Party rule, the Chinese leadership repeatedly has labeled dissidents ''counterrevolutionary,'' using massive purges and penal terms to suppress calls for political liberalization.

BUCHAREST, ROMANIA (JAN. 17) UPI - Another fledgling political party learning the ropes of democracy joined in a call Wednesday to delay elections planned for April to allow time for preparation and campaigning.

The request by the Romanian Democratic Party for more time from the interim leadership, the National Salvation Front, underscores the

difficulties of founding a democracy in a country accustomed to yielding to the will of one man, Nicolae Ceausescu, and his now-banned Communist Party.

Unless the ballot is postponed for five months to the end of September, new parties will not have time to campaign for support, said Democratic Party spokesman Nicolae Costel.

The National Peasant Party-Christian Democrat Party previously requested a delay but did not specify a new proposed date.

Like others among the handful of parties that have risen since Ceausescu was ousted Dec. 22, the agrarian-based party is struggling to set up offices, sign up members and learn how to campaign. Ceausescu and his wife Elena, were executed Christmas Day.

Rep. Chet Atkins, D-Mass., said during his six-day tour of Romania that aspiring leaders asked him how to run a campaign and journalists sought advice on covering an election.

Atkins said Dumitru Mazilu, vice president of the NSF council, was ''very open'' to delaying the election.

Government spokesman Aurel Dragos Munteaunu said Monday no firm decision had been made regarding the election date, and an agreement would be reached during discussions with other parties of the as-yet unwritten electoral law.

Atkins said he doubted the front would be organized in time to go ahead with plans for an April ballot.

The front is in an awkward position since it promised early elections and does not want to be seen as interfering with Romania's move toward democracy. It also plans to advance its own candidates this April, although leaders say the front will not register as an official party.

Democratic Party spokesman Costel called his organization ''a new party for a new country,'' patterned after Western European social democrats.

The school administrator apologized at a news conference for what he considered his unpolished style: ''We are not politicians. We do not have experience with the media.''

In two weeks of recruiting, the Democratic Party has about signed up about 4,500 members and established ''good connections'' in cities beyond Bucharest, Costel said.

While the Democrats will accept former members of the Communist Party, no

former leaders will be allowed to join.

''People must trust us,'' Costel said.

The RDP proposed a sweeping program of political, economic, social and religious reforms. Foremost on the list was a call for the Ministry of Defense to be run by civilians who are insulated from party whims.

The new president should be elected by ''a direct and secret vote,'' and his term limited to two four-year terms, Costel said.

Passports should be awarded to all citizens and exit visas should no longer be required, the party said.

The front already has said all people will be given passports and allowed to travel freely to neighboring countries although visas still will be required for other foreign nations.

Costel also called for an end to the violence in his country, and expressed horror at demonstrators' call at a rally Friday for the ''blood and death'' of former government rulers.

''Our party has totally condemned any call for revenge,'' he said.

To reward the younger generation, who paid the heaviest toll in the revolution, Costel suggested a plan of early pensions, with women retiring at 52 rather than 55 and men five years earlier at 57, which he said would free 600,000 jobs.

The Democrats advocate help for the country's half-million unemployed, and private ownership of land, building on a program already begun in which peasants are given plots of land.

Easter and Christmas should be declared holidays and an ecumenical service broadcast from the national cathedral, Costel said.

BEIJING (JAN. 17) UPI - Former U.S. Federal Reserve Chairman Paul Volcker called on China Wednesday to open its economy to the outside world, saying international economic cooperation is "irrelevant if you have a closed economy."

Volcker spoke at a news briefing after a three-day conference among international central bankers in Beijing, hosted by the Chinese central bank and sponsored by the International Monetary Fund and the United Nations Development Program.

The conference emphasized the increasing assistance China has sought from the international community as it grapples with an economic retrenchment program designed to trim high inflation and other unwanted results of its free-market economic reforms.

The government is pursuing an austerity drive that has hurt industrial production and increased unemployment, but released a lengthy policy document Tuesday indicating the retrenchment would continue for at least three years.

The drive has been complicated by the suspension of foreign lending and declines in investment and trade following the crackdown last spring on the pro-democracy movement. Chinese leaders have since stalled many of the past decade's free-enterprise reforms.

Asked about a resumption of international economic cooperation, Volcker, the former Federal Reserve chairman and now a professor at Princeton University, said, "International cooperation is irrelevant if you have a closed economy."

"The Chinese economy is more open than on my last visit here ten years ago.," he acknowledged. "Where China goes is of course a Chinese decision. But in another ten years I would hope we see further opening, and more opportunities for economic cooperation."

The bankers, including Miguel Mancera, Mexico's central bank governor, and Richard Erb, deputy managing director of the IMF, said in a statement they had agreed on the need for a strong central bank with autonomy in monetary policy from other government agencies.

China's central bank, the People's Bank of China, has often faced criticism that it is too pliable to the demands of finance officials and regional governments for looser credit and other policies that fuel inflation.

Chen Yuan, deputy governor of the Chinese central bank, told reporters the austerity program had since it began in late 1988 trimmed inflation to an estimated 18 percent in 1989, from nearly 30 percent in 1988. Most of the 1989 inflation was the result of carryover from the previous year, he added.

Chen said one of the most controversial economic reforms, allowing prices to be set by market forces instead of by the state at artificially low rates, had not been dropped but that the government now is emphasizing stability.

"We have to maintain price stability" during the retrenchment, Chen said. "However, this does not mean we will give up price reform. We haven't

stopped price reform completely."
